Preface ............................................................................................................................ 13
Technical Note ................................................................................................................ 19

Chapter One: A General Introduction: On Becoming a Buddha

1. Introductory Remarks ............................................................................................... 21
2. Buddhology .................................................................................................................. 22
3. Buddhist Soteriology ............................................................................................... 30
   (a) *Emic* and *Etic* Perceptions of Buddhism .................................................. 30
   (b) The Fundamental Features of Buddhist Soteriology ..................................... 33
   (c) The Mahāyāna Perception of the Quintessence of Buddhist Teachings .......... 35
   (d) Buddhist Soteriological Models and Goals ................................................... 36
   (e) Two Mahāyāna Soteriological Models of Becoming a *Buddha* .................. 38
4. Ontology .................................................................................................................. 41
5. Buddhist Epistemology and Gnoseology ............................................................... 43
6. Buddhist Axiology .................................................................................................... 45
   (a) The Three-Vow Scheme .................................................................................. 45
   (b) Comparing and Contrasting the Three Vows ................................................. 47
7. Concluding Remarks ............................................................................................... 56

Chapter Two: Previous Studies on *Bodhicitta*

1. Introductory Remarks ............................................................................................. 57
2. The Early Western Knowledge of *Bodhicitta*........................................................ 58
3. Monographs on the Study of *Bodhicitta* .............................................................. 59
   (a) Taishū Tagami (1990). .................................................................................... 59
   (b) Francis Brassard (2000). ................................................................................ 60
4. Articles on *Bodhicitta* ........................................................................................... 61
   (a) Kumatarō Kawada (1965). ............................................................................ 61
   (b) Lal Mani Joshi (1971). .................................................................................. 62
   (c) S. K. Nanayakkara (1971). ......................................................................... 62
   (d) Lobsang Dargay (1981). .............................................................................. 63
   (e) Gareth Sparham (1987). ............................................................................... 63
   (f) Gareth Sparham (1992). ............................................................................... 64
5. Studies on *Bodhicitta* in Specific Canonical Works ............................................... 65
6. On Translating the Term *Bodhicitta* .................................................................... 69
7. A Study of *Bodhicitta*: Still a Desideratum ......................................................... 70
8. Concluding Remarks ............................................................................................... 71
Chapter Three: The Historical and Doctrinal Background of the Bodhicitta Concept

1. Introductory Remarks ................................................................. 73
2. Bodhicitta as a Means of Compensating for the Loss of the Historical Buddha .... 74
3. The Doctrinal Foundations of Bodhicitta in Early Buddhism .................. 77
   (a) A Buddha as a Discoverer and Proclaimer of the True Reality .......... 77
   (b) The Plurality of Buddhas and Bodhisattvas in Early Buddhism .... 79
   (c) The Concept of the Resolve Made by Previous Buddhas ............... 80
   (d) The Altruism of the Historical Buddha ...................................... 82
   (e) Altruism in Early Buddhism ................................................... 84
   (f) Prerequisites for Becoming a Buddha in Early Buddhism ............... 86
   (g) The ‘Golden Rule’ in Early Buddhism ......................................... 87
4. Concluding Remarks .................................................................. 89

Chapter Four: The Buddha’s First Resolve to Become a Buddha

1. Introductory Remarks ............................................................... 91
2. The Historical Buddha as One of Many and Yet One of a Kind ....... 92
3. Three Events Marking the Career of the Buddha ......................... 92
   (a) The First Event: The Initial Resolve to Become a Buddha ............ 94
      (i) Attempts to Resolve the Illogicality of Several ‘First Times’ ...... 98
      (ii) Was the Historical Bodhisattva ‘King-Like’ or ‘Herdsman-Like’ ? 99
   (b) The Second Event: Striving to Become a Buddha .............. 100
   (c) The Third Event: The Time and Place of the Buddha’s Awakening .. 102
4. A Historical Sketch of the Buddha’s Initial Resolve to Become a Buddha .. 104
5. Concluding Remarks ...................................................................... 105

Chapter Five: Mahāyāna, Bodhisattva, and Bodhicitta

1. Introductory Remarks ................................................................... 107
2. The Concepts of Yāna in Buddhism ............................................... 109
   (a) The Various Models of Yāna ....................................................... 110
      (i) The One-Vehicle Model ......................................................... 111
      (ii) The Two-Vehicle Model ....................................................... 112
      (iii) The Three-Vehicle Model .................................................... 113
      (iv) The Four-Vehicle Model ..................................................... 115
      (v) The Five-Vehicle Model ..................................................... 116
      (vi) The Nine-Vehicle Model ................................................... 117
      (vii) The n-Vehicle Model ...................................................... 118
      (viii) The No-Vehicle Model .................................................... 119
   (b) Which Vehicles Are Buddhist? .................................................... 120
   (c) Mahāyāna ................................................................................ 121
      (i) Dissent on the Origin of Mahāyāna ........................................ 121
      (ii) The Content of Mahāyāna .................................................... 122
3. The Concepts of Sattva and Bodhisattva ....................................... 126
   (a) No Bodhisattvas without Sattvas ............................................. 127
   (b) Faith-oriented and Reason-oriented Sentient Beings .................. 128
   (c) The Term Bodhisattva ............................................................ 129
   (d) Synonyms of Bodhisattva ....................................................... 133
   (e) Types of Bodhisattvas ............................................................. 134
      (i) Historical, Celestial, and Earthly Bodhisattvas ................. 135
Chapter Six: The Two Bodhicittotpāda Traditions

1. Introductory Remarks................................................................. 169
2. The Two Bodhicittotpāda Traditions.................................................. 170
3. Tibetan Assessments of the Two Bodhicittotpāda Traditions......................... 172
4. The Names of the Two Bodhicittotpāda Traditions................................ 173
5. The Two Bodhicittotpāda Traditions: The Basis of the Distinctions..................... 175
6. The Two Bodhicittotpāda Traditions: Personal Authorities.............................. 175
7. The Two Bodhicittotpāda Traditions: Scriptural Authorities......................... 176
8. The Historical Background of the Bodhicittotpāda Ritual................................ 177
9. What Is Actually Generated by the Ritual?.................................................. 180
10. The Optionality of an Officiant in the Two Traditions............................ 181
11. Qualifications for Officiants in the Two Traditions.................................... 182
12. The Eligibility of Candidates in the Two Traditions................................ 183
13. The Preparatory Procedures of the Bodhicittotpāda Ritual............................. 186
14. The Main Procedures of the Bodhicittotpāda Ritual.................................... 187
15. The Concluding Procedures of the Bodhicittotpāda Ritual............................ 188
16. Observances and Offences in the Two Traditions....................................... 188
16. (a) The Cardinal Transgressions in the Mañjuśrī-ñāgārjuna Tradition............. 189
16. (b) The Cardinal Transgressions in the Maitreya-Asaṅga Tradition................ 191
16. (c) The Minor Offences in the Two Traditions............................................ 192
17. Reestablishing a Broken Vow in the Two Traditions..................................... 193
18. Concluding Remarks............................................................................. 194

Chapter Seven: A Typology of Bodhicitta

1. Introductory Remarks......................................................................... 195
2. An Overview of the Five Types of Bodhicitta........................................... 196
3. Ethico-Spiritual Bodhicitta.................................................................. 197
4. Gnoeological Bodhicitta...................................................................... 198
4. (a) What Gnoeological Bodhicitta Is......................................................... 198
4. (b) Some Synonyms of Gnoeological Bodhicitta........................................ 198
4. (c) Some Salient Features of Gnoeological Bodhicitta................................. 199
4. (d) Who Possesses Gnoeological Bodhicitta?............................................. 201
4. (e) Gnosis as Abiding in the Body............................................................. 202
Chapter Eight: Traditional Classifications of Bodhicitta

1. Introductory Remarks ................................................................. 235

2. Bodhicitta as a Fusion of Śūnyatā/Prajñā and Karunā/Upāya .... 235
   (a) The Term Śūnyatākarunāgārathma ........................................... 236
   (b) The Term Śūnyatākarunābhīma ................................................ 238
   (c) The Importance of Upāya and Prajñā .................................... 239
   (d) Tension between the Two Poles of Emptiness and Compassion .... 243
   (e) Union of Emptiness and Compassion: A Tibetan Controversy .... 245
   (f) Three Positions on the Fusion of Śūnyatā/Prajñā and Karunā/Upāya 245

3. Subclassifying Bodhicitta into Pratisthānicitta and Prasādhibhāva ... 246
   (a) The Locus Classicus of the Classification .................................. 246
   (b) The Possible Historical Development of the Subclassification .... 248
   (c) The Pervasiveness of the Classification .................................. 248
   (d) Distinctions, Interpretations, and Controversies ...................... 249

4. Subclassifying Bodhicitta into Conventional and Absolute ........ 251
   (a) Two Strands of the Conventional-Absolute Classification .......... 252
   (b) Textual Sources of the Conventional-Absolute Classification ...... 253
   (c) The Relative Chronology of the Conventional-Absolute Classification 255
   (d) Two Different Perceptions of Conventional and Absolute Bodhicitta 256
   (e) Can Absolute Bodhicitta be Generated Ritualy? A Tibetan Controversy ... 258

5. Leading to the Goal and Not Leading to the Goal ...................... 261

6. A Stable One and an Unstable One ............................................... 262

7. Twofold Classifications of Cittotpāda in the Viniścayasamgrahani ... 263
   (a) Samādānasāmketika and Dharmaśpratilambhika ........................... 263
   (b) The One That Is Uncertain and the One That Is Certain ............... 264
   (c) The One That Is Impure and the One That Is Pure ........................ 264
   (d) The One That Is Weak and the One That Is Strong ..................... 265
   (e) The One That Has Yielded the Ultimate Result and the One That Has Not Yet ... 265

8. Undistinguished and Distinguished Cittotpāda ............................. 266

9. The One Characterised by Karunā and the One Characterised by Prajñā 266

Preface

Obeisance to bodhicitta,
That which averts all bad destinies,
Shows the way to good destinies,
And leads [one] to [a state where there is] no aging and dying.

– Maitreyaparipṛcchāsūtra¹

My interest in Buddhism goes back to my high school days when I was introduced to a Bhutanese commentary on a small text popularly known by its abbreviated title rGyal sras lag len (‘Deeds of a Bodhisattva’). The basic text was authored by the Tibetan scholar dNgul-chu Thogs-med-bzang-po (1295–1369), who is believed to have been the incarnation of the Indian teacher Asaṅga. The commentary by the Bhutanese scholar mGon-po-bstan-'dzin, written in a very elegant rDzong-kha (the national language of Bhutan), was prescribed, however, as a textbook on the Bhutanese language, not on Buddhism. The theme of these texts, the bodhisattva ideals, fascinated me, so much so that it became increasingly clear that what I wanted to study after my high school graduation was Buddhist philosophy (in the broadest sense of the term).

Given the poor prospects back then of pursuing an academic study of Buddhism in Bhutan, the only viable alternative seemed to be to go to India. In the olden days, Tibetans travelled to India and Bhutanese to Tibet to study Buddhism, both of which were precarious undertakings. Ironically, Tibet’s tragedy enabled Bhutanese like myself easy and unrestricted access to the intellectual world of Tibet. The Tibetan Buddhist monastic seminaries that made this possible for me is my traditional alma mater, Ngagyur Nyingma Institute (NNI), a stronghold of rNying-ma academia at Bylakuppe (Mysore District, Karnataka State, South India). It was established and is still being administered by His Holiness Padma-nor-bu (or simply Pad-nor) Rin-po-che (b. 1932), one of the leading rNying-ma masters of our time. My study in India would not have been possible had it not been for His Excellency Jigme Thinley, the then director general of the Department of Education, Ministry of Social Services, Royal Government of Bhutan, who in 1987 granted me a Government scholarship to study Buddhism at the Ngagyur Nyingma Institute. Until this day, I remain grateful to the

¹ Maitreyaparipṛcchāsūtra (T, fol. 195a4–5; D, fol. 114a4–5):

\[\text{ngan 'gro thams cad zlog bgyid cing ||}
\text{mtho ris lam ni rab ston la ||}
\text{rga shi med par 'dren bgyid pa ||}
\text{byang chub sms la phyag 'tshal lo ||}.\]
Bhutanese Government and His Excellency Jigme Thinley, who is currently the minister of Home and Cultural Affairs.

I have incurred an unrepayable debt to Pad-nor Rin-po-che, who, in his infinite graciousness and compassion, allowed unrestricted access to the spiritual, intellectual, and material resources that abound in the monastic academy founded by him in 1978. I am also indebted to my astute and compassionate teachers at the NNI including mKhan-po Padmashes-rab, mKhan-po rNam-grol-tshe-ring, mKhan-po Tshe-dbang-rgya-mtsho (alias mKhan-po Gu-ru), mKhan-po dBang phyug-bsod-nams, mKhan-po Tshe-ring-rdo-rje, mKhan-po 'Jam-dbyangs-tshe-ring (alias mKhan-po Kätâyana), mKhan-po 'Jigs-med-skal-bzang, mKhan-po bKra shis-tshe-ring (alias mKhan-po Nub-ri), mKhan-po Padma chos-phel (alias mKhan-po Ajita), mKhan-po Sangs-rgyas-rang-byung, mKhan-po rDo rje-dpal-bzang, mKhan-po Kun bzang-bde-chen, and others who have been instrumental in introducing me to the major Indian treatises translated into Tibetan, centring on Vinaya, Abhidharma, Pramâna, Yogâcara, Madhyamaka, Pratîyapâramîtâ, Tathâgatagarbha, and Tantra, together with their Tibetan commentaries, and a wide range of other traditional fields of knowledge and texts of different literary genres. My gratefulness also extends to His Holiness the Dalai Lama, mKhan-po 'Jigs-med-phun tshogs (1933–2004), sMyo shu mKhan-po (1931–1999), Mes mes Bla ma bSmad-bams-bzang-po (1892–1983), sTag lung rTse sprul Rin po che, sMin gling Khri chen, gDung sras Phrin las nor bu, and Bla ma Ser po, from whom I have had the fortune to occasionally receive initiations, teachings, or transmissions, and with whom I could establish the so-called 'Dharma connection' (chos brel).

I cannot help looking back with a sense of joy and gratitude at my friends, colleagues, and students from monastic academia, too numerous to mention by name, who made my indulgence in the arts of exposition, disputation, and composition a stimulating, enriching, and memorable experience. I take this opportunity to thank dGa rabs Rin po che, sPrul sku 'Jam dpal, Karma sku chen Rin po che, Gyang khang sPrul sku, Rags mgo mChog sprul, sMin gling mKhan chen, sMin gling gDung sras, Sher pa sPrul sku, Zhi ba sPrul sku, among other incarnate masters, for their friendship and inspiration. I also owe thanks to my friends and colleagues at the NNI, most of whom now live or work in widely different parts of the world—including Byang sems bKra shis, Lung bstan srgya mtsho (Lungtaen Gyatso, who is currently the principal of the Institute of Language and Cultural Studies, Royal University of Bhutan), mKhan po bsTan dzin nor rgyas (the current Ram sbyar Bla ma), mKhan po Sangs srgyas dbang dus, mKhan po 'Gyur med kun bzang bstan dzin, mKhan po mKhyen brtse dpal Idan, mKhan po bsKang bzang yi ma, mKhan po ra tsa mgrin sri thub, Shing khar Bla ma dNgos grub, Dr. Karma Phuntsho (now a Spalding Fellow, Cambridge), Slob dpon Phrin las rdo rje (Thinley Dorjee), Slob dpon Klong yangs seng ge, and Bla ma Byang chub rdo rje—for their help and friendship.

Just as my desire to study Buddhist philosophy took me to India, so too did my desire to trace the Indian roots of Tibetan Buddhism bring me to the University of Hamburg, Germany, in 1997. In the course of my ten-year interaction in the NNI with Tibetan Buddhism, it became increasingly clear to me that the best way to deepen my understanding of this subject is to read the original Indian Buddhist texts in Sanskrit (from which most Tibetan translations were made) and to analyse Buddhist ideas by employing Western academic approaches. The road to Western academia has been, however, by no means smooth. Nonetheless, the kindness and assistance of several key individuals made my studies in Germany possible. First and foremost is Prof. Dr. Lambert Schmithausen (now Professor emeritus), my Doktorvater, without whose support I in all likelihood would not have had the privilege to study in Hamburg in the first place. My gratitude to him is profound for his having accepted me as his student, for guiding me, and for helping me to surmount a series of seemingly insurmountable bureaucratic hurdles. I feel honoured to be the last doctoral student of this legendary Buddhologist.
I am also indebted to Prof. Dr. David Jackson who supported me in various ways, among others by enabling me to teach the Tibetan language and Tibetan Buddhism at the University of Hamburg from early on, and for being my second supervisor for both the M.A. and Ph.D. degrees. Moreover, I express my gratitude to Prof. Dr. Harunaga Isaacson (University of Hamburg) for his support and guidance, and to Prof. Dr. Michael Friedrich (University of Hamburg) and Dr. Martin Delhey (University of Hamburg) for their invaluable suggestions.

I should also like to take this opportunity to thank a number of other persons for rendering their help in different ways: Prof. Dr. Albrecht Wezler (Professor emeritus), Prof. Dr. Katsumi Mimaki (University of Kyoto), Prof. Dr. Florin Deleanu and Prof. Dr. Hubert Durt (both of the International College for Postgraduate Buddhist Studies, Tokyo), Prof. Dr. Karin Preisendanz (University of Vienna), Dr. Anne MacDonald (University of Vienna), Dr. Felix Erb (University of Hamburg), Prof. Dr. Tatiana Oranskaia (University of Hamburg), Prof. Dr. Michael Zimmermann (Stanford University), Mr. Burkhard Quessel (British Library, London), Dr. Mudagamuwe Matiririmurthi (University of Heidelberg), PD Dr. Klaus-Dieter Mathes (University of Hamburg), Prof. Dr. Jan-Ulrich Sobisch (University of Copenhagen), Dr. Kazuo Kano (University of Kyoto/Hamburg), Dr. Achim Beyer (previously at the University of Hamburg), Dr. Barbara Schuler (University of Hamburg), and Ms. Ayako Nakamura (Ph.D. candidate, University of Hamburg). My thanks also go to the other staff and students at the Department of Indian and Tibetan Studies, Asia-Africa Institute, University of Hamburg, for their encouragement.

I am also grateful to Philip Pierce, who despite having a long waiting list of editorial work, not only corrected my English but also made valuable comments and suggestions pertaining to content, which often made me rethink, refine, or reformulate my thoughts. I also express my thanks to Prof. Dr. Junkichi Imanishi (Director, International Institute for Buddhist Studies, Tokyo) and Mr. Shin’ichiro Hori (Acting Director, International Institute for Buddhist Studies, Tokyo) and other members of the Steering Committee including Prof. Dr. Florin Deleanu and Prof. Dr. Hubert Durt for consenting to publish this book, a slightly revised and reorganised version of my dissertation, in the Studia Philologica Buddhica Monograph Series. Above all, I am indebted to my wife Dr. Orna Almogi (University of Hamburg) for standing by me in all walks of life, both academic and non-academic, and for being my first and foremost critic. My thanks are due also to relatives and friends in Bhutan, particularly to my brother bSod-nams-phun-tshogs and sister-in-law Chos-nyid-dbang-mo for their unrelenting support. I should also like to express my thanks to my non-academic German friends, particularly Klaus and Inga Briücken, for their support and help.

In addition to these acknowledgements, I have also some apologies to offer: to my Tibetan Buddhist teachers for my failure to live up to their expectations—for theorising about Buddhist teachings instead of practising them and for investigating the idea of bodhicitta instead of generating it; and to my teachers in the west and all other perfectionists for not always being able to meet the high standards of scholarship set by them, and for the major and minor mistakes that certainly abound in this work (for which I am solely responsible).

For the sake of transparency, I should perhaps venture a few words about my intellectual background and the methodological guidelines I have attempted to follow. For several reasons, it is not feasible to pursue the study of Buddhism in a western academic setting the same way it is done in a Tibetan monastic seminary, and vice versa. It goes without saying that the priorities and methods of monastic and western academic training differ, although the objective of both may be to gain knowledge of Buddhism. Ideally, the priority of a Tibetan monastic seminary is to train monks and nuns in such a way as to equip them with qualities of erudition, personal integrity, and conscientiousness (mkhas btsun bzang gsum); and with the competence to engage in exposition, spiritual practice, and beneficial tasks (bshad sgrub las gsum). Erudition is attained through learning, contemplation, and meditation (thos bsam sgom...
The Resolve to Become a Buddha

gsum); personal integrity through the practice of the three trainings (bslab pa sgum), namely, higher ethical-moral discipline, higher concentration, and higher insight; while a scholar with conscientiousness can be expected to carry out the tasks of exposition, disputation, and composition ('chad rtsod rtsom gsum), and thus contribute to the preservation and propagation of the Buddhist teachings so as to put salvific means at the disposal of other sentient beings. The pursuit of knowledge for knowledge's sake, permissible in western academia, would probably be seen as inadequate, although here too there are several Buddhist (particularly Mahāyāna) concepts with which one could legitimise one's unquenchable thirst and quest for knowledge. Perhaps one could say that for traditional Buddhist scholars, knowledge of Buddhism is desirable primarily for its instrumental value (i.e. good as a means), whereas for western academics it is primarily sought for its own intrinsic value (i.e. good as an end).

One of the methodological strengths of the monastic academic system, I find, is the intensiveness and extensiveness of training it can offer in a relatively short period of time. One of the weaknesses of the traditional system of investigation, however, seems to be its tendency to regard texts and ideas as though they were static entities with no history of their own. The strength of the western academic system, by contrast, as exemplified at the University of Hamburg, is its cultivation of historical-philological skills and tools, based on the presupposition that ideas, articulated and transmitted to us in the form of written texts, have a history of their own, just like persons—that they originate and evolve; and that the authors of texts, analogously to ourselves, wanted to convey definite (and not just any) ideas, and that researchers, regardless of religious or ideological affiliations, or other personal predilections, should attempt to determine the authorial intent of a given text by employing historical-philological tools and skills (without, however, ruling out the usefulness of any other tool that bids to bring us a step closer to the goal).

There have been other individuals like myself who studied first in a traditional monastic academy and later pursued their studies in a western university, and there may be many more in the future willing to do the same. For better or worse, such individuals are in a unique position, and thus also face unique challenges, including overcoming inner conflicts—perhaps a natural consequence of the tension generated between tradition and innovation, religion and science, subjective faith and objective reason, and even between Orientalism and Occidentalism—and having often to cope with such preconceived notions as that a Buddhist can never be an objective Buddhologist (or even that only a Buddhist can be a competent Buddhologist!). Surely individuals deal with such challenges in their own unique way.

My ten years in a Tibetan Buddhist seminary in India and now another ten years in Europe have imparted to me knowledge and values which I would have otherwise remained ignorant of. Far from regretting, there are reasons for rejoicing over having had both the privilege to study Tibetan Buddhism as a Tibetan Buddhist monk and the freedom to give up monkhood and pursue further studies in Germany. The information gathered during study in a monastic seminary can indeed be reassessed with the aid of western academic tools. Methodological precision and the reliability of findings may differ owing to several factors, but at least for me, one of (if not the most) reliable ways of gaining knowledge of Buddhism transmitted in the form of written texts seems to be the use of historical-philological tools and methods, which are not, by the way, completely unknown, at least in some form, in the Tibetan tradition. I would go so far as to say that if there were one western method that a judicious traditional Buddhist scholar is likely to find appealing and worth adopting when analysing Buddhist ideas and textual sources, then that would be the historical-philological one. Moreover, if we assume that the goal of western scientific enquiry is to determine states of affairs as precisely as possible, that is, without underplaying or overplaying any factor, I would argue that it is very much in conformity, at least in theory, with the traditional Indian and Buddhist notion of knowing things or reality without superimposition (adhyāropa/samāropa: sgro 'dogs pa) or depreciation (apavāda: skur ba 'debs pa).
Readers may wonder why I chose to study the concept of bodhicitta (i.e. the resolve to become a buddha) in Indo-Tibetan Buddhism. The existential significance of the bodhicitta concept in tantric and non-tantric Mahāyāna Buddhism, which I hope will become sufficiently clear in due course, is what motivated me to study it. Given the vastness of the literature on bodhicitta (it is in fact overwhelming), I had to be selective in the choice of my materials. Whenever possible I have based myself primarily on Indian texts (in their original, if available, or else in their Tibetan translation). I have also resorted to a great deal of indigenous Tibetan sources, particularly when these discuss bodhicitta from a tantric perspective, but also when the Tibetan tradition has attempted to systematise various positions found in Indian sources. Indigenous Tibetan sources have often been very helpful, and at times even indispensable, in several respects. Unrestrictive use of indigenous Tibetan material on bodhicitta would have been impossible, and I have hence tried to limit myself to the early sources, and drawn on later ones only when I could find no earlier source on a given topic. Two of my criteria for choosing sources have been the accessibility of a given work during the time of writing this thesis and my familiarity with it. In any case, I have tried to present Indian ideas and Tibetan ones (be they of the rNying-ma or gSar-ma schools) as objectively as possible. I have avoided presenting Tibetan ideas as Indian, or rNying-ma ideas as universally valid for all Tibetan schools. Although I have resorted to more Indian sources than Tibetan ones and, in the case of the Tibetan sources, employed more rNying-ma than gSar-ma literature, I believe that this study is, as far as the major issues are concerned, fairly representative of both Indian and Tibetan Buddhism, and hence can rightly be called a study of bodhicitta in Indo-Tibetan Buddhism.

This study contains eleven chapters of varying length. In chapter one, I try to provide a general background on the concept of becoming a buddha, against the backdrop of the relevant Buddhological, soteriological, ontological, epistemological, gnoseological, and axiological concepts of Mahāyāna Buddhism. I also try to bring the major themes addressed in this book within the compass of these concepts. The second chapter provides an overview (and when deemed necessary also an assessment) of previous studies done by modem scholars on the theme of bodhicitta. The third chapter seeks to explore the prehistory of the bodhicitta concept and discusses doctrinal foundations that may have contributed to its conception. Chapter four is devoted to the idea of the resolve to become a buddha purportedly made by the historical Buddha for the first time in one of his previous existences. The fifth chapter discusses three concepts that are closely related to each other, namely, Mahāyāna, the soteriological means of awakening; bodhisattva, a sentient being who strives for awakening; and bodhicitta, the resolve to strive for awakening. Chapter six examines the two traditions of Mahāyāna Buddhism found in India and systematised by Tibetan scholars—particularly their views of issues related to the generation of bodhicitta. The seventh chapter presents a typology of bodhicitta, namely, ethico-spiritual, gnoseological, ontological (or metaphysical), psycho-physiological, and semiological (or symbolical) bodhicitta. Chapter eight brings together various traditional classifications of bodhicitta found in Indian and Tibetan sources. The ninth chapter takes a look at the causes and conditions pertaining to bodhicitta. The tenth chapter thematises the observances of Mahāyāna, and particularly the maintenance of bodhicitta as the foundation of a bodhisattva’s ethico-spiritual discipline. The eleventh and last chapter deals with the relapse or loss of bodhicitta and the methods for restoring it. Since I have made profuse use in this study of Bodhisattvabhūmi 1.2 (i.e. the Cittotpādapatāla, the chapter on the generation of the resolve to become a buddha), which is one of the earliest pieces of Mahāyāna literature that deals with the theme, and so is an important textual witness to the development of the concept of bodhicitta, I have also included a critical edition of the Sanskrit and Tibetan texts of this chapter as, respectively, appendices A and B.

Given the pervasiveness of bodhicitta in Mahāyāna Buddhism and the amount of material found on it, this study cannot claim to have done full justice to the theme. Perhaps I
have been naïve in venturing to take a flight into the domain of Mahāyāna that is said to be as vast as space itself. To use a simile employed by Candrakīrti, a bird in flight must finally land, not because there is no sky left to traverse but because it has exhausted all its energy. Similarly, my study comes to an end not because materials on bodhicitta have been exhausted and everything that needs to be said on the subject has been said, but because a limit has had to be set so that the deadline for submitting the dissertation can be met. Nonetheless, I do hope that the present work will be a small contribution towards understanding the concept of bodhicitta, the élan vital of tantric and non-tantric Mahāyāna Buddhism.

3 Madhyamakāvātāra 11.32ab:
   nam mkha' med pas 'dab chags ldog par mi 'gyur gyi ||
   'di ni rang mthu zad pas ldog par 'gyur de bzhin ||.
Technical Note

When citing Tibetan canonical works from the bKa'-'gyur, I have employed both the sTog manuscript (T) and the sDe-dge (Karma-pa) xylographic edition (D). For works which are not available in T, such as the rNying-ma tantras, I have consulted the Peking bKa'-'gyur xylograph edition (P). When citing works found in the bsTan-'gyur, I have made use of the Peking edition, the sDe-dge edition, and the modern Sichuan (Chengdu) edition (S), which has the sDe-dge xylographic edition as its basis. This recent edition also takes into consideration the Peking (P), sNar-thang (N), and Co-ne (C) editions, and records the variant readings found in them. The variants N and C given by me are based on this edition. Although it is not a critical edition, S records significant variants fairly accurately (except in some cases, where variants seem either to have escaped the notice of the editors or to have been considered insignificant by them). I have not faithfully reproduced all the strokes (shad) while citing Tibetan texts. Whenever possible, I consulted and made use of existing critical editions, versions, translations, or studies of texts that I have cited. It was, however, impossible to discuss the date of composition and authorship in all cases. The respective Sanskrit titles and authors were in most cases adopted from the available bKa'-'gyur and bsTan-'gyur catalogues. Nonetheless, as already noted by several scholars, some of them are doubtful. Short titles have been used for citing primary sources in Sanskrit and Tibetan. The bibliography and index have been arranged according to the Roman alphabet, including Tibetan titles and words, in which cases I followed the sequence of the initial letters, not the main letter (ming gzhi).

The relevant Sanskrit and Tibetan passages have for the most part been quoted in the footnotes, except for the passages from Bodhisattvabhūmi 1.2 (i.e. Cittotpādaśālā). In the latter case, only the paragraph numbers are provided in the notes, referring to the edited text included in the appendices, where lists of the sigla used in the editions are also provided.

Archaic orthographies found in some autochthonous Tibetan works, particularly works of Rong-zom Chos-kyi-bzang-po, have been retained. These include the archaic suffix d (da drag), the archaic employment of the suffix 'a, and the inverted vowel gi gu (marked as i). Glosses contained in the cited Tibetan texts have been given within braces.

1 Although the so-called Karma-pa edition of the sDe-dge bKa'-'gyur and bsTan-'gyur is said to have undergone some corrections and hence does not completely represent the original sDe-dge xylographic edition of the Tibetan canon, I hope that variants resulting from those corrections, if they exist at all, are negligible, and do not affect the content of the texts that I have cited.

2 In cases where the works cited by me are not found in the sDe-dge edition, only P and S have been considered.
Chapter One

A General Introduction: On Becoming a *Buddha*

There has never appeared, will never appear,
And does not appear a *buddha*
Who does not depend on *bodhicitta*.
It is thus always worth being joined in reverence with [*bodhicitta*].

– Khu-nu Bla-ma bsTan-'dzin-rgyal-mtshan (1894/95–1977), *Byang sens bstod pa* 331

1. Introductory Remarks

Becoming a *buddha* (‘Awakened One’) under the Bodhi tree (*Ficus religiosa*) was undoubtedly the most significant event in the career of the historical Buddha, and may be considered the starting point of Buddhism. According to both Mahāyāna (‘Greater Vehicle’) and Hīnayāna (‘Lesser Vehicle’) or non-Mahāyāna, the historical Buddha had sometime in the distant past resolved to become a *buddha*, thereby launching out on the career of a *bodhisattva*, that is, a sentient being who strives to attain the highest state of awakening. A major distinction between non-Mahāyāna and Mahāyāna, however, is that for the former the status of being a *bodhisattva* or *buddha* is confined to the historical Buddha (or a few others like him), while the ultimate soteriological goal of a disciple is Arhatship (that is, the final state of a saint who has attained release from the cycle of birth and death) primarily for oneself. For the latter, by contrast, even an ordinary sentient being is capable of undertaking the long and arduous career of a *bodhisattva* by generating *bodhicitta* and finally becoming a *buddha* (just like the historical Buddha himself), primarily for the sake of many other sentient beings. In sum, a person who possesses or has generated *bodhicitta* is considered to be a *bodhisattva*, and the form of Buddhism concerned with the theory and practice of a *bodhisattva* is known as Mahāyāna. The idea of *bodhicitta* in the sense of the resolve to become a *buddha* is hence the bedrock of Mahāyāna, and is what distinguishes a *bodhisattva*

rtag tu gus pas 'grogs par 'os ||.
from a śrāvaka, Mahāyāna from non-Mahāyāna. It is presupposed by all forms of Mahāyāna Buddhism including Vajrayāna ('Diamond Vehicle'), or tantric Mahāyāna.

Multiple internal and external factors must have contributed to the formation and further development of the concept of bodhicitta. The psychological need of the Buddhists to make up in one way or another for the demise of the historical Buddha may have been one of the principal internal factors that contributed to the formation of the idea of the resolve to become a buddha. Such an idea would not have lacked the doctrinal justification or legitimisation that it needed, for the non-Mahāyāna sources seem to abound in doctrinal elements that could easily be used to underpin the concept of bodhicitta. In its early phase of development, the idea of generating bodhicitta probably meant only the initial resolve to become a buddha, a momentous decision made by an aspirant seeking Buddhahood (buddhatva). This was seen as an indispensable but not necessarily a sufficient condition for the attainment of Buddhahood. However, gradually the idea came to encompass the entire theory and practice of a bodhisattva and to be considered not only a necessary but in fact a sufficient condition for such an attainment. In the course of time, even the true reality that a bodhisattva or buddha experiences as a spiritual event, the meditative insight or gnosis by means of which the true reality is experienced, and all conceivable resources or means—be they psycho-physiological, visual, verbal, or visional impulses that could be employed for becoming a buddha—came to be regarded as bodhicitta. It is this idea as found explicated in Indian and Tibetan Mahāyāna Buddhism that the present study seeks to examine.

The concept of bodhicitta, regardless of its type, invariably involves in one way or another the idea of becoming a buddha. This in turn involves a host of other concepts pertaining to Buddhology (i.e. the theory of the Buddha or a buddha), soteriology (i.e. the theory of salvation), ontology (i.e. the theory of being or reality as such), epistemology (i.e. the general theory of knowledge)—particularly gnoseology (i.e. the theory of jñāna ‘liberating insight’)\(^2\)—and axiology (i.e. the theory of values, primarily ethicality or morality), all of which are, unsurprisingly, conceived of differently in different Buddhist systems and scriptures. The heterogeneity of the strands of Mahāyāna Buddhism that explicitly or implicitly endorse one or more types of bodhicitta, the diversity of the concepts of Buddhology, soteriology, ontology, epistemology, gnoseology, and axiology proposed in them, and the divergence and convergence of these strands and ideas make a thematic study of the bodhicitta concept a daunting task.

What I shall attempt in this chapter is to provide a general introduction to the concept of bodhicitta by considering the idea of becoming a buddha against the backdrop of the relevant Buddhological, soteriological, ontological, epistemological-gnoseological, and axiological concepts of Mahāyāna Buddhism. I shall, in the process, be trying to bring the major themes addressed in this book under the umbrella of these concepts.

2. Buddhology

The idea of the resolve to become a buddha inevitably raises the Buddhological question as to what or who a buddha is, or rather who the historical Buddha was, for the concept of the historical Buddha seems to be the point of departure for all matters pertaining to Buddhology in all strands of Buddhism. One of the questions that we never seem to stop asking is who or what a buddha is. According to the Anguttaranikāya, one of the earliest Buddhist sources, the

\(^2\) The use of the term gnosis here is not intended in any way to link the Buddhist concept of jñāna with the concept of gnosticism in Gnosticism. See SEYFORT RUEGG 2004: 35–35 (particularly n. 49), where problems of comparativism (i.e. drawing comparisons between Mahāyāna and Gnosticism and Manichaeism) are discussed. The case of certain concepts clustering around the notion of what I call 'physiological bodhicitta' is mentioned there as one example.
Buddha, upon being asked whether he was a god, some kind of celestial being, demon, or human being, answered: 3

Just as a blue, red, or white lotus, having sprouted in water, having grown up in water, and having risen above the water, stands unstained by water, even so do I, born in the world and grown up in the world, and having overcome the world, dwell unstained by the world. 4

Understand that I am a Buddha.

The Buddha wanted us to understand him as a Buddha, an ‘Awakened One,’ and not less and not more. 5 The notion of the Buddha found in various schools and strands of Buddhism is, of course, by no means uniform. Perhaps the only consensus within Buddhology among all forms of Buddhism at all times is the appearance of a phenomenon that we call ‘the historical Buddha.’ It is, however, the reflections upon and dissent over the nature of the Buddha, the teacher (śāstra: ston pa); the spatial domain (sthāna: gnas) and temporal dimension (kāla: dus) of his existence, appearance, activities, and influence; his assembly (pariṣad: 'khor) and teachings (dharma:chos); and the substratum, nature, and scope of the Buddha’s body (kāya:sku), speech (vāc: gsung), mind (citta: thugs), qualities (guna: yon tan), and salvific activities (karman: phrin las) that make Buddhology a fascinatingly complex topic. Several studies devoted to various Buddhological themes have appeared in recent years. 6 I do not, however, intend to probe into the overall subject matter of Buddhology, a theme as complex and wide-ranging as the history and doctrine of Buddhism itself, but merely to touch upon some aspects of Buddhology which I believe are relevant to the study of the bodhicitta concept.

Several Buddhological themes, particularly those related to the notions of the historical Buddha, are directly or indirectly addressed in this book. In chapter three, I discuss a number of issues surrounding the historical Buddha and the aftermath of his demise, with the aim of providing possible historical and doctrinal background to the bodhicitta concept. I attempt to show how his demise could have created an emotional vacuum among his followers (particularly his lay disciples) and subsequent measures that could be read as ways to fill this emotional gap. One of these subsequent measures could have been to embrace the idea of becoming a Buddha oneself. As sources of doctrinal justification or legitimisation, I discuss the ideas of a Buddha as a discoverer and proclaimer of the perpetual true reality; the plurality of buddhas; the resolve made by previous buddhas to become buddhas; the altruism of the historical Buddha; and the prerequisites for becoming a Buddha as spelled out in non/pre-Mahāyāna sources. The fourth chapter seeks to explore the idea of the major events of the Buddha’s career, namely, the initial resolve to become a Buddha purportedly made by him in one of his previous existences; his striving to become a Buddha; and the time and place of his becoming a Buddha. I also briefly discuss whether the historical Buddha has been

---

4 See also the Vimalakīrtinirdesāsūtra 1.14c (p. 8.3): jaleruham vā salile na lipyase. Later on the analogy of a lotus growing in mud and yet remaining unsullied by it is applied also to bodhisattvas. See, for example, Bodhicittavivarana 89:

\[\text{sems can bskyab pa'i bsam pa can} || \]
\[\text{de dag srid pa'i 'dam skyes kyang} || \]
\[\text{de byung nyid pas ma gos pa} || \]
\[\text{chu yi padma'i 'dab ma bzhin} || .\]

For an English translation, see Lindtner 1997: 63.

5 The term buddha was, to be sure, used by many religions of the Buddha’s time; see Nakamura 1980: 83.

6 See, for example, Griffiths 1994; Weber 1994; Makrasky 1997; Schmithausen 2000c; Vetter 2000; Steinkellner 2000; and the several related contributions in Schmidt-Leukel 1998. See also Lopez 2005. For a study of traditional Buddhology in its manifold and complex forms as presented by the eleventh-century Tibetan scholar Rong-zom-pa with special reference to the controversy surrounding the existence of gnosis (jñāna: ye shes) at the stage of a Buddha, see Almogi 2006.
retrospectively conceived of as a ‘king-like’ or ‘herdsman-like’ bodhisattva, that is, whether his intention was to become a buddha prior to other sentient beings or only after them. Some of the possible theoretical reflections on Buddhology in Mahāyāna and non-Mahāyāna are also discussed in chapter seven, where I show, for instance, that the body of the Buddha, once thought of as ‘stinking,’ gradually began to be seen as pure, luminous, and adamantine.

Let us first of all consider the term buddha itself. It hardly bears mentioning that buddha means ‘Awakened One’ and that ‘awakening’ (bodhi, a verbal noun which, like the noun buddha, is derived from बुध būdha) is a metaphor for ‘eye-opening’ comprehension or realisation.7 It has been noted that the term buddha is also used in the Jaina scriptures to designate an insightful person.8 In the Indo-Tibetan Buddhist tradition it is customary to explain the term as ‘one who has awakened from the sleep of disorientation’ (mohanidrā: gti mug gi gnyid) or ‘sleep of ignorance’ (avidyānidrā: ma rig pa’i gnyid).9 The term, according to Candrakīrti and others, can be used to designate all three types of Buddhist saints, namely, śrāvaka saints, pratyekabuddhas, and buddhas (or, to be precise, samyaksambuddhas).10 A pratyekabuddha is explicitly referred to as a ‘middling buddha’ (sangs rgyas ‘bring’), and thus, analogously, a śrāvaka saint and a buddha may be described as ‘minor’ and ‘major’ buddhas, respectively. According to the eleventh-century Tibetan scholar Rong-zom Chos-kyi-bzang-po (or Rong-zom-pa), however, the term is applicable to a pratyekabuddha, a bodhisattva of the tenth stage, and a samyaksambuddha.11

Usually a buddha is described, as in the Tattvasamgrahapaññikā, as one who has known all that is worth knowing, meditatively accomplished all that is worth meditating on, and eliminated all that is worth eliminating.12 The idea of the Buddha or a buddha as a person who is wide awake from the sleep of ignorance—that is, a buddha of spiritual realisation—seems to be, however, if the fundamental, not the only type of buddha found in Mahāyāna

7 SCHMITHAUSEN 2000c: 8 “Eben deshalb heißt er buddha, ‘der Erwachte’. Erwachen (bodhi, das Verbalnomen zu buddha) ist eine Metapher für ‘augenöffnendes’ Erkennen, Begreifen.” See also Sthiramati *(Mahāyāna)sūtrālaṃkāravyākhyā (P, fol. 200a3–5; D, fol. 170a4–5; S, vol. 72, pp. 413.16–414.1): ‘di litar sangs rgyas zhes bya ba yang ji snyed du yod pa’i chos thams cad kyi don phyin ci ma log par thugs su chud pa la [las P] sangs rgyas zhes bya ste | de bas na sā lu liang pa’i indo las kyang | de la sangs rgyas bcom ldan ‘das gang zhe na | gang gis chos thams cad thugs su chud pa’i phyir | sangs rgyas zhes bya ste | de dang ‘phags pa’i chos kyi sku dang shes rab kyi spyan gyis byang chub byed pa dang slob pa dang mi slob pas [= pa’i] chos gsigs so zhes gsungs so ||. sources. For example, we come across ten types of buddhas in the Lokottaraparivarta of the Buddhāvatamsakasūtra,13 where they are considered to be the ten worthy things to be discovered (rjes su rtogs par bya ba: anugantavya)14 by bodhisattvas. The ten may be rendered tentatively as follows: (1) a buddha who is totally awakened (mgon par byang chub pa'i sangs rgyas), (2) a buddha who is [awakened in virtue of his] aspirational wishes (smon lam gyi sangs rgyas), (3) a buddha [awakened in virtue of] the maturation of karma (las rnam par smin pa'i sangs rgyas), (4) a buddha [awakened in virtue of] the empowerment [of other buddhas] (byin gis brlabs pa'i sangs rgyas), (5) a buddha who has manifested [in a certain animate or inanimate form or being] (spyru pa'i sangs rgyas), (6) a buddha [in the absolute sense of] dharmadhātu (chos kyi dbyings kyi sangs rgyas), (7) a buddha [inherent in or envisioned by] the mind [of sentient beings] (sams kyi sangs rgyas), (8) a buddha [envisioned through] meditative concentration (ting nge 'dzin gyi sangs rgyas), (9) a buddha by nature (rang bzhin gyi sangs rgyas), and (10) a buddha [fashioned] according to one's inclination (bsam pa ji lla ba'i sangs rgyas).

Nāgamitra in his Kāyatrayāvatāramukha15 offers his own interpretation of these ten kinds of buddhas. For him, the first set of five pertains to the conventional kāya, namely, the two kinds of rūpakāya (i.e. the nirmānakāya and sambhogakāya), and the second set of five to the absolute kāya, namely, the dharmakāya. This understanding is shared by Jñānacandra in his commentary on the Kāyatrayāvatāramukha called the Kāyatrayavṛtti. He, however, maintains that all of the first set of five refers to both the nirmānakāya and sambhogakāya except for the third in the list (i.e. las rnam par smin pa'i sangs rgyas), which cannot apply to sambhogakāya.16 Clearly the idea that a sambhogakāya should be regarded as the result of karmic maturation must have been unacceptable for him.

The ten types of buddha found in the Buddhāvatamsakasūtra have obviously been interpreted in the light of the idea of a buddha of spiritual attainment. A similar list and explanation of ten types of buddha can be found in the Dharmasamgītisūtra,17 which is cited, for instance, in the bKa' yang dag pa'i tshad ma18 and in the Mañjuśrīnāmasamgīti.19

Daśabalaśrīmitra (ca. twelfth or thirteenth century), in his *Saṃskṛtasaṃskṛtaviniścaya*,20 subclassifies *buddha* in yet a different manner, namely, into true or absolute (*pāramārtha*) and designatory or conventional (*sāṃketa*). As we shall see in chapter eight, on the traditional classification of *bodhicitta*, he also categorises *dharma* and *samgha* in a similar way. His classification of *buddha* may be summarised in a tabular form as follows:21

<table>
<thead>
<tr>
<th>buddha</th>

The types of *buddha* listed by Daśabalaśrīmitra are more or less clear, except for the distinction called for between *stupa* and *caitya*, assuming that the Tibetan reading *tsi tya* (without any variant) points to *caitya*. One wonders, though, whether it should rather read *citta*, which is not inconceivable, given the concept of *sems kyi sangs rgyas* found in the *Buddhāvatamsakasāṭṭha* (no. 7). Perhaps *pratibimba* means any representation of a *buddha*, including statues or footprints. The author may not have intended a mentally pictured or meditatively experienced *buddha*, as described, for example, in the *Bhadrapālasāṭṭha* or *Pratyutpannabuddhasammukhāvasthitasamādhisāṭṭha*. In any case, the types of *buddha* listed by Daśabalaśrīmitra are quite noteworthy for both historical and doctrinal reasons. Historically, the notions of a *buddha* discussed here can perhaps be best understood on the basis of various approaches taken by Buddhists to compensate for the absence of the historical Buddha, to which we shall return in chapter three.25

20 *Mañjuśrīrāmasaṃgitiśīkā* (P, fols. 152a5–153a8; D, fols. 131a6–132a6; S, vol. 32, pp. 346.12–349.6).

21 For information on this author and work, see MARTIN 2006, s.v. Daśabalaśrīmitra.

22 Note the expression *stūpabimbāṇi* recorded in *BHSD*, s.v. *stūpa*.

23 See *MW*, s.v. *citya* and *caitya*; *BHSD*, s.v. *caitya*.

24 Daśabalaśrīmitra states that the body of a *bodhisattva* is posited as the fifth kind of designatory *buddha* by the proponents of the Bodhisattvayāna (*bodhisattvayānikā*). He himself was reportedly affiliated to the Abhayagiri tradition (a Theravāda school). See MARTIN 2006, s.v. Daśabalaśrīmitra.
In the Tibetan Buddhist context, it is worth looking at what Rong-zom-pa has to say about the various types of buddhas. He alludes to three kinds in his *ITa 'grel*, which figure in a purely tantric context, during his exposition of the philosophical view (*lta ba: daršana*) of the Mahāyoga. His explanation may be summarised in the following tabular form:

| 1. a buddha by nature (rang bzhin gyi sangs rgyas), i.e. a sentient being | 2. a buddha in virtue of realisation (rtogs pa'i sangs rgyas), i.e. a yogin on the spiritual path | 3. a buddha in virtue of attainment (grub pa'i sangs rgyas), i.e. a yogin who has attained the spiritual goal |

| 1.1. the [complex of elemental] causes of one's birth [envisioned during conception as a buddha (skye ba rgyu'i sangs rgyas) | 1.2. the bases of one's birth [viewed during conception as a buddha (skye ba rten pa'i sangs rgyas) | 1.3. the attained birth (or ensuing body) [viewed as the body of a buddha (skye ba mngon par grub pa'i sangs rgyas) |

As an aid to the understanding of some of the unusual expressions found here, a translation of the pertinent passage is attempted as follows:26

The philosophical view (*lta ba: daršana*) of the Mahāyoga: All phenomena are viewed as [already] awakened (sangs rgyas pa: buddha) in [the domain of] {the spontaneously attained} reflectional (or representational) mandala (gzugs brnyan gyi dkyil 'khor). A buddha is said to be of three kinds: [1] a buddha by nature (rang bzhin gyi sangs rgyas), [2] a buddha by realisation (rtogs pa'i sangs rgyas), and [3] a buddha by attainment (grub pa'i sangs rgyas). [1] A buddha by nature is the sentient being itself, which is said to be [of three kinds in accordance with its] three states or circumstances: [1.1] The [complex of elemental] causes of one's birth [envisioned during conception as a buddha (skye ba rgyu'i sangs rgyas), [1.2] the bases of one's birth [viewed as a buddha (skye ba rten pa'i sangs rgyas), and [1.3] the attained birth (or ensuing body) [viewed as the body of a buddha (skye ba mngon par grub pa'i sangs rgyas). [1.1] The [complex of elemental] causes of one's birth envisioned during conception as a buddha means that when the seeds (i.e. sperm and ovum) of the parents, the cause of a sentient being's body being formed, are taken possession of by the element of consciousness (skyi mchad: āyatana) exist in [their] incipient and elemental states, they can be viewed as being [already] awakened in the [domain] of the complete divine mandala. [1.2] The bases of one's birth [viewed during conception as] a buddha means that all the physiological and

25 SCHMITHAUSEN 2000c: 12–15. The possibility of a connection among the individual approaches is not ruled out (ibid., 12, n. 32).

26 *ITa 'grel* (A, fols. 251b4–252a4; B, p. 334.10–24): *rnal 'byor* [*byord B*] *chen po* 'i *lta ba la* | *chos thams cad* (lhun gyis grub pa'i) *geugs brnyan gyi dkyil 'khor du sangs rgyas par lta ba la* | *sangs rgyas kyi bye brag gsum du smra ste* | [1] rang bzhin gyi sangs rgyas dang | [2] rtogs pa'i sangs rgyas dang | [3] grub pa'i sangs rgyas so || [1] le rang bzhin gyi sangs rgyas ni | *sems can nyid yin te* [om. A] | *de yang gnas skabs gsum du smra ste* || [1.1] skye ba rgyu'i sangs rgyas dang | [1.2] skye ba rten pa'i sangs rgyas dang | [1.3] skye ba mngon par grub pa'i sangs rgyas so || [1.1] de la skye ba rgyu'i sangs rgyas ni | *sems can gyi lus 'grub pa'i rgyu* | *pha ma gnis kyi sa bon* | *rnam par shes pa'i khams kyi bzung ba'i dus na* | *nyon mongs pa* [pa'[ B] dang phung po [po' B] dang skye mchad thams cad kyi [om.?] *sa bon dang khams kyi rang bzhin du gnas pa'i dus na* | *de nyid yongs su rdzogs pa'i lta'i dkyil 'khor du sangs rgyas par lta'o || [1.2] skye ba rten pa'i sangs rgyas ni | *pha ma gnis kyi lus dang* *sems kyi khams thams cad lha'i dkyil 'khor du grub par lta'o* || [1.3] skye ba mngon par grub pa'i sangs rgyas ni | *rang gi lus mngon par grub pa* [pa'[ A] *di '[di' B] *nyid* | *de lta bu'i *tishul du lta ba'o* || [2] rtogs pa'i sangs rgyas ni | *de lta rtogs pa'i rig 'dzin* [*dzin B*] *gyi sa la gnas pa' na* | *rnam so* || [3] grub pa'i sangs rgyas ni [ni A] *de nyid mngon du gyur* [gyur A] *pa'o* || *di' rnamms kyang rang bzhin dang gnas skabs kyi bye brag du [*tu*] 'dod do* ||. See also ibid. (A, fols. 254a3–4; B, p. 337.6–8)
psychical elements of [one's] parents are envisioned as being attained in the form of a divine mandala. [1.3] The attained birth (or ensuing body) [viewed as the body of] a buddha means that the very coming into existence of one's body is [viewed] in that manner (i.e. as the coming into existence of a buddha's body). [2] Those who are buddhas in virtue of realisation are those who abide at the stage of knowledge-bearers (rig pa 'dzin pa: vidyādhara), that is, who, in doing so, have realised [that all phenomena are awakened in the domain of the divine mandala]. [3] A buddha by attainment (grub pa'i sangs rgyas) is one who has actualised that (i.e. the realisation that all phenomena are already awakened in the domain of the divine mandala). These [types of buddha], it can be maintained, differ in terms of nature and circumstances (or states).

Although the author does not make this explicit, one is tempted to interpret the three kinds of buddha mentioned here as pertaining to buddhas on the three levels of (a) cause (rgya) or basis (gzhi), namely, the state of still being a sentient being, (b) path (lam), and (c) result or goal ('bras bu), respectively. Interestingly, the author, while describing one who is a buddha by nature (rang bzhi gnyisangs rgyas), does not allude to the idea of an ontological buddha but merely to the meditative visualisation associated with the so-called tantric practices of the generation phase (bskyed pa'i rim pa: utpattikrama) and completion phase (rdzogs pa'i rim pa: nispannakrama) of the Mahāyoga system. The idea of the three types (or rather states) of a buddha by nature may convey the impression that it concerns the actual process of conception and birth of a person, and presupposes the capacity of a Mahāyoga practitioner to remain conscious of these processes. Yet none of these, in my view, could have been the intent of the author.27 The process of conception and birth of a person here should thus be understood as the enacting of the events of conception and birth meditatively, by mimicking those of a fully awakened buddha as a form of mental training (blo sbyong ba) so as to realise and become accustomed to the fact that there is no phenomenon that is not awakened (sangs ma rgyas pa'i chos).

I would suggest that the various types of buddhas may be classified as: (a) historical (i.e. the Buddha Śākyamuni), (b) mythical (e.g. Dipamkara, who is said to have lived on earth, like Śākyamuni himself), (c) celestial or transcendental (e.g. Amitābha, who is said to reside in the paradise-like realm of Sukhāvatī, or the Medicine Buddha), (d) gnoseological (i.e. nirvikalpañāna,28 advayañāna, etc.), (e) ontological (i.e. dharmatā,29 dharmadhātu, bhūtakoṣi, śūnyatā, tathāgatagarbha, etc.), (f) symbolical or representational (i.e. physical symbols or representations, such as relics and footprints of the historical Buddha; verbal symbols or representations, such as letters and mantras; and mentally envisaged buddhas, i.e. through samādhi), (g) manifested or emanated (i.e. as animate beings, such as bodhisattvas, pratyekabuddhas, śrāvakas, kings, teachers, hunters, prostitutes, and animals, or as inanimate objects, such as bridges and islands). One also finds the idea of a buddha manifesting himself as dharma and the samgha; dharma manifesting itself as a buddha and the samgha; or the samgha manifesting itself as a buddha and dharma.30

---

27 It is said that only a buddha (i.e. sambuddha) is conscious while entering, residing in, and exiting in the womb of his mother. A pratyekabuddha is said to be conscious when entering and residing but not when exiting, and a cakravartin (‘universal monarch’) only when entering. See the Abhidharmakosabhāṣya (p. 128.24–27).

28 Dignāga, Prajñāpāramitāpiṇḍārtha (as cited in STICHERBATSKY 1932: 537, n. 6): prajñāpāramitā jñānam advaya ma sa tathāgatah. For further information on the Prajñāpāramitāpiṇḍārtha, see MARTIN 2006, s.v. Navāloka.

29 Lankāvatārasūtra 239cd (p. 296): sarvadharmāvabodhena cittaṃ buddham vadāmy aham ||. For an English translation, see SUZUKI 1932: 245. Cf. the term dharmatābuddha (chos nyid kyi sangs rgyas) also found in the Lankāvatārasūtra (TSD, s.v. chos nyid kyi sangs rgyas). The following famous verse from the Vajrachchedikāśūtra, as cited in the Catuḥśatakaśūtra (TILLEMANS 1990: vol. 2, p. 79), may also be mentioned: dharmato buddhā ārāstovā dharmakāyā hi nāyakāḥ dharmatā cāry avijñeyā na sā śakyā vijñīnātum ||.
More studies will be required in order to determine the interrelationship among these concepts and to sort them out according to their different historical and doctrinal layers, if such is possible at all. It is conceivable that one type of *buddha* may have been juxtaposed to or superimposed on another type of *buddha*. But as I noted above, we can at least state, both historically and doctrinally, that the idea of the historical Buddha Gautama (or Śākyamuni) is the point of departure for the idea of all other types of *buddhas*. From a historical perspective, no Buddhist school of thought could ignore or detach itself from the historical Buddha, irrespective of how much it may have doctrinally digressed from early Buddhist thought, for doing so would have undermined its own roots.¹ To be sure, any given school of Buddhist thought—be it Mahāyāna or non-Mahāyāna, tantric or non-tantric Mahāyāna—may have rejected others’ perception of the historical Buddha or relativised his role, but it would never have ignored the historical Buddha himself. For example, although the rDzogs-chen tradition of the rNying-ma school may give the impression that it has little to do with or say about the historical Buddha, it nevertheless sees the Buddha Śākyamuni as a *nirmānakāya* of the Ur-Buddha Samantabhadra.² The various schools of Buddhist thought were all but bound to accept and explain the phenomenon called the historical Buddha, and this has resulted in multifarious Buddhological concepts.

For the question of how one becomes a *buddha*, the concepts of gnoseological and ontological *buddhas* seem to be particularly significant. As paralleled in the case of the typology of *bodhicitta* (which we shall address in chapter seven), one can become a *buddha*, like the historical Buddha himself, by generating (or by revealing) the gnoseological *buddha*, and thereby gain full and direct access to the ontological *buddha*. The rest can be seen as factors conducive to the process of becoming a *buddha*. It is thus understandable why many tantric and non-tantric Mahāyāna sources assert that the quest for Buddhahood is a journey within one’s psycho-physiological complex, one’s own mind, for it is there and there alone that a *buddha* can either be generated or exposed. For example, the *Atyayajñānasūtra* states:³³

```
The mind is the cause of the arising of gnosis (i.e. the gnoseological *buddha*);[43x94]  
Do not seek a *buddha* elsewhere!
```

Likewise, the *Hevajratantra* states:³⁴

```
Nowhere else in the spheres of the world
```

¹ Rong-zom-pa, *dKon mchod 'grel* (A, fol. 11a4–b1; B, p. 37.14–19). See also ALMOGI 2006: 463 (text) and 310–311 (translation).

² The Tibetan Bon religion, if regarded as de facto a form of Mahāyāna Buddhism, may be an exception (although it is said to have its own explanation of the Buddha Śākyamuni).

³² Klong-chen-pa Dri-med-'od-zer (1308–1364), *Yid bzhin mdzod 'grel* (vol. 1, p. 24.4–6): *de yang thog mtha’ med pa’i dus su mgon par byang chub pa’i mgon po ’di ni | chos kyi sku’i gnas skabs na gnyis su med pa’i ye shes de nyid ston pa kun tu bzang po zhes bya’o || longs spyod rdzogs pa sku’i gnas skabs na rigs Inga’i sangs rgyas zhes bya’o ’o || sprul pa sku’i gnas skabs na thub pa bcom ldan ’das zhes bya’o’o ||

³³ *Atyayajñānasūtra*, as cited by Prajñāsamudra in his *Atyayajñānasūtravyākhyāna* (P, fol. 208b8; D, fol. 173a6; S, vol. 67, p. 453.3–4):

```
sems ni ye shes ’byung ba’i rgyu ||  
sangs rgyas gzan du ma tshol cig ||
```

See also *ibid.* (P, fol. 208a8–b3; D, fol. 173a1–2; S, vol. 67, p. 452.6–11). The *Atyayajñānasūtra* itself does not seem to have survived.

³⁴ *Hevajratantra* 2.4.75:

```
na buddho labhyate ‘nyatra lokadhātuṣu kutracit |  
cittam eva hi sambuddho na buddho ‘nyatra darśitah ||
```

See also *ibid.* 2.4.69:

```
sattvā buddhā eva kim tu āgantukalāvṛtyāḥ |  
tasyāpakaśānaḥ sattvā buddhā eva na samśayaḥ ||
```

Cf. *ibid.* 2.4.73a: *abuddho nāsti sattvakaḥ.*
Can one obtain a buddha.
Mind itself is a perfect buddha;
No buddha has been exhibited elsewhere.
This idea is echoed also in the *Guhyagarbhatantra*, one of the most important tantras of the rNying-ma school.\textsuperscript{35}
A perfect buddha cannot be obtained
From anywhere else within the four times and ten directions.
Mind itself is a perfect buddha.
Do not seek a buddha somewhere else!

In short, as propagated in these and similar sources, mind is already a buddha (by ‘nature’); mind is the cause of a buddha (by ‘nurture’). Becoming a buddha means generating or unfolding a buddha from within, from one’s own mind.

3. Buddhist Soteriology

In order to make sense of Mahāyāna soteriology, according to which the highest salvific goal is Buddhahood, it is perhaps worthwhile to look at the basic tenets of Buddhist soteriology in general. We might question the wisdom of employing the term ‘soteriology’ in the Buddhist context, particularly if we recall its Greek etymological roots sōtēr (‘saviour’) and sōzein (‘to save’),\textsuperscript{36} and the possible connotations of the term used in theology. Here as elsewhere, however, we should, like Tibetan Buddhist exegetes and logicians,\textsuperscript{37} be aware of the limitations of etymology. Buddhism in general does not embrace the idea of an external saviour, but if we understand soteriology as a theory or plan of salvation, we cannot deny that it, like any other religion, does have its own such notions. There are a host of words used in Buddhism that more or less convey the meaning of salvation, such as release (mukti: grol ba), complete release (vimukti: nram par grol ba), deliverance (mokṣa: thar pa), complete deliverance (vimokṣa: nram par thar pa), awakening (bodhi: byang chub), complete awakening (saṃbodhi: rdzogs pa’i byang chub), perfect complete awakening (samyaksam bodhi: yang dag par rdzogs pa’i byang chub; abhisambodhi: mgon par rdzogs pa’i byang chub), emancipation (apavarga: byang grol), purification (vyavadiina: rnam par byang ba), cessation (niruddha: ‘gog pa), and extinction (nirvāṇa: mya ngan las ‘das pa) (i.e. of the fire of sansāra).

(a) Emetic and Etic Perceptions of Buddhism

Almost a century ago the famous Belgian Buddhologist Louis de La Vallée Poussin, even as he was aware of the risks of general definition, ventured to define Buddhism as ‘a discipline

\textsuperscript{35} *Guhyagarbhatantra* (P, fol. 121a5; D, fol. 123b2):
dus bshi phyogs bcu gang nas kyang ||
rdzogs pa’i sangs rgyas rnyed mi ‘gyur ||
sems nyid rdzogs pa’i sangs rgyas te ||
sangs rgyas gzhon na [nas D] ma tshol cig ||.
Cf. Dohāgīti 71 (SNELLGROVE 1954: 233); Kurukullākālpa 2.10:
cetasā sarvabuddhatvam cetasaśva vimucyate |
cetasā mokṣate bandhaśa cetasā muktimān bhavet ||.

\textsuperscript{36} Webster’s, s.vv. soteriology and soterial.

\textsuperscript{37} One Tibetan exegetic or hermeneutic maxim runs as follows: sgra bshad pa la khyab pa med || (lit. “There is no [logical] pervasion (khyab pa: vyāpī) in an etymological explanation (sgra bshad or nges tshig: nirukti) [of a word].” This means that in a debate or a dialogue the proponent or opponent cannot count on defending or refuting a thesis on the basis of the etymology of some given term, for etymologies are often inadequate as definitions.
of salvation,' a definition obviously approved by a host of other prominent Buddhologists. Indeed, the various notions of Buddhology and Buddhist physiology, psychology, ontology, epistemology, gnoseology, axiology, cosmogony, cosmology, mythology, and eschatology (here in the sense of the belief concerning the ultimate destiny of the external and internal worlds—the bhājanaloka ('receptacle world') and sattvaloka ('world of sentient beings')—in Buddhism) ultimately make sense only in the context of Buddhist soteriology. In particular, there seems to be no way to understand the idea of becoming a buddha without setting it within the context of Mahāyāna soteriology, which in turn revolves around the bodhicitta concept.

If we were to ask Buddhist scholars of various traditions to explain the teachings of the Buddha (buddhasāsana: sangs rgyas kyi bstan pa) in a nutshell (i.e. just in one verse), we would probably hear the following verse recited (transmitted with slight variations in the Udānavarga, Prātimokṣasūtra, and Dharmapada):

The avoidance of all unwholesome deeds,
The accumulation of all wholesome deeds,
The purification of one's own mind—
This is the doctrine of the Buddha.

Although the verse occurs in texts representing a rather conservative strand of Buddhism, I would argue that it is the foundation and nucleus of tantric and non-tantric Mahāyāna spirituality as well. The sublime doctrine or the doctrine of the sublime ones, or even the eternally (valid) doctrine (saddharma: dam pa'i chos), as Buddhist teachings are often described, is primarily defined by its ability to alleviate the suffering and discontent of sentient beings and purify their intellectual-emotional defilements, as the following verse states:

That which eliminates all suffering or discontent (duḥkha) and all obscurations (āvarana) Is the sublime doctrine (saddharma).

38 LA VALLEE POUSIN 1917: 1; cf. DE JONG 1979: 50: "La Vallée Poussin has defined Buddhism as Nirvāna-mysticism. No better definition can be given." FRAUWALLNER 1956: 1: "The Buddha himself had admittedly taught exclusively a salvific doctrine, and in regard to the philosophical questions of his time he hardly took any stance" (Der Buddha selbst hatte zwar ausschließlich eine Erlösungslehre verkündet und zu den philosophischen Fragen seiner Zeit kaum Stellung genommen). See also ibid. 9; STCHERBATSKY 1932: 6: "It (i.e. Buddhism) is a doctrine of salvation."

39 It has been pointed that "the overriding focus of Buddhist doctrine in soteriological concerns ultimately brought even its eschatology within the purview of soteriology; and it is apparently for this reason that the demise of the dharma was defined in terms of the nirvedhabhiṣṇa-s" (BUSWELL 1997: 598).

40 Udānavarga 28.1:

sarvapāpasāyatānāṃ kuśalaṣaṃpāgam adhigradhe
svacittaparyavaddanam etad buddhaya sāsanam ||

For an English translation of the corresponding verse from the Prātimokṣasūtra of the Mahāsāṃghikas and Mūlasarvāstivādins, see PREBISH 1975: 110–111. The source of the verse is identified in the Ita phreng attributed to Padmasambhava as the Vinaya, and is cited there as a scriptural source justifying the austerities (tapas: dka' thub) of śrāvakas. For Rong-zom-pa's commentary on the verse, see his Ita 'grel (A, fols. 262b4–264a1; B, pp. 347.5–348.12). For the Dharmapada version of the verse, see, for example, GETHIN 2004b: 190. The popularity of the verse makes it impossible to indicate all the primary and secondary sources.

41 An unidentified verse (cited, for example, in the Bu stonchos 'byung, p. 11.15–16; Co ne bstan dkar, p. 39.5–6):

sdug bsdngal dag ni thams cad dang ||
sgrib kun sel byed dam pa'i chos ||

Śākyaprabha in his *Prabhāvati,* a commentary on the *Mūlasarvāstivādīśrāmanerakārika,* describes the Buddha’s teachings as follows:43

The wise ones realise that [those teachings]
That are well endowed, [namely,] with three seals,44 teach three trainings (śiksātraya),
And are wholesome in the beginning, middle, and end
Are words of the Buddha (buddhavacana).

According to the Madhyamaka scholar Āryadeva, the doctrines of the Buddha are in sum the doctrine of non-violence (ahimsā: 'the ba med pa) and of emptiness (śūnyatā: stong pa nyid), which, according to Candrakīrti are meant to lead one to the attainment of a higher destination (svarga: mtho ris; sugati: bde 'gro) and (final) emancipation (apavarga: byang grol), respectively.46 Tantric Mahāyāna scriptures, such as the *Dākinīvajrapaṇḍaratantra,* seem to have their own perception of the Buddhist doctrine.47

The classification of saddharmā under two headings, scriptural (āgama: lung) and realisation (adhigama: rtogs pa), is witnessed in *Abhidharmakosa* 8.39ab, which is a locus classicus for any Tibetan Buddhist scholar dealing with the theme.48 According to the *Ratnagotravibhāgavyākhyā,* ascribed to Asanga by the Tibetan tradition, the (Buddhist) doctrine is of two kinds, namely, the doctrine of instruction (deśanādharma: bstan pa'i chos)

---

42 A Sanskrit manuscript of the *Prabhāvati* is reported to be extant (MARTIN 2006, s.v. Śākyaprabha).

43 Śākyaprabha, *Prabhāvati* (P, fol. 188b2–3; D, fol. 161b5; S, vol. 93, pp. 417.21–418.2)

44 The ‘three seals’ alluded to here are: (1) All phenomena are characterised by the absence of a self (nairūtmya). (2) All conditioned phenomena are momentary. (3) Nirvāṇa is characterised by quiescence. See the *Prabhāvati* (omitted in P; D, fol. 161b3; S, vol. 93, p. 417.15–17):

   chos rnam thams cad bdag med de ||
   'dus byas thams cad skad cig ma ||
   mya ngan 'das zhi de dag ni ||
   chos kyi phyag rgya mtshan nyid gsum ||

   dharmaṁ samāsaṁ 'himśāṁ vartayanti tathāgataḥ |
   śunyatāṁ eva nirvāṇaṁ kevalaṁ tad tathāyam ||

47 See, for example, the *Dākinīvajrapaṇḍaratantra* (cited in DASGUPTA 1958: 93, n. 2 according to the Advayavajravasamgraha):

   śunyatākaraṇaṁ yatra cittam prabhāvyate |
   so hi buddhasya dharmasya saṃghasyaऽ hi deśanā ||

For the Tibetan translation of the verse, see the *Dākinīvajrapaṇḍaratantra* (T, fol. 184b2; D, fol. 54b7–55a1):

   stong pa snying rje tha dad med ||
   gang du sms la rab bsgom pa ||
   'di ni sngaṅ rgyas chos dang ni ||
   dge 'dun gyi yang bstan pa'o ||

48 *Abhidharmakosa* 8.39ab: saddharmo dvividhaḥ śāstrur āgamādhigamātmakah |. See also the *Abhidharmakokshabhāṣya* (p. 459.10): tatra gamaḥ sūtraśvābhāvdhīkāmaḥ adhigama bodhipakṣyāt ity esa dvividhah saddharmah |. For an English translation, see PRUDEN 1988–90: 1281. The two types of dharma are also briefly described in SEYFORT RUEGG 2004: 29.
and the doctrine of realisation (adhipadharma: rtags pa'i chos). The two, therefore, correspond to the theoretical and practical aspects of Buddhist soteriology. This distinction can be useful for relieving or reducing the tension that seems to exist between theory-oriented and praxis-oriented Buddhists in real life. If the āgama were self-sufficient adhipa would be superfluous, and vice versa, but for Buddhists no saddhā can be said to be superfluous.

Although theoretical learning is never conceived of as a substitute for (or alternative to) practical realisation, the former is certainly a prerequisite for the latter. Being unduly indisposed to one of the two may lead to the shunning of the saddhā, and thereby to retracting the commitment one made while taking refuge in the Three Jewels, and also to violating the bodhisattva vow, which from the Buddhist perspective would be like a patient shunning life-saving medicine. We may regard Buddhism as a philosophy or religion (as a religion of reason or of faith; of intellectualism or of mysticism), but one thing seems to be clear: it is in the end, from both emic and etic perspectives, a discipline meant to lead one to salvation. Because of its extreme emphasis on the role of the mind, it may justifiably also be called a religion of the mind.

(b) The Fundamental Features of Buddhist Soteriology

The nature of salvation and those for whose sake one is supposed to seek it is what divides Mahāyāna and non-Mahāyāna. Generally speaking, the Mahāyāna notion of salvation is universal in its scope, while the non-Mahāyāna notion is personal, although both aspects of universality and individuality of salvation may be found in both traditions. Even in tantric and non-tantric Mahāyāna, one’s salvific breakthrough needs to be made by oneself (regardless of the degree of others’ help) and is thus individualistic; and even in the non-Mahāyāna tradition the prospects of salvation are, in principle, not limited in regard to time, place, or person (except perhaps according to the agotrāka theory of the Yogācāra school). The following verse represents the fundamental outlook of Buddhist soteriology.

49 Ratnagotravibhāgavyākhya (pp. 18.14–19.1): dvividho dharmah | deśanādharmo 'dhigamadharmas ca | tatra deśanādharmah sūtrādideśanāyā nāmapadavyājanakāyasyaṃgrhiṭṭaḥ | sa ca mārgābhīsaṃyavaparyavasānāvatī kopalama ity uktah | adhipadharma hetuphalabhedena dvividhāḥ | yad uta mārgasatyam nirodhasatyam ca |. For an English translation, see TAKASAKI 1966: 182.

50 On the difficulty of employing the term ‘mysticism’ in the Buddhist context, see SEYFORT RUEGG 2004: 58.

51 See, for example, Catuḥsataka 12.19 (LANG 1986: 116; TILLEMANS 1990: vol. 2, p. 51):

shā kya gos med bram ze ste ||
gsum po rnam kyi'ang chos yid dang ||
mig dang ma ba yis 'dzin pa ||
de'i phyir thub pa'i gzhung lugs phra ||.

For an English translation, see LANG 1986: 116. See also TILLEMANS 1990: vol. 1, pp. 130–131. Cf. Suhrlekha II.7c:

khyod kyi thugs dul mdzad cig bcom ldan gyis ||
sems ni chos kyi rtsa ba lags par gsungs ||.

For English translations, see JAMSPAL 1978: 64 and KAWAMURA 1975: 88.

52 See the verse cited in Prajñāvarman’s Udānavigavivekha (P, vol. du, fol. 83a7–8; D, vol. tu, fol. 72b5–6; S, vol. 83, p. 188.13–15; BALK 1984: 98):

thub rnamz chu yis sdig pa 'khru bar mi mdzad cing ||
'gro ba'i sdug bsngal phyag gis kyang ni sel mi mdzad ||
bdag gis gzhon la rtogs [rtog DC] pa spos pa ma yin te ||
chos nyid zhi ba gsung rabs tu sgrub pa yin.||

This verse is often cited, though with slight variations. See, for example, the mChims chen (p. 8.23–25), Lam rim chen mo (fol. 24b1–2), and sPyod 'jug tshig 'grel (p. 245.15–17). The mChims chen cites Udānaviga 12.10 preceded by the phrase ‘from the Udānaviga’ (ched du brjod pa'i tshoms las). This is followed by the citation of our verse which is introduced by the phrase ‘in the commentary on it’ (de'i 'grel par). ‘The commentary on it’
Sages (muni: thub pa) neither cleanse evil deeds (pāpa: sdig pa) with water, Nor do [they] eliminate the sufferings of living beings manually, Nor do they transfer [their] realisation to others. [They] bring about [salvific release] by teaching [them] true reality, which is characterised by quiescence.

The Buddha is said to have taught: the means of salvific release; [Your] salvific release depends on yourselves. Endeavour accordingly!

That one is primarily responsible for one’s salvation is made clear also by Nāgārjuna. In the Tibetan Buddhist tradition, it is said that a thousand buddhas are helpless when it comes to rescuing one sentient being from falling into lower existences. That the saddharma takes clear precedence in Buddhism over persons, including even buddhas, bodhisattvas, or gurus, is perhaps crucial for understanding the spirit of Buddhist soteriology. It is, as the Dharmasamgitiśūtra states, not sentient beings who rescue or protect the Dharma but the Dharma that protects them.

The Buddhist notion of curatio et salvatio (‘healing and salvation’) in the broadest sense of the term is a fascinating theme which cannot be discussed here. What may be merely stated in general is that the saddharma has often been seen as medicine, and that as with any medication, there are risks involved. Probably the tenth-century Tibetan teacher sGam-po-pa had this in mind when he stated:

Dharma, if not practised in conformance with the Dharma, could be a cause of [one’s] going to lower destinations.

And the Tibetan scholar dPal-sprul ’Jigs-med-chos-kyi-dbang-po (1808–1887) must have been thinking of the people’s growing resistance to Dharma when he wrote the following:

evidently does not mean Prajñāvarman’s commentary on that specific verse (i.e. Udānavarga 12.10), as has been understood in LAMRM TRANSLATION COMMITTEE 2000: 384, n. 101, but rather the Udānavarga commentary in general, for the pertinent verse can be found in the commentary on the Anityavarga (i.e. Udānavarga 1) and not the Mārgavarga (i.e. Udānavarga 12).

See also the sPyod ‘jug ishig ‘grel (p. 245.13–14) by mKhan-po Kun-bzang-dpal-ldan or Kun-dpal (1872–1943). Cf. LA VALLEE POUSSIN 1917: 155: “Buddhas do not liberate their fellow creatures. A Buddha is only a preacher, and he teaches men how to liberate themselves.”

The adage runs as follows: sens can geig ngan song du ‘gro ba la sangs rgyas stong yang ‘u thug. I have not been able to trace the source of this statement. However, the idea itself can be found in Gro-lung-pa’s bsTan rim chen mo (fols. 5a1, 41b5–6).

TheResolve to Become a Buddha

53 See the famous (but not yet identified) citation in Klong-chen-pa’s Shing rta chen po (vol. 1, p. 261.1):

ngas ni khyed la thar pa ‘i thabs bstan gyis ||
thar pa rang la rag las brtson par gyis ||
See also the sPyod ‘jug ishig ‘grel (p. 245.13–14) by mKhan-po Kun-bzang-dpal-ldan or Kun-dpal (1872–1943). Cf. LA VALLEE POUSSIN 1917: 155: “Buddhas do not liberate their fellow creatures. A Buddha is only a preacher, and he teaches men how to liberate themselves.”

54 For English translations, see JAMSPAL 1978: 31 and KAWAMURA 1975: 48.

55 The adage runs as follows: sens can geig ngan song du ‘gro ba la sangs rgyas stong yang ‘u thug. I have not been able to trace the source of this statement. However, the idea itself can be found in Gro-lung-pa’s bsTan rim chen mo (fols. 5a1, 41b5–6).

57 The adage runs as follows: sens can geig ngan song du ‘gro ba la sangs rgyas stong yang ‘u thug. I have not been able to trace the source of this statement. However, the idea itself can be found in Gro-lung-pa’s bsTan rim chen mo (fols. 5a1, 41b5–6).

A sinner (or malefactor) can be disciplined by the Dharma, but one who is resistant to the Dharma cannot be disciplined by the Dharma.

A hardened [piece of leather] can be made supple with oil, but a butter [container made of] leather cannot be made supple with oil.

(c) The Mahāyāna Perception of the Quintessence of Buddhist Teachings

In what has all but become a cliché, several tantric and non-tantric Mahāyāna sources state that 84,000 sets of doctrine (caturaśīṭasahasradharmaskandha: chos kyi phung po bryaṅ khrī bzhi stong) have been taught by the Buddha as antidotes for the 84,000 intellectual-emotional defilements (kleśa: nyon mong pa)—21,000 sets as antidotes for desire (rāga: 'dod chags), 21,000 for hatred (dveṣa: zhe sdang), 21,000 for disorientation (moha: gti mug), and 21,000 for counteracting all three equally. This idea can be found, for example, in the Akṣayamatinirdēṣaśūtra, 59 *Guhyagarbhatantra* (to which we shall return briefly in chapter five), 60 and Kun byed rgyal po, a rdzogs-chen tantra. 61 According to dPal-sprul, the quintessence of all these is bodhicitta. 62

59 The Akṣayamatinirdēṣaśūtra is cited by sKa-ba dPal-brtsegs in his gSung Rab rin po che (P, fol. 143a4; D, fol. 239a6; S, vol. 115, p. 652.19–11): 'dod chags la [om. PN] spongodb pa nyo khrī chid stong de bzhin du zhe sdang dang [dād P] gti mug dang cha mnyam la spyod pa st | spyir bryaṅ khrī bzhī stong ngo |]. The number 84,000 here refers to types of persons (gang zag). Cf. ibid. (P, fol. 143a2; D, fol. 239a4; S, vol. 115, p. 652.3–4); mdo na chos kyi phung po bryaṅ khrī bzhī stong bstan pa ni tshig bru zhes bya'o |]. See also the Vīkurvānārājapariṇācāśūtra (T, fol. 351b1–7; D, fol. 199a5–b2) and the Madhyamakāvatārabhāṣya (p. 332.1–3). The Dhāraniśvararājapariṇācāśūtra is cited in the latter. Cf. the Tathāgatācintyayuhyainirdēṣaśūtra (T, fol. 197b3–7; D, fol. 134a5–7), which states that the number 84,000 was taught by the Buddha only provisionally and that in fact there is no limit.

60 *Guhyagarbhātantra* (P, fol. 111a3–5; D, fol. 113a3–4).

61 Kun byed rgyal po (P, fol. 15b3–6; D, fol. 15b5–16a1): 'dod chags zhe sdang gti mug gsum byung st | de 'dul ba yi gnyen por gsums pa ni | chos kyi sgo mo bryaṅ khrī bzhī stong st | ... 'dod chags zhe sdang gti mug rnam gsum byung | de dag 'dul ba'i gnyen por sde snod gsum | 'dod chags 'dul ba'i gnyen por gsums pa ni | 'dul ba nyo khrī chid stong gsums pa yin | gti mug 'dul ba'i gnyen por gsums pa ni | mdo sde'i sde snod nyo khrī chid stong gsums | zhe sdang 'dul ba'i gnyen por gsums pa ni | mgon pa'i sde snod nyo khrī chid stong gsums | dug gsum cha mnyam 'dul ba'i gnyen po ru | sde snod gsum las nyo khrī chid stong gsums | spyi ru bryaṅ khrī bzhī stong gsums pa yang | dug gsum gnyen [snyen P] po 'dul phyir gsum pa yin |].

The expression caturaśīṭasahasradharmaskandha can be found elsewhere in tantric and non-tantric Mahāyāna sources. See, for example, TSD, s.v. chos kyi phung po, where the Aṣṭasāhasrīkā and VīMaḷaprabhā are referred to. In the Abhidharmakosa, however, the number of dharmakṣandaḥ is put at 80,000. See Abhidharmakośa 1.25ab: dharmakṣandaḥasahasrāṇī yānī aṣṭīśā jaggā munīḥ | ibid. 1.26cd: caritapratipikṣas tu dharmakṣandhaḥ naurṇīḥ | Abhidharmakośabhāṣya (p. 17.18–19): evam tu vartenayant aṣṭīśā caritasaḥasrāṇī sarvānām | rāgaḍevaḥomāmānādīcaritabhedaḥaḥ | teṣām pratikṣeṇa bhagavatāśīr dharmakṣandhasahasrāṇy uktaṃ |. For an English translation, see PRUDEN (1988–90): 86–87.

62 Kun bzang bla ma'i zhal lung (fol. 171a4–b2): de lta bu'i byang chub kyi sems bskyed pa 'di ni | rgyal bas chos kyi sgo mo bryaṅ khrī bzhī stong gsums pa thams kyi snying po dril drel ba | yod na des chog | med na thabs 'chags kyi = chag gi gdams pa | nār-bryaṅ sman gcig | sman dkar po chig thub lta bu yin | gezhan tshogs baags pa | sgrīb pa sbyang ba | la bsgom pa | sngags bzla ba la sogs chos nyams su len pa thams cad kyang byang chub kyi sems yid bzhin gyi nor bu 'di rgyud la skye ba'ti basts tsam du nyams su len pa yin gyi |
This generation of bodhicitta is the crème de la crème of 84,000 salvific means or practices (chos kyi sgo mo) taught by the Victorious One. It is an instruction the presence of which [causes the bodhisattva practice to] be self-sufficient, [and] the absence of which [causes it to] be impoverished. It is like a panacea, a single medicine for a hundred ills. All other spiritual practices, such as the gathering of [the two] accumulations (i.e. punyasamabhāra and jñānasamabhāra), [those aimed at] the purification of obscurations, meditation on deities, and recitation of mantras, are carried out simply as means of [encouraging] the arising of this wish-fulfilling jewel, bodhicitta, in [one’s mental] continuum. Without [this] reliance on bodhicitta, none of the individual paths could [bring about] the attainment of the rank of perfect Buddhahood. But if bodhicitta has arisen in [one’s mental] continuum, whatever spiritual practice one engages in will cause the rank of perfect Buddhahood to be attained. Indeed bodhicitta is regarded in several Mahāyāna scriptures as the causa sine qua non of becoming a buddha, as will become clearer in chapter five. The Kuśalamūlasamparigrahahūtra, for instance, states:

O Ajita, it is as follows: For instance, without butter (ghṛta) the essence of melted butter (ghṛtamānda) would cease to exist. Similarly, O Ajita, without the generation of bodhicitta a tathāgata would not come into being.

According to Śāntideva, the doctrine of bodhicitta is the fresh butter (navanīta: mar gyi nying khu) extracted by churning the (thickened) milk of saddharmā (saddharmakṣīra: damchos ‘o ma).

(d) Buddhist Soteriological Models and Goals

In chapter five I discuss the Mahāyāna view of the various models of mundane and supramundane vehicles or paths (yāna: theg pa) that are said to lead sentient beings to the desired non-soteriological and soteriological goals. There I also point out that the diversity of soteriological models and goals are conceived of as being due to the diversity of sentient beings’ spiritual and non-spiritual dispositions. Atiśa’s Bodhipathapradīpa and Tsong-kha-pa’s Lam rim chen mo clearly delineate three types of persons (skyes bu gsum) and their corresponding soteriological and non-soteriological aspirations—a scheme well grounded in earlier Indian sources. The most modest type of person merely aspires to secure a happy future state of existence in samsāra; the mediocre type aspires to depart from samsāra (or...
attain the state of nirvāṇa) as soon as possible; and the magnificent type aspires to become a buddha for the benefit of oneself and others by striking a delicate and precarious balance between samsāra and nirvāṇa, a balancing act that a bodhisattva performs on a single pivotal point, namely, bodhicitta, characterised by upāya (or karunā) and prajñā.

bSod-nams-rtsé-mo (1142–1182) in his rGyud sde spyi rnam presents four Buddhist soteriological models (tshul) according to Mahāyāna sources, namely, those that propose (1) three soteriological paths and three soteriological goals, (2) one soteriological path and three soteriological goals, (3) one soteriological path and one soteriological goal, and (4) three soteriological paths and one soteriological goal. Glo-bo-mkhan-chen bSod-nams-lhun-grub (1456–1532), in setting forth the exegetical methods (bshad thabs) he employs upon Sa-skya Paṇḍita Kun-dga’-rgyal-mtshan’s (1182–1251) Thub pa dgongs gsal, provides some additional information on systems and scriptures that propose these four soteriological models:

(1) According to the three-path-and-three-goal model, there are three separate (and independent) paths, namely, Śrāvakayāna, Pratyekabuddhayāna, and Bodhisattvayāna/Buddhayāna (which we shall re-encounter in chapter five), and three separate corresponding soteriological goals, namely, śrāvakabodhi, pratyekabodhi, and buddhabodhi (samyaksambodhi, which should be sought after by three types of persons (those endowed with the spiritual disposition of a śrāvaka, pratyekabuddha, and bodhisattva, respectively). A person whose spiritual disposition is not determined or fixed (aniyatagotraka) may try treading one of the paths. According to this model, for someone with no spiritual disposition (agotraka), trying to tread any of the three soteriological paths would be a labour lost. This soteriological model is said to have been advocated by Yogācāra teachers, such as Asaṅga, on the inspiration of such scriptures as the Saṁdhinirmocana-sūtra.

(2) The one-path-and-three-goal model has the seekers of salvation passing through a single gateway in order to reach their respective soteriological goals. This single passage is termed the gate of emancipation without a second (advitiya-samavāra: gnyis pa med pa’i zhi sgo), usually meant in the sense of direct meditative insight into true reality, and this latter often equated with the non-self or absence of self (nairatmya). For Mañjuśrīmitra, as we shall see in chapter five, bodhicitta (in its ontological sense) is itself de facto an advitiya-samavāra. This model is said to have been accepted by Candrakīrti and other proponents of Madhyamaka (i.e. Prāsaṅgika-Madhyamaka) on the basis of the explicit purport of the Prajñāpāramitā scriptures.

(3) The position and proponents of the one-path-and-one-goal model remain obscure. bSod-nams-rtsé-mo does not identify any of its advocates, although he himself holds that it and the fourth model are similar in essence (ngo bo mtshungs pa) and tenable (’thad). Glo-bo-mkhan-chen reports that according to earlier teachers (snga rabs pa), this model was proposed by Byang-chub-sems-dpa’-gcig-pur-smra-ba in line with scriptures such as the Ākāśagarbha-sūtra. Although Rong-zom-pa did not discuss the soteriological model of the

67 bSod-nams-rtsé-mo, rGyud sde spyi rnam (p. 15.1–2); spyi don gsum pa khyad par du ’phags pa de la dbye na bzhi ste | lam gsum la ’bras bu gsum ’dod pa dang | lam gcig la ’bras bu gsum ’dod pa dang | lam gcig la ’bras bu gcig ’dod pa dang | lam gsum la ’bras bu gcig ’dod pa’o ||.

68 Glo-bo-mkhan-chen, bShad thabs lam bzang (pp. 199.18–200.15).

69 See TSD, s.vv. nyan thos kyi byang chub, rang sangs rgyas kyi byang chub, and sangs rgyas kyi byang chub.

70 See below n. 95.

71 rGyud sde spyi rnam (pp. 15.2–16.1).
gCig-pur-smra-ba (*Ekatvaviida) school, he did explain some of its fundamental tenets. Based on his explanation, we can perhaps assume that this school would have compared sentient beings to gold in its unrefined state and buddhas to gold in its refined state, and pointed out they are actually, therefore, two forms of the same element. There is thus only one path, namely, the process of purification; and one goal, namely, the purified state.

(4) The three-path-and-one-goal model is said to have been proposed by teachers such as Virūpa on the authority of scriptures such as the Saddharmapundarikasūtra. One might get the impression that this model proposes three equally valid (but separate) paths to the same goal—like three ways of getting to the top of a triangular pyramid. Yet what is actually intended here is the soteriological model of the Tathāgatagarbha school: A śrāvaka and a pratyekabuddha would walk their respective paths or ride their respective vehicles up until a certain point, but finally they, too, will have to join the bodhisattvas and proceed on until they all become buddhas.

(e) Two Mahāyāna Soteriological Models of Becoming a Buddha

The type of buddha presupposed by a system or scripture determines the model followed for becoming a buddha. One can find several less common Mahāyāna methods of becoming a buddha (some of them closely related or even overlapping), particularly in tantric scriptures—such as those of paying homage or offering to the buddhas, coming into contact with mantras, visualising buddhas through the samādhi of a buddha, uniting with all buddhas.

72 See the Theg chen tshul 'jug (A, fols. 27b2–28a5, 37b1–4; B, pp. 445.16–446.11, 456.10–19), where some of the positions of gCig-pur-smra-ba are described. The gCig-pur-smra-ba, according to these descriptions, is obviously a certain school of Mahāyāna (probably an offshoot of Yogācāra) thought, which postulates a single cognitive element (shes pa'i khams gcig) or a single cognitive nature (shes pa'i ngo bo nyid gcig) and is contrasted with what one might call the mainstream Yogācāra school, which postulates eight perceptual-conceptual apparatuses (rnam par shes pa ishogs brgyad).

73 In this regard, it is worth considering the attempts made by traditional Chinese Buddhist scholars to classify the most important Mahāyāna scriptures according to doctrinal hierarchy or profundity, and in terms of soteriological models of simultaneism or gradualism as presented in KAN'NO 2000. A scheme called the ‘five-period classification’ (wushi jiaopan) was devised during the period of the North-South dynasties in China (very likely by Huiguan, a disciple of Kumārajīva). According to this classification, for example, the Saddharmapundarikasūtra was accorded a higher status than the Prajñāpāramitā scriptures, whereas it was subordinated to the Avatamsakaśūtra and Mahāparinirvānasūtra. The Avatamsakaśūtra is said to propose a soteriology of simultaneism, and the other works a soteriology of gradualism. This scheme was later refuted by the so-called Three Great Masters of the Sui, namely, Jingying Huiyuan (523–592), Zhiyi (538–598), and Jizang (549–623), according to whom Mahāyāna scriptures do not differ in how they reveal ultimate reality. See also the small Zen story narrated by Deninger-Polzer in BSTEH 2000: 273 (cf. 280), which seems to encapsulate the soteriological model followed in Zen Buddhism.

74 Kurukullākalpa 2.7:
buddehiyō manasā ādī buddhaḥvaphalākāṃśīna | anena sarvabuddhatvam vidyādharah sāmaṇṭe ||

See also the Tattvasamgrahasūtra (HORIUCHI 1983: 290):
sarvabuddhamahāpunyatāvāvākittavajrajam | anumodanāpiyānā buddhatvam kṣipram āpnuyāt ||
The Tibetan translation (T, fol. 354b2–3; D, fol. 44b4) reads:
sangs rgyas thams cad bsod nams che ||
sku gsung thugs ni [khyi T] 'do rje skyes ||
rjes su yi rang bas mchod na ||
myur du sangs rgyas 'thob [thob T] par 'gyur ||.

75 Kurukullākalpa 2.47:
siddhe sūte ca saṃsāṛṣṭo yathā svarṇo bhaven nidhiḥ | siddhamantrena saṃsāṛṣṭo buddhakāyā hi mantriṇaḥ ||
(and thereby becoming equal with them),\textsuperscript{77} and practising \textit{buddha} recollection (\textit{buddhānusmṛti}).\textsuperscript{78} The various models can all be perhaps subsumed under one of two models, what I call the ‘generation model’ and the ‘revelation model,’ which, borrowing from Seyfort Ruegg, could also be termed the ‘nurture model’ and the ‘nature model,’ respectively.\textsuperscript{79} Refuting theories that are based on one soteriological model by appealing to presuppositions of another has been one of the major methodological problems within the Tibetan Buddhist traditions. Recognising the fact that different theories presuppose different soteriological models may help us to better our understanding of the controversies surrounding the issues of gradualism (\textit{rim gyis pa}) versus simultaneism (\textit{cig char ba})\textsuperscript{80} and intrinsic (\textit{rang stong}) versus extrinsic emptiness (\textit{gzhan stong})—issues that are crucial to Indo-Tibetan Buddhism.

According to the generation model, becoming a \textit{buddha} means generating the two (or more) \textit{buddha} bodies (\textit{kāya}) by means of the so-called two accumulations, namely, the accumulation of beneficial resources (\textit{punyasaṃbhāra}) and the accumulation of gnosis (\textit{jñānasambhāra}). The former is said to bring forth the physical bodies (\textit{rupakāya}), and the latter the body of true reality (\textit{dharmaṇākāya}). Tibetan Buddhist scholars often cite Nāgārjuna to authenticate this idea.\textsuperscript{81} Usually a \textit{buddha} (or perhaps, here, the Buddha) is regarded as the

\textsuperscript{76} Tatvagasamgrahasūtra (HORIUCHI 1983: 138):
\begin{quote}
\textit{buddhabimbamayam sarvam adhimucya khadhātuṣu} | \\
\textit{\textquoteleft sarvabuddhasādhir̥ tu\textquoteright} buddhatvāya bhavitayati |. \*Perhaps read \\textquoteleft dhis tu?\right\}
\end{quote}

The Tibetan translation (T, fol. 335a1–2; D, fol. 29b2) reads:
\begin{quote}
\textit{nam mkha\textquoteleft i abyings [dbyibs T] ni thams cad du ||}
\textit{sangs rgyas gzugs su dmigs nas ni ||}
\textit{sangs rgyas kun gyi ting \textquoteleft dzin las ||}
\textit{sangs rgyas nyid du \textquoteleft grub par \textquoteleft gyur ||.}
\end{quote}

\textsuperscript{77} Buddhāsāyogatantra-1 (T, fol. 289b3–4; D, fol. 188b4–5):
\begin{quote}
\textit{sangs rgyas kun dang mnyam sbyor bas ||}
\textit{sangs rgyas kun dang mnyam par \textquoteleft gyur ||}
\textit{sangs rgyas kun dang mnyam pas na ||}
\textit{sangs rgyas thams cad rab tu \textquoteleft grub \textquoteleft gyur T ||.}
\end{quote}

See also ibid. (T, fol. 294b1–2; D, fol. 192b2). For an explanation of this verse, see Rong-zom-pa’s \textit{mNyam sbyor \textquoteright grel pa} (A, fol. 140a4–b6; B, pp. 613.10–614.4).

\textsuperscript{78} Tatvagasamgrahasūtra (HORIUCHI 1983: 149): \textit{buddhānusmṛtisāmsiddhā śīghram buddhatvam āpnuyāt ||}. The Tibetan translation (T, fol. 336b1; D, fol. 30b4–5) reads:
\begin{quote}
\textit{sangs rgyas rjes su dran grub pa ||}
\textit{sangs rgyas nyid du myur du \textquoteleft gyur ||.}
\end{quote}

\textsuperscript{79} Note that only the terms ‘nurture’ and ‘nature’ (i.e. without the word ‘model’) are employed by him (SEYFORT RUEGG 1989: 3).

\textsuperscript{80} For studies on the sudden and gradual approaches to awakening in Tibetan Buddhism, see SEYFORT RUEGG 1989; JACKSON 1994; VAN SCHAIK 2004: 11–19; 71–127. For discussions of the same topic in the context of Chinese Buddhism, see GREGORY 1987.

\textsuperscript{81} Ratnāvalī 3.12–13 (no Sanskrit text extant):
\begin{quote}
\textit{sangs rgyas rnam kyi gzugs sku ni ||}
\textit{bsod nams tshogs las \textquoteleft byung ba ste ||}
\textit{chos kyi sku ni mdor bsdu na ||}
\textit{rgyal po ye shes tshogs las \textquoteleft khrungs ||}

The Resolve to Become a Buddha

father of the bodhisattvas (piṭā bodhisattvānām: byang chub sems dpa’ rnam kyi yab), and a bodhisattva as a buddha’s son or offspring (jinaputra: rgyal ba’i sras; jināṅkura: rgyal ba’i myu gu; buddhātmajaj buddhaputra: sangs rgyas kyi sras). In contrast to a śrāvaka or a pratyekabuddha, who are sometimes pejoratively referred to as the buddha’s illegitimate sons, a bodhisattva is regarded as a buddha’s legitimate son (jinaurasa: rgyal ba’i thugs kyi sras). Occasionally, however, a buddha is said to be born from a bodhisattva. It is also worth recollecting here that in the Prajñāpāramitā literature, Prajñāpāramitā herself is regarded as the mother of all buddhas (jinajanani: rgyal ba’i yum) and other Buddhist saints.

The revelation model is based on the presupposition that sentient beings are by nature buddhas and that the spiritual practices such as those included in the two accumulations merely serve to reveal their true nature. Under this model, the distinctions among a normal sattva, bodhisattva, and (anachronistically) vajrasattva (i.e. buddha) are not essential ones, but ones that are based merely on the absence or extent of adventitious impurities (āgantukamaśā: glo bur gyi dri ma).

82 At what juncture or stage a person can be called a rgyal ba’i sras (or bodhisattva), that is, the rgyal ba’i sras threshold (rgyal sras kyi sras mtehams), is a contested issue in Tibet. Sāntideva (Bodhicaryāvatāra 1.9; CROSBY & SKILTON 1995: 5-6) and others take the position that one is born into the Sugata’s family the very first moment one generates bodhicitta, even though one has yet to attain the path of seeing (darśanamārga). According to another school of thought represented by Candrākīrti (Madhyamakāvatāra 1.5cd), however, a person can become a bodhisattva only upon reaching the darśanamārga. Tibetan exegetes have attempted to reconcile the two positions. One way is to assume that Sāntideva was employing the conventional bodhicitta as the criterion for Bodhisattvahood, whereas Candrākīrti absolute bodhicitta. Interestingly, these two (apparently) divergent criteria had already been observed (and even harmonised) by Rong-zom-pa, who also explained that in the tantric system a person obtains the appellation bodhisattva, whereas the bodhicitta, even though one has yet to attain the path of seeing (darśanamārga).

83 The revelation model is propagated by specific strands of Mahāyāna, such as the Tathāgatagarbha tradition, and by most Vajrayāna systems. The question as to which model the Madhyamaka school follows would be answered differently by different Tibetan Madhyamaka commentators. These two soteriological models were recognised in Tibet already in the eleventh century, for example, by Rong-zom-pa. He himself followed the revelation model, but did not regard it as necessarily contradictory to the

84 See TSD, s.vv. sras, sras po, and sangs rgyas sras.

85 Mahāvyutpatti, no. 641. See also TSD, s.v. thugs kyi sras.

86 Candrākīrti (Madhyamakāvatārābhāṣya, pp. 4.10-6.6) resorts to logical reasoning (yukti) and authoritative scriptures (āgama) to establish that a buddha arises from a bodhisattva.

87 See, for example, the Abhisamayālaṃkāravivṛtti (p. 6.2). Cf. the opening verse of the Abhisamayālaṃkāra.

88 See, for example, Ratnagotravibhāga 1.47: aśuddha ‘suddhaśuddho ‘tha suviśuddho yathākramam | sattvadhātār iti prokto bodhisattvas tathāgataḥ ||

For an English translation, see TAKASAKI 1966: 230-231.
generation model. In commenting on the generation of bodhicitta in the second chapter of the *Guhyagarbhatantra*, Rong-zom-pa explains that although sentient beings are in reality buddhas, they do not realise it, and hence need to generate the two kinds of bodhicitta. Nonetheless, aware of the logic that if something is already inherently existent it cannot be generated, he explains that the process of generating bodhicitta mentioned in the *Guhyagarbhatantra* is merely a revelatory condition and not a generating cause. Therefore, for him, the two accumulations merely illuminate but do not generate Buddhahood. For Rong-zom-pa there is hence no actual contradiction between the two soteriological models, since the generation model, which is, strictly speaking, based on the principle of causes and conditions, is in conformity with the manner in which things appear to sentient beings. This soteriological model automatically implies that the ground (gzhi), path (lam), and result (bras bu) cannot actually be distinguished. The very ground is taken as the path, and the result does not transcend the ground.

4. Ontology

The various Buddhist notions of ontology, a term I use here in the sense of a theory of being or reality as such, are of direct relevance to the study of bodhicitta and the concept of becoming a buddha, for in Buddhism a salvific breakthrough (including the becoming of a buddha) is only possible by gaining direct cognitive access to true reality. As I try to show in chapter three, it is this idea that seems to explain not only the existence and appearance of the historical Buddha but also to doctrinally justify the concept of multiple buddhas and support the theory of oneself becoming a buddha. The idea of an ontological buddha that we have just been considering and that of ontological bodhicitta (which we shall dwell on in chapter seven, 89

---

89 dKon mchog 'grel (A, fol. 92a4–6; B, p. 124.1–4): “According to the popular general [system of Mahāyāna], the generation of the resolve to [strive for] awakening (bodhicittotpāda) is considered to be the generation of insight (prajñā) and compassion (karunā) in [one’s] mental continuum, in reliance upon [one’s own] spiritual disposition (gotra) and upon the strength of a spiritual friend (kalyāṇamitra). However, here [in this system, the generation of bodhicitta] is considered merely a revelatory condition of reality, which is primordial. Thus the expression ‘primordially awakened mind’ has been used” (de yang thun mong du grags pa ni rigs dang bshes gnyen gyi stobs la brient nas | shes rgyad dang snying rje rgyud la bskyed pa ni byang chub kyi sans bskyed pa zhes ‘dod de | dir ni ye nas yin pa’i don gsal bar byed pa’i rgyen isam du ‘dod de | de i phyir ye nas snges rgyas pa’i sans ze smos pa yin no ||).

The Resolve to Become a Buddha

where I also discuss synonyms and near synonyms of the term), along with positive-mystical and negative-intellectualist perceptions of ontological reality, seem to be particularly relevant to understanding what it means to become a buddha. They are also, in my view, a key to the understanding of such tantric concepts as Vajrasattva, the Primordial Buddha Samantabhadra, Hevajra, and Kālacakra, for part of the significance of these deities seemingly always lies in the ontological buddha or ontological bodhicitta. Mahāyāna ontology, despite its soteriological neutrality (it tilts neither to samsāra nor nirvāṇa), is of utmost soteriological relevance, since it is nescience or cognisance of true reality, the core of that ontology, that results in a state of bondage or release.

While various Buddhist systems and scriptures may disagree on the nature of ontological reality, they all seem to agree on its perpetual existence; and the idea that the true reality of phenomena exists and endures independently of the appearance of a buddha runs like a thread throughout the various Buddhist systems and scriptures. Generally speaking, the principle of dependent origination (pratītyasamutpāda) is what is meant by true reality, and the direct realisation of it is, as we shall see below, seeing the Dharma and hence also the buddhas. For most Buddhists (except perhaps for the Vātsiputraṇas or Pudgalavādins), true reality, through the realisation of which one attains salvation, is the non-essentiality or selflessness (nairatmya) of the person (pudgala) and of phenomena (dharma), and is called the one and only entrance gate to salvation. Another designation for true reality is emptiness (śūnyatā), which is doubtless, in one form or another, universally acceptable to Buddhist traditions. It is also said that seeing śūnyatā is seeing a buddha. As we shall see in chapter seven, there are several synonyms of ontological reality, the most important being the ontological buddha and bodhicitta. However, the demarcation between bodhi, citta, bodhicitta, and buddha seems to dissolve on the ontological level. In Mahāyāna sources, one often encounters attempts to reduce everything to one level. Thus, one particularly interesting aspect of the concept of becoming a buddha is that all phenomena, including sentient beings and buddhas, are levelled out onto a common plane. This is perhaps justified if we understand, as Āryadeva did, that the emptiness of one is the emptiness of all.

5. Buddhist Epistemology and Gnoseology

This study deals in part, both directly and indirectly, with a number of issues pertaining to Buddhist epistemology and gnoseology, particularly in chapter seven, where I present a typology of bodhicitta. My main concern is, however, not Buddhist epistemology (i.e. a theory of knowledge) per se but the underlying epistemological foundations and presuppositions of Buddhist soteriology. Gnoseology, here primarily in the sense of a theory of meditative insight or gnosia (\textit{bijjana: ye shes}) within the Buddhist context, may simply be understood as a kind of 'higher epistemology.' In a certain way, if one were to make a distinction between mind (\textit{citta: sems; manas: yid; bijjana: rnam par shes pa}) and gnosia (\textit{bijjana: ye shes}), as is done, for example, in some Mahāyāna and dZogs-chen sources, epistemology may be said to encompass the theory of knowledge mediated by the mind, and gnoseology a theory of transcendental knowledge, or gnosia. Soteriologically, as the concept of the four types of reliance (\textit{pratisaraIJa: rton pa})\textsuperscript{98} suggests, gnosia is clearly ranked higher than the mind. For a seeker of salvation within Buddhism, the cognitive acuteness of mind is certainly a valuable asset, but it can never take the place and role of gnosia, for the only way to experience ontological \textit{buddha, nirvāṇa, bodhi,} or \textit{bodhicitta} in the form of a spiritual event is through gnoseological \textit{buddha, nirvāṇa, bodhi,} or \textit{bodhicitta}.

The actual spiritual breakthrough in Buddhism is an intellectual event, inasmuch as a direct cognitive insight is called for, not a physiological or emotional one. We need, then, to ponder the role of cognisance and nescience, the presence and absence of knowledge, within the mechanism of bondage and release. According to Āryadeva, for instance, disorientation (\textit{moha: gti mug}) or ignorance pervades all other \textit{klesas}, even as the tactile sense faculty (\textit{kāyendriya}) pervades the entire body. Hence, all \textit{klesas} can be destroyed by destroying \textit{moha}.\textsuperscript{99} For Āryadeva, \textit{moha} represents not only a hindrance to \textit{mokṣa} but also to higher mundane existence.\textsuperscript{100} The idea that there is no salvation without the cognition of true reality (i.e., here, \textit{sūnyatā}), is explicated also in the \textit{Bodhicitattavivarāṇa} and \textit{Yuktiśaṣṭikā}.

\textsuperscript{98} Mahāvyutpatti, nos. 1545–1549.

\textsuperscript{99} \textit{Catuhṣataka} 6.10 (LANG 1986: 66):
\begin{verbatim}

samyagnātena tu sukham bodhīm cāpnoty anuttaram ||.
\end{verbatim}

\textsuperscript{101} \textit{Bodhicitattavivarāṇa} 72:
\begin{verbatim}
gang dag stong nyid mi shes pa ||
de dag thar pa 'i rtom ma yin ||
'gro drug srid pa 'i bison ral ni ||
rmongs pa de dag 'khor bar 'gyur ||.
\end{verbatim}

For an English translation, see LINDTNER 1997: 69. Cf. \textit{Yuktiśaṣṭikā} 4:
\begin{verbatim}
yod pas rnam par mi grol te ||
med pas srid pa 'di las min ||
dngos dang dngos med yongs shes pas ||
bdag nyid chen po rnam par grol ||.
\end{verbatim}
Samsāra is conceived of as rotating on a single axle, namely, nescience (expressible in a number of ways). Ignorance is ultimately responsible for the evolution and dissolution of the world, which consists of the mundane setting (smod) and its inhabitants (bcud), along with the intellectual-emotional defilements and their undesirable consequences, such as misery and discontentment. The uncontrollable rotation of the wheel of existence (bhavacakra: srid pa'i 'khor lo) can be brought to a momentous halt by putting its axle, ignorance, out of action. In other words, the seemingly formidable and everlasting complex of samsāra can be dismantled, like a house of cards, by undermining nescience. All the remaining work is like clearing up the rubble.

Ultimately, correct perception is the only possible antidote for misperception; and bondage (bandha: being ba), caused by misperception, can only be eliminated or brought to cessation—the actual release (mokṣa/muktī: grol ba)—by correct perception. This notion of release upon seeing true reality (satyadarśana) is found in both tantric and non-tantric Mahāyāna sources. According to Rong-zom-pa, the idea of release upon seeing true reality is common to all Buddhist systems. Dharmakīrti, too, states that one becomes realised upon seeing emptiness. For Nāgārjuna, there are three ways of dealing with phenomena such as visible objects. It is not by being attached to or detached from them that one is released but by knowing their nature. According to Aryadeva, the seed of existence ceases sprouting upon one's seeing the non-existence of a substantial self (or phenomena). Similarly, Śāntideva states that klesās are weaklings to be annihilated by prajñā's (mere) glance. The Vajradākinīguhyatantra states: Upon realising [the nature of] one's mind oneself, [One realises that every] sentient being has primordially been a Buddha.

---

64 The Resolve to Become a Buddha

---
It is also stated that one who sees dependent origination sees the Dharma, and one who sees the Dharma sees the Buddha.\textsuperscript{109} A R\textsuperscript{n}y\textsuperscript{m}a tantra entitled the 'Jig rten snang byed similarly states that one who sees emptiness sees what one calls a \textit{buddha} (or perhaps the Buddha).\textsuperscript{110} In short, one could perhaps, following Rong-zom-pa, say that the nature of [one's] mind—as it [really] is \textit{(sems kyi rang bzhin ji lta ba)}—is the fundamental, actual [being] of all \textit{buddhas} \textit{(sangs rgyas thams cad kyi dngos gzhi)}, and one who sees it sees the faces of all \textit{buddhas} \textit{(sangs rgyas kun gyi zhal mthong)}.\textsuperscript{111}

6. Buddhist Axiology

Regardless of the kind of soteriological model presupposed, it is clear that salvific success in general and becoming a \textit{buddha} in particular rest on certain sets of \textit{modi operandi} and \textit{modi vivendi}. Chapters nine, ten, and eleven are devoted mainly to ethical-moral aspects of \textit{bodhicitta}, namely, its cultivation, preservation, and restoration, respectively. In the belief that an understanding of Buddhist axiology (particularly of ethics and morality)\textsuperscript{112} is crucial for our understanding of Buddhist soteriology, I shall attempt here to consider some aspects of Buddhist axiology in the context of the three vows (\textit{trisamvara: sdom pa gsum}), namely, the \textit{pratimokṣa}, \textit{bodhisattva}, and \textit{mantra} \textit{vows}.\textsuperscript{113} A detailed analysis of the various tantric and non-tantric vows and their intricate relationship is, of course, beyond the scope of this study. For present purposes, I avail myself mainly of two sources, namely, the \textit{Samvarasamgraha} (perhaps falsely ascribed to Atiśa) and Rong-zom-pa’s \textit{dKon mchog ‘grel}, which are very probably some of the earliest sources that deal exhaustively with the matter and have not yet been studied. I shall, however, concentrate on those passages that deal with distinctions among the three vows, and it is hoped that the attempted translations will enable us to gain an idea of how the ethical-moral disciplines of all three vehicles (i.e. Śrāvakayāna, Pāramitāyāna, and Vajrayāna) stand in relation to each other.

(a) The Three-Vow Scheme

In Tibet it is said:\textsuperscript{114}

109 \textit{Śālistambasāitra} (SCHOENING 1995: 392). The Sanskrit text of this famous statement is transmitted in commentaries such as Yaśomitra’s \textit{Abhidharmakośavyākhya} and Prajñākaramati’s \textit{Bodhicaryāvatārāpanjikā} (ibid. 701–702): \textit{yo bhikṣavah prātiṣṭhānamupādām paśyati sa dharmam paśyati | yo dharmam paśyati sa buddham paśyati |}. See also \textit{NAKAMURA 1980: 65}; “Buddha is the one who sees dharma.” For the Pāli version of this statement, see \textit{GETHIN 2004a: 535–536}.

110 ‘Jig rten snang byed (p. 923.5):

\begin{align*}
\text{stong pa nyid kyi don riogs na | |} \\
\text{sangs rgyas sungs rgyas mthong ba yin | |}.
\end{align*}

111 \textit{dKon mchog ‘grel} (A, fol. 162a1–3; B, p. 198.5–10).

112 The term ‘axiology’ is lexically defined as “the theory and study of values, primarily of intrinsic values (as those in ethics, aesthetics, and religion) but also of instrumental values (as those in economics) particularly with reference to the manner in which they can be known or experienced, their nature and kinds, and their ontological status” (Webster’s, s.v. axiology; cf. \textit{HWP}, s.vv. Axiologie and Wertphilosophie). It is also defined as “the philosophical study of goodness, or value, in the widest sense of these terms” (\textit{EB}, s.v. axiology). Thus the term ‘axiology’ can be used fruitfully in the Buddhist context, mainly, to be sure, in the sense of the Buddhist theory of ethical and moral values.

113 At least two major publications on the study of the three-vow theories in Tibetan Buddhism are available: \textit{RHOTON 2002} \& \textit{SOBISCH 2002}.
The Resolve to Become a Buddha

The root of [the Buddhist] doctrine is Vinaya (i.e. as representative of Śrāvakayāna). The essence of [the Buddhist] doctrine is Pāramitāyāna. The quintessence of [the Buddhist] doctrine is Mantrayāna.

This conventional formulation reflects the true spirit of Buddhist theory and practice among Tibetan Buddhists. The underlying axiological concepts of these three systems are encapsulated in the three vows. The term samvara may be translated as ‘restraint,’ ‘discipline,’ or ‘vow.’ The most conservative conception of the trisamvara seems to be that involving the restraint of body (kāyasamvara: lus kyi sdom pa), restraint of speech (vāksamvara: ngag gi sdom pa), and restraint of mind (manasāsamvara: yid kyi sdom pa).

In the Abhidharmakosā and its commentaries, one finds the concept of three kinds of samvara, namely, prātimokṣasamvara, dhīnasamvara, and anāśravasamvara. There is yet another useful categorisation of śīla, found (at least explicitly) only in Tibetan sources, namely, (a) ethical-moral discipline [motivated by the desire for] protection (jigs skyob kyi tshul khrims), (b) ethical-moral discipline [motivated by] desirable [worldly] rewards (legs smon gyi tshul khrims), and (c) ethical-moral discipline [motivated by the sense of] renunciation (nges 'byung gi tshul khrims).

These are also called vows (i.e. 'jigs skyob kyi sdom pa, legs smon gyi sdom pa, and nges 'byung gi sdom pa). The last kind of śīla or samvara is identical with the prātimokṣasamvara, which is said to be exclusively Buddhist and relevant to a person’s salvific aspirations. It is said that an apparent prātimokṣasamvara would only then become an authentic one when a genuine sense of renunciation arises. Based on the solid ground of higher ethical-moral discipline (adhiśīla), the aspirant may develop higher meditative concentration (adhisamādhi) and higher insight (adhiprajñā), and finally he or she may indeed attain nirvāṇa or Arhatship.

But what if one’s aim is not merely the attainment of nirvāṇa or Arhatship, but Buddhahood itself? Some Mahāyāna sources state that the prātimokṣasamvara does not meet the aspirations of a bodhisattva. Indeed we can see that the scope of śīla has been extended in Mahāyāna Buddhism. The old prātimokṣasamvara is subsumed under what is called samvaraśīla, while kuśaladharmasamgrāhakaśīla and satvārthakriyāśīla enter as new elements. The idea is that it is not enough to merely refrain from unwholesome deeds. A bodhisattva ought to gather wholesome deeds as well, and actively help other sentient beings. From this perspective, the bodhisattva’s ethical-moral discipline does not undermine or replace the śrāvaka’s ethical-moral discipline but rather augments it. The ethical-moral discipline of a bodhisattva in turn undergoes further augmentation in tantric Mahāyāna.

118 The expressions 'jigs skyob kyi sdom pa, legs smon gyi sdom pa, and nges 'byung gi sdom pa, are used in the mTsho tık (p. 70.14–21).
119 TSD, s.v. tshul khrims rnam pa gsum.
(b) Comparing and Contrasting the Three Vows

The Samvarasamgraha provides thirteen distinctions among the three vows:120

[1] Of these [three vows],121 the prātimokṣa vow accentuates the [adoption and abandonment of] wholesome and unwholesome actions. The sūtra (i.e. bodhisattva) vow accentuates compassion. The mantra vow accentuates the indivisibility of body (kāya), speech (vāc), and mind (citta). [2] The prātimokṣa vow arises from the firm resolve [to strive] for nirvāṇa. The bodhisattva vow arises from excellent altruistic inclination (adhyāśaya). The mantra vow arises from bodhicittavājra. [3] The prātimokṣa vow is [characterised by] seven [kinds of] abandonment.122 The bodhisattva vow is [characterised by] ten [kinds of] abandonment. The mantra vow is [characterised by] one [kind of] abandonment. [4] In the prātimokṣa treatises, both types of reproachable [deeds] (avadya) are mentioned. In the bodhisattva treatises, only those [deeds] reproachable by nature (prakṛtisāvadya) are mentioned.123 In the tantric treatises, neither of the two terms is mentioned. [5] The prātimokṣa vow, it is maintained, really exists. The bodhisattva vow, it is maintained, exists only nominally. In the mantra context, neither of the two terms is mentioned. [6] The śrīvaka vow is [said to] possess many impediments. The bodhisattva vow is [said to] possess a few impediments. No impediments are explicated in [the context of] the mantra vow. [7] There is no prospect of retaking the first vow if the pārājika offence has occurred. There is the prospect of retaking the middle vow [even if the pārājika offence has

---

121 The remaining occurrences of the particles de la and yaug in these passages will not be translated. They will be expressed as units of enumeration.

122 See the mTsho rjik (pp. 30.23–31.2).

123 Two kinds of actions are often mentioned, namely, those that are objectionable or reproachable (śāvadya: kha na ma tho ba dang bcas pa) and those that are unobjectionable or irreproachable (anāvadya: kha na ma tho ba med pa). Those that are reproachable are further subdivided into two kinds, namely, those that are by nature unwholesome and thus by nature reproachable (prakṛtisāvadya: rang bzhin gyi kha na ma tho ba), and those that are reproachable by agreement/convention (prajñāpatisāvadya: bcas pa'i kha na ma tho ba) or reproachable in virtue of prohibition or decree (pratikṣeṇasyāvādya, also rendered into Tibetan as bcas pa'i kha na ma tho ba).
The Resolve to Become a Buddha occurred. The last vow does not degenerate if [it is] endowed with bodhicittavajra. [8] For [the assumption of] the first vow, a preceptor (upādhyāya) and a teacher (ācārya) are required. For [the assumption of] the middle vow, only one or no master (guru) is required. For [the assumption of] the last vow, there are four [kinds]: [a] an empowerment that has come into being verbally from a master, [b] an empowerment [received] through the power of a deity endowed with gnosis, [c] an empowerment [received] through the prophecy of a Vajraākāśa, and [d] the empowerment received on the strength of one’s own mental capacity. [9] The former [vow] is characterised by avoiding causing harm to others. The middle [vow] is, in addition, [characterised by] benefiting others. The last [vow] is, in addition, [characterised by] engagement in the activities of a buddha. [10] The first vow is [tailored] to the practices of arhats. The middle vow is [tailored] to the practices of bodhisattvas. The mantra vow is [tailored] to the practices of buddhas. [11] The first vow [aims at achieving] one’s own benefit alone. The middle vow [aims at achieving] others’ benefit alone. The last vow [aims at achieving] the benefit of both. [12] The first vow is conferred [and persists] as long as one lives. The middle vow [persists] until [one arrives at] the seat of awakening (bodhimanda, i.e. the spot under the Bodhi tree). The last vow [persists] as long as space prevails. [13] The result of the first vow is the two kinds of nirvāṇa (i.e. sopaḍhiśeṣanirvāṇa and nirupadhiśeṣanirvāṇa). The result of the middle vow is the ten stages [of a bodhisattva] or the eleventh stage (i.e. buddhabhumi). The result of the last vow is the twelfth stage. [14]

The distinguishing features of the three vows as summarised in the Ita 'grel are as follows: [125]

1. In brief, the śrāvaka vow [is characterised] by the refraining from inflicting injury on sentient beings. The bodhisattva vow [is characterised] by the engagement in benefiting sentient beings in addition to refraining from inflicting injury on them. The tantric vow [is characterised] by the conduct of engaging in benefiting sentient beings in addition to refraining from inflicting injury on them, by practising the activities of a tathāgata. [2] Moreover, for the śrāvaka vow, it is the conscious thought ('du shes) and the actual [act] (dngos gzhi) that are held to be of prime importance. For the bodhisattva vow, it is compassion (karunā) that is held to be of prime importance. For the tantric vow, it is insight (prajñā) that is held to be of prime importance. [3] Furthermore, śrāvakas follow the former noble arhats. Bodhisattvas follow bodhisattvas who are at high stages (bhūmi). Tantric [practitioners] follow the tathāgatas themselves. One could go on [in this way] extensively.

The dKon mchog 'grel states that the triad of view, conduct, and assistance (ita spyod grols gsum) are said to be common to all vehicles. The view (ita ba) is equated with adhiprajñāsikā, conduct (spyod pa) with adhicittāsikā, and assistance (grols) with adhiśilāsikā. These three differ depending on the type of vehicle. [126] The work goes on to

124 According to Rong-zom-pa, the concept of the twelve bhūmis occurs in the Vajrahrdayālaṃkāratantra. However, unlike the author of the Samvarasamgraha, who seems to suggest here that the result of the tantric vow is different from and superior to that of the bodhisattva vow, Rong-zom-pa (like many other Indian and Tibetan scholars) holds that the ultimate goal of both tantric and non-tantric Mahāyāna is Buddhahood and that there cannot be a bhūmi superior to the buddhabhumi. The twelve bhūmis in the Vajrahrdayālāṃkāratantra, according to him, refer to different aspects of the buddhabhumi itself, namely, the five kāyasas/kulas (sku/rigs lnga), five jñānas (ye shes lnga), upāya (thabs), and prajñā (shes rab). For details, see his dKon mchog 'grel (A, fols. 154b5–155a5; B, pp. 190.18–191.6) and Ita 'grel (A, fols. 260b1–261a6; B, pp. 344.17–345.16).

125 Ita 'grel (A, fol. 265b2–266a1; B, p. 350.2–12): [1] mdor bsdu’ na nyan thos kyi sdom pa ni | sems can la gnod par shyor ba las log pa’o || byang chub sens dpa’i sdom pa ni | sems can la gnod par shyor ba las log gi steng du yang | sems can la phan ‘dogs pa la zhugs pa’o || gsang sngags kyi sdom pa ni | sems can la gnod par shyor ba las log cing phan ‘dogs pa la zhugs pa de yang | de bzhin gshegs pa’i mdzad spyod nyams su blangs te spyod pa’o || [2] gzhlan yang nyan thos kyi sdom pa ni | ‘du shes dang dangs gzhi’i sgo nas gtsos bo yin par ‘dod do || byang chub sens dpa’i ni shnyin rje gtsos bo yin par ‘dod do || gsang sngags kyi ni shes rab gtsos bo yin par ‘dod do || [3] gzhlan yang nyan thos kyi ni sngon gyi ‘phags pa dgra bcom pa rnam s kyi rjes su bslab pa’o || byang chub sens dpa’i ni sa chen po la gnas pa’i byang chub sens dpa’ rnam s kyi rjes su bslab pa’o || gsang sngags kyi ni de bzhin gshegs pa nyid kyi rjes su slob pa’o || ha cang spros pas chog go ||

126 dKon mchog 'grel (A, fol. 199a6–b2; B, p. 236.8–12).
show how the tantric commitment excels the bodhisattva vow in seven ways, and the bodhisattva vow in turn excels the prātimokṣa vow in the same number of ways. The seven ways in which the bodhisattva vow excels the prātimokṣa vow are as follows: 127

Only the distinction in terms of assistance need be stated here. This is how the bodhisattva vow excels the prātimokṣa vow of the śrāvakas in the context of the non-tantric vehicles. The marks [of distinction] are infinite, but nonetheless, just as [Mahāyāna is] known to excel [Śrāvakayāna] by seven kinds of greatness, 128 so does [the bodhisattva vow] excel [the prātimokṣa vow] in the following seven ways: [1] Just as the greatness of [Mahāyāna’s] object (ālambanamahāhattva) 129 is characterised by the profundity and vastness of the object it seeks to appropriate, so is [that of] the accompanying bodhisattva vow [characterised by] the profundity and vastness [of its object of appropriation]; [it] is not an object [that can be fatshed by] disputants, 130 and goes beyond the domain of numerical figures. [2] Just as the greatness of practice (pratipattiṃmahāhattva) [is characterised by] the fulfilment of one’s own objectives and those of others, so is [that of] the accompanying [bodhisattva vow] [characterised by everything that] is of use in achieving all [these] objectives. [3] Just as the greatness of gnosis (jñānamahāhattva) [is characterised by] the realisation that all phenomena are selfless, so is the accompanying [bodhisattva vow] in total harmony with the non-essentiality of phenomena (dharmanairātmya). [4] Just as the greatness of expedient means (upāyakausalyamahāhattva) [is characterised by] the fixation on neither of the two [extremes of] samsāra and nirvāṇa, so is the accompanying [bodhisattva vow] a factor conducive to the non-fixation on the two extremes. 131 [5] Just as the greatness of activity (karmamahāhattva) [is characterised by] the purification of the buddha realms and the ripening of sentient beings, so is the accompanying [bodhisattva vow] [characterised by] the non-deterioration of these [activities]. [6] Just as the greatness of diligence (vīryamahāhattva) [is characterised by] the non-abandonment of perseverance for the sake of just one sentient being so long as samsāra [exists], so is the accompanying [bodhisattva vow] imbued with that [kind of diligence]. [7] Just as the greatness of attainment (samudāgamacchāhattva) [is characterised by] the perfection of the qualities of buddhas, so does [its] accompanying [bodhisattva vow] exist

exclusively as a factor conducing to all possible aspects of good qualities. Therefore, the bodhisattva vow is profound and [its] depth difficult to fathom. It is vast and immeasurable. It is not a domain for [people with] meagre intellect and meagre courage. Thus, although one cannot measure the number and mass of the qualities of bodhisattvas [in virtue of which they] excel the śrāvakas, if one provisionally summarises [them] according to [their] objects [of appropriation and so forth, it] should be known that they come under precisely these [seven kinds of greatness].

It is quite clear that Rong-zom-pa has used the seven kinds of greatness of Mahāyāna found in Indian sources such as the Mahāyānasūtrālāṃkāra to define the difference between the bodhisattva and prātimokṣa vows. However, it is not clear whether this was his own inspired idea or whether he had inherited it from his predecessors. (At least some Tibetan scholars, such as Kong-sprul Yon-tan-rgya-mtsho (1813–1899), seem to take it as the former. 

Rong-zom-pa then goes on to show how the mantra vow, too, excels the bodhisattva and prātimokṣa vows in seven ways. But this is not done on the basis of the seven kinds of greatness found in the Mahāyānasūtrālāṃkāra. He has used a passage from the nineteenth chapter of the *Guhyagarbha* on samaya as his textual basis. The seven distinctions that he draws are as follows:

Similarly, one cannot count and express [the ways] the tantric samaya [is superior] to the bodhisattva vow, because [the tantric samaya] is much more profound and vast [than the bodhisattva vow]. For the moment, it will be shown here in brief that [the tantric samaya excels the bodhisattva vow] in seven ways. What are the seven? [1] [Persons who adhere to samaya possess] qualities that are spontaneously attained without effort, for [they] are sealed with the seal of Samantabhadra. [2] [They possess] superb power and empowerment, for [they] are...

---

132 *Shes bya mdzod* (p. 393.31–32):

regarded as sublime objects of reverence by the lords of the world (lokajñesu), [namely,] the great deities and their retinues, the mārkaś and dākinis. [They] rapidly acquire the empowerment of compassion, for [they] are regarded by buddhas and bodhisattvas as [their] intimate sons and brothers. [They] range over a superb [domain of conduct], for [their] conduct corresponds to the domain of conduct of the tathāgatas. [They] are without any fear and anxiety whatsoever, for [they see that] all phenomena are one with the realm of Samantabhadra. [All] vows (samvara) that have been taught in either a provisional or definitive sense are naturally and spontaneously included [in the samaya of this tantric system].

[Even when the samaya] has deteriorated, there is a method of retrieving [it]. In this way, one should understand by implication (lit. ‘apply’ or ‘employ’) that [the tantric samaya] excels [the bodhisattva vow] by an infinite number of qualities, such as these seven kinds [of excellence].

The idea of taking the pertinent verses of the *Guhyagarbhatantra* as a basis for distinguishing the bodhisattva and mantra vows seems to be Rong-zom-pa’s own. Each of these seven points are explained in great detail in the dKon mchog ’grel. Since it is in these explanations that we can best see how the three vows are contrasted, we shall consider each of the explanations in turn. The explanation of the first point is as follows:

[1] How are [the observer of samaya] sealed with the seal of Samantabhadra? The śrāvakas are those who are born from the mouth (mukha jātaḥ) of tathāgatas and are not [those who possess] the spiritual disposition (gotra) to become samyaksambuddhas, and are hence not sealed by the seal of the buddhas but merely sealed by the seal of the empowerment of buddhas. The bodhisattvas, [on the contrary,] it is taught in the sūtras, are sealed by one or three seals, for they are going to become tathāgatas, but nonetheless no seal of spontaneous attainment is commonly known [among them], and hence [it is] maintained that [they] realise the result with effort, in virtue of [their] spiritual disposition. [According to] the highest (miruttara) tantric system, [the observer of samaya] is said to be sealed with the seal of Samantabhadra, since there is no phenomenon that is not primordially awakened in the adamantine body, speech, and mind. Therefore, all qualities of the greatness of the result are [said to be] effortlessly and spontaneously attained.

The following explanation is given of the second point:

---

135 The Tibetan syntax seems to suggest that both mārkaś and dākinis are retinues of the great deities. I am not sure if this is factually correct. For the term mārkaś, see *TSD*, s.v. ma mo, and for a discussion of the term dākinī, see *ENGLISH* 2002: 397–398, n. 67.

136 This passage has also been cited in the *Shes bya mdzod* (p. 349.1–11).

137 dKon mchog ’grel (A, fol. 201a2–b1; B, pp. 237.24–238.9): de la ji ltar kun tu bzang po ’i phyag rgyas btub ce na | de la nyan thos rnam ni de bzhi gshegs pa’i zhal las skyes pa ste | yang dag par rdzogs pa’i sangs rgyas rnam su ’gyur ba’i rigs ma yin pas sangs rgyas nyid kyi phyag rgyas ma btub kyi | byin gyi bralbs kyi phyag rgyas btub pa tsam mo || byang chub sms dpam ni de bzhi gshegs pa nyid du ’gyur ba’i phyir | phyag rgya gcig dang gsum gsyi btub pa mdo sde nyid las gsums mod kyi | ’on kyang lhung gyun grub pa’i phyag rgya thun mong du ma grags pas | rigs las rtosol ba ’bras bu mgon par ’grub [grub B] par ’dod pa yin no || gsgang sngags blo na med pa’i [pas A] chos thams cad ye nas gsum thugs rdo rje ’diyil ’khor du sangs ma rgyas pa ’ga’ yang med pas kun tu bzang po ’i phyag rgyas btub ces bya ste || de bas na ’bras bu che ba’i yon tan thams cad rtosol ba med par lhun gyis grub pa yin no ||.

138 Usually an epithet of śrāvaka, but evidently also of a bodhisattva; see *Mahāvyutpatti*, no. 643, and *TSD*, s.v. zhal nas skyes pa. In the Tibetan translations of the Madhyamakāvatāra and Madhyamakāvātārabhāṣya, the term used is gsum skyes (in verses). See, for example, *Madhyamakāvatāra* 1.8, 2.7, 6.225. See also the Madhyamakāvātārabhāṣya (p. 341.18–19): bde bar gshegs pa’i gsum las skyes pa rnam te nyan thos rnam so zhes bya ba’i don to ||.

139 dKon mchog ’grel (A, fols. 201b1–202a1; B, p. 238.9–22): gnyis pa ’jig rten pa’i gtsos bo dang ’khor rnam kyi bsir kun gnas dam par gyur pa ni | nyan thos rnam kyang tshangs pa dang bgya byin la sogs pa rnam kyi bsir kun gnas yin yang sangs rgyas bzhi du bkur ba ni ma yin no || byang chub sms dpam ni rnam kyang de bas ches bkur ba yin mod kyi sangs rgyas bzhi du ni bkur ba ma yin no || yang dag par rdzogs pa’i sangs rgyas rnam ni
The second [point], being the sublime reverential object of the lords of the world and [their] retinues: Although śrāvakas are also reverential objects of [the lords of the world], such as Brahmā and Śakra, they are not revered like the buddhas. Although bodhisattvas are revered much more than them (i.e. śrāvakas), they are not revered like the buddhas. Samyaksaṃbuddhas are to be highly revered. In the same way, people who observe the vow of conduct in their respective domains are also seen as reverential objects in a hierarchical order by the guardians who protect the Doctrine (dharmaipāla); that is, those upholding the vow of conduct in the domain of śrāvakas are regarded as reverential objects but are not honoured (dam par [byed]) [like those abiding by the bodhisattva and mantra vows]. In the same way, those upholding the vow of conduct in the domain of buddhas are honoured more but not as highly [those abiding by the mantra vows]. In the same way, those upholding the vow of conduct in the domain of buddhas are most highly honoured. Hence all [deities] have committed themselves to follow [their] instructions and to honour [them] as ornaments of [their] crowns. Therefore, on account of their (i.e. the deities') assistance (sāhāyaka), the power and empowerment [of those upholding the tantric vow] greatly excel [those of the others].

The third distinction is explained thus.141

The third [point], namely, being regarded by buddhas and bodhisattvas as [their] intimate sons and brothers: If a son endowed with the major and minor marks [of a great being] is born to a universal monarch, [the father] thinks: “This [child] is going to be a universal monarch.” Similarly, if a person endowed with the marks of a vow (ṣikṣā) that accords with the intent and conduct of buddhas appears, [the tathāgatas] think: “This [person] is upholding the line of the tathāgatas.” On account of this, empowerment will occur soon. An alternative [explanation would be]: Just as a reflection appears in clear water to one who is endowed with pure perception, noble conduct, and the power [of an accompanying vow, the empowerment of the buddhas and bodhisattvas occur naturally and swiftly. For this reason [those upholding the tantric vow] are designated so.

Concerning the fourth point, Rong-zom-pa states:142

The fourth [point], a superb domain of conduct: The domain or object of appropriation (i.e. of the upholder of the mantra vow) is the domain of the conduct of a tathāgata; that is, [a tathāgata,] while abiding in the conduct of non-adoption and non-abandonment (all phenomena being primordially pure), does not disrupt the continuity of activities for the benefit of sentient beings.

140 TSD, s.v. stong grogs; JÄSCHKE 1881, s.v. stong grogs.

141 dKon mchog 'grel (A, fol. 202a1–5; B, pp. 238.23–239.7): gsun pa sangs rgyas dang byang chub sens dpas nye ba'i sras dang spun du dgonugs pa ni | ji ltar 'khor los sgyur ba'i rgyal po la mthang dang dpe byad dang ldan pa'i bu skyes par gyur na | 'di las 'khor los sgyur ba'i rgyal po nyid 'byung ngo snyam du dgonugs pa bzhin du | sangs rgyas nyid kyi dgongs spyod dang mthun pa'i bslab pa'i mthang dang ldan pa'i gang zig byung na 'di ni de bzhin gshegs pa nyid kyi gdung nye bar | 'dzin pa'o || zhes dgonugs pa'dbang gis byin rlabs myur du | 'byung ngo | rnam pa gcig tu chu dwangs pa la gzugs brnyan 'byung ba bzhin du | dngigs pa dag pa dang spyod pa | 'phags pa dang | grogs kyi sdom pa nas pa dang ldan pa can la rang bzhin gisangs rgyas dang byang chub sens dpas rab byin rlabs myur na 'byung bas de ['de B] skad ces bya'o ||.

142 dKon mchog 'grel (A, fol. 202a5–b2; B, pp. 239.7–14): bzhis pa spyod yul khyad par du 'phags pa ni | gsang sngags kyi spyod yul dang dmigs pa ni de bzhin gshegs pa nyid kyi spyod yul te | 'di ltar chos thams cad ggod ma nas rnam par dag pas blang dor med pa'i spyod pa la gnas bzhin du | sams can gyi don yang gsugs kyi sku rnam pa gnis kyi sgo nas mdzad pa rgyun mi goed pa 'di ni spyod yul gcig la mthun par zugs pa yin no | sdom pa gzhin ni de ltar ma yin te | sngon gyi 'phags pa dgra bcom pa rnam kyi rjes su slob po dang | sa chen po la gnas pa'i byang chub sens dpas'chen po rnam kyi rjes su slob po yin no ||.
beings by means of [his] two kinds of corporeal bodies (rūpakāya). He (i.e. the upholder of the mantra vow) is one who ranges over a domain of conduct identical [with that of a tathāgata] and has entered into [it] in a similar manner. The [upholders of the other two] vows are not so. [The upholder of the prātimokṣa vow] follows the ancient noble arhats. [The upholder of the bodhisattva vow] follows the great bodhisattvas at high [spiritual] stages.

The fifth point is demonstrated with striking examples: 143

The fifth point being without anxiety for any phenomena, [which are seen as being] one with the realm of Samantabhadra: All phenomena of samsāra and nirvāṇa are the realms of Samantabhadra, since [they are] primordially pure and thus there is nothing to be eliminated or abandoned. One who has realised this and does not waver mentally from this [insight] is not apprehensive of the pain [or suffering] of samsāra. For example, (a) if a person being swept away by a huge river happens to come across a boat, [the following thought would occur to him]: “I will now find a way to get to dry land.” And there being no danger from [or fear of] the water, [he] will be saved. (b) Someone dreams of being swept away by water, and [after a while] becomes slightly wakeful (lit. ‘sleep having slightly become shallower’). If [he] happens to be conscious of the fact that it is a dream, although the watery apparitions have not withdrawn [yet], the following [thought will occur to him]: “This is [only] a dream. [I am] not really being swept away. This appearance will not occur once [I am] awake, and so the fear of dying by drowning (lit. ‘water’) will be averted.” And thus courage will be summoned towards simply taking preparatory measures for waking up from sleep. Once [he] is awake, [he] will realise that there has neither been [an incident of] being swept away by river nor of being saved, nor will water appear to [his] perception. Similarly, those who have entered the path of the śrāvakas are those who have come across a small boat. It is like a number of individuals who, accompanied by a few belongings, have been rescued [to] one shore and dwell [there]. Those who have entered the path of the bodhisattvas are like those who have come across a big ship. With many sentient beings and with a great purpose, [they] sail on luxuriously, thanks to the prosperity of the land. 144 Those who have entered the path of the Mantranaya are like those who have been saved from the sleep in which [they dream of] being swept away by a river. [They are ones who feel] safe from [or reassured in the face of] the dangers of samsāra, for they have realised the non-duality of samsāra and nirvāṇa. With great discriminating insight [they] make attempts merely to wake up. [They] do not make any effort to eliminate unfavourable factors or to rely on antidotes, but merely abide [in such a way that] their great attentiveness (samprajñāna) does not dwindle.

---

143 dKon mchog 'grel (A, fols. 202b-203b1; B, pp. 239.14-240.11): Inγa pa chos thams cad kun tu bzang po 'i zhiγ du stbyas bas bstag tsha ba med pa ni | 'khor ba dang mya ngan las 'das pa'i chos thams cad ni gtid ma nas rnam ran dag pas 'spang zhing' [spangs shing A] dor bar bya ba med pa'i phyir kun tu bzang po 'i zhin yin no | 'di lar rtags zhing blo gros 'di las mi g.yo ba ni 'khor ba'i sād bsgal gyis bstag tsha ba mi 'gyur te | aper na chu klung chen pos khyer ba' i mi dag gruz ging dang 'phrad par gyur na da ni bdag gis skam sa la phyin pa'i lam rnyed do snyam ste | chus 'jigs pa med cing dbugs phyin par 'gyur la | gang zhiγ rmi lam na chus khyer ba rmi sas pa las | gnyid cing zhiγ sbrab par gyur te | de nyid rmi lam yin par shes pa'i blo byung na chur snang ba ma log kyang 'di snyam 'di ni rmi lam yin te dngos su khyer ba med do | snaγ ba 'di ying gnyid sad pa'i dus na 'mi 'byung ste | de bas na bdag chus 'chi ba'i dus byed pa'i 'jigs pa las log nas | gnyid sangs par bya'i stbyor ba tsm la snying stobs bskyed [skyed A] par 'gyur ro | des gnyid sad par gyur pa de'i tshes chus khyer ba med cing chu las thar pa med pa yang shes la chu yang mi sngag no | de bzhin du nyan thos kyi lam du zhugs pa ni gru chung ngu dang 'phrad pa lta bu ste | gang zag 'ga' zhiγ dngos po chung ngu tsam dang 'groγs nas phyogs gcig tu thar bar byas te gnas pa ita bu'o | byang chub sems dpas'i lam du zhugs pa ni gru gzhings che dkyo dang 'phrad pa dang 'dra ste | gro ba mang po dang bcas don chen po dang bcas nas yul khams bde bas rgyas par spyod do | gsgang sngags kyi tshul gyi lam la zhugs pa ni rmi lam na chus khyer ba gnyid cing zad sbrab [srasbs A] par 'gyur ba dang 'dra ste | 'khor ba dang mya ngan las 'das pa gnyis su med par rtags pas 'khor ba'i 'jigs pa las dbugs phyin te | shes rab chen pos gnyid sad pa tsm la rtsol ba tsam byed do | de la mi mthun pa dang gnyen po spong ba dang bsten pa'i rtsol ba ni mi byed kyi | shes bzhin chen po las mi nyams pa tsmu du gnas so |]

144 It is not clear how yul khams bde bas rgyas par spyod do is to be understood. My translation is thus a mere attempt to make some sense of the phrase.
The sixth point is explained in brief as follows: 

The sixth [point], the inclusion of all vows whatsoever: The bodhisattva vow is not included in and enhanced by the prātimokṣa vow of a śrāvaka. The prātimokṣa vow of a śrāvaka is included in and enhanced by the bodhisattva vow. Likewise, [the same] may be said of the tantric pledge. The manner in which these (i.e. the 'lower' vows) are included in and enhanced by [the 'higher' ones] have already been explained above extensively while demonstrating superiority.

The seventh and final point is explained as follows:

The seventh [point], the quality of [being able to] replenish the [samaya] if it has deteriorated: It is said that there is no means of restoring a prātimokṣa vow of a śrāvaka that has deteriorated on account of [his] attachment to phenomena as if they were substantial and the emphasis he places on entities through his physical and verbal activities. It is comparable to a broken clay vessel. As for the bodhisattva vow, it is said that on account of [a bodhisattva’s] non-attachment to phenomena taken [by others] to be substantial and the emphasis [he] places on the mind, even broken [vows] can be [restored and] enhanced by relying on a spiritual teacher. It is, for example, comparable to a skilled smith who can turn broken gold and silver vessels into vessels that are even superior to the [vessels that existed] before. As for the tantric pledge, it is said that deteriorated pledges can be revived and thus restored by oneself without having to rely on a spiritual teacher, given the realisation that all phenomena [are characterised by] great equanimity, the main thing being command over awareness of the illusion-like display [of phenomena]. For example, dented gold or silver vessels do not have to be made all over again by the smith. Depending on the extent of the dents, one can gradually repair [them] on the basis of one’s own capacity, and [they] will be straightened out [and assume their] original shape. It occurs in some tantric systems that [a tantric practitioner] who has let [his samaya] deteriorate receives it [anew], as a [non-tantric] bodhisattva [receives] empowerments and pledges from a spiritual teacher by entering a mandala. Such [procedures] are, however, merely taught in view of certain aspirants. Here, the former meaning [is preferred]. Therefore, these seven qualities [representative] of [the ability to] replenish [the samaya] if it has deteriorated are only a summary [listing]. It should be known by implication that extensive qualities such as these are limitless.

The gist of Buddhist axiological principles seems to be that according to the prātimokṣa vow, one tries to refrain from inflicting injury on other sentient beings; according the bodhisattva vow, one tries to benefit sentient beings, which presupposes that one has already refrained

145 dKon mchog 'grel (A, fols. 203b1–3; B, p. 240.11–16): drug pa sdom pa ji snyed pa thams cad 'dus pa ni | nyan thos kyi so sor thar pa'i sdom pa'i nang du ni byang chub sems dpa'i sdom pa ma 'dus shing ma dag go || byang chub sems dpa'i sdom pa'i nang du ni so sor thar pa'i sdom pa' 'dus shing rnam par dag ste | de bzhin du gsang sngags kyi dam tshig la yang sbyar bar bya'o || de dag ji ltar 'dus shing rnam par dag pa'i tshul ni gong du che ba bstan pa'i skabs su rgyas par bshad pa nyid do ||

from inflicting injury on them; and that according to the mantra vow, one tries not only to refrain from inflicting injury on other sentient beings but also tries to actively benefit them, and that too in the manner of a buddha.

The question is how one is supposed to know what is really beneficial or detrimental. What if an action executed with benevolent intent turns out to be detrimental to the beneficiary. Is there not the risk of harming others, although one does something with the aim of sincerely wishing to benefit them? As far as I can gather from various sources, this risk will always remain. What a bodhisattva at the most can try to do is to minimise this risk by trying to maximise his compassion (karuṇā) and foresight or discriminating insight (prajñā). Not all bodhisattvas will have the same degree of karuṇā and prajñā. Each bodhisattva will make his own decisions. Hypothetically, for example, even if a bodhisattva endowed with intense karuṇā (which is by nature wholesome) but lacking adequate prajñā (but not on account of moha) were to perform an act that turns out to be detrimental to himself and others, he should be able to bear all the consequences. Because a bodhisattva dreads the sufferings of others, he would gladly and readily tread even the lowest depths of hell (avīcī: mnar med), as explicated in the Bodhicittavivarana and Bodhicaryāvatāra.147 The axiological principle is expressed by Nāgārjuna as follows: if it benefits, give even poison; if it does not benefit, do not give even medicine.148 An attitude can be said to be ethically and morally right if it is characterised by benevolence, and wrong if it is characterised by malevolence; an action can be said to be ethically right if it is beneficial to others, and wrong if it is detrimental to others.149

One of the difficulties of bodhisattva ethics is: should and can someone who has taken the bodhisattva vow tolerate those who through maliciousness and perverse ideology perpetrate horrendous deeds? On the one hand, a bodhisattva is not supposed to regard even a single sentient being as his foe and thus make it an object of his aversion, for doing so would mean violation of the bodhisattva vow. On the other hand, how can a bodhisattva regard someone who perpetrates horrendous deeds out of sheer maliciousness or perverse ideologies as his friend? Would not a bodhisattva’s show of tolerance indicate his intellectual and emotional consent to such deeds and thereby make himself an accomplice of the perpetrators? Aryadeva seems to offer an answer to this predicament. According to him, just as a physician does not regard a patient possessed with a spirit (bhūta: ‘byung po) as his foe, so sages regard

intellectual-emotional defilements (kleśa: nyon mongs pa) as their foes, not those who possess them.  

A final question would be how much a bodhisattva should actively dedicate himself to the benefit of others. The answer would be ‘to the best of one’s capacity’ (yathāsaktyā yathābalam: ci nus ci lcogs kyis), an expression used often in the Bodhisattvabhūmi. A bodhisattva is not culpable for not having done things that he is not capable of, very much according to the dictum: Ad impossibile nemo obligatur (“No one is obliged to do the impossible”). The conscience of individual bodhisattvas alone would stand witness to whether or not they indeed did their best.

7. Concluding Remarks

In conclusion, one could say that bodhicitta is all about becoming a buddha. Becoming a buddha in turn means directly experiencing the ontological buddha, true reality, by means of the gnoseological buddha, the profoundest meditative insight. For someone striving to become a buddha, any method or resource seems to be acceptable so long as he or she thinks and acts within the bounds of extraordinary prajñā and karuṇā.

Chapter Two

Previous Studies on Bodhicitta

Should one initiate [something], one should initiate [it] with bodhicitta.
Should one reflect on [something], one should reflect on bodhicitta.
Should one analyse [something], one should analyse bodhicitta.
Should one investigate [something], one should investigate bodhicitta.

— Khu-nu Bla-ma, Byang sms bstod pa

1. Introductory Remarks

In this chapter, I attempt to review studies relating to bodhicitta or cittotpāda previously undertaken by modern scholars. For a number of reasons, however, my survey will not be comprehensive. In the first place, I have been selective in my choice of secondary literature, giving preference to books and articles which deal with bodhicitta as the main topic. Furthermore, several relevant studies by Japanese scholars will not be discussed because of either language barrier or inaccessibility. In spite of these restraints, I hope to provide a general review of the previous studies.

The notion of bodhicitta or cittotpāda, conceived as it was as the quintessence of Mahāyāna Buddhism, received great attention among traditional scholars. sGam-po-pa (1079–1153), the famous disciple of the Tibetan yogin Mi-la-ras-pa (1052–1135), for example, thought all Buddhist teachings to be somehow centred around bodhicittotpāda. He stated that some teachings deal with the foundations (meaning perhaps prerequisites) of cittotpāda, some with its object, some with its attributes, some with its observances, some with its benefits, and some with its results. On the other hand, it received relatively less

attention among the first scholars of Buddhism in the West. Laurence Austine Waddell (1854–1939), for instance, whose work served as an authoritative source on Tibetan Buddhism for many years, did not even mention the word *bodhicitta* or *cittotpāda.* This discrepancy may be explained by the differences in attitude, interests, and priorities between traditional scholars and modern ones. One of the reasons why the theory of *bodhicitta* has not received much attention among modern scholars seems to be the assumption that *bodhicitta* is of no philosophical interest.

This tendency, however, is changing. There is a growing interest in Buddhist ethical or moral philosophy, and thus also in the study of *bodhicitta.* Many scholars have noticed that the term *bodhicitta* is used with various meanings. To be precise, the concept of *bodhicitta* found in both tantric and non-tantric Mahāyāna is not uniform within or between either of them. But up to now no one has proposed a comprehensive scheme to explain these differences, and it is thus difficult to create a systematic, coherent picture of the previous studies relating to *bodhicitta.* I have devised a scheme (described in chapter seven) that I believe spans the entire spectrum of meaning expressed by *bodhicitta.* The five typologies proposed by me are: (a) ethico-spiritual, (b) gnoseological, (c) ontological, (d) psycho-physiological, and (e) semeiological. In my survey, I shall, whenever necessary, use these typologies to describe the types of *bodhicitta* studied by previous scholars.

### 2. The Early Western Knowledge of Bodhicitta

The concept of *bodhicitta* or *cittotpāda* probably first became known to a European not through Sanskrit but through Tibetan sources. Francesco Orazio della Penna (1681–1745), an Italian Capuchin, must have learned about *bodhicitta* from Tsong-kha-pa Blo-bzang-grags-pa’s (1357–1419) famous *Lam rim chen mo,* which he translated. As this translation has unfortunately not been preserved, we do not know how he actually treated the theme. Another Italian father, the Jesuit Ippolito Desideri (1684–1733), acquired during his five-year stay (1716–1721) in Lhasa an excellent knowledge of the Tibetan language and religion, and made excerpts of many Tibetan works starting with the *Lam rim chen mo.* It is possible that he also discussed the theory of *bodhicitta* in the third book of his *Relazione* (to which I have no access), which is said to be entirely devoted to a description of Tibetan religions.

---

3 WADDELL 1895.

4 Walpola Rahula, for example, complained that scholars tend to neglect the ethical aspect of Buddhist teachings: “Ethical Conduct (*Sīla*) is built on the vast conception of universal love and compassion for all living beings, on which the Buddha’s teaching is based. It is regrettable that many scholars forget this great ideal of the Buddha’s teaching, and indulge in only dry philosophical and metaphysical divagations when they talk and write about Buddhism” (RAHULA 1974: 46).

6 Della Penna was only one of the many eighteenth-century Capuchins and Jesuits who acquired good knowledge of Tibetan. He lived in Lhasa from 1716 to 1732 and compiled a Tibetan dictionary (35,000 words), which was later translated into English by F. C. G. Schroeter and published in Serampore in 1826 (DE JONG 1987a: 12).

7 Della Penna’s translation of the *Lam rim chen mo* is apparently mentioned (among his other writings) in his chronological summary of Tibetan history published by Antonio Giorgi in his *Alphabetum Tibetanum Missionum Apostolicae Commodo Editum,* Rome, 1762 (DE JONG 1987a: 12).
The study of the Indian sources of Mahāyāna Buddhism in Sanskrit began in the West in 1837, when the Société Asiatique received from Brian Houghton Hodgson (1800–1894), who was then in Kathmandu, eighty-eight Buddhist Sanskrit manuscripts. That same year, Eugène Burnouf (1801–1852) started reading the Saddharmapuṇḍarīkasūtra, and in 1839 he completed a translation of it, which appeared only after his death.9 This sūtra expounds the concept of ‘one vehicle’ (ekayāna: theg pa gcig) and one goal (i.e. Buddhahood). As a means of attaining this goal, the realisation of emptiness (śūnyatā: stong pa nyid) and the generation of bodhicitta are taught at the end of the fourth chapter.10

Unlike L. A. Waddell, Emil Schlagintweit (1835–1904), in his famous book Buddhism in Tibet (first published in 1863), does mention the idea of bodhicitta at least once, when discussing the so-called ‘code of eight specific duties’ drawn up for a more general Tibetan Buddhist public.11 He based himself on Alexander Csoma de Körös (1784–1842), who in turn must have based himself on Tsong-kha-pa’s Lam rim chen mo.

3. Monographs on the Study of Bodhicitta

I am aware of two monographs on bodhicitta: (a) A Study of Bodhicitta (in Japanese) by Taishū Tagami, published in 1990,12 and (b) Francis Brassard’s The Concept of Bodhicitta in Śāntideva’s Bodhicaryāvatāra, published in 2000. Taishū Tagami (Komazawa University) has devoted much of his research life to the topic, and his monograph, which is an investigation into the origin and development of the bodhicitta concept, is the product of several years of study and his most important publication on the subject. His works are often mentioned by Hajime Nakamura in his book Indian Buddhism when referring to the concept of bodhicitta. Brassard’s monograph is a study of the nature and function of bodhicitta and its relationship to the spiritual path as delineated by Śāntideva in his Bodhicaryāvatāra.

(a) Taishū Tagami (1990)

On the basis of a summary and a detailed table of contents in English which Tagami helpfully provides,13 I shall briefly describe the subject matter of his monograph here. The book contains eight chapters. In addition, there is a general introduction, conclusion, and appendix to the book followed by the summary and table of contents in English. In the introduction, the author discusses the problems connected with the study of bodhicitta and provides an outline of the eight chapters. Two important points are made in the first chapter with regard to non-Mahāyāna Buddhist sūtras: (a) several terms, such as samvega, which correspond to the term bodhicitta, are found in non-Mahāyāna sūtras, but their meanings and functions are different from those of the term bodhicitta found in Mahāyāna sūtras, and (b) terms such as bodhicitta

---

8 The manuscript of Desideri’s work was discovered by C. Puini in 1875 but was published only in 1904. Luciano Petech and Giuseppe Tucci praised his study of Tibetan Buddhism as well in advance of his time (DE JONG 1987a: 13).
9 DE JONG 1987a: 19.
10 Otherwise the theory of emptiness (śūnyatā) seldom occurs in the Saddharmapuṇḍarīkasūtra. There seems to be some disagreement regarding the relative chronology of the individual chapters of the sūtra. For details, see VETTER 2001: 82–87, where it is maintained that the Saddharmapuṇḍarīkasūtra represents a strand of ‘Mahāyāna without Prajñāpāramitā.’
11 SCHLAGINTWEIT 1863: 106: “To form in one’s mind the resolution to strive to attain the highest degree of perfection, in order to be united with the supreme intelligence.”
12 I am grateful to Kazuo Kano (University of Kyoto/Hamburg) for presenting me a copy of this book.
The Resolve to Become a Buddha

and sambodhicitta are not found in non-Mahāyāna sūtras. Tagami regards the term aññācīcita as the original word for what later came to be denoted by bodhicitta. He thus maintains that the concept of bodhicitta (although not the term) was extant already in the non-Mahāyāna sūtras. In the second chapter, Tagami discusses the term bodhicitta in Abhidharma literature. Although two of the three subheadings of this chapter refer to mahābodhicitta (in the Prajñāpāramitāśāstra) and bodhicitta (in the Mahāvibhāṣāsāstra), it seems that these terms actually do not occur in the respective two works. Furthermore, Tagami states, the word laukikāgratā occurring in the Jñānaprajñāpāramitā is the corresponding Abhidharma term for bodhicitta. I, however, find this proposition very problematic.

The third chapter examines how bodhicitta figures in the Mahāvastu. The fourth chapter contains a discussion of the Chinese translations of the word bodhicitta by fifteen famous translators and an examination of the term bodhicitta in Sanskrit sources, namely, the Vajracchedikā, Kāśyapaparivarta, Aśṭasāhasrikā, Sukhavatīvyūha, Saddharmapuṇḍarīka-sūtra, Daśabhūmikasūtra, and Gāṇḍavyūhasūtra. The fifth chapter presents the features and functions of bodhicitta. Among other things, Tagami proposes that bodhicitta has a function similar to that of a mnemonic formula (dhāraṇī: gzungs snags). He also provides cases where bodhicitta is equated with emptiness (śīnyatā: stong pa nyid). The sixth chapter deals with the nature and development of the bodhicitta concept in some important Mahāyāna sūtras. Bodhicitta is investigated there under the aspect of its being (a) an indispensable precondition for the revelation of the buddhadhātu or tathāgatagarbha, (b) an altruistic practice, (c) an equivalent of śīnyatā, and (d) an equivalent of tathāgatadhātu. The first two apparently correspond to what I call ethico-spiritual bodhicitta, and the latter two to ontological bodhicitta.

The seventh chapter presents the theory of bodhicitta according to various Mahāyāna sāstras, such as the Mahāyānasūtrālaṃkāra. It also discusses the relationship between the theory of bodhicitta and that of the tathāgatagarbha. The eighth chapter describes the place of bodhicitta within tantric Buddhism, mainly as exemplified in the Vairocanābhīṣambodhitantra. In sum, Tagami comes to the following four conclusions: (1) The term bodhicitta is uniquely Buddhist but is not found in non-Mahāyāna sources. (2) The term found in non-Mahāyāna sūtras for bodhicitta is aññācīcita, and the corresponding non-Mahāyāna term used in Abhidharma sources is laukikāgratā. (3) The term bodhicitta according to the Mahāyāna scriptures means ‘thought of Enlightenment’ and not ‘thought to Enlightenment.’ (The difference between the two is, however, not quite clear to me. It may be that Tagami is making here a case for an ontological or gnoseological interpretation of bodhicitta (i.e. citta whose nature is characterised by bodhi) against an ethico-spiritual interpretation (i.e. citta that is directed towards the attainment of bodhi). (4) The function of bodhicitta is similar to that of a dhāraṇī.

(b) Francis Brassard (2000)

Francis Brassard, in attempting to understand the nature and function of bodhicitta in the Bodhicaryāvatāra, presents two opposing interpretations by Daisetz Teitaro Suzuki and Sangharakshita, compares and contrasts them, and then offers his own interpretation. According to him, Suzuki understood bodhicitta as an ‘instigator of a brute force’ which is

---

14 Also noted in NAKAMURA 1980: 70, n. 74. Cf. also CPD, s.vv. aññācīcita and abhiññācīcita. Note, however, that the Śrāvakabhūmi (p. 356.23) has aññācīcita (Tib. kun shes par bya ba'i sms). See also the BHSD (s.v. añña, which indicates the Bodhisattvabhūmi as one of the sources), where the term has been translated as ‘a mind disposed to perfect knowledge.’ Presumably, the term aññācīcita will have to be examined in the light of the three undefiled faculties, namely, aññasāyāmīndriya (kun shes par byed pa'i dbus po), aññendriya (kun shes pa'i dbus po), and aññasāvindriya (kun shes pa dang dban pa'i dbus po), which are among the twenty-two faculties (indriya) discussed in the Abhidharmakosā and elsewhere.
'totally devoid of knowledge' and as having a 'definitive conative connotation,' and thus he translated it as a 'desire for enlightenment.' If this is indeed the case, Suzuki's notion of bodhicitta would not seem to fit into any of the five typologies of bodhicitta which I discuss in my work. Sangharakshita, on the other hand, interprets bodhicitta as a 'will to enlightenment,' or 'going for refuge,' and that too on a 'cosmic scale.' According to Brassard, Suzuki interpreted bodhicitta in 'conative,' 'purely motivational' and 'functional' terms, and Sangharakshita in 'metaphysical' ones. He himself goes on to interpret bodhicitta within what he calls a 'soteriological context,' which takes three aspects of bodhicitta (namely, 'functional,' 'metaphysical,' and 'ethical' ones) into consideration, as well as their role 'in the process of spiritual transformation.' Bodhicitta, in the context of the spiritual path, can, according to him, possibly assume three functions, that is, it can function as: (1) a 'desire for enlightenment,' where desire is an 'act of will,' and by extension a 'commitment,' (2) an 'object of concentration,' and (3) a 'basis for the cultivation of awareness.'

4. Articles on Bodhicitta

Several articles that deal with bodhicitta or cittotpāda have appeared. In the following few paragraphs, I shall attempt to review some of the most important ones accessible to me.

(a) Kumataro Kawada (1965)

In 1965 the Japanese scholar Kumatarō Kawada wrote an article in German about both the transcendent and immanent nature of bodhicitta. Bodhicitta is discussed there in a philosophical context under four points: (1) the problems related to the transcendent and immanent nature of bodhicitta, (2) the relation between bodhicitta and dharmatā, (3) methodological relativisation, and (4) concluding observations.

(1) Under the first point, Kawada states that the transcendent nature of bodhicitta is analysed in great detail and with great precision in both Hinayāna and Mahāyāna sources, thereby suggesting that bodhicitta as an idea is common to both the Mahāyāna and non-Mahāyāna systems. Kawada's assumption seems to be based on his usage of the term bodhicitta in a strictly 'gnoseological' sense, that is, as the gnosis of a buddha. In any case, the point he goes on to make is that although it might appear as if only the transcendent nature of bodhicitta is important in Buddhism, in reality immanence too figures in, if one but considers the concept of apratisthitanivṛtta, which implies that one is able to transcend saṁsāra (or attain nirvāṇa) and yet remain within saṁsāra and continue carrying out salvific activities. Kawada also addresses the relationship between the transcendent and immanent nature of bodhicitta, viewing it as a problem that may be resolved in several ways. One of the ways to explain the link between transcendence and immanence is on the basis of the relationship between bodhicitta and the highest reality (dharmatā).

(2) Under the second point, he discusses three matters: (a) the notion that the highest truth or reality (dharmatā) is the 'master,' (b) the idea that one becomes awakened by gaining insight into the eternal dharmatā, and (c) the Buddhist claim of the absoluteness of truth. Under the first subpoint, he explains that a buddha, a bodhisattva, and bodhicitta are all dependent on the dharmatā, whereas the dharmatā is eternal and is independent of them. In other words, to use my typologies, 'gnoseological' bodhicitta and the beings who possess it are dependent on the 'ontological' one. Under the second subpoint, he argues that it is by gaining cognitive insight into the enduring dharmatā that one obtains bodhicitta (in its

15 Cf. SINGH 1977: 31–32, where Suzuki's positions on bodhicitta, as found in his Outlines of Mahāyāna Buddhism, have been summarised.

16 BRASSARD 2000: 27.
The Resolve to Become a Buddha

62

The Resolve to Become a Buddha

‘gnoseological’ sense) and becomes awakened, and it is at this juncture that both the transcendent and immanent nature of bodhicitta can unfold. Under the third subpoint, he notes that Buddhism, like other religions and philosophies, lays claim to the absoluteness of truth.

(3) Since every philosophy and religion lays claim to absoluteness, it is, according to Kawada, methodologically sensible for each of them to transcend itself, find its own methods of putting itself into perspective, and scrutinise the claims regarding the universality of truth made by it and others; otherwise any mutual understanding among them would give way to narrow-minded mutual deprecation. For Buddhist philosophy, he recommends the transcendent and immanent nature of bodhicitta as a suitable and practical point of reference.

(4) In the concluding part of the article, he refers to the four kinds of śraddhā mentioned in the Mahāyānaśraddhotpāda, namely, those pertaining to the ‘root’ (called paurāṇasthitidharmatā in the Lankāvatārasūtra), Buddha, Dharma, and Saṁgha. According to him, for one who has only the last three in mind, the Three Jewels would remain only immanent, but for one who has all four in mind, the Three Jewels would be transcendent and immanent simultaneously.

(b) Lal Mani Joshi (1971)

The article by Lal Mani Joshi published in 1971 is one of the most useful on bodhicitta. By referring to a number of source texts including the Vajradhvajasiitra, Aṣṭasāhasrikā, Nairātmyaparipṛcchāsūtra, Gandavyūhasūtra, Guhyasamājatantra, Hevajratantra, Bodhisattvabhūmi, Mahāyānasūrālāṃkāra, Bodhicittotpādaśāstra (attributed to one Vasubandhu), Abhisamayālāṃkāra, Dharmasamgraha (attributed to Nāgārjuna), Śīkṣāsamuccaya, Bodhicaryāvatāra, First Bhāvanākrama, Prajñāpayaaviniścayāsiddhi (by Anangavajra), and Jñānasiddhi (by Indrabhūti), the author attempts a historical survey of the bodhicitta concept. He makes it clear that the concept does not occur in the early Pāli literature (i.e. in non-Mahāyāna Buddhism), whereas it is pervasive in both tantric and non-tantric Mahāyāna. He refers to several aspects and types of bodhicitta, including its nature, subdivisions, causes, significance, and benefits, eulogies of it, and similes for it. Apart from the common meaning of bodhicitta, he refers to a ‘highly philosophical and absolutistic’ idea of bodhicitta (i.e. in the sense of what I call ‘ontological’ bodhicitta), the idea of Vajrasattva being bodhicitta, and the designation of the union of emptiness (śūnyatā: stong pa nyid) and compassion (karuṇā: snying rje), the union of insight (prajñā: shes rab) and efficient strategies (upāya: thabs), the fluids of virility (sukra: khu ba), and great bliss (mahāsukha: bde ba chen po) as bodhicitta. The various notions of bodhicitta, however, have not been placed by him into any historical or doctrinal context, and seem to stand isolated from each other.

(c) S. K. Nanayakkara (1971)

S. K. Nanayakkara’s overview of bodhicitta in the Encyclopaedia of Buddhism published by the Government of Ceylon is one of the most informative such accounts that I have encountered. Nanayakkara maintains that bodhicitta is an important concept common to Theravāda (implicitly) and tantric and non-tantric Mahāyāna Buddhism. He has also showed that in non-tantric Mahāyāna bodhicitta ‘developed along both ethical and metaphysical lines,’ and that in due course these two aspects were blended together. Further, he states that in tantric Mahāyāna bodhicitta came to be regarded as great bliss (mahāsukha: bde ba chen po). One of the strengths of this article is that it gives many important primary sources, which show the historical development of the concept of bodhicitta. However, Nanayakkara makes some problematic comparisons. For example, he states that in non-tantric Mahāyāna
bodhicitta was developed along ‘pantheistic lines’ and came to be ‘analogous to the Brahman concept of the Upanisads.’

(d) Lobsang Dargay (1981)

An article by Lobsang Dargay entitled “The View of Bodhicitta in Tibetan Buddhism” was published in 1981. In this article, Dargay—taking Tsong-kha-pa and Mi-pham rNam-rgyal-rgya-mtsho (1846–1912) as his test cases—demonstrated how Tibetan scholars attempted to harmonise the divergent views of bodhicitta found in Indian sources. As the basis for his discussion, he employed the commentaries on the Abhisamayālaṁkāra by Tsong-kha-pa and Mi-pham. He seems to have chosen these scholars as representatives of the youngest and the oldest schools of Tibetan Buddhism, respectively.

Three topics regarding bodhicitta are discussed: (1) the problem concerning the placement of pranidhiccita (the resolve to aspire) and prasthañacitta (the resolve to set out’) on the different levels of the bodhisattva paths, (2) conventional and absolute bodhicitta, and (3) the issue of whether bodhicitta is mind (citta: sems) or a mental factor (caitta/caittasika: sems las byung ba). Under the first point, Dargay addresses several issues. He notes that prasthañacitta is said to involve the practice of the six perfections (pāramitā: pha rol tu phyin pa) on the one hand, and to be already active at the intermediate level on the path of accumulation (sambhāramārga: tshogs kyi lam)—that is, while one is still an ordinary person (prthagjana: so so/so'i skye bo)—on the other. Consequently, he raises the following questions: How can a bodhisattva who is still a prthagjana and who has no direct insight into true reality possess the perfection of insight (prajñāpāramitā: shes rab kyi pha rol tu phyin pa)? Do pranidhiccita and prasthañacitta start simultaneously from the very beginning and continue until the very end, that is, the stage of a buddha? Or do they start and end at different levels of the bodhisattva path? Dargay shows that some Tibetan scholars leave some of these questions unresolved and that various other scholars, even within the same school, come up with different solutions. He shows, for example, that ’Jam-dbyangs-bzhad-pa (1648–1721), although a dGe-Iugs-pa, deviates from Tsong-kha-pa, and that Mi-pham, although a rNying-ma-pa, deviates from ’Jigs-med-gling-pa (1729/30–1798). Dargay then goes on to present the explanations of conventional and absolute bodhicitta offered by Tsong-kha-pa and Mi-pham. The discussion of the third point is based mainly on Indian sources and ends with the conclusion that although Tibetans were aware of divergent Indian views on this issue, they held the view of Haribhadra (who flourished in the later part of the 8th century) and his disciples as authoritative.

(e) Gareth Sparham (1987)

Gareth Sparham’s article “Background Material for the First of the Seventy Topics of Maitreya-nātha’s Abhisamayālaṁkāra,” which appeared in 1987, deals with the meaning of cittotpāda in Abhisamayālaṁkāra 19–20. The aim of the article is to explain ‘what cittotpāda is and how it is to be defined.’ Sparham attempts to do this by (1) supplying the context of the verses in the Prajñāpāramitā tradition in general and in the Abhisamayālaṁkāra in particular, (2) explaining some of the metaphysical implications of the verses according to traditional exegesis, and (3) presenting translations of the pertinent commentaries on the verses, namely, Haribhadra’s Abhisamayālaṁkārāloka and Tsong-kha-pa’s Legs bshad gser phreng. The issue of whether cittotpāda is citta or caitta is also discussed in this context. Furthermore,
The Resolve to Become a Buddha

according to him, all Indian and Tibetan Mahāyāna writers seem to agree that a fully qualified cittotpāda requires two objects of appropriation: (a) bodhi, which a bodhisattva hopes to attain, and (b) the benefit of other sattvas, which he hopes to accomplish. The first is seen as the means of achieving the second.

(f) Gareth Sparham (1992)

In 1992 Gareth Sparham wrote another article, entitled “Indian Altruism: A Study of the Terms bodhicitta and cittotpāda,” in which he attempted to trace the origin of the cittotpāda doctrine and also to demonstrate how its origin differs from that of bodhicitta. He further goes on to differentiate the meanings of bodhicitta, cittotpāda, and bodhicittotpāda. According to him, the concept of cittotpāda can be traced in a later part of the Aṣṭasāhasrikā (named by him the ‘Origin-Passage’), which he cites, translates, and comments upon. Noting that the Origin-Passage is corroborated by the Rainagunasaṁcaya, he then makes the following observations:

Based on the Origin-Passage, cittotpāda was originally an attitude, construed out of the wilful manipulation of ideas or imagination, that welled up within the person banishing negativism and depression and inspiring further effort. In the earliest formulation of cittotpāda this uplifting of the heart was to be caused by thinking about living beings in a certain fashion: (a) imagining them to be relatives and (b) reflecting on the sameness of them and oneself. Such thoughts or ideas were to make bearable the difficult work of a bodhisattva. Although altruistic sentiments are clearly identifiable in the Origin-Passage there is no unequivocal altruistic message, in the sense of an exhortation urging the bodhisattva to make work for others his primary motivation. It should be stated that although the Origin-Passage does use the expression cittam utpādayitavyam twice, the term cittotpāda itself does not occur there. This may be because the Origin-Passage indeed represents an early pre-terminological passage, that is, one where the technical term cittotpāda has not yet been fixed. Sparham, however, seems to make no distinction between what one might call the pre-terminological cittam utpādayitavyam and the terminological word cittotpāda, and argues as though the latter can already be found in the Origin-Passage.

Next, Sparham distinguishes the terms bodhicitta and cittotpāda. According to him, the component citta in bodhicitta refers to ‘something more fundamental’ (i.e. prakṛti cittasya prabhāsvarā: sems kyi rang bzhin ’od gsal ba), and the bodhi in bodhicitta to the ‘Prajñāpāramitā herself.’ On the other hand, citta in cittotpāda (which compound, according to him, occurs in the Origin-Passage) is understood as something that needs to be generated by a ‘set of notions’ (samjñā: ’du shes). He further states that the meaning of cittotpāda in the Origin-Passage underwent transformation and was later divided into conventional and ultimate bodhicittotpāda, as follows: Conventional bodhicittotpāda is ‘concerned with conventional realities such as the needs of other living beings and the attainment of enlightenment,’ whereas ultimate bodhicittotpāda is ‘none other than the original bodhicitta’ (i.e. ‘the non-dual liberating vision and the ultimate reality called Prajñāpāramitā,’ which I call ‘gnoseological’ and ‘ontological’ bodhicitta, respectively). According to Sparham,

20 Ibid., 227–228.
21 This seems to be also the case with the technical term bodhicitta; that is, the terminological word bodhicitta was developed later from earlier pre-terminological expressions such as bodhāya cittam utpadyate to which I shall return later. Schmithausen pointed out to me that a similar case seemingly exists with regard to satipaṭṭhāna and satim upaṭṭhapeti.
bodhicitta and cittotpāda were originally different in meaning, and later bodhicitta became more popular as a shortened form of bodhicittotpāda.

Sparham then goes on to discuss the lineage of the practice of the sameness of self and others (parātmāsamatā: bdag dang gzhan du mnyam pa). In this context, he, following La Vallée Poussin, makes the following two observations about the idea of parātmāsamatā expressed by Śāntideva: (1) ‘self and other are ultimately undifferentiated,’ and (2) ‘empathy with the plight of others is natural because one shares feelings of happiness and sorrow in common with them.’ The former is said to be a doctrine of the Prajñāpāramitā scriptures, whereas the latter, which is not distinctly Buddhist, is said to be found in pre-Mahāyāna texts. The rest of the article makes an attempt to trace the so-called ‘seven-point lineage’ (rgyu 'bras man ngag bdun) recognised in Tibet and concludes with some remarks about the place of altruism in Mahāyāna Buddhism.

I shall return to this article by Sparham in chapter five, where I discuss some of the ideas presented by him in more detail.

5. Studies on Bodhicitta in Specific Canonical Works

Although it is beyond the scope of this study to undertake a survey of all editions, translations, and summaries of Mahāyāna sūtras and śāstras dealing in one way or the other with the topic of bodhicitta, there exist several studies each of which makes a valuable contribution to understanding how bodhicitta is used in a specific work, and which should therefore be mentioned here, however briefly. Since numerous publications dealing with bodhicitta are in Japanese, I shall list here some of them, even though it has not been always possible to locate them or to assess them.

Ulrich Pagel has discussed bodhicitta or cittotpāda in his studies of the Bodhisattvapitaka published in 1994 and 1995. The idea that a bodhisattva becomes a buddha at the very instant bodhicitta is first generated—an idea found in the Šatasāhasrikā—has been noted by David Seyfort Ruegg. Likewise the notion that a bodhisattva attains vajropamasaṃādhi immediately after the generation of bodhicitta, as stated in the Pañcavimśatisāhasrikā, has also been pointed out by him. In 1972 Taishū Tagami addressed the meaning of upāya and cittotpāda in the Saddharma-puṇḍarīkasūtra. The chapter on bodhicittotpāda and vinayacitta in the Daśabhūmikasūtra was dealt with in a 1966 article by Yukinori Tokiya. In 1993 Jens Braarvig discussed prathamacittotpāda, the first of the eighty ‘inexhaustible factors’ (aṅkṣaya: mi zad pa), in his study of the Aṣṭasāhasrikāvatārasūtra. Just as lotuses grow in mud, so too does bodhicitta grow in the heap of intellectual-emotional defilements (kleśa: nyon mongs pa); this comparison, found in

24 The expression parātmāsamatā is used, for example, in Bodhicaryāvatāra 7.16c.
27 Ibid., 167.
the *Vimalakirtinirdeśasūtra*, is briefly mentioned by A. K. Warder. The account of Māra’s generation of *bodhicitta* found in the *Śūramgamasamādhisūtra* has also drawn the attention of some scholars. Chishō Namai wrote an article on *svacittādhiśṭhāna*, treating it as an aspect of *bodhicitta* in the *Gandavyūhāsūtra*, and another on *bodhicittabhāvanā* in tantric Buddhism. Warder has remarked that the main theme of the *Gandavyūhāsūtra* is the quest for awakening, which begins with *bodhicitta*. He has also taken note of the numerous similes (involving such things as alchemy and a certain gem) used in that *sūtra* to describe *bodhicitta*. For the entry *bodhicitta* in his *Buddhist Hybrid Sanskrit Dictionary*, Franklin Edgerton has drawn on the *Mahāvyutpatti*, *Lalitavistarasūtra*, and *Gandavyūhāsūtra*. In particular, he refers to the glorification of *bodhicitta* in the *Gandavyūhāsūtra* (cited in the *Sikṣāsamuccaya* in abbreviated form).

Helmut Eimer, discussing the four *caryās* and ten *bhūmis* in the *Mahāvastu*, noted that the work belongs to a period during which the term *bodhicitta* was formed, and stated that the presentation of the *pranidhicaryā* and *bhūmis* in it reflects the actual meaning of *bodhicitta*, even though the latter has not yet become a fixed term. The technical term *bodhicitta*, however, does occur in the *Mahāvastu*. Seyfort Ruegg, referring to Demiéville, pointed out that the *bodhisattva’s* non-regression after the first generation of *bodhicitta* is mentioned in Samgharakṣa’s supplement to the *Yogācārabhūmi*. There exist two articles on *cittotpāda* in the *Yogācārabhūmi*, one published in 1971 by T. Tagami, and the other in 1981 by K. Ozawa. Summaries of the *cittotpāda* chapter of the *Bodhisattvabhaumī* have been made by several scholars. Wogihara and Dutt’s editions of the text have been valuable contributions as well. The *cittotpāda* chapter of the *Bodhisattvabhaumī* was translated into Japanese by K. Sōma. The edition and translation of the *Mahāyānasūtrālaṃkāra* and one of its

commentaries published by Sylvain Lévi in 1907 and the edition and translation of the *Śiksāsamuccaya* published by Cecil Bendall and W. H. D. Rouse in 1922 should also be noted here. Deserving mention, too, in this context are a study of *cittotpāda* in the *Abhisamayālaṃkāra* by Hirofumi Isoda, published in 1970, and Naoya Funahashi’s 1988 article on the *cittotpāda* chapter of the *Mahāyānasūtrālaṃkāra*.

Takasaki, in his study of the Ratnagotravibhāga, has noted that the main theme of the *Mahāyānadhadharmadhātvavīśeṣaśāstra*, a small work attributed within the Chinese tradition to Śāramati, is bodhicitta, which is presented there under twelve points of view. The author takes it to be synonymous with *cittaprabhṛti* and *tathāgatagarbha*. Tagami, too, wrote an article on the concept of bodhicitta in the same text. Another article in Japanese, by Kyōsen Itō, is about the meaning of bodhicitta and tathāgatagarbha in the Ratnagotravibhāga. Tesshū Kaneko has studied bodhicitta in the context of Japanese Buddhism with special reference to the ninth consciousness (i.e. Paramārtha’s *amalavijñāna*). The *Bodhicittotpādasūtra* attributed to one Vasubandhu, which must have been very popular in China, was studied by Bhadanta Santi Bhikṣu as well as by Shinten Sakai. A study of the Chinese commentary on the *Bodhicittotpādasūtra* by K. Yamaguchi appeared in 1949.

Of all works dealing with bodhicitta, Śāntideva’s *Bodhicaryāvacāra* has received the greatest attention. One cannot possibly talk about bodhicitta without reference to it. Furthermore, the ten kinds of *cittotpāda*, each linked with one of the ten bhūmis and pāramitās in the *Madhyamakāvatāra*, have been noted by Seyfort Ruegg. The praise of

55 The large number of translations into various Western languages is itself testimony to modern scholars’ interest in the *Bodhicaryāvacāra*. See, for example, the details provided in Gómez 1999 and Pfandt 1986: 18–19. The extent of its use for thematic studies cannot, however, be assessed here.
bodhicitta in the Caryāgītikāsa has also drawn the attention of some scholars. Along the same lines, Herbert Guenther wrote an article on the eulogising of bodhicitta. The notion of bodhicitta in Kamalaśīla’s First and Second Bhāvanākrama has been discussed briefly by both Tucci and Seyfort Ruegg. An article in Japanese on the two kinds of bodhicitta in the Bhāvanākrama was published in 1988 by Morinobu Asano. Similarly, Atiśa’s excursus on bodhicitta in his Ratnakarāṇḍodghāṭa was discussed by Izumi Miyazaki in 1994. Seyfort Ruegg has drawn attention to the first chapter of Abhayākara-gupta’s Munimatālāṃkāra, where bodhicitta is treated as the main subject together with the tathāgatagarbha and ekāyāna theories. Schmithausen, in his book Maithri and Magic, refers to the occurrence of the bodhicitta concept in the Mahāmāyūrīti and notes that the text explicitly states that the emergence of bodhicitta in nāgas entails their friendliness towards other sentient beings.

Snellgrove’s introduction to the study of the Hevajratantra mentions the various notions of bodhicitta found in that tantra. The remarkable definition of bodhicitta in the Guhyasamājatantra has understandably occupied many scholars. The meaning of bodhicitta in the Vairocana-bhisaṃbodhi-tantra has been discussed by Nobuo Ōtsuka, who wrote two articles on the subject in Japanese. In this connection, three articles in Hindi should be mentioned, namely, one on the significance of bodhicitta in Buddhist tantric traditions by Chhog Dorjee, one on absolute bodhicitta in Paramītānyāna and Vajrayāna by Acarya Gyaltsen Namdol, and one on the development of bodhicitta in Vajrayāna by Banārasi Lāl. The last one contains several particularly useful citations from tantric sources.

---

65 Snellgrove 1959: 25. Tsuyoshi Seki is said to have written an article in Japanese about the concept of bodhicitta in the Hevajratantra. I have, however, not been able to locate the bibliographical details of this article.
The reference to bodhicitta in the early Tibetan work bsam gtan mig sgron as ‘great bliss’ (bde ba chen po) has been alluded to by Samten Karmay. Karmay also discusses the idea of bodhicitta found in two Tun-huang manuscripts, namely, those of the Rig pa'i khu byug (along with its commentary) and the sBas pa'i rgum chung. He further refers to the different meanings bodhicitta had for early Tibetan masters, as recorded by Rong-zom-pa in his commentary on the lTa phreng. The type of bodhicitta thematised in the commentary seems to be of the psycho-physiological type. Karmay also discusses the ‘five excellencies’ (che ba lnga) of the rDzogs-chen ‘gnoseo-ontological’ concept of bodhicitta as presented by Rong-zom-pa in his Theg chen tshul ’jug. The importance of bodhicitta in the rDzogs-chen tradition has been discussed briefly by David Germano in his study of Klong-chen-pa’s Tshig don mdzod. Finally, Eva Neumaier-Dargyay translated the Kun byed rgyal po, an important rDzogs-chen tantra which greatly highlights the concept of ontological bodhicitta.

6. On Translating the Term Bodhicitta

Looking at how the term bodhicitta has been translated may be expected to give us an idea of how it has been understood by modern scholars. It has been translated in various ways, some of which were already noted by Dayal in 1932. The term was translated as ‘intelligence-heart’ by Suzuki; as ‘primordial essence of mind’ by Masaharu Anesaki; and as ‘thought-enlightenment’ by Bendall and Rouse. Erich Frauwallner, in his Die Philosophie des Buddhismus, has translated bodhicitta as ‘der Gedanke an die Erleuchtung.’ Moritz Winternitz has translated it as ‘der Wille zu Erleuchtung.’ And Herbert Guenther has translated byang chub kyi sms (bodhicitta) in the rDzogs-chen context as ‘intending toward limpid clearness and consummate perspicacity.’ Furthermore, Brassard records seven

77 BENDALL & ROUSE 1922: 53. See the comments in VON STAËL-HOLSTEIN 1933: v: “Bendall and Rouse (page 53) translates the expression bodhicitta by ‘thought-enlightenment’ in chapter 3 and 4 of the Kātyāyaparivarta which are quoted in the Čikṣāsamuccaya. I am sure that all my readers will agree with me in preferring Sthiramati’s explanation, according to which (p. 37) bodhicitta is the fixed purpose, which the words ‘I shall become Buddha’ express.”
79 WINTERNITZ 1930: 51. See also BRASSARD 2000: 7, n. 7, 26, where ‘will of enlightenment’ and ‘will to enlightenment’ are renderings of Sangharakshita’s translation of the term bodhicitta. Perhaps the difference is a matter of style. As I have indicated, TAGAMI 1990: 519 also makes a similar distinction, i.e. between ‘thought to enlightenment’ and ‘thought of enlightenment.’
alternative translations according to various scholars: (1) ‘thought of enlightenment,’ (2) ‘mind of enlightenment,’ (3) ‘desire for enlightenment,’ (4) ‘will of enlightenment,’ (5) ‘mind turned to enlightenment,’ (6) ‘awakening mind,’ and (7) ‘desire for awakening.’ Brassard adds that it is pointless to try to decide which translation is the most appropriate one. In this regard, Luis O. Gómez makes the following remarks:

It is, of course, impossible to translate to anyone’s satisfaction the term bodhicitta. I prefer the simple rendering ‘thought of awakening,’ leaving it to context to clarify its many nuances. A full discussion of my argument for this choice would take much space. Suffice to say that when we come to terms such as these, there is even more room for honest, intelligent disagreement.

Schmithausen has, in the context of the ethico-spiritual bodhicitta, translated bodhicitta as ‘the resolve for awakening.’ He has also explained that there is no connotation of light in the Sanskrit word bodhi and that hence it would be preferable to translate it as ‘awakening’ rather than as ‘enlightenment.’ But he has also made it clear that since the attained insight is occasionally designated as ‘light’ (āloka), it is not erroneous to translate bodhi as ‘enlightenment’ as long as there is no implication of an external higher source of the ‘enlightenment.’

It is indeed difficult to find a common translation that covers all five types of bodhicitta, and hence I have, in most cases, refrained from translating it. Nonetheless, I do think that bodhicitta in the sense of the resolve to become a buddha covers the conative, cognitive, and emotive components. By ‘conative component’ I mean the aspect of ‘will’ (chanda: ‘dun pa) or ‘resolve’ to become a buddha. Such a resolve can be driven or accompanied by a ‘cognitive component,’ that is, insight or knowledge (prajñā: shes rab) about the modi operandi and modi vivendi conducive to and necessary for the attainment of such a soteriological goal. By ‘emotive component’ I mean the ethical and altruistic aspects expressed in the form of emotions such as benevolence (maitrī: byams pa) or compassion (karunā: snying rje).

In my view, all five types of bodhicitta are in one way or another connected with or relevant to the realisation of the soteriological objective by oneself and others, that is, to becoming a buddha.

7. A Study of Bodhicitta: Still a Desideratum

Despite the various studies done on bodhicitta, a systematic and comprehensive study of bodhicitta is still called for for a number of reasons. First, bodhicitta deserves to be studied in all its aspects simply owing to its central importance in tantric and non-tantric Mahāyāna Buddhism, for the absence of bodhicitta would render most forms of Mahāyāna Buddhism lifeless and meaningless. Second, even though some studies have already been done on bodhicitta, I am afraid that they are marginal and minimal in proportion to the vast contributors. See also Schmithausen 1997: 13, n. 40; Norman 1990: 26–27.
unexplored territory. Our understanding of bodhicitta has hitherto mainly been based on the Bodhicaryāvatāra, the Abhisamayālaṃkāra, and the Mahāyānasūtrālaṃkāra, but my impression is that there exists much more material in other—tantric and non-tantric—scriptures and commentaries that await exploration, its surface having so far barely been scratched.

Third, most of the studies that I discussed above are short articles or only brief references often made in passing within very general contexts. Moreover, while acknowledging the contribution of all previous studies done on the subject, I do not necessarily accept all their conclusions. Some of them have treated bodhicitta as though it were an idea shared by both Mahāyāna and non-Mahāyāna sources, despite the fact that, as already made clear by Taishū Tagami, the term itself cannot be traced to non-Mahāyāna sources. In my view, there is no sense in taking bodhicitta as a pure 'conative' desire to become a buddha, with no cognitive or ethico-spiritual content. The interpretation of bodhicitta as an 'instigator of brute force' devoid of prajñā and karuṇā, is, I submit, indefensible, at least according to the Mahāyāna ideals of a bodhisattva. Of the two monographs, Brassard's book concentrates mainly on Śāntideva's Bodhicaryāvatāra, and some may wonder to what extent it actually contributes towards understanding Śāntideva's idea of bodhicitta. Tagami's monograph, on the other hand, while providing an overview of the historical development of bodhicitta, unfortunately remains inaccessible to many scholars. Some of his propositions, such as the suggestion that the Mahāyāna concept of (though not the term) bodhicitta can be found in the non-Mahāyāna sources, and his considering the term ajñācitta to be a non-Mahāyāna precursor of the term bodhicitta, and the word laukikāgraṭā (occurring in the Jñānaprasthāna) as a corresponding Abhidharma term for bodhicitta, seem to be very problematic. Except for Tagami, nobody seems to have attempted a historical treatment of bodhicitta as a concept. Even those studies that follow a chronological presentation are by and large descriptive rather than historical or analytical.

Fourth, no one, as far as I can tell, has explained or devised a scheme to explain the baffling variety of types of bodhicitta pervasive in different degrees throughout tantric and non-tantric Mahāyāna Buddhism. The majority of scholars have studied what I call 'ethico-spiritual' bodhicitta, which is the most conservative view of bodhicitta. On the whole, most of the studies deal only with certain aspects from the entire spectrum of meaning expressed by bodhicitta. For instance, many address the concept of bodhicitta current in tantric Buddhism, but even here the term 'tantric form of bodhicitta' quite confusingly suggests that there is one single type of tantric bodhicitta, for tantric Buddhism, as we shall see, presupposes all five types of bodhicitta defined by me. For all these reasons, further studies of bodhicitta seem to be fully justified. I cannot, to be sure, claim that my own study of bodhicitta will do full justice to the topic. Nonetheless, it is hoped that it will make some contribution, small though it may be, to the field of bodhicitta studies and raise some awareness of the importance of bodhicitta in tantric and non-tantric Mahāyāna Buddhism.

8. Concluding Remarks

The whole sweep of Mahāyāna Buddhism, tantric as well as non-tantric, seems to be permeated with the idea of bodhicitta, which makes an exhaustive assessment of previous studies done on bodhicitta difficult. It is very likely that many studies have escaped my notice, and even those that I have discussed or mentioned may not have received the attention and emphasis they merit. Although they have not been discussed in this chapter, I also tacitly acknowledge several studies on Mahāyāna Buddhism that, while not mentioning the term bodhicitta at all, are still valuable for the study of the concept of bodhicitta.
Chapter Three

The Historical and Doctrinal Background of the Bodhicitta Concept

Which to-be-abandoned is not abandoned through bodhicitta? Which to-be-attained is not attained through bodhicitta? Which benefit of others is not done through bodhicitta? Which benefit of oneself is not done through bodhicitta?

– Khu-nu Bla-ma, Byang sms bstod pa 345

1. Introductory Remarks

An attempt shall be made in this chapter to trace the historical and doctrinal background of the bodhicitta concept in early non-Mahāyāna Buddhism, in other words, to identify early ideas or notions which could have been the ‘raw materials’ that went into the formation of the concepts of proto-bodhicitta and later of bodhicitta itself. By ‘proto-bodhicitta’ I mean an archetypal concept according to which even an ordinary sentient being can in principle resolve to become a buddha for the benefit of sentient beings. The first concept of this kind, which historically precedes the term bodhicitta, and which had not yet been put into practice by anyone, can doctrinally be said to hover on the borderline between Mahāyāna and non-Mahāyāna Buddhism. It is only when this model becomes prescriptive and begins to be implemented by those ordinary sentient beings wishing to become buddhas that it can be called bodhicitta proper. The latter concept thus figures only within the doctrinal domain of Mahāyāna Buddhism. I therefore regard the initial resolve that the historical Buddha (or any other Buddha, such as Kāśyapa) supposedly made in his previous life to become a buddha, as found in non-Mahāyāna Buddhism, as embodying neither the concept of bodhicitta nor of proto-bodhicitta. While non-Mahāyāna Buddhism may contain doctrinal seeds or even

individual building blocks of proto-bodhicitta and bodhicitta proper, it would be, in my view, inaccurate to state that it actually operates with these concepts.\textsuperscript{2}

In general, while not denying some outside influences, one may assume that the impulse for the major part of the development of Mahāyāna Buddhism can be traced to the Buddhists themselves, particularly to a psychological need on their part to make up for the loss of their teacher, the historical Buddha. It is quite conceivable that the idea of bodhicitta was developed as one of the measures to fulfil this need. Presumably the existing doctrinal reserves found within conservative Buddhism contributed to the development and legitimisation of this concept. Moreover, the rise of the notion of bodhicitta and both the problems and possibilities it generated probably lent impetus to further developments and so unleashed a dynamism of its own.

2. Bodhicitta as a Means of Compensating for the Loss of the Historical Buddha

One popular Tibetan Buddhist maxim runs as follows:\textsuperscript{3}

> Whether [one is] a Buddhist or non-Buddhist is a matter of sarangamana (‘taking refuge’).

> Whether [one is a follower of the greater or the smaller vehicle is a matter of cittotpāda.

The ideas expressed in it, namely, the search for refuge in the Buddha and the wish to become a buddha oneself, are relevant for our discussion. The idea that one could become a bodhisattva by resolving to become a buddha may well have had a historical link with that of becoming a Buddhist by taking refuge in the Three Jewels (ratnatreya/triratna): the Buddha (the teacher), the Dharma (the teachings), and the Sangha (the ordained community of monks and nuns).\textsuperscript{4} In some Mahāyāna sūtras, such as the Lalitavistaraśūtra, the function of bodhicitta is indeed conceived as the perpetuation of the lineage of the Three Jewels.\textsuperscript{5} The expression ‘not terminating the continuity of the family of the Three Jewels’ recurs elsewhere.\textsuperscript{6} This suggests that the perpetuation of the Three Jewels has been one of the main concerns in the history of Buddhism.

\textsuperscript{2} Non-Mahāyāna Buddhism may also contain doctrinal elements that have given rise to several other ideas characteristic of Mahāyāna Buddhism. Such doctrinal elements that have the potential to develop into characteristic Mahāyāna views cannot be regarded as yielding exclusively Mahāyāna thought.

\textsuperscript{3} The Tibetan Buddhist maxim, for which I could not trace a written source, is as follows:

\textit{phyi pa nang pa skyabs ‘gro i khyad || theg pa che chung sms bskyled khyad ||}

\textsuperscript{4} However, it should be noted here that the ritual and practice of generating the resolve to become a buddha is not a substitute for the historically older ritual and practice of taking refuge, and is in fact almost always preceded by the latter. This is because the Mahāyāna doctrine presupposes that one becomes a Buddhist (at least ‘officially’) before becoming a bodhisattva.

\textsuperscript{5} For the so-called ‘eight great treasures,’ see the Lalitavistaraśūtra (VAIDYA & TRIPATHI 1987: 342.13–19; T, fols. 318b7–319a3; D, fol. 214a6–b1). See also TSD, s.v. gter chen po bryag. Mi-pham seems to have been fascinated by the idea of the ‘eight great treasures’ and mentions or describes it on several occasions, namely, in his (a) Sanskrit-Tibetan lexicon (also referred to in TSD, s.v. gter chen po); (b) mKhas ‘jug (pp. 321.4–322.4), where the pertinent passage from the Lalitavistaraśūtra is cited; (c) mKhas ‘jug sdom byang (p. 380.2–4); and (d) Shes rab ral gri i mchan (pp. 815.3–817.3). The bodhicittanidhāna, which is one of the eight, is said to guarantee the propagation of the family lineage of the Three Jewels. See the Lalitavistaraśūtra (VAIDYA & TRIPATHI 1987: 342.17): bodhicittanidhānam triratnavamśānupacchedaparākramā; ibid. (T, fol. 319a2–3; D, fol. 214b1): dkon mchog gsum gyi rigs rgyun mi gcod pas byang chub kyi sems kyi gter dang |. See also Mi-pham’s mKhas ‘jug (pp. 321.5–322.2) and Shes rab ral gri (p. 816.4–5).

\textsuperscript{6} For example, the Sāgaramatparipucchāśūtra states that a bodhisattva, once having generated his resolve to become a buddha, “is not deterred from the exertion of perpetuating the genealogy of the Three Jewels.” See the citation in the Śikṣāsamuccaya (BENDALL, p. 184.12–13; VAIDYA, p. 103.2): na bhidyate triratnavamśānupacchedaparākramā. Cf. BENDALL & ROUSE 1922: 180. See also the Sūtrasamuccaya (pp.
Becoming a Buddhist seems to pose no problem so long as the Three Jewels exist, but what if one or more of them ceases? How can one take refuge in the Buddha if he is not present? Does the possibility of becoming a Buddhist then cease? Such questions were probably irrelevant so long as the historical Buddha Gautama Śākyamuni lived, but the sudden demise of this charismatic teacher and mentor is a fascinating theme for the comparative studies of religions, for the same may well be the case, for example, with Jesus and Muhammad.

It has been pointed out that the names Siddhārtha/Siddhattha and Śākyamuni/Sakyamuni occur quite seldom in the earlier parts of the Pāli canon and that the name Śakyamuni occurs only in verses of ‘keywords’ (uddāna), which do not belong to the actual text. See SCHMITHAUSEN 2000c: 7, n. 9.

One of the so-called ‘seven limbs’ (yan lag bdun pa) is requesting buddhas not to pass into parinirvāṇa. This idea, in my opinion, presupposes that the Buddha once gone is forever gone, or is at least beyond the reach of ordinary beings.

SCHMITHAUSEN 2000c: 11, 14. One of the so-called ‘seven limbs’ (yan lag bdun pa) is requesting buddhas not to pass into parinirvāṇa. This idea, in my opinion, presupposes that the Buddha once gone is forever gone, or is at least beyond the reach of ordinary beings.

SCHMITHAUSEN 2000c: 9, n. 18.

One of the so-called ‘seven limbs’ (yan lag bdun pa) is requesting buddhas not to pass into parinirvāṇa. This idea, in my opinion, presupposes that the Buddha once gone is forever gone, or is at least beyond the reach of ordinary beings.

SCHMITHAUSEN 2000c: 9, n. 18.

See SCHMITHAUSEN 2000c: 9, nn. 17, 19; GETHIN 1998: 30. In the light of such statements, it is comprehensible why the Buddha was first depicted by way of symbols such as the Wheel of Dharma (dharmacakra), an empty throne, his footprints, and the Bodhi tree (Ficus religiosa), and why the deceased Buddha was represented only symbolically, such as by a stūpa. See SCHMITHAUSEN 2000c: 9, n. 20; GETHIN 1998: 30.

Schmithausen notes that this is a fascinating theme for the comparative studies of religions, for the same may well be the case, for example, with Jesus and Muhammad.
could have played just as much a role as the desire for happiness, consolation, and safety from the unwholesomeness and dangers of present and future lives.\textsuperscript{12} The spiritual need for a person to relate to could only have intensified upon witnessing the fast deterioration of the Dharma, which was supposed to take over the role of the Buddha. According to Schmithausen, the following six approaches were taken to restore the presence of the Buddha:\textsuperscript{13} (a) the worship of the Buddha’s relics, the śūpas containing them, and sacred places associated with major events in the Buddha’s life,\textsuperscript{14} (b) the practice of ‘thinking of the Buddha’ (buddhānusmṛti) and the attempt to encounter him face-to-face through meditative visualisation, (c) the hope placed in the future Buddha Maitreya, (d) the introduction of portraits of the Buddha for the purpose of paying respect and as a basis for meditative visualisation, (e) the belief that the historical Buddha exists further in a transcendental paradise-like sphere, and from time to time appears as a phantom (nirmāṇa) out of compassion for the world, and (f) the belief in the simultaneous existence of more than one buddha in a cosmos which comprises vast and countless world systems.\textsuperscript{15} The belief in the Buddha as a living presence in monasteries (vihāra) was also surely important.\textsuperscript{16} Given the cause-and-effect or means-and-end relationship between bodhicitta and a buddha, studies on the development of the figure or notion of the Buddha should prove quite useful for understanding the history of the bodhicitta concept. A change in the buddha concept would result in a change in the soteriological model, and thus possibly in the notion of bodhicitta.\textsuperscript{17}

Doctrinally speaking, Buddhist scholars themselves would not deny that a conditioned phenomenon is the result of multiple and complex causes and conditions. Historically speaking, too, we can presuppose that Mahāyāna in general (on which there is no consensus) and the bodhicitta concept in particular did not arise on account of a single self-sufficient cause. Given the supposed multiplicity of causes and complexity of circumstances of the bodhicitta idea, it would be impossible to reconstruct its history of inception and development fully and satisfactorily. Any attempt, including my own, to explain the history of bodhicitta, I am afraid, will have to remain speculative and tentative. What we can at best do is to propose

\textsuperscript{12} SCHMITHAUSEN 2000c: 11.

\textsuperscript{13} SCHMITHAUSEN 2000c: 12–15. The possibility of a connection among the individual approaches is not ruled out (ibid., 12, n. 32).

\textsuperscript{14} See SCHOPEN 1997: 86–164.

\textsuperscript{15} The notion that a buddha does not pass away into parinirvāna and that the Dharma does not disappear, as professed by the Suwarnaprabhāsottamasūtra—often referred to in later sources, for example, the Ratnałokālamkāra (P, fol. 342a6–b6; D, fol. 293a6–b5; S, vol. 64, pp. 811.13–812.15)—is perhaps a generalisation of the fifth point. The pertinent verse is as follows (Suvarṇaprabhāsottamasūtra 2.30, Skt. p. 19.1–2):

\begin{quote}
na buddho parinirvāti na ca dharmo ‘ntardhīyate |
sattvānām paripākāya nirvāṇam tūpadarṣayet ||
\end{quote}

Cf. the verse cited in the Cāryāmālāpakapradīpā (p. 103.2–3):

\begin{quote}
na buddhaḥ parinirvāti na ca dharmah parihīyate |
sattvānām paripākāya parinirvāṇam nidārṣayet ||
\end{quote}

See also the Suvarṇaprabhāsottamasūtra (Tib., p. 17.12–15, n. 241). See also the discussion in the Anantamukhanirāhāradhāraṇītīkā (pp. 121.19–123.3). Such a notion can also be found elsewhere, for example, in the Tathāgatotpattiśambhavasūtra (as cited in the Sūtrasamuccaya, p. 115.3–120.6), Tathāgatācintayuguyanirdeśasūtra (T, fols. 292b5–293a1; D, fol. 193b2–4), *Guhyagarbhatantra (P, fol. 111b2; D, fol. 113b2–3), and dGongs pa ’dus pa’i mdo (P, fol. 89a2–3; D, fol. 94a7–b1).

\textsuperscript{16} SCHOPEN 1997: 258–289.

\textsuperscript{17} For example, a tradition that holds a buddha to be permanent cannot have the same perception of bodhicitta as one that views a buddha as impermanent. The perception or role of bodhicitta may depend on the kind of soteriological model a tradition has chosen.
theories that are possibly quite conceivable. We can assume that there must have been internal and external factors that were responsible for the inception and development of the bodhicitta concept. In my view, one of the most likely internal factors seems to have been the psychological need on the part of Buddhists to somehow make up for the loss of the historical Buddha and to guarantee the durability of the Three Jewels. Probably for some, the best conceivable way to convince themselves of the existence of the Three Jewels was to resolve to become a buddha themselves. “Instead of seeking refuge elsewhere, let me become a refuge for myself and others! Let me ensure the existence of the Three Jewels by becoming a buddha myself.” Such an idea must have appeared appealing to many people, and perhaps can be seen as the most innovative step taken in this direction. Although we shall never be able to determine exactly the process of conception, we can state with certainty that the birth of this resolve to become a buddha oneself by first becoming a bodhisattva was the birth of the bodhicitta concept, and that the dawn of such a concept was indeed a milestone in the history of Buddhism. With it we step onto the terrain of Mahāyāna Buddhism, historically as well as doctrinally. Once the idea of bodhicitta was conceived and its bounds fixed, several factors conceivably contributed to its further development.

3. The Doctrinal Foundations of Bodhicitta in Early Buddhism

Although neither the concept nor the term bodhicitta is explicitly documented in the Pāli canon, several ideas that may have theoretically been sources of its formation can be detected in early Buddhist texts. I shall attempt here to consider these various ideas from various angles and show that they tendentially laid the foundations for the bodhicitta concept, or at least provided the theoretical conditions for its development.

(a) A Buddha as a Discoverer and Proclaimer of True Reality

The question as to what extent the Buddha’s discovery or awakening was ‘new’ or ‘old’ or ‘timeless’ leads to a dilemma. In the historical setting of the Buddha Gautama, it was indeed something new, and it was considered by him as such. In the course of time, however, the idea arose that the one and the same true reality is repeatedly discovered by successive buddhas. Since bodhicitta is primarily about becoming a buddha, it may be worthwhile to take a look at the early Buddhist notion of the perpetuity of truth and the concept of the buddha or tathāgata as its re-discoverer and proclaimer at a given point in time and space. A tathāgata is one who has cognised (gata) the way to salvation in this manner (tathā), namely, exactly as it is (yathābhūtam), even as he himself went along (gata) in this manner (tathā).

18 If we think of other later re-interpretations (such as of the term dharmakāya), it is not impossible that the notion that ‘one is the protector (or lord) of oneself’ (bdag nyid bdag gi mgon yin gyi) stimulated some people to want to become a buddha themselves, although I have not come across such a line of thought elsewhere.

19 See JOSHI 1971: 70, where it is reported that the concept of bodhicitta is not found in the Pāli literature. However, it has been occasionally maintained that although the technical term bodhicitta does not occur in Pāli canonical sources, it is such as is found in non-Mahāyāna Buddhism. For example, the EoB (p. 184) states that bodhicitta “is an important concept common to Theravāda, Mahāyāna and Tantric Buddhism. Though not directly mentioned, the idea is explicit in Theravāda Buddhism.” However, further on it states: “Though the term bodhicitta does not occur in Pali, traces of this concept are found in Pali canonical literature....” Such statements in which the doctrinal foundations that later gave rise to the theory of bodhicitta are ad sensum referred to as bodhicitta, are, however, quite misleading.

However, my primary interest here is the philosophical aspect of the question and the implications it has for the study of the origin of bodhicitta. Understanding the Buddha in this way, in my opinion, presupposes certain philosophical views. The first tacit assumption is that there is a kind of truth, reality, or nature of phenomena (whatever it may be) that is cognisable, timeless, and independent of its cognition, or of the person (e.g. the Buddha) who cognises it. The second tacit assumption is that the correct cognition or insightful penetration of the truth has a soteriological or salvific affect on the person who cognises or penetrates it by means of meditative insight (jhāna). In other words, a person is liberated by gaining a meditative insight into the truth. The third tacit assumption is that, at least in principle, anybody, at any given point in time and space, can gain full access to the truth by means of meditative insight, thereby becoming a fully liberated being, a buddha, a rediscoverer of the true reality, who can and may (but need not necessarily) proclaim it to others. Speculations regarding the destiny of a buddha after he passes away are of no spiritual or soteriological relevance. Buddhas may come and go, but the truth remains as it is (yathāḥ kūtum), unaffected by its occasional re-discovery or oblivion. This idea can be found in non-Mahāyāna as well as in tantric and non-tantric Mahāyāna.

What implications does the concept of the perpetuity of truth and the possibility of its repeated discovery have for the study of the origin of bodhicitta? The idea of appearing and disappearing buddhas, and of the discovery of the eternal truth and its proclamation to others, opens up the theoretical possibility of developing the notion of oneself becoming a bodhisattva and a buddha, which is essentially embedded in the bodhicitta concept. Under this premise, the truth would not become quantitatively or qualitatively less if more buddhas happen to discover it, nor would it become better if fewer buddhas discover it. If insightful penetration of the truth has a soteriological impact not only on the discoverer but also on others, it should be in the interest of suffering sentient beings to have more such 'discoverers.' As for the sentient beings who suffer in samsāra, there are enough of them, for samsāra is endless. Pondering over such arguments may perhaps help us to understand why at a certain point in the history of Buddhism the notion of oneself becoming a buddha became inevitable.

---

23 This is perhaps one of the reasons why the idea of a 'successor' for the historical Buddha makes no sense in Buddhism. A buddha or his successor cannot be 'appointed.' One either becomes a buddha when all the conditions necessary come together, or one does not.

24 Āgama (as cited by Candrakīrti, Prasannapadā, p. 40.1): utpādād vā tathāgatānām anutpādād vā tathāgatānāṁ sthitavaisā dharmānāṁ dharmatā |. For the universality of reality and its being independent of the appearance of a tathāgata in both non-Mahāyāna and Mahāyāna sources, such as the Samyuttanikāya, Anguttaranikāya, Lankāvatāraśūtra, and Saddharmapundarikāśūtra, see YAMADA 1980: 282, 291–292, nn. 70–72. See also the Jñānālokālāmākāśūtra (p. 138.6–7), Madhyamakāvārahāsya (pp. 305.19–307.8), Lankāvatāravyrti (P, fol. 188b4–5; D, fols. 164b7–165a1; S, vol. 69, p. 1216.17–19), and Sālistambhokakārikā (P, fol. 22b4–5; D, fol. 18b2; S, vol. 65, p. 775.14–15). For a similar idea in tantric Buddhism, see the Vairocanābhāsambodhitantra (as cited in the Caryāmelāpapradīpa, pp. 33.3–6, 220.3–8). For an English translation, see HODGE 2003: 131. Cf. also the citation in Rong-zom-pa's Sangs rgyas kyi sa (A, fol. 216a3–b2; B, p. 82.6–15). See also the Suvikśadasaṃputtaññā (P, fol. 9b5–6; D, fol. 8b2–3; S, vol. 3, p. 19.16–20); Tarkadvālā (P, fol. 133b5–7; D, fol. 123b3–5; S, vol. 58, p. 302.9–17); Ratnālokaśūtra (P, fol. 338a1–2; D, fol. 289a7; S, vol. 64, p. 802.1–3); Kṛṣṇyavārattantraprāṇijā (P, fol. 169a3–5; D, fol. 141a7–b1; S, vol. 23, p. 1077.14–19); Saṃdhinirmocanāśūtra (pp. 52, 158). Cf. Madhyamakāvāra 6.222. See also the dGongs pa ' dus pa'i mdo (P, fol. 164a6–8; D, fol. 175a6–7).

25 NORMAN 1983: 77. For a lengthy discussion of the impossibility of buddhas arising at the same time, see VETTER 2001: 67–68, n. 32. See also SKILLING 1996: 155, cf. n. 5.
Chapter Three: The Historical and Doctrinal Background of the Bodhicitta Concept

(b) The Plurality of Buddhas and Bodhisattvas in Early Buddhism

The notion of resolving to become a buddha oneself automatically implies the multiplicity of bodhisattvas and buddhas, which became a characteristic feature of Mahāyāna Buddhism. This may prima facie seem to contradict the early Buddhist notion of a single buddha, who was seen as being sui generis. The early Buddhist view was that only one buddha would appear at a time, and the reason for this, occasionally stated, is that one buddha is enough to ensure that all the necessary tasks of a given time are carried out. This argument, however, seems to presuppose corresponding limited world systems. The development of the idea of plural buddhas is thus connected with the development of the Mahāyāna cosmology. However, the concept of a plurality of buddhas begins to appear already in the Pāli canon. At first, details of six past buddhas who preceded Gautama Buddha are given. Later the number increases to twenty-five including Gautama Buddha. The fundamental reason for introducing the previous mythological buddhas was, according to Richard Gombrich, to authenticate the historical Buddha (as a discoverer and preacher of the eternal truth). Furthermore, post-canonical Pāli sources speak of ten future buddhas including Maitreya, who is, however, mentioned only once in the early Pāli canon. It is thus clear that the concept of past buddhas is older than that of future buddhas. This development of several future buddhas in the later non-Mahāyāna traditions is said to be the influence of Hinduism as well as of Mahāyāna. Unlike Maitreya, though, the remaining nine future buddhas mentioned in the post-canonical Pāli sources are said to have nothing in common with their Mahāyāna counterparts.

27 See GOMBRICH 1980: 65, where it is stated: "It is important to understand that this cosmology allows the line of Buddhas stretching into the past and the future to be infinite. That it is infinite is certainly the view that developed; it is however not stated in the earliest texts on the subject, though it may be implicit."

30 See GOMBRICH 1980: 68, where it is stated: "At an early stage, however, the number twenty-four became standardised in the Theravādin tradition. This occurred with the composition, perhaps in the third or second century B.C., of the Buddha-vamsa, one of the last books to be added to the Pali canon. This poem, 'The Lineage of the Enlightened', gives details of twenty-four Buddhas, with Gautama as the twenty-fifth, in almost identical terms. The first eighteen of these Buddhas we encounter here for the first time." See also NORMAN 1983: 93. The model and number of twenty-four past buddhas was presumably borrowed from the Jain concept of twenty-four 'ford-makers' (tīrthāṅkara). The difference, however, is that the Jain twenty-four include the present Tīrthāṅkara Mahāvīra, whereas the Buddhist twenty-four exclude the present Buddha Gautama (GOMBRICH 1980: 64, 68, 72, n. 24). Yet the Budhavamsa is said to mention the names of twenty-seven previous Buddhas, without, however, giving the details of the first three. The number twenty-eight (including Gautama Buddha) has reportedly become standard in Burmese Theravāda Buddhism (GOMBRICH 1980: 68). For the names of the twenty-five buddhas, see EoB, s.v. bodhisattva; PED, s.v. buddha; SCHUMANN 1995: 123–125. Note that the last seven are identical with the group of seven buddhas.

31 GOMBRICH 1980: 64.

32 SCHMITHAUSEN 2000c: 13, n. 43; NORMAN 1983: 93, n. 423, 41; KITAGAWA 1980: 94; cf. BHSD, s.vv. maitriya and maitreya. Maitreya is also mentioned as the fifth buddha of this aeon; see NORMAN 1983: 161; LAMOTTE 1988: 699–710. For the development of the story of Maitreya in Pāli sources, see COLLINS 1998: 355–357.

The Resolve to Become a Buddha

Peter Skilling provides a nuanced account of the development of the idea of multiple and infinite number of past and future buddhas found in Theravāda and other Buddhist schools. He points out that (a) the ‘open plurality’ of past and future buddhas in the earliest texts turn into an ‘open infinity’ of past and future buddhas in the latest texts; (b) the evidence goes against the suggestion that the idea of multiple and infinite buddhas is the outcome of Mahāyāna influence; and (c) the plurality and infinity of buddhas, according to the Theravāda tenet, applies only to past and future buddhas but never to the present, in contrast to Mahāyāna Buddhism. Later, in Mahāyāna sources, even the Buddha Śākyamuni is multiplied, an idea which seems to have been inspired by the concept of the domain (kṣetra) of his influence. The six kinds of Śākyamuni Buddhas or, to be precise, Munis (thub pa) found in some rNying-ma tantric systems may have developed from the notion of multiple Śākyamuni Buddhas traceable in some Mahāyāna sūtras.

If there are multiple buddhas there must also be multiple bodhisattvas who strive to become buddhas. This simple logic made the concept of multiple bodhisattvas possible, which is understandably less archaic than the notion of multiple buddhas. In the Pāli canon, only two bodhisattvas are mentioned: the bodhisattva who later became Gautama Buddha, and the bodhisattva who will become the future Buddha Maitreya. The notion of the present bodhisattva Maitreya who will become the future Buddha Maitreya is analogous to the notion of the past bodhisattva of the present Buddha Gautama. In my opinion, this concept already lays the theoretical foundations for extending and applying this analogy to other bodhisattvas and buddhas limitlessly in both time and space, that is, to countless buddhas and bodhisattvas in the past, present, and future, and in the ten directions. Thus the presence of the buddhas Gautama and Maitreya and their respective bodhisattvas in the Pāli canon can be seen as at least two precedential cases for the Mahāyāna notion that an ordinary person can become a bodhisattva and finally a buddha.

(c) The Concept of the Resolve Made by Previous Buddhas

The resolve to become a buddha made by the historical Buddha in the past is a popular theme (at least from what I know of Tibetan Buddhism), particularly his initial resolve, which I shall discuss in detail in the following chapter. It is, in my view, this initial resolution (whatever term the early sources may have used to express it), that is, the initial step taken by Gautama or any other buddha in setting out on the bodhisattva path, that gave rise to the idea of prathamacittotpāda and prathamacittotpādika. However, the important question here is: Can one trace such a concept, at least in its germinal stage, to the early Pāli canon?

Let us look at one story found in some Pāli sources, which predicates a connection between the Buddha and an earlier buddha called Kāśyapa. It is told that Gautama Buddha was once born as a young brāhman named Jotipāla who heard the teachings of Kāśyapa and

34 Skilling 1996.

35 Buddhadharmakośākṣara (T 257; D 123); rGyab chos pad dkar (p. 910.3); Mahāmokṣasūtra (T 153; D 264). Note that the title of the latter work is doubtful.

36 For the expression ‘six Munis’ (thub pa drug) and its various interpretations in the *Guhyagarbhatantra (P, fol. 111b7; D, fol. 113b7), see the dKon mchog ‘grel (A, fols. 58b5–6, 96a1–b5; B, pp. 89.7–10, 127.21–128.17). It should be noted that not all six Munis mentioned there are conceived of as human beings or monks. For example, the ‘Muni’ in the animal realm takes the form of a lion.

38 Cf. Ratnāvalī 2.7ab: asaṃkhyeyā gatā buddhās tathāsyanyata atha sāmpratāḥ |.
became a monk under him. This connection between Jotipāla and Kāśyapa becomes closer still in the Mahāvastu, according to which Jotipāla makes a resolution (pranidhi/pranidhāna) in the presence of Kāśyapa to attain Buddhahood and receives from him a prediction (vyākaraṇa) of its successful fulfilment. Furthermore, the account of Gautama Buddha’s previous birth as Sumedha and the resolution he made and the prediction he received, according to which he would one day become a buddha called Gautama, is particularly significant. This initial resolution or the prediction seems to be tendentially considered as a prerequisite for Buddhahood. Mahāyāna sources state that bodhicitta consists in an altruistic inclination (āśaya/adhyāśaya), and the term āśaya in conservative Buddhism may hint at a precursory stage of bodhicitta. Other Pāli terms such as abhinīhāra (‘an earnest wish’ or ‘aspiration’) and aṇācitta (‘liberating insight’) and *laukikāgratā (‘summit of the mundane [state]’) in the Jñānaprasthāna have also been suggested as non-Mahāyāna terms corresponding to the term bodhicitta. The question is, of course, whether and to what extent these three terms exhibit a correspondence to the term bodhicitta. One of the meanings of the term abhinīhāra given in A Critical Pāli Dictionary according to the Buddhavamsa is: ‘generally in the sense of an earnest wish, aspiration, resolve, determination (to become a Buddha, a pacceka-buddha, etc.),’ and panidhāna (pranidhāna) and pathanā (prārthana) are given as synonyms. The term aṇācitta seems to apply to liberating insight in general, that is—also from the perspective of Mahāyāna—to that of a śrāvaka saint, and at best seems to have in common with bodhicitta the nuance of ‘resolve.’ Finally, to what extent Tagami’s *laukikāgratā corresponds to bodhicitta has yet to be determined. The resolution (pranidhi)

39 This story is also briefly discussed in GOMBRICH 1980: 68.

40 GOMBRICH 1980: 68, 72, n. 26. The resolution and the receiving of a prediction from an earlier buddha entail a logical regressus ad infinitum. However, the tradition does not seem to have regarded this as a problem, for it was seen as compatible with the Buddhist notion that the world has no beginning (ibid., 69–70). This problem, however, may have contributed to the development of the notion of an ādibuddha.

42 See GOMBRICH 1980: 68. Both the ritual procedure of accepting the bodhisattva precepts and the text recited on this occasion (i.e. for taking the ‘official step’) suggest that the bodhicittotpāda ritual procedure is modelled on a kind of ‘blessing’ in the form of a vyākaraṇa from a previous buddha.

43 See, for example, the Gaganagaṇaparipṛcchāsūra (T 160; D 148) cited in the gŚung rab rin po che (P, fol. 148b1–2; D, fol. 243b6–7; S, vol. 115, p. 663.3–6) and Bodhimārgapradīpapānītikā (P, fol. 296a3–8; D, fol. 256b6–257a3; S, vol. 64, pp. 1688.9–1689.1). See also SHERBURNE 2000: 102–103. Cf. the Madhyamakavatāraṇīkā (P, fol. 82a4–5; D, fol. 68b6–7; S, vol. 61, p. 165.7–9): lhag pa ’i bsam pa ni sams can rnams sdu sgang dang sdu sgang gi rgyu las yang dag par ’dren par ’dod pa ’i mthon bya can no ||; ibid. (P, fol. 83a3; D, fol. 69b2–3; S, vol. 61, p. 167.4–6): lhag pa ’i bsam pa ’i che ba nyid kyi zhes bya ba ni khyad par du gyur pa ’i bsod nams kyi rgyu byang chub kyi sams dang [snying rje ’i stobs kyi bya ba ’i don to ||.

44 Johnston, in his translation of the Buddhacarita, remarked: “It may imply here the Buddha’s resolve in past lives ultimately to become a Buddha, something like the bodhicitta of the Mahāyāna” (JOHNSTON 1936: part 2, 38, n. 34). See also CPD, s.v. āśaya.

45 EoB (p. 184); NORMAN 1983: 173. See CPD, s.v. abhi-nīhāra.

46 TAGAMI 1990: 521–521; NAKAMURA 1980: 70, n. 74. See also CPD, s.v. aṇācitta. The word laukikāgnaṭā given by Tagami is apparently a misprint for laukikāgratā.

47 CPD, s.v. abhi-nīhāra. See also PED, s.vv. panidhāna and pathanā and BHSD, s.vv. panidhāna, pranidhi, and prārthana. See also Bodhisattvabhāmi 1.2 (§ 1.1.2–1.1.3).

48 It has been pointed out in BUSWELL 1997: 590 (cf. 592) that the Abhidharmakāṇḍa (Taishō No. 1545, vol. 24) divides the path of preparation (prayogamārga)—under which *laukikāgratā (or perhaps
and prediction (vyākarāna) associated with previous buddhas was, in all probability, the actual keystone of both the theory and the ritual procedure surrounding bodhicitta, which later gradually became a conditio sine qua non of Buddhahood.

(d) The Altruism of the Historical Buddha

As we all know, Mahāyāna is principally defined by a new goal of salvation: One should not only seek one’s own freedom from samsāra but should become a buddha, whose task consists in primarily leading others, too, to salvation. One should hence follow the path of a bodhisattva. Because the way to Buddhahood is much longer and arduous than the direct way to nirvāṇa, a strong motivation is required to overcome and endure the difficulties. The Mahāyāna texts often mention compassion (karuṇā) as a decisive motive for this undertaking. Empathy or compassion is hence seen as the root (mūla) or seed (bīja) of bodhicitta, and bodhicitta as the defining principle of a bodhisattva striving to become a buddha. Moreover, in some Mahāyāna sources a buddha appears to be conceived not only as the end result of compassion but also as an embodiment and source of compassion. And since the historical Buddha, who was once seen as a kind of mentor for his followers, came to be later regarded as a model or prototype for the conception of a buddha in general, it would be worthwhile to take a look at the early notion of the historical Buddha in the light of his compassion and altruism.

Several questions may be asked in this connection: Why, according to the early Buddhist sources, did the Buddha appear? For whom did the Buddha become a buddha? And what was his motive for teaching and founding a community of ordained followers (sāṅgha)? There is no canonical evidence for the theory that the main motive for the Buddha’s appearance in the world was for the sake of others. This idea is found only in the post-canonical literature. The overwhelming majority of the canonical material suggests that the Buddha’s renunciation of worldly life and his search for salvation from samsāra were exclusively or primarily motivated by the realisation that he himself was inevitably affected by aging, sickness, and death, and that he was concerned with his own release (vimukti). Once he had attained his own release from samsāra, he could have, if he wanted, retreated and acted like a ‘solitary awakened one’ (pratyekabuddha), that is, without propagating his teaching systematically or founding a community of monks and nuns.

What, then, was the Buddha’s motive for setting the Wheel of Dharma into motion? Schmithausen has made it clear that the Buddha’s teaching or his founding of a tradition of teaching and a community of monks and nuns was neither an obligation nor the mechanical

Laṅkāvatāra (laukikāvṛti) should actually be subsumed—into two aspects, namely, the remote and proximate, consisting of the mokṣabhāṣyakūśalamūlas and nirvedhabhāṣyakūśalamūlas respectively, and that the text, ‘in a provocative passage,’ as he puts it, defines the former in implicitly Mahāyāna terms as follows: “The remote preparatory [stage] refers to the initial [resolve] not to backslide from the bodhicitta, and so forth.” Even according to such an interpretation, however, the correspondence between bodhicitta and *laṅkikāvṛtā, which seems to mean the summit of the mundane factors, is incomprehensible.

49 Apparently compassion is the ‘ideal’ motive for a bodhisattva’s endeavour. Nonetheless other motives have also been suggested. For example, according to Schmithausen (based on Paul Harrison) the prospect of acquiring the status and supernatural powers of the Buddha may also have played some role in this regard (Schmithausen 2000b: 438, n. 8, 452, n. 84; Schmithausen 2000c: 16). In the Śūraṅgamasamādhisūtra, even Māra generates bodhicitta, not out of compassion but out of deceit. See chapter nine, n. 1. See also Lamotte 2003: 10; Snellgrove 1987a: 65–66.

51 Schmithausen 1997: 24, n. 53.

52 Schmithausen 2000a: 122–123, n. 16.
effect of some earlier impetus. Teaching or similar efforts were obviously not perceived to be a *sine qua non* for awakening or release—not for the Buddha and certainly not for those who followed his instructions. The Buddha’s compassion is thus not conceived in early Buddhism as an automatic result of his awakening. There are several indications in the Pāli canon that the Buddha was quite reluctant to share his profound spiritual experience with others. Because of the profundity of his discovery and the inadequacy of the mental capacity of the people, he thought, the latter would not be able to understand him, and teaching would thus be a futile gesture. Therefore, he decided not to commit himself to any special round of activity (*appossu'i*kātā). It required the intervention of the god Brahmā Sahampati to make the Buddha reconsider his decision. In the Tibetan tradition, the reluctance of the Buddha to teach has often been interpreted as an expedient means of ‘expressing the excellency of the doctrine’ (*chos kyi che ba brjod pa*). Also the fact that precisely the highest god of the Brāhmans is portrayed as asking the Buddha for the teaching can be seen as a type of propaganda aimed at glorifying the doctrine of the Buddha. This, in a way, implies that teachings are given only when asked for. Moreover, even if one is requested to teach, it is considered improper to give teachings to the disrespectful. The practice of requesting a teacher to teach is ingrained in the Theravāda as well as in the Tibetan tradition. The underlying philosophy of teaching is that teaching should be beneficial, not detrimental, to the recipient. This may also explain the apparent secretiveness of the tantric tradition.

In most early sources, however, compassion is given as an additional motive for teaching on the part of the Buddha. The supposition that compassion must have been the Buddha’s motive for teaching makes perfect sense particularly if one considers the complete irrelevance and redundancy of the teaching for his own salvation. There are numerous episodes or incidents narrated in the Pāli canon reflecting the Buddha’s compassion, even though the word *karuṇā* does not seem to occur frequently. Instead near synonyms such as care (*anukampā*) and concern (*anuddaya*) are found. Later the Buddha is credited with having not only compassion but even great compassion (*mahākaruṇā*). However, the word *mahākaruṇā* as an attribute of the Buddha is not found in the first four *Nikāyas*. It occurs for the first time in a later stratum of the Pāli canon, in the *Patisambhidāmagga*. In the course of time, this compassionate or altruistic motivation seems to have been increasingly placed...
further back chronologically: first, after the Buddha’s awakening, then after his renunciation, and then back in the distant past—for example, in the Jātakaniḍānakathā, when the Buddha took birth as Sumedha during the time of the Buddha Dipamkara.\(^{63}\) As already stated, such an initial resolution (motivated by compassion), said to have been made by the historical Buddha in the past, is of tremendous significance, because with great plausibility it served as a model for the Mahāyāna concept of bodhicitta.

(e) Altruism in Early Buddhism

The altruistic attitude and actions of a bodhisattva crystallised in the form of bodhicitta, which may, as opposed to the altruism found in conservative Buddhism referred to by Maithrimurthi as ‘passive altruism,’ be designated as ‘active altruism.’\(^{64}\) Active, for a bodhisattva chooses not only to avoid harming other sentient beings (who are all suffering in one way or another in samsāra) but tries his best to be of benefit to them. But where did this principle of ‘active altruism’ found in Mahāyāna come from? How did it arise? In order to answer these questions, perhaps the only sensible thing to do is to look for traces of ‘active altruism’ in early Buddhist spirituality.

There has been disagreement as to which of the two poles of spirituality—the inner detachment from the world expressed by the term upekkhā (‘spiritual state of equanimity’) and the care and concern for others expressed by the term karuṇā (‘compassion’)—is central in early or conservative Buddhism. Some have maintained that the state of spiritual equanimity plays the central role, whereas others have contended that it is altruism or compassion. However, both Schmithausen and Maithrimurthi have convincingly demonstrated that it is indeed the spiritual equanimity that is pivotal to early Buddhist soteriology,\(^{65}\) while at the same time showing that compassion, too, is an essential factor in it, with an increasing tendency to gain a dynamism of its own. It is this very dynamism in early Buddhist spirituality that heralds the dawn of the bodhicitta concept.\(^{66}\)

But let us first return to the essentials of early Buddhist spirituality. The principal goal of spiritual practice in early Buddhism is the release from samsāra, and in the first place one’s own release. Thus striving for or attaining salvation is seen as a private affair, for the Buddha

\(^{63}\) VETTER 2000: 14; NORMAN 1983: 78. Cf. RAY 1994: 51, where ‘compassion is identified as a central component of the Buddha’s enlightened personality.’ It would also be interesting to examine how a buddha’s compassion or altruistic motivation is treated in strands of thought where a buddha is conceived to have always been a buddha, that is, an adibuddha. In such a case, it is quite likely that compassion would be held to have an ontological status. This seems to be the case, for example, in the rdzogs-chen system, where the so-called ‘all-embracing compassion’ (thugs rje kun khyab) is said to be one of the triad of qualities immanent in the ‘universal ground’ (gehi). For the various notions of the Buddha Dipamkara, see Ratnakaraśānti’s Ratnālokālaṃkāra (P, fols. 355b3–356b1; D, fols. 305b3–306a7; S, vol. 64, pp. 841.9–843.7).

\(^{64}\) Maithrimurthi deems the three kinds of ethics named in connection with early Buddhism (i.e. egocentric, altruistic, and hybrid or mixed ethics) misleading (MAITHRIMURTHI 1999: 183), and instead uses the term ‘passive altruism’ to describe early Buddhist spirituality (ibid., 184–185).

\(^{65}\) MAITHRIMURTHI 1999: 1–2, 161–185, 429; SCHMITHAUSEN 2000a: 119. See particularly MAITHRIMURTHI 1999: 149–152, where the soteriological relevance of spiritual equanimity is discussed. According to Maithrimurthi, it is originally not only the most decisive factor on the path to salvation but ultimately the essence of salvation itself.

\(^{66}\) See SCHMITHAUSEN 2000a: 119, where it is stated: “Ich selbst will versuchen, beiden Polen die gebührende Aufmerksamkeit zuteil werden zu lassen; wenngleich ich den Eindruck habe, daß der Gleichmut im Zentrum der frühbuddhistischen Spiritualität steht, ist doch auch das Mitgefühl ein wesentlicher, zur Eigendynamik neigender Faktor.” See also MAITHRIMURTHI 1999: 34, n. 34, and 185, where it is stated: “Eine gewisse Eigendynamik, die sich bei Bedarf in spontaner Hilfeleistung äußern kann, dürfte aber schwer abzusteigen und im Mahāyāna zu voller Entfaltung gekommen sein.”
as well as for his followers.\textsuperscript{67} Self-responsibility is stressed in early Buddhism,\textsuperscript{68} the Buddha being only a ‘good (spiritual) friend’ (kalyāṇamitra), or a guide who shows the path, but not a saviour.\textsuperscript{69} As for the practice of compassion (karunā), it is primarily recommended for combatting one’s own negative emotions, such as hatred and pleasure in the pain of others.\textsuperscript{70} Hence compassion does not play an overly prominent role in early Buddhism. Furthermore, there is no conclusive or otherwise convincing evidence in the Pāli canon to show that active social engagement was prescribed for or expected from the monks and nuns who were its main addressees.\textsuperscript{71}

Does this imply that early Buddhism professes an egoistic or exclusivistic ethic? The individual monks and nuns, and originally also the Buddha himself, were indeed concerned about their own salvation. Nevertheless, they were not so in an egoistic manner, but rather allowed and wished others the same sort of salvation. Although the inner state of equanimity is the zenith of spiritual perfection, it does not nullify other apramāṇas but merely de-emotionalises or de-personalises them.\textsuperscript{72} An altruistic ethic is not categorically ruled out in early Buddhism. One is not supposed to harm the interests of others, at least not in a conscious, direct, and aggressive manner. One can help others after freeing oneself.\textsuperscript{73} There is no conflict between one’s own salvation and that of others. Providing help in spiritual matters to others is thus a by-product of one’s own salvation, but not an actual goal.\textsuperscript{74} According to Maithrimurthi, the kind of altruism promoted in the Dīghanikāya does not involve rendering immediate practical help but rather placing soteriological resources at others’ disposal and making them available as long as possible.\textsuperscript{75} The best way the ordained community can be of help is thus by being a mentor who lends ‘moral support.’\textsuperscript{76} There is also a kind of ‘reciprocal

\textsuperscript{67} Maithrimurthi uses the German term Heilsprivatismus (which may be translated as ‘salvific privatism’) coined by S. A. Srinivasan to describe the striving for salvation in early Buddhist spiritual practice. According to Srinivasan, the notion of Heilsprivatismus was readily adopted throughout the entire range of Indian religiosity (with a few exceptions, such as the later Mahāyāna Buddhism); see MAITHRIMURTHI 1999: 184, n. 52. One may say that even Mahāyāna Buddhism (including Vajrayāna, despite the immense weight of the role of a guru) tacitly presupposes that one is responsible for one’s own salvation, and thus implies the idea of Heilsprivatismus. (I shall leave it up to the Jōdo-shinshū specialists to answer the question whether and to what extent Heilsprivatismus is applicable also to the Pure Land Buddhist notion of salvation.)

\textsuperscript{68} MAITHRIMURTHI 1999: 144–145, n. 22.

\textsuperscript{69} MAITHRIMURTHI 1999: 120–121.

\textsuperscript{70} SCHMITHAUSEN 1985: 111. Compassion in the context of the four ‘immeasurables’ (apramāṇa) is more of a meditative practice (described by Maithrimurthi as ‘Gedanken-Ethik’) serving to enhance one’s spiritual development than one’s actions; see MAITHRIMURTHI 1999: 117, 120, 127, 137.

\textsuperscript{71} See MAITHRIMURTHI 1999: 115, 146, n. 25, 147, n. 27, 162, 428. Maithrimurthi summarises his own position in the following manner: “I show that the Buddhist lay ethic does have strong social components, and that the practice of the apramāṇas, or at least of maitri and karunā, can promote social engagement, but that this social engagement is, in the normative ethics of the Pāli-canon, not intended for monks” (MAITHRIMURTHI 1999: 429). See also NORMAN 1983: 42.

\textsuperscript{72} For the de-emotionalisation or de-personalisation of compassion and friendliness, see MAITHRIMURTHI 1999: 148–149, n. 29.

\textsuperscript{73} MAITHRIMURTHI 1999: 183.

\textsuperscript{74} SCHMITHAUSEN 2000a: 119.

\textsuperscript{75} MAITHRIMURTHI 1999: 180–181, n. 41. For a translation of the pertinent passage from the Dīghanikāya, see ibid. (167, 168, n. 16).

\textsuperscript{76} MAITHRIMURTHI 1999: 180, n. 39; SCHMITHAUSEN 2000a: 125.
altruism' in early Buddhism. The lay Buddhist followers offered the ordained community material gifts (āmisadāna) in return for gifts of teaching (dhammadāna). These 'spiritual gifts' were important for preventing the criticism that the monks and nuns were parasites on society. Hence the ordained community lives according to the ethical principles of not harming others, of advising others on spiritual matters (in return for material support), and of being a mentor by living in spiritual purity (soceyya) and wishing others well. Apart from these, it neither meddles in the private affairs of others nor is it held responsible for their actions.

Nevertheless, beside the general notions of 'passive altruism' and 'reciprocal altruism,' one also finds in the Pāli canon passages to the effect that one who strives for the salvation of oneself and others is esteemed more than one who strives only for one's own salvation.\(^77\) Such statements, however, were by no means intended to question the legitimacy of limiting oneself to one's own salvation or to downgrade it,\(^78\) but rather to suggest that while refraining from harming others may be good, actively benefiting them (if one can) is better, and similarly, while there is nothing wrong with not interfering in the affairs of others, it is better to lend a helping hand when they are in trouble. In all probability, it is through the application of such simple ethical common sense that the 'active altruism' (recommendable for anyone seeking Buddhahood) in Mahāyāna Buddhism came into being. If the teaching activity of the Buddha can be assumed to have been motivated by his compassion, it can well be seen as the first and foremost instance of active altruism, which, although perhaps only feasible for someone like the historical Buddha, might have served as a model or doctrinal legitimisation for developing the concepts of other forms of active altruism, ones which can be implemented not just by the Buddha, but by any ordinary being resolving to become a buddha.

(f) Prerequisites for Becoming a Buddha in Early Buddhism

According to early Buddhism, the salvation of a buddha, a pratyekabuddha and a śrāvaka saint is qualitatively the same.\(^79\) The difference lies in the fact that while a buddha and a pratyekabuddha make their soteriological breakthrough on their own, that is, without the help of a teacher, a śrāvaka has to depend on a teacher. Furthermore, the difference between a buddha and a pratyekabuddha is that a buddha establishes a tradition of teaching and teaches systematically, whereas a pratyekabuddha cannot or does not want to do so. A śrāvaka saint cannot establish a tradition of teaching, because he already finds himself in an established tradition. With such a doctrinal presupposition, which presupposes the same spiritual goal among all three, the question as to what made the Buddha a buddha would not seem a pressing one. The existing spiritual theories and practices would have adequately explained the soteriological goal aspired to. But as the notion of the Buddha changed and as he was increasingly seen as transcendent or supramundane, the question as to what makes one a buddha must have become increasingly urgent. The spiritual views and practices presented in the early Buddhist canon could not have satisfactorily explained the result of Buddhahood as conceived with later strands of thought. Some Buddhist thinkers must have reasoned: The Śrāvakāyāna may be sufficient to produce a śrāvaka saint, but can by no means yield a

---

\(^77\) SCHMITHAUSEN 2000a: 125, n. 25. See also SCHMITHAUSEN 2004, where a comparative evaluation of exertions made for the welfare of oneself and others, as found in Anguttaranikāya 7.64, is discussed in detail.

\(^78\) SCHMITHAUSEN 2000b: 439.

\(^79\) The Samayabhedoparacanacakra (attributed to Vasumitra), for instance, states that according to the Mahāsākās, the spiritual path and the salvation of the śrāvakas and buddhas are the same (P, fol. 176a3; D, fol. 146b1; S, vol. 93, p. 1139.4–5): "sangs rgyas rnams dang nyan ngs dam [om. PN] ni lam gcig go || 'rnam par grol ba gcig go ||' [om. PN]. See also Bhavya's Nikāyabhādavibhāṅgavākyāṇa (P, fol. 182a6; D, fol. 150b6; S, vol. 93, p. 1153.20): "sangs rgyas dang nyan ngs kyi 'rnam par grol ba ni gcig go ||".
buddha. In order to produce a saint who is far superior to a śrāvaka saint, there must be a yāna which is far superior to the Śrāvakayāna. Thus, without the existence of a Buddhayāna, Bodhisattvayāna, or Mahāyāna, there is no way one can explain the existence and the appearance of a buddha or a bodhisattva (or mahāsattva). It is precisely such an argument that has been employed by the followers of Mahāyāna. The Buddhist thinkers must have availed themselves of the doctrinal resources embedded in the accounts of the Buddha’s previous lives found in the Jātaka and Avadāna literature. The heroic altruist deeds described in this literature were then probably assumed to be the factors that made the Buddha a buddha, and not a pratyekabuddha or a śrāvaka saint. However, these accounts of the Buddha’s previous lives seem to have served only as a model for the practical deeds expected of a bodhisattva, which are schematised into the six or ten perfections (pāramitā), but not for the theoretical doctrine of bodhicitta. The eight prerequisites necessary for the attainment of Buddhahood listed in the Buddhavamsa (Khuddakanikāya) may have well been the result of an attempt to explain the causes that go into the making of a buddha.

(g) The ‘Golden Rule’ in Early Buddhism

Although one witnesses an ontological (or metaphysical) interpretation of bodhicitta, the concept of bodhicitta seems to have primarily arisen within the contextual framework of ethics or ethical-moral discipline (śīla). If one looks at how the perfection of the ethical-moral discipline (śīlapāramitā) is conceived in early Mahāyāna literature, such as the Bodhisattvabhūmi, it becomes clear that the first śīla (namely, saṁvaraśīla) reflects in essence the ‘passive altruism’ found in early Buddhism, that is, refraining from unwholesome actions so as to attain spiritual purity, whereas the last two śīlas (namely, kuśaladharmanasamgrahakāśīla and sattvārthakriyāśīla) give force to the aims of ‘active altruism.’

If the new Mahāyāna concept of śīla is rooted in the old non-Mahāyāna concept of śīla, the question to be asked is which element of the old śīla the new one is based on. It would appear to be: on the element most fundamental to Buddhist ethics, namely, non-injury (ahimsā). As the infliction of pain on living beings (the ultimate form being the killing of a sentient being out of hatred and anger) is the gravest offence from a Buddhist ethical-moral point of view (for lay followers as well as for the ordained), the practice of non-injury is most

10 Mahāyānasūtṛālaṁkārabhāṣya (p. 3.15–16): śrāvakayānaṁ buddhavacanaṁ na mahāyānam iti na yujyate vinā buddhayānena buddhānam anutpādat | ibid. (p. 4.12–13): na ca śrāvakayānenaśīla ciraṁ śīlaṁ bodhau ghaṭamāno buddho bhavitum arhate |

81 For the difference between Jātaka and Avadāna, see NORMAN 1983: 89.

82 The earliest enumeration of the ten perfections is found in the Buddhavamsa and the Cariyāpiṭaka (VETTER 2000: 14, n. 8; NORMAN 1983: 94–95). The concept of ten perfections was quite likely developed later than that of six (EoB, p. 288). Note, however, that the ten perfections found in the Sanskrit literature do not exactly correspond with the ten found in Pāli sources. For the ten perfections occurring in the Sanskrit sources, see DAYAL 1932: 168. Also note that the term used for ‘perfection’ in the Pāli sources is either pārami or pāramitā (MAITHRIMURTHI 1999: 169, n. 19). See also SKILLING 1996: 179.

83 Many of the stories in the Jātakas are said to be non- or pre-Buddhist in origin (NORMAN 1983: 79ff.). To the extent that they were adopted by Buddhists prior to the rise of Mahāyāna, however, such an origin does not affect the assumption that they were used as sources of inspiration or as a model for the bodhisattva’s altruistic deeds. On the overall role of the Jātakas, see SCHMITHAUSEN 2000c: 11.

84 For these terms, see TSD, s.v. dge ba'i chos sūd pa'i tshul khrims.
The Resolve to Become a Buddha

fundamental to Buddhist ethics. The underlying explanation is the Buddhist version of the Golden Rule: “Just as I wish to be left in peace, so too do others wish to be left in peace.”

It is indeed an extension of this same Golden Rule that can probably explain the rise of bodhicitta along with attendant ethical principles, namely, “Just as I wish to be helped when I am in trouble, so too do others wish to be helped when they are in trouble.” The Mahāyāna version of the Golden Rule has been formulated explicitly by Sāntideva, who flourished in the first half of the eighth century. In early Buddhism, for the sake of ‘spiritual purity,’ one is cautioned not to violate the principle of non-injury, even when inspired by compassion. To be sure, radical acts motivated by compassion can be found in the Pāli Vinaya, where it is narrated, for example, how a monk out of compassion recommends a fellow monk to take his own life, but such conduct is censured. In Mahāyāna the reverse is true: in cases of conflict, compassion and altruism outweigh the principle of non-injury. There are cases where even killing out of compassion is sanctioned. The question is where to set a limit. Perhaps the Golden Rule is applicable even in this extremely exceptional and risky situation. The Golden Rule seems to presuppose free will and self-responsibility. The execution of such an extreme measure as killing out of compassion would demand unusual insight (or foresight) and an extraordinary amount of compassion. Only a bodhisattva would know if he fulfilled both criteria. He would proceed only after considering the givens with both compassion and insight. If he indeed decided to carry the plan out, then he alone would bear all the consequences, whatever they might be. His insight and compassion should guide him not to cause more pain or suffering in samsāra than there already is. This Golden Rule, in my view, is also applicable in the context of Vajrayāna ethics. The Golden Rule, of course, is only applicable if we can presuppose that sentient beings by nature desire to live and live happily, and resist being injured or killed. It can thus be counterproductive in the case of, for examples, an arhat who no longer clings to life, and is, so to speak, indifferent (though still not immune) to suffering and death; one who, for whatever reason, has no regard for the lives of oneself and others; one who is insensitive, indifferent, or immune to the feeling of pain and suffering; one who finds pleasure in inflicting pain (e.g. a sadist) or in it being inflicted upon oneself (e.g. a masochist). Theoretically, a Buddhist saint could allow himself or herself to do anything with unlimited immunity without fearing any kind of karmic retribution, for the very basis of karmic mechanism has been rendered dysfunctional, but nonetheless it is said that it is impossible for a Buddhist saint to deliberately kill a sentient being.

85 See chapter one, n. 46.
86 The notion of a ‘golden rule’ is also found in non-Buddhist Indian sources (Schmithausen 2000a: 127–128, nn. 41, 42).
88 Schmithausen 1985: 114.
89 Schmithausen 1985: 119. Non-injury in both tantric and non-tantric Mahāyāna would be defined primarily by attitudinal or motivational impulses such as compassion or benevolence, not by physical or verbal action or non-action. This becomes clear in the context of the ‘four cases’ (mu bzhī) pertaining to ‘transgression’ (ltung ba) and ‘non-transgression’ (ltung med), discussed, for example, in sDom gsum rab dbye 2.30cd–35 and the Rig ‘dzin ’jug ngogs (pp. 156.16–159.9). For an English translation of the former, see Rhotent 2002: 298–293.
The question is, of course, what the doctrinal foundations were for such ethically problematic practices prescribed for or expected of a capable bodhisattva or a Buddhist tantric yogin. Even in the conservative Vinaya system, the borderline between transgression and non-transgression is not always clear-cut. Whether or not an ordained monk or nun commits a cardinal transgression (mūlāpatti)—and the severity of the offence—is not dependent on the action alone but also on a number of other criteria. The existence of such criteria leaves room for equivocality. This may have occasioned some followers of tantric or non-tantric Mahāyāna to introduce and legitimise ethically problematic or risky practices.

4. Concluding Remarks

This chapter has attempted to provide the historical and doctrinal background to the key Mahāyāna concept of bodhicitta. Although neither the term bodhicitta nor the concept can be traced in the early non-Mahāyāna sources, there seem to be ample doctrinal resources which could have easily contributed to the conception and development of a notion such as bodhicitta. Thus I have argued that the exploitation of doctrinal strands of thought found in the early canonical and post-canonical sources, driven by a psychological need on the part of Buddhists to compensate for the loss of the historical Buddha and to guarantee the durability of the Three Jewels, probably gave rise to the notion of bodhicitta, that is, quintessentially, the resolve to become a buddha oneself by first becoming a bodhisattva.

93 See, for example, the Vinayakārikā (P, fols. 8a8–13a3; D, fols. 7a1–11a5; S, vol. 93, pp. 15.19–26.7), where the four pārājikas are discussed. According to some Tibetan sources, a cardinal transgression occurs only if the following four criteria are met: (1) the ‘target’ or ‘object’ (gzhi) must be unmistakable, (2) the offender must be compos mentis and must have a corresponding ‘motive’ or ‘intention’ (bsam pa) for carrying out the act, (3) the actual ‘committing’ (sbyor ba) of the act should take place as planned, and (4) the ‘completion’ (mthar thug) of the act must be accompanied by a sense of gratification or lack of remorse. See, for example, the Rig ’dzin ’jug ngogs (pp. 52.13–56.13).
Chapter Four

The Buddha’s First Resolve to Become a Buddha

As for me, [I] generated the resolve to [attain] awakening for the first time
In [one of my] previous lives when I was a physician,
[In the presence of] Tathāgata Śākyamuni, offering [him]

—Bhadrakalpikasūtra

1. Introductory Remarks

The first step that an individual takes towards becoming a buddha is the generation of the resolve or aspirational wish (pranidhāna) for the highest awakening. This step marks one of the most significant events of a bodhisattva’s career. The idea as such is, of course, a commonplace in Mahāyāna literature. What is perhaps not a commonplace is its historical background. It is quite possible that this later idea of an initial resolve of a bodhisattva was conceived and modelled on the earlier initial resolve said to have been made by the historical Buddha in the distant past, as recorded in Mahāyāna as well as in non-Mahāyāna sources. The Buddhist traditions want us to believe that the historical course of events leading up to the appearance of the Buddha took place in the following progression: The historical Buddha had first of all, sometime in the distant past, made his initial resolve to become a buddha; he consequently lived up to his commitment by satisfying one by one all the prerequisites necessary for becoming a buddha; and finally he became a buddha. However, these three stages, which define the career of the Buddha, were possibly developed exactly in the reverse sequence. That is, the notions of the Buddha’s first resolve to become a buddha and of his satisfying the prerequisites necessary for the awakening were a direct or indirect consequence of reflecting on the very nature of the historical Buddha and the causes of his attaining awakening (bodhi). In other words, the notions of the Buddha’s first resolve and his

subsequent endeavour came into being or were introduced to explain the very appearance and existence of the Buddha in the world. That is why these events in the Buddha's career, especially his first resolve, are particularly significant in the history of bodhicitta as a concept.

2. The Historical Buddha as One of Many and Yet One of a Kind

Despite the multiplicity of buddhas in Mahāyāna Buddhism, the historical Buddha still seems to enjoy a status of his own, and is perceived as someone special (at least as far as I can judge from Tibetan Buddhism). In the Maitreyaparipṛchchhāsūtra, the resolve of the historical Buddha is contrasted with the resolve of Maitreya. Maitreya resolved to act for the sake of sentient beings that are easy to deal with, that is, those endowed with scarcely any intellectual-emotional defilements (klesa), whereas the historical Buddha resolved to do precisely the opposite. He resolved to deal with difficult sentient beings endowed with intense intellectual-emotional defilements. The bleak picture portrayed of the sentient beings of our era and the resolve and readiness of the historical Buddha to come to their assistance make him look all the more sympathetic and magnanimous. This seems to set him apart for many Buddhists despite his being one of countless buddhas in a limitless expanse of space and time, for he is the one with whom they have the most immediate ties spatially, temporally, and emotionally. Tibetan Buddhists thus understandably refer to the historical Buddha as 'our teacher' (bdag cag gi ston pa) or, so to speak, the 'Buddha of our Destiny.' It is said that the buddhas cannot be differentiated qualitatively, that is, on the basis of the quality of their elimination (spang ba) of obscuration (sgrīb pa), realisation (rtogs pa), or great compassion (thugs rje chen po). The distinction, if it is made at all, is hence almost always subjective; that is, whether or not, and how much, one values a buddha depends on the spiritual profit gained from him or his teaching.

The logic of evaluating the worth of the historical Buddha in this way seems to have been later transposed or extended to evaluating one's spiritual friend (kalyāṇamitra) or master (guru), particularly in Vajrayāna. The spiritual teacher had by then taken on the role of the historical Buddha himself. The historical Buddha, as benevolent as he might be, had come and gone. Not everybody had the fortune to be at the right place at the right time, and hence to experience the presence of the historical Buddha personally. The person one looked to was now one's own spiritual teacher, who lived and transmitted the teachings of the Buddha, which otherwise would have remained inaccessible to ordinary beings. This perhaps also explains the tremendous importance attached to the role of the bla ma in Tibetan Buddhism (thus formerly called 'Lamaism')—a result perhaps, among other things, of the need to compensate for the loss of the historical Buddha.

3. Three Events Marking the Career of the Buddha

When and how the historical Buddha resolved to become a buddha for the first time was perceived differently at different times and places in different texts and traditions. In other

---

2 Cf. DAYAL 1932: 292: "The doctrine of a bodhisattva's career was also promulgated in order to explain and interpret the historic fact of his marvellous virtue and wisdom. In Buddhist philosophy and history, all roads lead to Gautama Buddha."

3 Maitreyaparipṛchchhāsūtra (T, fol. 296b4–297b5; D, fol. 115a6–116a2).

4 This point is also made in the rGyab chos pad dkar (pp. 200.2–202.4), where the pertinent passage from the Maitreyaparipṛchchhāsūtra is quoted.

5 mChims 'Jam-pa'i-dbyangs, mChims chen (p. 690.15–24).
words, the changing view of the nature of the Buddha directly affected how his initial resolution was viewed. The diversity of ways the Buddha was conceived in the various Buddhist systems ranging from Śrāvakayāna to Vajrayāna precludes a one-dimensional presentation of the Buddha’s initial resolve to become a buddha. Several questions have to be clarified first: On the brink of becoming a buddha—that is, let us say, when Gautama Śākyamuni sat down under the Bodhi tree (Ficus religiosa) the night before his awakening—was he a bodhisattva (in a non-Mahāyāna sense), albeit an ordinary person subject to birth and death, or was he a bodhisattva of the tenth stage (bhūmi), or was he already a buddha? Had he been an ādībuddha in the sense of one who has never experienced samsāra as a sentient being? And how could he have made the initial resolution if he had been an ādībuddha?

Despite the numerous Buddhist views regarding the true nature of the historical Buddha and the time and place of his awakening, the later non-Mahāyāna and Mahāyāna sources more or less seem to agree that the Buddha’s career was marked by the three great events mentioned above, also known as the events at the beginning (thog ma), the middle (bar), and the end (tha ma). The following verse from the Dvādaśakāranaṇayastotra attributed to Nāgārjuna, for example, describes Buddha Śākyamuni thus:6

I extol You, Protector of the world (or living beings),
Who now [engage in] far-ranging [salvific] activities,
Having first generated the resolve to [strive for] awakening,
And gathered the [two] accumulations of beneficial resources (punya) and gnosis (jñāna).

Similarly the Astamahāsthānacaityastotra, also ascribed to Nāgārjuna, states:7

Obeisance to the stūpa (or caitya) [that symbolises or commemorates the event] of the great awakening [of the Buddha],
Who first resolved to [strive for] the supreme awakening,
[Then] gathered [the two types of] accumulation for three countless aeons,
[And finally] conquered the [four] marās and became a buddha on the seat of awakening (bodhipinda) [under the Bodhi tree].

It is interesting to note that the deeds of the Buddha as narrated in the Bodhisattvāvadānākalpalata by the eleventh-century Kashmirian poet Kṣemendra (ca. 1000–1070) are fitted into the framework of these three events.8 Of the one hundred eight ‘sprigs’ (pallava) of the Bodhisattvāvadānākalpalata, the first and the hundredth (i.e. the Prabhāsāvadāna and the Punyaprabhāsāvadāna)9 deal with the generation of bodhicitta in the past by the historical Buddha.10 In a similar fashion, Śraddhākaravarman states.11

---

6 Dvādaśakāranaṇayastotra (P, fol. 95b2–3; D, fol. 82b3–4; S, vol. 1, p. 255.4–6):

gang gis dang por byang chub thugs bskyed nas ||

10 MEJOR 1992: 159.
The Resolve to Become a Buddha

The Well-gone One (sugata), the font of all virtues, at the beginning generated the resolve [to strive for awakening].

In the middle gathered the two [types of] accumulation, and at the end attained

The Body of Reality (dharmakaya), and [for] the purpose of others

Manifested himself in the form of a Material Body (rupakaya) out of the state of non-origination.

Kong-sprul cites a certain Yo t an yongs su bkod pa'i mdo (perhaps *Gunakaranadvayushasutra) which also seems to allude to these three events in the career of the historical Buddha. According to Nyang-ral Nyi-ma'-od-zer (1136–1204), the three great events are enacted for the benefit of sentient beings, and are thus the reason why buddhas and bodhisattvas deserve the gratitude of sentient beings. The late non-Mahayana and the Mahayana traditions may differ in the terminology they employ in this context and in where they draw the borderlines between these three great events, but in essence both traditions seem to presuppose them.

(a) The First Event: The Initial Resolve to Become a Buddha

Of the three great events of the Buddha’s career, the most significant for this study is his initial resolve to become a buddha. It should, however, be remembered that the generation of an initial resolve as such is not limited to the historical Buddha. One can also find accounts of sravakas and other bodhisattvas making their own initial resolution. I shall, however, limit myself to the accounts of the historical Buddha’s initial resolve.

As has been already stated, according to both non-Mahayana and Mahayana traditions, the historical Buddha made his initial resolution to become a buddha in the distant past. Nevertheless, they disagree, according to Tibetan sources, on how he did so. This is also applicable to the tantric and non-tantric Mahayana sources, and thus we are confronted with several versions of the Buddha’s first resolution, which, of course, neither can nor should be interpreted as historical accounts, for doing so would result in irreconcilable contradictions. For the Buddhist traditions, the issue of multiple ‘first times’ is, strictly speaking, rather a doctrinal than a historical problem, and hence the attempts that have been made by traditional Tibetan scholars, for instance, to resolve these contradictions have been exclusively doctrinal in nature. This does not, however, mean that these accounts of legendary character are of no use to us. In fact, such accounts seem to contain traces of ideas that very likely contributed to

11 Yogavatitasamagraha (P, fol. 116a2–3; D, fol. 104b3–4; S, vol. 41, p. 279.9–111):
- bde gshegs yon tan kun gyi ‘byung gnas kyis ||
- thog mar thugs bskyed bar du tshogs gnyis bsags ||
- tha mar chos sku brnyes nas gshzan don ni ||
- skye md ngang las gzugs kyi skur bstan te ||.

12 Kong-sprul, Shes bya ma'gdo (p. 149.1–5). I was not able to locate a sutra in the bKa’-'gyur with the title Gunakaranadvayushasutra, but see the [Avalokitesvaraguna]karanadvayushasutra (Taishö 1050).

13 Nyang ral chos ‘byung (pp. 2.13–4.13).

14 Bhadrakalpikasutra (T, fol. 405b1–474a4; D, fol. 288a1–336b2). See also, for example, DORJE 1998: 29–89, where the names of one thousand and five buddhas occurring in the Bhadrakalpikasutra have been listed along with the manner in which each buddha is said to have generated bodhicitta for the first time. See also the citation in the Sutrasamuccaya (pp. 26.3–27.1).

15 See, for example, mKhas-pa lDe'u, lDe'u chos ‘byung (p. 26.16–17): ... sms bs kyed par mthun yang bs kyed lugs theg pa che chung du byung ngs o .

16 That there are several versions of the Buddha’s first resolution has already been noted by Har Dayal, who is also quick to point out that “[it] is not possible to reconcile these conflicting accounts” (DAYAL 1932: 293).
the development of the bodhicitta concept, and hence can be valuable for the study of the history of it and related ideas.

The Tibetan tradition considers the account of the Buddha’s initial generation of the resolve to strive for awakening found in the legend of King Prabhāsa (or Suprabhāsa)\(^\text{17}\) and the elephant tamer as the non-Mahāyāna version of this event.\(^\text{18}\) The story can be found in the Vinayavastu of the Mulāsārvāstivāda school, upon which traditional Tibetan scholars seem to have mainly drawn,\(^\text{19}\) and the Jātaka and Avadāna literature,\(^\text{20}\) and also in the Tibetan version of the *Damamikāstūra* and in the Tibetan supplement to Aryaśūra’s Jātakamālā by Karmapa Rang-byung-rdo-rje (1284–1339).\(^\text{21}\) As I have stated, the story has been often recounted by Tibetan scholars, albeit with varying details and emphases, and has also drawn the attention of several modern scholars, some of whom have provided summaries of the account.\(^\text{22}\)

King Prabhāsa (who is the Buddha in one of his previous existences) came to realise that while the skilled elephant tamer could train an elephant physically so well that it could even be made to swallow a red-hot iron ball, he is powerless against the surging passion of the elephant. The king was overcome by compassion for the elephant, which was both so wild and so submissive. Analogously, the king then realised that other sentient beings in samsāra also succumb to the power of passion and pain, and thus felt compassion towards them, too. Subsequently, the king wanted to know from the elephant tamer if he had ever seen or heard of anyone who was free from passion and able to tame the passion of sentient beings. The trainer told him that only buddhas are able to do so, and the king, upon hearing this, was

\(^{17}\) The name of the king is given as Suprabhāsa in the Jātakamālāvadānasūtra and Mahājñātakamālā (Hahn 1985: 31) and as Prabhāsa in other sources. The name of the king is usually translated into Tibetan as ’Od-idan (Panglung 1981: 286), perhaps from *Saprabhāsa, but according to Mi-pham, it also occurs as Rab-snang and Rab-gsal in the Jātaka literature, which he naturally assumed to be synonymous (Mi-pham, rGyab chos pad dkar, p. 887.2): skyes rab gzhan las rgyal po rab snang dang rab gsal zhes gsungs pa ming gi rnam grangs yin par mngon no ||). Cf. the Bu ston chos ’byung (p. 61.1), where the king is called Rab-grags.

\(^{18}\) Vinayavastu (T, vol. kha, fols. 365a5–367b5; D, vol. kha, fols. 273a3–273b5) It has almost become a custom among Tibetan scholars writing on the origin of the Buddha or Buddhism to recount the story of King Prabhāsa and the elephant tamer. The story is told in the context of explaining how the historical Buddha, according to the non-Mahāyāna tradition, first resolved to become a buddha. See, for example, the Bu ston chos ’byung (pp. 60.22–61.16); mChims chen (p. 451.6–12); Gur bbra chos ’byung (p. 19.1–13); sDe dge bstan dkar (pp. 40.1–41.14); Co ne bstan dkar (p. 12.4–13.21); Baidurya ser po (p. 347.15–24); Mi-pham, rGyab chos pad dkar (pp. 882.6–883.3); Kong-sprul, Shes bya mdzod (p. 142.27–31).

\(^{19}\) While some Tibetan scholars, such as Bu-ston, do not indicate their source for the story, others give it simply as ’Dul ba lung = Vinayāgama (e.g. Kong-sprul, Shes bya mdzod, p. 142.27) or as ’Dul ba gzhi = Vinayavastu (e.g. Mi-pham, rGyab chos pad dkar, p. 884.3), and still others specify it as the sMan gyi gzhi = Bhaśaśayavastu (e.g. Baidurya ser po, p. 347.15; Panglung 1981: 223).

\(^{20}\) For example, it is found in the Jātakamālāvadānasūtra (Hahn 1985: 5); Mahājñātakamālā, no. 7 (Hahn 1985: 86–100), Kumāralāta’s Kalpanāmanidūttika, no. 53 (Panglung 1981: 218), Haribhatta’s Jātakamālā, no. 1 (Hahn 1985: 5), Gopadatta’s introduction to the Jātakamālāvadānasūtra (Hahn 1985: 31); Gopadatta’s Jātakamālā, no. 1 (Hahn 1985: 5); Khemendra’s Bodhisattvavādānakalpatāla, nos. 1 & 100 (Mejor 1992: 36, and 48; Panglung 1981: 209; De Jong 1997: 348–349); the Khotanese Jātakastava, no. 1 (Panglung 1981: 214); Damamikānīdānasūtra, nos. 21 and 49 (Panglung 1981: 218). See also the sources indicated in Panglung 1981: 50.

\(^{21}\) sKyes rabs brgya pa (no. 71, pp. 475.12–480.7). In the Tibetan tradition, the Jātakamālā by Aryaśūra, which consists of thirty-four pallavas, and Rang-byung-rdo-rje’s supplement, consisting of sixty-seven pallavas, are called collectively the sKyes rabs brgya pa. See the publishers’ introduction to the sKyes rabs brgya pa (p. 1.12–15). We still, however, need to trace the source/s of Rang-byung-rdo-rje’s compilation.

\(^{22}\) Takakusu 1901; Dayal 1932: 293; Tucci 1949: 442, 529; Schlingloff 1977. For summaries of the story in German, see Hahn 1985: 30–31 and Panglung 1981: 49–50.
overwhelmed with faith towards the buddhas. These realisations are said to be responsible for prompting the king to resolve to become a buddha. In the *Vinayavastu*, the Buddha narrates the story upon being asked by the *śrāvakas* where he made his resolution to become a buddha for the first time. The Buddha’s answer is summarised as follows:

- Having heard that [only] buddhas are free from passion,
- Having seen a proud powerful elephant [overcome by passion],
- And [having seen] the suffering of the world,

I generated the resolve to [strive for] awakening [for the first time].

In the *Drin lan bsab pa’i mdo*, the Buddha, upon being asked when he generated the thought of kindness and benevolence towards monks, narrates the following story: Countless aeons ago, the Buddha was once born in hell as a strong man (gyad) who, together with a weaker co-worker, had to draw a bullock cart for the torture guard. When the guard tortured his colleague for being unable to pull the cart faster, the Buddha, overwhelmed with compassion, pleaded with the guard to show some sympathy and instead allow him to pull the cart alone. The guard became furious at his audacity and tortured him to death. This is often said to be the first time that the Buddha generated unswerving benevolence. The *sūtra* itself, however, does not refer to it as the first time. In contrast to many others, mKhas-pa lDe’u considered the account in the *Drin lan bsab pa’i mdo* to be another non-Mahāyāna version of the story.

According to the *Mahāvastu*, the historical Buddha aspired to the awakening (bodhiye prāṇiḥti) in the presence of the past Buddha called Tathāgata Śākyamuni during his life as a merchant or guildsman (śrēṣṭhin). The Abhidharmakosa tradition seems to take this as the very first such resolution on the part of the historical Buddha. However, there is nothing to this effect in the *Mahāvastu*. The account of the initial resolution made in the presence of the past Buddha Śākyamuni can also be found in other Mahāyāna sūtras, such as the *Triskandhakasūtra* and *Bhadralpikasūtra*; although the name of the past Buddha occurs

---

23 See, for example, Kong-sprul, *Shes bya mdzod* (p. 142.25-27): *sngon ’das pa’i dus na ston pa ’di rgyal po ’od idan du gyur pa’i tshe | rgyu mishan gsum la bren nas sbyin pa sbyin smon lam bsab cing bla na med pa’i byang chub tu thugs mchog bakshed par gsungs te |

24 *Vinayavastu* (T, fol. kha, fol. 369b1; D, fol. kha, fol. 276a2):

   *sangs rgyas ’dod chags bral thos shing ||
   glang po dregs pa’i shas chen dang ||
   ’jig rten sdug bongal gyur mthong nas ||
   ngas ni byang chub sems bakshed do ||

The verse is cited also in the mChims chen (p. 451.8-9).

25 The story is narrated in the fourth chapter of the *Drin lan bsab pa’i mdo* (T, fol. 291a2–292a5; D, fol. 117a3–118a2) and the forty-fourth chapter of the *Damamūkasūtra* (T, fol. 229a4–b4; D, fol. 282b4–283a6). Both of these sūtras were obviously translated from the Chinese and hence bear no Sanskrit titles. The story has been retold in varying details in a number of Tibetan works. See, as examples, the *lDe’uchos ’byung* (pp. 26.18–27.11); *Bu stonchos ’byung* (p. 65.13–18); *Baidārya ser po* (p. 348.13–23); *Sum-pa mKhan-po, d’Pag bsam Iyon bzang* (pp. 44.18–45.4); *Mi-pham, rGyabchos pad dkar* (pp. 883.3–884.2); Kong-sprul, *Shes bya mdzod* (p. 144.4–10).

26 See *TSD*, s.v. *gyad*.

27 *lDe’uchos ’byung* (p. 26.18). The *sūtra* is, however, not specified by name there.

28 *Mahāvastu* (vol. 1, p. 47.12–16): *ito mahāmaudgalyāna aparimātā asamkhyeyā kalpā yam śākyamunir nāma tathāgato || śākyamunisya khalu punaḥ mahāmaudgalyāna kapilavastum nāma nāgaram ||| tadāham śreṣṭhi abhūṣ || vyāgīpanām kṛtvā bodhiye prāṇiḥti ||| Cf. n. 1.

29 Abhidharmakosābhidāya (pp. 266.23–267.1): śākyamunir nāma samyaksambuddhaḥ pūrvaṁ babhāva | yatra bhagavātā bodhisattvabhūtenādyam prāṇidhānam kṛtam evamprakāra evāham buddho bhavāyam iti....
in the latter as *Mahāsākyamuni. This was perhaps in order to distinguish him from the historical Śākyamuni. According to both the Mahāvastu and the Tristandhakasūtra, the historical Buddha was then born into a merchant’s family. In the Bhdrakalpikasūtra, however, he is born as the son (khye ’u) of a poor potter (rdza mkhan). According to the Ajātaśatruakaukṛtyavadināsūtra, the Buddha generated his initial resolve to become a buddha at the feet of Tathāgata Mi-thub-pa’i-rgyal-mtshan, as a son of a merchant (śreṣṭhin) called Dri-ma-med-pa’i-dpung-pa, and at the initiative of Mañjuśrī, who had taken birth as the Dharma exponent *Jñānārāja. According to the Duhṣilaniṃghrasūtra, the Buddha made the resolution to become a buddha at the feet of the Tathāgata gZhan-gyis-mi-thub-pa’i-rgyal-mtshan, forty million aeons after the bodhisattva Maitreya—then ruling as a universal king (cakravartin)—had made his own such resolution in front of the Tathāgata *Prabhāśa or *Suprabhāsā (Shin-tu’od). The Karunāpūndarikāsūtra narrates that the generation of bodhicitta by Śākyamuni Buddha occurred in the presence of the Tathāgata Ratnagarbha, after the former had been born as Brāhmaṇa Śāmudrareṇu (also referred to as Bodhisattva Mahākāruṇika). The Bhdrisattvapīṭakasūtra, too, is referred to as a source, according to which the Buddha, having taken birth as *Vīryācāra (brtson’grus-grus-spyod), resolved to become a buddha in the presence of Tathāgata *Mahākāndha (Phung-po-chen-po). Occasionally the Lalitavistarāsūtra is also drawn upon as a source documenting the Buddha’s initial resolution, here made before the Tathāgata Amoghadārśin. Finally, Daśabalaśrimitra’s Sanskritasamskritavinīścaya records the position of the Sthāvira school,

30 Tristandhakasūtra (T, fol. 209b3–5; D, fol. 68a6–7): ‘ji ltar bcom ldan ’das de bzhin gshegs pa shākya thub pa tshong apon gyi bu mngon dgar gyur pa na | bcom ldan ’das de bzhin gshegs pa mdzes chen la brient te | dang po byang chub tu thugs bskyed pa de bzhin du bdag kyang byang chub tu sms bskyed par bygi’o ||.

31 For the pertinent verse from the Bhdrakalpikasūtra, see n. 1.

32 Ajātaśatruakaukṛtyavadināsūtra (T, fols. 289b4–292b1; D, fols. 227b5–229b5). The Sanskrit fragments of this sūtra (HARTMANN & HARRISON 1998) do not contain this story. The story has been narrated in varying details in various Tibetan works such as the IDE’u chos byung (pp. 27.17–29.11); mChims chen (p. 451.3–5); Mi-pham, rGyabchos pad dkar (pp. 881.6–882.5).

33 Cf. the Madhyamakāvatārābhāṣya (pp. 4.20–5.4).

34 Duhṣilaniṃghrasūtra (T, fols. 400b7–401b2; D, fols. 57b3–58a5). See also Mi-pham, rGyabchos pad dkar (pp. 882.6–883.3).

35 Karunāpūndarikāsūtra (YAMADA 1969: 352.11–18): tat kim manyadhive kula putrānyah sa tena kāleṇa tena samayena mahākāruṇiko nāma babhūva | na cāpyo draṣṭavayo ‘ham sa tena kāleṇa tena samayena mahākāruṇiko nāma babhūva ratnagarbhasya tathāgatasya piṭā | ayaṁ me phrahatmacittotpādo ‘bhūt anuttaradīyaṁ samyaksambodhaḥ | prahamacittotpādeṇa ca me ganaṇātānirāṇāḥ sattvāḥ sadāpātā putrāntaryāṁ samyaksambodhaḥ | ayaṁ me prathamaṁ śārabhāvah śārabkāryaṁ ca |. The Resolve to Become a Buddha

according to which the historical Buddha made his initial resolution in the presence of the Buddha *Brahmādeva.\(^39\)

(i) Attempts to Resolve the Illogicality of Several ‘First Times’

The fact that each of these *sūtras* has its own account of the Buddha’s resolve to become a buddha for the first time (as already mentioned, some are not explicit in this regard) shows that those *sūtras* originated at varying times and places. The traditions which take these accounts as reflecting the word of the Buddha are thus obliged to explain these contradictions, since logically there cannot be several first times. The historical anachronism and inconsistencies in the authoritative scriptures regarding this event have often been interpreted as efficient strategies employed by the Buddha with the diverse perceptive capacities and predispositions of sentient beings in mind. There are, however, several other attempts at an explanation. Some have tried to interpret the various instances of the initial resolve as pertaining to *pranidhīcitta* and *prasthānacitta*.\(^40\) Others, while noting that the discrepancies are due to the different contexts and mental states of the sentient beings before whom such teachings were given, and that there is no point in insisting on one version of the Buddha’s initial resolve to become a buddha, still suggest interpreting the various views as pertaining to conventional and absolute bodhicitta, and the like.\(^41\)

As an example, I shall present here Mi-pham’s attempt to resolve this inconsistency. Mi-pham employed the five causes of *samađanasāmketikacittiotpāda* found in *Mahāyānasūtrālaṃkāra* 4.7 to explain these several ‘first times.’ It is unclear to me, however, whether this interpretation is his own or whether he adopted it from an earlier Indian or Tibetan source. In any case, the generation of the Buddha’s resolve to strive for awakening for the first time found in the *Ajītāsastrāukṛtyavinnodanāsūtra* is explained by him as being the result of the strength of a friend (*mitrabala*); that is, the Buddha generated bodhicitta at the initiative of his spiritual friend, Mañjuśrī. The initial resolutions spoken of in the *Duḥṣilanigrasūtra* and *Drīnaṇaṃbsab pa’i mdo* are said to have been due to the strength of cause (*hetubala*) or spiritual disposition (*gotra*). The initial resolve to strive for awakening mentioned in the *Bhaisajyavastu* is ascribed to the strength of hearing (*śrūtabala*); and in the *Bhad rakalpikasūtra*, to the strength of the basis (*mūlabala*) of virtues (*kusala*). Brāhmaṇa Samudrareṇu’s initial resolution, narrated in the *Karunāpundarikasūtra* as well as in the *Bhad rakalpikasūtra*, is explained as being the first extraordinary such resolution made by the Buddha on the strength of the repeated practice of positive (attitudes and actions) (*subhābhīyāṣa*), that is, on account of his readiness to appear in our world system, which is inhabited by the most difficult sentient beings. Such resolve made him special among all

\(^{39}\) See also the *Shes bya mdzod* (pp. 143.3–8; 145.16–17).

\(^{40}\) See, for example, Sum-pa mKhan-po, *dPa’g bsam ljon bzang* (p. 45.10–12): *... sems dang po bs[k]eyd par gsungs pa sogs mang yang dmyal ba’i shing rta ’dren pa’i gyad kyi dus su smon sems dang khye’u snang hyed kyi dus ’jug sems thog mar bs[k]eyd pa yin nam snyam mo *]].

\(^{41}\) Kong-sprul, *Shes bya mdzod* (p. 144.15–19): *de ltar thog mar thugs bs[k]eyd tshul theg pa che chung gi khyad par dang | theg chen nyid la’ang mdo rnam s su mi ’dra ba du mar ’byung ba rnam gi gdul bya’i dus skabs bsam pa’i khyad par dang | smon ’jug don dam gyi thugs bs[k]eyd pa’i khyad par sogs dgongs gzhī mang po thā dad du gsungs par rnam pas | thugs bs[k]eyd kyi thog ma ’di kha na’o zhes phyogs gcig tu rnam par zhen zhin go rim dkrigs char bshgrigs pa la ni snying po med do *]].
bodhisattvas. Mi-pham, however, notes that it is not easy to determine the chronology of such events by employing logical analysis.\textsuperscript{42}

(ii) Was the Historical Bodhisattva ‘King-Like’ or ‘Herdsman-Like’?

As we shall discuss in greater detail later, the Tibetan tradition refers to three kinds of bodhisattvas, namely, ‘king-like,’ ‘boatman-like,’ and ‘herdsman-like.’ Such a distinction is made on the basis of the bodhisattva’s magnanimity as reflected in his attitude or resolve. The immediate question is: What kind of bodhisattva was the historical Buddha? How magnanimous was he, how selfless was his resolve? Tibetan Buddhist scholars have pondered upon such questions and come to different conclusions. According to Klong-chen-pa, the historical Buddha was a herdsman-like bodhisattva and his resolve was the most magnanimous.\textsuperscript{43} The dGe-lugs-pa historian Sum-pa mKhan-po Ye-shes-dpal-'byor (1704–1788), however, maintained that the resolve of the historical Buddha was that of a ‘king-like’ bodhisattva.\textsuperscript{44} rDo-grub Kun-bzang-gzhan-phalan alias 'ligs-med-'phrin-las-'od-zer (1745–1821), in commenting on 'ligs-med-gling-pa's Yon tan mdzod, does not follow Klong-chen-pa and give the bodhisattva that became the historical Buddha as an example of a herdsman-like bodhisattva, but instead names the so-called ‘Lords of the Three Families’ (rigs gsun mgon po), namely, Mañjuśrī, Avalokiteśvara, and Vajrapāni, who, although they fulfilled all the prerequisites for becoming buddhas, postponed full attainment of their Buddhahood, and have thus remained as bodhisattvas of the tenth stage (bhūmi), and will continue as such for as long as there are suffering sentient beings in samsāra.\textsuperscript{45}

Klong-chen-pa’s identification of the historical Buddha’s resolve as that of a herdsman-like bodhisattva seems to be influenced by a passage from the Ratnakūṭasūtra, which states that a herdsman-like bodhisattva takes three countless aeons, to become a buddha, and indeed the historical Buddha is said to have taken three countless aeons according to both non-Mahāyāna and most Mahāyāna traditions. But such a proposition, if understood as an exact description of the actual course of events, would have undesired illogical consequences, namely: (a) the historical Buddha actually did not become a buddha, because if he had become a buddha, this would imply that there was no suffering sentient being left in samsāra, or (b) the historical Buddha did not keep his commitment. Neither of the two alternatives is, of course, doctrinally acceptable. It seems that it was for this reason

\textsuperscript{42} Mi-pham, rGyab chos pad dkar (pp. 893.5–984.4): ‘di dag smon 'jug soags sems bsksyed pa'i gnas skabs so so la bzhan pa'ang yod md po rang giis ji iar gsal ba las mtha’ gcig tu ‘di dag gi snga phyi 'di zhes nges pa dka' mod | gang liar kyang thog mar thugs bsksyed pa'i tshul 'di yang je bzhan je brtan du song nas bram ze rgya mtsho'i rdul giis thugs bsksyed pa'i tshe thag pa chen po la yid ches pa'i dad pa drag pos sems can gshan mng po theg chen la bkod pa dang | bdag nyid kyis snying rje chen pos zhung ma po chen pa ched du bzang ba'i thugs bsksyed thog ma yin par mngon no || des na thog mar 'jam dpal giis bla med byang chub tu thugs bsksyed du gzhug pa'i sa bon las thag pa chen po'i rigs sad de phyi ma 'di or ma sna bzhin 'byung yang rung la | khye'us sangs rgyas su smon la bstan pa'am | gyad pakṣi tas byams pa'i sems bsksyed dang por byas nas nshong apon gyi bu sogs rim bzhin yin kyang 'gal ba med mod lung gis gsal ba med rigs pas mtha’ gcig tu dpyad par dka'o || des na snga ma de dag gi go rim ci iar byas kyang thugs bsksyed pa thog mar gsungs pa'i don la ni gnas skabs so so'i dbang gis 'gal ba med par snang ngo ||.

\textsuperscript{43} Klong-chen-pa, Shing rta chen po (vol. 1, p. 637.1–6).

\textsuperscript{44} Sum-pa mKhan-po, dPag bsam ljon bzang (p. 44.12–13): sems bsksyed tshul giis rgyal po mnyan pa rdrz'i bo la bu gsun bshad pa las rang cag gi ston pos sems bsksyed tshul dang po yin la |.

\textsuperscript{45} rDo-grub Rin-po-che, Yon tan mdzod lde (p. 338.12–17): chen pos sems can thams cad sngas rgyas kyi sa la ma bkod par rang don mi gnyer ba grangs med gsun nas sngas rgyas par gsungs pa byang chub mchog tu sems bsksyed nas bslab bya la bslabs shing nus pa rdzogs kyang | sa bcu'i 'i sampa 'i tshul giis 'gro don mdzad pa la 'khor ba ji srid bar sngas m gi rgya ba rigs gsun mgon po lia bu'o ||.
that Sum-pa mKhan-po decided that the historical Buddha had not been a herdsman-like bodhisattva. Apparently, some scholars held the boatman-like or herdsman-like bodhisattva to be impossible and their respective resolutions to be pseudo-bodhicittotpāda. According to such an interpretation, all bodhisattvas must resolve to become buddhas first, an approach which seems practical and realistic. This interpretation, in my view, reflects the typical dGe-lugs-pa tendency to ‘de-mysticise’ Buddhist thought.

Nonetheless, many Tibetan scholars have understood these three kinds of bodhisattvas, defined by three kinds of corresponding bodhicittotpāda, as essentially expressing varying magnanimous attitudes rather than a course of events during their career. According to this standpoint, there is no contradiction in the historical Buddha nourishing such a noble attitude and yet becoming a buddha before many other sentient beings have been able to. Such an explanation will become more comprehensible if we examine the actual process of perfection (pāramitā) as presented by Śāntideva in his Bodhicaryāvatāra. For example, the perfection of giving (dānapāramitā) by no means implies the elimination of poverty through giving, for if it were so, such a perfection would be unattainable. The perfection of giving is thus the perfection of the thought of giving or the readiness to give. In principle, therefore, one could attain the perfection of giving without having given even one cent to anybody. In theory, the reverse can also be true: one gives everything and yet has not attained even an iota of the perfection of giving. This is said to be similarly true of the remaining perfections. This point, I believe, is crucial in understanding the essence of bodhisattva ethics in general.46

(b) The Second Event: Striving to Become a Buddha

The Jātakas, Avadānas, and other related Buddhist literature are said to provide narrative accounts of the efforts made by the historical Buddha in the past to become a buddha. Here, we shall merely look into the different perceptions of the time taken by him to do so. According to the Abhidharmakośa tradition, the historical Buddha, having made his initial resolution at the feet of the past Buddha Śakyamuni,47 rendered service and paid respect to 75,000 buddhas for the duration of one immeasurable aeon. After the elapse of this first aeon there appeared the Buddha Ratnasikhin, and then he proceeded to render service and pay respect to 76,000 buddhas for another immeasurable aeon.48 Thereafter the Buddha Vipaśyin appeared, and then one more immeasurable aeon elapsed, during which he rendered service and paid respect to 77,000 buddhas.49 Now if the Buddha-to-be had indeed accumulated all

46 The tradition of the Abhidharmakośa also concerns itself with the historical Buddha’s practices of the six perfections. However, the non-Mahāyāna notion of perfection as found in the Abhidharmakośabhāṣya is rather modest when compared with the Mahāyāna notion of perfection (Abhidharmakośabhāṣya, p. 267.10–17). According to it, one attains, for example, the perfection of giving (dānapāramitā) if one is able to give purely out of compassion and with no expectation of anything in return. Such giving is presupposed in Mahāyāna, but is insufficient to allow it to be designated as a perfection. This perhaps explains why according to the non-Mahāyāna doctrine one can be an ordinary person (prthagjana) and yet accomplish the perfections. According to Mahāyāna, a bodhisattva would begin to accomplish the perfections only from the first stage (bhūmi) onwards, that is, when he is no longer a prthagjana.

47 The past Buddha Śakyamuni is not to be mistaken for the historical Buddha, who is also called Śakyamuni.

48 Abhidharmakośa 4.110b–d:

... asaṃkhyaevatrayāntyajāḥ ||

vipaśyī dīpaakraṇa ratnasikhī śākyamunīṁ purā ||.

49 Abhidharmakośabhāṣya (p. 266.14–16): atha bodhisattvabhihūto bhagavān kīyato buddhān paryupāśayaṁ āsa || prathame kalpaśaṃkhye pañcasaṃpatisahasrāṇi, dvitiye saṭṣapatiṁ, tṛtiye saṭṭasapatiṁ ||; ibid. (p. 266.20–
the prerequisites necessary for becoming a *buddha* during these three immeasurable aeons, he must have, according to the *Abhidharmakosa*, become a *buddha* sometime shortly thereafter. But since he is said to have become a *buddha* only much later, this would imply that there was an idle period of time during which he did not exert himself towards his awakening. Such an implication was obviously a problem for Puṇṇavardhana, a commentator of the *Abhidharmakosa*. This he attempted to resolve by specifying that the Gautama Buddha did indeed fulfil (*yongs su rdzogs*) the prerequisites in three immeasurable aeons, but not in all respects (*rnam pa thams cad du*). According to Daśabalaśūrimittra, this is the position of the Kāśmīra-Vaibhāṣika school.

The account in the *Vinayavastu* is somewhat different. It is said there that the historical Buddha made his initial resolution in front of the past Buddha Śākyamuni and that until the time of the Buddha Rūparatiṣa, he is said to have rendered service and paid respect to 75,000 *buddhas* for the duration of one immeasurable aeon. From the time of the past Buddha Dipamkara until the Buddha *Indrakhavajamuni (dBang-po'i-rgyal-mtshan-thub)*, he is said to have rendered service and paid respect to 76,000 *buddhas* for the duration of another immeasurable aeon. Finally, from the time of the past Buddha *Sādhukārīn (Legs-mdzad)* until the Buddha Kāśyapa, he is said to have rendered service and paid respect to 77,000 *buddhas* for the duration of one more such aeon. This position is identified by Daśabalaśūrimittra as being that of the Sāṃmitiya school. In addition, he also provides the position of the Stāvira school, according to which the Buddha took a period of twenty immeasurable aeons and 100,000 aeons to attain Buddhahood.

Kong-sprul considers the *Abhidharmakosa* and *Vinaya* accounts to derive from the Vaibhāṣika system, specifying that the former represents the position of the Kashmiri Sarvāstivāda school in particular, while the latter probably reflects positions of other conservative Buddhist schools (*nikāya*). He further states that according to the Mahāsāṃghika

---

See the Shes bya mdzod (pp. 144.22–27, 144.31–33), where the total number of *buddhas* (the historical Buddha rendered service to and honoured) is correctly given (i.e. according to the *Vinayavastu*) as 230,000. Cf., however, Klong-chen-pa’s *Phyogs bcu'i mun sel* (pp. 123.2–124.2) and the mChims chen (pp. 452.21–453.1). That the reading in T must be a scribal error is supported by the fact that a similar verse recurring on some folios later (T, vol. kha, fol. 370a5) indicates the number as 75,000 and not 77,000.

54 Ibid. (P, fols. 38a4–40a8; D, fols. 136a3–138a1; S, vol. 63, pp. 361.16–366.4). Part of the pertinent passage has been translated in SKILLING 1996: 163.
school, the time it takes a person to become a buddha would vary from ten to thirty immeasurable aeons, but adds that he had seen no sources that give the details.55

In the Mahāyāna sources, it is not always clear whether the description of the time taken to become a buddha applies only to the historical Buddha or to bodhisattvas in general. Generally speaking, there are allusions to three, seven, and thirty-three immeasurable aeons as the required period.56 But if we concentrate on the Mahāyāna account of the historical Buddha's career, the common perception is that he became a buddha in three immeasurable aeons.57 Some, however, maintain that he took four immeasurable aeons or 'a little more than three immeasurable aeons' (grangs med gsum lhag tsam) to become a buddha.58

It may be mentioned here that the generation of initial resolve is no guarantee of a successful bodhisattva career. There is always the chance that a bodhisattva will suffer a relapse. Thus depending on the bodhisattva's faculties (indriya), the irreversibility is said to be as follows: a bodhisattva of the first calibre is irreversible from the moment the initial resolution is made; a bodhisattva of medium calibre, from the path of seeing (darṣānāmārga) onwards, and a bodhisattva of lesser calibre only from the eighth stage (bhūmi) onwards. According to Dharmamitra, the historical Buddha was a bodhisattva of the first calibre and attained irreversibility from the moment he made his initial resolution to become a buddha.59

(c) The Third Event: The Time and Place of the Buddha's Awakening

According to the greater part of non-Mahāyāna tradition, the Bodhisattva Siddhārtha, despite his long and arduous preparation, was an ordinary person (prthagjana) burdened with all the forms of bondage (sakalabandhana) when he sat down under the Bodhi tree before his awakening;60 that is, he was a bodhisattva in his last birth (antyajanman) who had reached the greater path of accumulation (tshogs lam chen po), the last phase of the first bodhisattva path (mārga).61 It is said that a buddha-to-be (and pratyekabuddha) can traverse all the remaining four paths in just one sitting (ekatraivāsane) by taking the fourth meditative state (dhyāna) of

55 Kong-sprul, Shes bya mdzod (p. 145.11–25).
56 See the Madhyamakapradīpa (P, fol. 363b3–5; D, fol. 288a6–7; S, vol. 57, p. 1558.16–19): ... btsiṅ 'grus dang | dbang po rab kyi skal pa grangs md pa gsum gyis sangs rgyas nyid thob la | de las gshan pa nyid kyi skal pa grangs md pa bdun dang | bskal pa grangs md pa sum cu rtsa gsum gyis so ||; cf. the Bu ston chos 'byung (p. 71.15–17).
57 See, for example, Kong-sprul, Shes bya mdzod (pp. 146.33–147.9).
58 Ibid. (p. 147.9–16).
59 Ibid. (p. 148.1–8).
60 mChims chen (p. 464.25): de ni bye brag tu smra ba so so'i skye bor 'dod do ||; Yid bzhin mdzod 'grel (pp. 34.6–35.1): de la tshe lo brya pa'i dus 'dir shākya thub pa byon tshul ni | theg pa chung ngu nmam ni so so skye bo 'ching ba mtha' dag dang bcas pa gcig gi lam bsgrubs pas sangs rgyas par 'dod la ... It should be noted that not all non-Mahāyāna schools considered the ('historical') Bodhisattva to be an ordinary person (prthagjana). According to Vīśṇudeva, the Haimavatas were one such example. See the Nīkāyabhedavībhāṅgavākyāyāna (P, fol. 181a3–4; D, fol. 150a2; S, vol. 93, p. 1151.20–21): de la gang ri pa'i rtsa ba'i dam thig ni byang chub sms dpa' ni so so'i skye bo ma yin [add. pa PN] shes bya'o ||. Another such were the Lokottaravādins. See the Nīkāyabhedopadesānasaṃgraha (P, fol. 188a3–4; D, fol. 155a1; S, vol. 93, p. 1167.9–10): byang chub sms dpa' la ni 'dod chags la sogs pa skye ba dang | mer mer po la sogs pa las skye ba med do ||.
61 For details, see the Shes bya mdzod (p. 148.15–31).
the material realm (rpag phdul) as his mental base. Thus the path of preparation (prapagamargga), path of seeing (darshnamargga), path of practice or meditation (bhavantimargga), and path of no more training (asaiksamargga) were all attained by the Buddha in just one sitting.

According to some Mahayana sources, the Buddha, before his awakening, was a bodhisattva of the tenth stage (abhuma), that is, a bodhisattva at the last continuum of the ten stages (sa bcu'i rgyun mtha'). Most Mahayana traditions maintain that the Buddha actually became awakened (and simultaneously assumed the form of his sambhogakaya) in the Akanistha realm, where the empowerment of great rays ('od zer chen po'i dbang) was bestowed upon him by the buddhas of the ten directions, and then proceeded to perform his remaining deeds in the world. This idea seems to be based on the Lankavatarastra, Ghanavyuhasutra, Ratnagotraivibhaga, the commentary to the Vyakhayuktika and the writings of Vagisvarakirti (Ngag-gi-dbang-phYug-grags-pa). (Just what Akanistha means in this context would require a separate study.)

According to some other tantric and non-tantric Mahayana traditions, the Buddha became a buddha while already undergoing austerities at the bank of the river Nairajana. The actual awakening, however, did not take place there. Instead he is said to have left his physical body, which was the result of the maturation (vipakakaya) of previous karmic deeds, at the river and went in his body of gnosis (jnanakaya) to Akanistha, where he became awakened, thereby assuming the body of enjoyment (sambhogakaya). He then returned and re-entered his vipakakaya on earth and demonstrated the remaining activities including going to Bodh-Gaya and becoming awakened. This is said to be the position favoured by the rNying-ma tantra sGyu 'phrul bla ma, Buddhajyianapada's Muktitilaka, Sakyamitra of the Guhyasamaja tradition, some commentators of the Hevajratantra, and Rin-chen-bzang-po. However, according to the Pitaputramagamanasutra, Saddharmapundarikasutra, and Tattvasamgrahatantra, the

historical Buddha had already become a Buddha an innumerable number of aeons before, and hence all his three great events were merely a performance for the benefit of sentient beings. Moreover, according to the Saṃdhinirmocanasūtra-vākyākhyāna, all the deeds of the Buddha—beginning with his residence in Tuṣita and ending with his passing away (including the event of awakening)—were manifested simultaneously. This model seems to presuppose the Ratnagotra-vibhāga model of a Buddha’s activities combined with the presumption that the Buddha had already in the distant past become a Buddha. What is perhaps worth mentioning here is that some tantric notions of the Buddha’s awakening seem to be more conservative than other, non-tantric ones. For example, the idea that the Buddha became awakened while undergoing austerities at the bank of the river Nairājana suggests that the Buddha had not yet been a Buddha before. This idea is obviously more conservative than the idea found, for example, in the Saddharma-pundarīka-sūtra, according to which the Buddha had already become a Buddha in the distant past.

4. A Historical Sketch of the Buddha’s Initial Resolve to Become a Buddha

Let us examine the historical background of the Buddha’s initial resolve to become a Buddha. In this context, I again find Schmithausen’s statement that a greater part of the development of Buddhist ideas can be explained by the development of the perception of the Buddha very enlightening. Buddhism began with the Buddha. Different Buddhist traditions at different times and places may argue about what or who the Buddha was or is, but what is inarguable is the appearance of the historical Buddha;72 that is, someone took birth as Gautama, went forth and became a mendicant, became awakened under the Bodhi tree, hesitatingly (for whatever reason) founded a community of monks and nuns, taught for many years and finally passed away. The notion of the Buddha’s initial resolve seems to be one of several outcomes of the attempt to explain this unique person called Gautama Buddha, at the root of which were two questions: What was the driving force behind the appearance of the Buddha? And what motivated him to found a community of monks and nuns and establish a tradition of teaching?

Although rather rare, early canonical sources do mention compassion as the prime motive behind the Buddha’s appearance on the scene and his salvific activities. In the course of time this motive seems to have been increasingly placed further back in time: at first, prior

byang chub mgon par rdzogs par sangs rgyas so || See also the citation in the Shes bya mdzod (p. 149.14–15) and Bu ston chos ’byung (p. 81.1–3).

Shes bya mdzod (p. 149.15–17): rgyud de nyid bsdu pa las | bcom ldan ’das bs kal pa bsam gyis mi khyab par mgon par rdzogs par sangs rgyas nas shākya’i rigs su skye ba ston par mdzad do || zhes sogs byang ngo || This citation, which Kong-sprul thought to be from the Tattvamāgrahātātra (i.e. the Tattvamāgrahātrasūtra), is not to be found there; it is nonetheless quoted in Anandagarbha’s commentary, the Tattvamāgrahātātramāyaṃkhyā (P, fol. 44a7–8; D, vol. ii, fol. 38b2; S, vol. 29, p. 88.12–15): bcom ldan ’das bs kal pa bsam gyis mi khyab par mgon par rdzogs par sangs rgyas nas shākya’i rigs su skye ba ston par mdzad do zhes [ces PN] gsungs pas na | shākya’i rigs su skye ba bzhes nas zhes bya ba ’di la mi rigs so ||.

Saṃdhinirmocanasūtra-vākyākhyāna (P, fol. 19b5–7; D, fol. 17b1–3; S, vol. 115, pp. 1047.16–1048.1): zhugs pa ’i sku dang ldan pa zhes bya ba ni | ’jig rten gyi kham s dag gi gling bzhī pa ’i ’jig rten gyi kham thams cad du sprul pa ’i skus [sku PN] dang po nga’ ldan gyi gnas nas ’bab pa nas | tha ma yongs su mya ngan las ’das pa chen po ston pa ’i bar gyi sangs rgyas kyi mdzad pa bcu gnyis la sogs pa cig car ston pa ste | de ni nga’ ldan gyi pho brang nas ’bab pa la sogs pa kun tu [du D] ston pa ’i yon tan gyi khyad par yin no ||. See also the remarks in the Bu ston chos ’byung (p. 80.14–17).

Nineteenth-century European scholars did not believe that the Buddha was a historical person. For instance, Émile Senart (1847–1928) held that he was a ‘solar god.’ For details, see DE JONG 1987a: 26–29. Very few scholars today would doubt the historicity of the Buddha (see SCHmithausen 2000c: 6).

73 See DP, s.v. kāruṇā: sattvesu ca kāruṇātama pājīca...
to the awakening, then prior to his renunciation, and finally back in the distant past. In Mahāyāna sources, not only the initial resolution made by the Buddha is pushed back ever further into the distant past, but also the time of his awakening, until it becomes timeless. The need to close the temporal gap between the first resolve to strive for the highest awakening and the awakening itself is noticed, for example, in the *Buddhāvatamsakasūtra.*\(^{74}\) The concept of sudden awakening is apparently rooted in such a theoretical base.\(^{75}\) There are also traces of another line of thought where the closure of this gap is taken a step further: not only the gap between the initial resolve and the highest awakening but also that between the initial resolve and the setting of the Wheel of Dharma into motion is closed; that is, the generation of the initial resolve is immediately followed by (or even occurs simultaneously with) the turning of the Wheel of Dharma.\(^{76}\) Such an idea presupposes perhaps the notion of ādibuddha. According to Klong-chen-pa, the ādibuddha can still, as an efficient strategy, demonstrate to sentient beings the generation of an initial resolve to strive for awakening.\(^{77}\)

In the tradition of the *Guhyagarbhatantra*, the Ur-Buddha Samantabhadra does generate both conventional and absolute bodhicitta. It is explained that although all sentient beings are in reality already buddhas, he nonetheless generates the two kinds of bodhicitta for the benefit of sentient beings who have not realised this.\(^{78}\) The event of awakening itself seems to be superfluous in the tradition of the *Guhyagarbhatantra*. Here the generation of bodhicitta seems not to be conceived as an actual resolve to strive for awakening (at least not for the Ur-Buddha himself) but rather as a kind of compassionate impulse to teach.

### 5. Concluding Remarks

What I have suggested in this chapter is the idea that the bodhisattva’s generation of the resolve (*cittotpāda*) to seek the highest awakening was possibly inspired by or modelled on the Buddha’s first resolve to become a buddha. I have also attempted to explain the Buddha’s initial resolve by putting it into its historical and doctrinal context; that is, to show that both the history of and doctrine associated with the Buddha’s first resolve to become a buddha seem to largely depend on how the Buddha was perceived at a given time and place, and above all, on questions such as when and where the Buddha made the initial resolve, became a buddha, and set the Wheel of Dharma into motion.

Chapter Five

Mahāyāna, Bodhisattva, and Bodhicitta

May the immaculate, excellent bodhicitta,
Which, if present, would be sufficient for procreating a buddha,
[But] which, if absent, would deprive [one] of all means of procreating a buddha—
[May this] unmistakable seed for procreating a buddha arise!

1. Introductory Remarks

The notions of bodhicitta, bodhisattva, and Mahāyāna are so intricately linked with each other that it seems to be almost impossible to deal with one of them without referring to the others. Doctrinally speaking, there cannot be a bodhisattva without bodhicitta, and no Mahāyāna without a bodhisattva. That bodhicitta is of existential significance for a bodhisattva and that Mahāyāna would be impossible without bodhicitta is reiterated in several Mahāyāna sources. For example, it is said in the Śūtrārthasamuccayopadeśa that just as a sattva ('sentient being') cherishes the life-force and depends on it for his existence, so does a bodhisattva cherish and depend on bodhicitta.2 The Bodhisattvapiṭakasūtra states:3

1 This famous verse from a small untitled aspirationa1 prayer (smon lam: pranidhāna/pranidhi) found in the collected writings of dPal-sprul (PK, vol. ca, p. 956.3–4) reads:
yod na sangs rgyas sgrub la des chog cing ||
med na sangs rgyas sgrub la thabs chags [= chag] pa ||
sangs rgyas 'grub [= b/sgrub?] pa'i sa bon ma nor ba ||

2 Śūtrārthasamuccayopadeśa (P, fol. 354a6–7; D, fol. 304b1–2; S, vol. 64, p. 1828.10–12): de litar sans can [add. mams DC] la sro gces shing srog la brten pa de bzhin du byang chub sens dpa' la yang srog tla bu'i byang chub kyi sans gces shing de la brten pa'o ||.

O Śāriputra, if a bodhisattva is endowed with one factor, he would possess these and other infinite qualities of a buddha. What is that one factor? It is bodhicitta, the excellent, altruistic inclination. O Śāriputra, if a bodhisattva is endowed with this one factor, he would possess these and other infinite qualities of a buddha.

In the Sāgaramatipariprcchāśūtra, the bodhisattva Sāgaramati asks the Buddha.⁴

O Venerable One, what are the factors that constitute Mahāyāna?⁵

Thereupon, the Buddha answers:⁶

O Sāgaramati, there is one factor that constitutes Mahāyāna. What is that one factor? It is not forgetting bodhicitta and being vigilant. O Sāgaramati, this is the one factor that constitutes Mahāyāna.

According to the Daśadharmakasūtra, a bodhisattva is said to have properly embarked upon Mahāyāna only if ten criteria are fulfilled, two of them being wishing bodhicitta and not wishing to pass away into nirvāṇa by means of vehicles that accommodate śrāvakas and pratyekabuddhas.⁷ Likewise, the Bodhicittavivarana (ascribed to a certain Nāgārjuna) states that bodhicitta is the best factor in Mahāyāna.⁸ According to Nāgārjuna’s Ratnāvalī 2.74 and Candrakīrti’s Madhyamakāvatāra 1.1, a bodhisattva is born of three factors, namely, karunā, a mind of non-duality (i.e. non-dual prajñā), and bodhicitta.⁹ According to Ratnākarasānti, one is said to embark upon Mahāyāna after he has generated bodhicitta.¹⁰ Elsewhere, it is said that the bodhisattva’s task is to bring other sattvas to (spiritual) maturity and protect the Sublime Doctrine (saddharma).¹¹ that is, those parts of the doctrine pertaining to the various yānas. Because the concepts of bodhicitta,

bodhisattva, and Mahāyāna were formulated in broadly Buddhist terms, it is essential that we view them not only in their Mahāyāna setting, but in a wider Buddhist context as well. One of the ways to do this would be to consider the general understanding of bodhi, citta, sattva, and yāna in both Mahāyāna and non-Mahāyāna Buddhism, a detailed discussion of which is, however, beyond the scope of this study. This chapter instead seeks to discuss briefly the idea of yāna with special reference to Mahāyāna (including Vajrayāna); the various kinds of sattvas, with an emphasis on bodhisattvas and vajrasattvas; and finally the term bodhicitta and its importance within the bodhisattva doctrine, or Mahāyāna spirituality, more generally.

2. The Concept of Yāna in Buddhism

In the following few sections, we shall first take up the various yānas in general and then discuss in greater detail those yānas that are primarily defined in terms of bodhicitta. The objective of the presentation is, however, merely to put the notion of bodhicitta into perspective, not to treat the topic of yāna comprehensively.

Somewhat hesitantly, I have employed the expression non-Mahāyāna instead of Hinayāna. The term Theravāda Buddhism is too narrow since there are other non-Mahāyāna schools that do not belong to it. Although some traditional sources seem to use Śrāvakayāna in the sense of non-Mahāyāna, it, too, is too narrow, particularly if used alongside Pratyekabuddhayāna. I have restrained myself from employing terms such as primitive Buddhism, early Buddhism, and conservative Buddhism owing to their vagueness. And although the expression non-Mahāyāna is not absolutely satisfactory, given its undesired implication that Mahāyāna is the standard for other forms of Buddhism, it seems, nonetheless, to be a relatively better choice.

Similarly, I have decided to employ 'non-tantric Mahāyāna' in juxtaposition to 'tantric Mahāyāna' (or 'Vajrayāna'). The use of 'Mahāyāna' as if opposed to 'Vajrayāna' is problematic, for this implies that Vajrayāna is not Mahāyāna Buddhism. The term Bodhisattvayāna offered as a contrast to Vajrayāna is not satisfactory either, insinuating as it does that those who practise Vajrayāna are not bodhisattvas. One could use 'Pāramitāyāna,' but it tends to be understood in the sense of the Prajñāpāramitā system, to the exclusion of the Yogācāra and Tathāgatagarbha systems. Thus, while not the ideal solution, 'non-tantric Mahāyāna' and 'tantric Mahāyāna' seem to be reasonably acceptable.

Because one can hardly talk about bodhicitta without alluding to Mahāyāna, it is perhaps imperative that I make clear what I mean by 'Mahāyāna.' Mahāyāna may be defined

---

12 Cf. SEYFORT RUÉGG 1967: 161–162: "It should moreover always be kept in mind that the Buddhist sources attest various uses of the terms 'Hinayāna' and 'Śrāvakayāna,' and that while some of them may be motivated in polemics, others possess a perfectly evident and valid psychological and soteriological foundation; before these terms can be properly and meaningfully used by a modern scholar in his investigations their application in varying contexts needs to be exactly analyzed with a view to determining what role these expressions can play in studies on Buddhist thought." For further discussions, see id. 2004: 7–12.

13 For a recent discussion on the various terms pertaining to yāna (viz. Mahāyāna and Bodhisattvayāna in relation to Śrāvakayāna, Hinayāna, and Shaviravāda/Theravāda), see SEYFORT RUÉGG 2004: 5–12, cf. 28–31.

14 The term mantramahāyāna is attested, for example, in the Yogaratnamālā (p. 138.36). Note, however, that some Japanese scholars as well as David Snellgrove have distinguished between Mantrayāna and Vajrayāna, and that some Indian scholars such as B. Bhattacharyya (cf. DASGUPTA 1958: 63, 64, 144) have employed terms such as Sahajayāna and Kālacakrayāna, thereby distinguishing them from Vajrayāna, but as pointed out in NEWMAN 1987: 16, n. 2, these terms are 'neologisms' and their distinction from Vajrayāna 'artificial.'

15 Tilmann Vetter had argued that there existed a major difference between Prajñāpāramitā and Mahāyāna at an early time and that the former was connected with the śrāvakas rather than with the bodhisattvas. See VETTER 1994: 1241–1281; id. 2001: 58–89; SEYFORT RUÉGG 2004: 10, n. 14.
as a form of Buddhism that presupposes that even an ordinary sentient being can generate bodhicitta and become a bodhisattva or a buddha, and advocates that they do so. According to this proposed definition, Mahāyāna would include Yogācāra, Prajñāpāramitā, Madhyamaka, Tathāgatagarbha. Vajrayāna, a combination of two or more of these forms, and any other form of Buddhism that recognises Buddhahood as the ultimate soteriological goal of (many or all) sentient beings. With this definition in mind, I shall avoid setting off, for example, Prajñāpāramitā or Vajrayāna from Mahāyāna, for in my view both Prajñāpāramitā and Vajrayāna are forms of Mahāyāna Buddhism.

(a) The Various Models of Yāna

The term yāna will be employed here in the sense of ‘vehicle’ and ‘way’ (or ‘carrier’ and ‘course’), and as referring to the means or methods that lead one to a desired destination, as explained in the ITa ba'i khyad par by Ye-shes-se. A yāna resembles a carriage. It carries [passengers] and causes [them] to arrive at different destinations, and hence [it is called] a yāna (‘vehicle’). It is like a bridge, a boat, or a ship. [It is called] yāna, too, because [one] arrives at the other shore of the great river of samsāra by means of the lift and support lent by it.

The ways or means that lead to an undesirable destination are usually not referred to as yāna. One can find multifarious models of yāna in Indian and Tibetan Buddhism, although some are certainly more popular than others. Most models describe only yānas pertaining to the Buddhist soteriological goal, but some also relate to desirable human and celestial existences. Although not consistent with the historical development, I shall, for practical reasons, present the various models of yāna in an ascending order, beginning with the ‘one vehicle’ (ekayāna) model and concluding with the ‘no vehicle’ (avyāna) model. It should be

---

11 Note that some modern Japanese scholars denounce the tathāgatagarbha doctrine as non-Buddhist. For a discussion of this issue, see ZIMMERMANN 2002a: 82–84.

12 The notion of becoming a buddha can also be found in what is known as Hinayāna, but in its case, this may be considered an exception rather than the rule since it applies only to a few instances, such as the Buddha Gautama or the future Buddha Maitreya. Hinayāna does not hold to the idea that anyone (with the right spiritual disposition) can become a buddha and thus should generate bodhicitta. I have not included various forms of Chinese and Japanese Buddhism in my discussion. Nonetheless, these forms of Buddhism, too, insofar they presuppose Buddhahood as the ultimate soteriological goal of sentient beings, can justifiably be called Mahāyāna Buddhism. According to the Japanese Buddhistologist Susumu Yamaguchi, for example, Pure Land Buddhism (and other schools such as Hua-yen and Zen) is a part of Mahāyāna tradition based on Nāgārjuna’s Madhyamaka and Vasubandhu’s Yogācāra thought; see KIYOTA 1978: 252, 254–255.

14 ITa ba'i khyad par (P, fol. 254a3–4; D, fol. 215a2–3; S, vol. 116, p. 565.10–13): theg pa zhes bya ba ni bzhon [gzhon PN] pa dang 'dra ste | des theg cing so so'i gnas su son [ston D] par byed pas theg pa'o || zam pa dang gru dang gzing dang 'dra ste | des bieg cing brien nas [add. | P] 'khor ba'i chu bo'i pha rol tu phyin pas na yang theg pa'o ||. See also the dKon mchog 'grel (A, fol. 196b1–2; B, p. 46.15–17): spyir theg pa zhes bya ba'i nges tshig ni | ya [= ya] na zhes bya ba 'gro ba'i bya ba ston [smon A] pa'i tshig yin pas tshig gzugs por lam la bya'o || bregyud nas ni mya ngan las 'das pa dang | gzhung [gzung A] gi tshogs dang | brjod bya lta bu yang 'jug par shes par bya'o ||.

15 In the Aksayamatinirdesati (P, fol. 180b2–5; D, fol. 147b2–5; S, vol. 66, p. 358.9–19) it is explained that although unwholesome ways or means that lead to lower destinations can also be called yānas, they are not referred to as such, since they cause suffering and are not a basis conducive to the realisation of the truth.
remarked that some of the terms concerning certain vehicles are found only in Tibetan sources, and these will be identified as such. 21

(j) The One-Vehicle Model

The view that there is only one vehicle (ekāyāna), namely, the buddha vehicle (buddhayāna), is advocated primarily in the Saddharmapuṇḍarīkāsūtra, and has been upheld by both the Madhyamaka and Tathāgatagarbha traditions. Besides the Saddharmapuṇḍarīkāsūtra, a number of other Mahāyāna sūtras are cited by the Sūtrasamuccaya in support of this position. 22 However, while maintaining the view of one (final) vehicle, the Sūtrasamuccaya seems to deny neither the diversity of sentient beings nor the existence and legitimacy of multiple (provisional) vehicles. 23 The ekāyāna theory is also fleetingly mentioned in Nāgārjuna's Ratnāvalī 4.88. This stance was adopted in turn by Candrakīrti, a Prāsaṅgika-Mādhyamika, who referred to both the Saddharmapuṇḍarīkāsūtra and Sūtrasamuccaya, and attempted to establish it on a logical footing. The gist of his argument is that because there is only one true reality (tattva) as the object (viśaya), its subject (viśayin) can be gnosis of only one quality, and hence only one (final) vehicle is possible and not three (with qualitative differences). 24 The doctrine of three vehicles is termed provisional, while the one vehicle is, for him, Mahāyāna. In the Tathāgatagarbha tradition, the argument is that all sentient beings have the same or one spiritual disposition (gotra) and that there is only one (final) nirvāṇa, namely, Buddhahood. 25 The Madhyamaka and Tathāgatagarbha traditions, however, disagree regarding the immanence of positive qualities attributed to the spiritual disposition. Haribhadra, an important commentator of the Abhisamayālaṃkāra, belongs to the tradition that interprets the idea of one vehicle as definitive and that of three vehicles as provisional. 26

21 Some of the Sanskrit terms pertaining to yānas recorded in the Mahāvyutpatti are: mahāyāna (no. 1250), pratyekabuddhayāna (no. 1251), sīrivakayāna (no. 1252), sīrivakapratyekabuddhayāna (no. 186), hīnayāna (no. 1253), prādeśikayāna (no. 1254), ekāyāna (no. 1255), tathāgatayāna (no. 1263, in a compound), paramayāna (no. 795, in a compound).

22 See, for example, the Saddharmapuṇḍarīkāsūtra 2.54 (p. 43.9–12):

\[\text{ekāḥ hi yānam dūvitiyam na vidyate tṛtiyam hi naivāsti kadāci loke} | \text{anyatvā upāyā puruṣottamānām yad yānañānāvā' upadarśayanti} \|.

The ekāyāna concept, of course, is found in a number of other Mahāyāna scriptures such as the Lankāvatārasūtra (see n. 76). For the entire discussion, see SUZUKI 1930: 358–361.

23 Sūtrasamuccaya (pp. 126.1–131.20).

24 Ibid. (pp. 132.1–133.17).

25 Madhyamakāvītarābhāsya (p. 400.4–9): gang gi phyir de ltar de kho na nyid gcig nyid yin pas | de kho na nyid kyi yul can ye shes tha mi dad pa de 'i phyir theg pa gcig kho na bas theg pa gsum yod pa ma yin te | 'od srungs chos thams cad mnyam pa nyid du rtops na mya ngan las 'das pa yin la de yang gcig nyid yin gyi gyi dang gsum ni ma yin no zhes 'byung ba 'i phyir ro |. For the entire discussion, see ibid. (pp. 399.9–402.19). See also SEYFORT RUEGG 2004: 6–7, n. 8; 45–46, n. 70.

26 Ratnavajravibhūga 1.94:

\[\text{ato 'nāgamyā buddhatvaṁ nirvāṇam nādhigamyate} | \text{na hi sākyah prabhārámin nirvāya prekṣītum raviḥ} \|.

For an English translation, see TAKASAKI 1966: 266. For the importance of the ekāyāna theory in the Ratnavajravibhūga, see ibid. (p. 38).

27 Abhisamayālaṃkāraśāstra (p. 36.9–11): triyānāvyavasthānāṁ abhirāpyikāṁ na lākṣaṇikam iti nyāyād anuttarasāmyakṣaṁbodhiparyavasāna eva sarvo jana ity ato vitarāgetarayoginā buddhatvapraṇâpte vāryajñatā bhāvanīyeyi vyāptiḥ |.
The Resolve to Become a Buddha

Kamalaśīla, too, a Yogācāra-Mādhyamika, supports the notion of one vehicle in his Mādhyamakāloka, thereby rejecting the interpretations of vehicles found in some Yogācāra texts such as the Mahāyānaśīrālāmkāra and Mahāyānasūtrālāmkārabhāṣya,28 where the one vehicle is expounded in several ways, and so shown to be of provisional meaning.29 But at the same time he also seems to reject the position of Candrakīrti (particularly his interpretation of the tathāgatagarbha concept). The idea of one vehicle later recurs in the Vajrayāna context, where it is equated with the resultant vehicle.30

The notion that there is ultimately only one vehicle has gained universal acceptance in Tibet. I am not aware of any Tibetan author or work that rejects this idea. This can perhaps be explained by the fact that, philosophically, Tibetan Buddhism is principally defined by the doctrines of Mādhyamaka, Prajñāpāramitā, Tathāgatagarbha, and Vajrayāna, all of which subscribe to it. Already in the early ninth century, Ye-shes-sde in his ITa ba'i khyad par had shown an unequivocal preference for the one-vehicle theory.31

The relevance of the one-vehicle theory for the bodhicitta concept is that for those who accept that it is of definitive meaning, there is only one ultimate goal, namely, Buddhahood, and only one ultimate way, namely, the Mahāyāna; and everybody can, in principle, generate bodhicitta and finally become a buddha. For those who interpret the one-vehicle theory to be of provisional meaning, Buddhahood is one of three alternative soteriological goals.32

(ii) The Two-Vehicle Model

There are several two-vehicle models, the commonest being the Small Vehicle (hīnayāna) and the Great Vehicle (mahāyāna).33 The former includes both the Śrāvakāyāna and Pratyekabuddhayāna, and the latter both tantric and non-tantric Mahāyāna (at least from the perspective of later Mahāyāna commentators).34 According to another two-vehicle model, the yānas are the Vehicle of Characteristics (*lakṣāṇayāna) and the Diamond Vehicle

---

29 See Mahāyānasūtrālāmkāra 11.53–53:

dharmataṅrāmyamuktiṁ bhūtā gotrabhedataḥ |
dvyāśayāpiś ca nirmanatā paryantā ekayatā ||
ākarsanārtham ekeṣām anyasamdhāranaṁ ca ||
desāntīyaṁ bhūtā samuddhir ekayatā ||.

See also the Mahāyānasūtrālāmkārabhāṣya (p. 68.17–6).

30 See nn. 58 & 52, and Ratnakaraśānti’s interpretation of ekayāna in the Triyānavaśāsthaṇa (P, fol. 115a6–b5; D, fol. 104a1–7; S, vol. 41, pp. 275.13–276.5). See also the dKon mchog 'grel (A, fol. 19b3–4; B, p. 46.20–22):
‘di ltar ’phags pa rtogs chen phyag rgya pa las | ’theg pa ni gcig tu bas te | gnyis dang gsum du ma mchis so | ’di zhes gsungs pa lta bu ste | ‘di ltar yang dag par rdzogs pa ’i sangs rgyas gcig kho na’o ||. This citation has not been identified.

31 ITa ba’i khyad par (P, fols. 256b3–257a6; D, fol. 217a5–b6; S, vol. 116, pp. 570.16–572.5).

32 See also SEYFORT RUEGG 1989: 49–50.

33 A systematic study of the distinction between Hīnayāna and Mahāyāna as found in primary literature is still a desideratum. For a recent contribution on this topic, see Mario D’Amato, The Mahāyāna-Hīnayāna distinction in the Mahāyānasūtrālāmkāra: A Terminological Analysis. University of Chicago thesis, 2000 [ref. SEYFORT RUEGG 2004: 48, n. 77].

The term *laksanayāna* has, however, not been located in Sanskrit sources. The *Akṣayamatirindevatikā*, attributed to Vasubandhu, also speaks of two vehicles, namely, a Supramundane Vehicle (*lokottarayāna*) and a Mundane Vehicle (*laukikayāna*). The former comprises the Śrāvakayāna, Pratyekabuddhayāna, and Bodhisattvayāna, and the latter the ‘vehicle of celestial beings’ (devayāna) and the ‘vehicle of human beings’ (*manusyayāna*).

While there is probably no disagreement regarding the distinctions between mundane and supramundane vehicles, there seem to be, broadly speaking, divergent positions in India and Tibet regarding what sets non-Mahāyāna apart from Mahāyāna, and non-tantric from tantric Mahāyāna. One significant issue in this regard is whether non-Mahāyāna and Mahāyāna can be distinguished on the basis of prajñā (or view of sūnyatā), a matter which is beyond the scope of this study. One point, however, upon which possibly all Indian and Tibetan Mahāyāna sources would agree is that the presence of the bodhicitta concept distinguishes tantric and non-tantric Mahāyāna from non-Mahāyāna.

(iii) The Three-Vehicle Model

There are several three-vehicle (yānatraya or triyāna) models evincing varying degrees of conservatism and scope. Some three-vehicle models include only non-tantric vehicles, whereas others include also tantric ones. The commonest and certainly the oldest one is the three-vehicle model comprising the Śrāvakayāna, Pratyekabuddhayāna, and Mahāyāna or Bodhisattvayāna. Edgerton observed that the Mahāvastu mentions three vehicles, without, however, specifying them by name, and that “it is specifically stated that one can attain parinirvāṇa by any of them, and no preference is expressed.” Seyfort Ruegg also points out that the *Abhidharmakosabhāṣya* and *Vibhāṣāpabbhāvytī* on the Abhidharmaḍipa contain references to the idea of the three vehicles. In the Bodhisattvabhūmi, ten areas of expertise

---

35 Ita phreng (pp. 161.4–162.1): ‘jig rten las ‘das pa’i lam la yang rnam pa gnyis te | mishan nyid kyi theg pa dang | rdo rje’i theg pa po’o ||. See also the dKon mchog ‘gre! (A, fol. 19b5; B, p. 46.23): yang gnyis te | mishan nyid kyi theg pa dang | rdo rje’i theg pa gnyis so ||.

36 Aksayamatinirdesatikā (P, fol. 179b8–180a1; D, fol. 147a3; S, vol. 66, p. 357.7–9): de la theg pa thams cad ni bsdu s na rnam pa gnyis te | ‘jig rten las ‘das pa’i theg pa dang | ‘jig rten gyi theg pa po’o ||.

37 Aksayamatinirdesatikā (P, fol. 180a2–3; D, fol. 147a4–5; S, vol. 66, p. 357.11–16): nyan thos dang rang sngags rgyas dang | byang chub sens dpa’i theg pa ‘di gsum ni ‘jig rten las ‘das pa’i theg pa zhes bya ste | ci ‘i phyir zhe na ‘khor ba las [la PN] ‘byin par byed pa’i phyir ro || ‘jig rten gyi theg pa bstan par bzhed nas | gzhan yang theg pa gnyis te | gnyis gang zhe na | lh’i theg pa dang mi’i theg pa o’o zhes bya ba gsungs pa’o ||.

38 The term triyāna is attested, for example, in the *Laṅkāvatārasūtra* (see n. 76) and *Abhisamayālaṃkāravivrtti* (p. 36.9).

39 See, for example, the *Anavatapanāgarājapariprchnāsūtra* (T, fol. 277a3–4; D, fol. 243b4–5): rigs kyi bu bcom ldan ‘das shākya thub pa de bzhin gshogs pa theg pa gsum las [om. T] btsams te chos ston to || gsum gン zhe na | nyan thos kyi theg pa dang | rang sngags rgyas kyi theg pa dang | theg pa chen po ste | theg pa gsum po de dag go ||; *Madhyamakāloka* (P, fol. 1586b–7; D, fol. 146b5–6; S, vol. 62, p. 1146.4–6): ‘phags pa blo gros mi zad pas [par PN] bstan pa las kyang gsum po ‘di dag ni nges par ‘byin par byed pa’i theg pa yin te | ‘di lta ste nyan thos kyi theg pa dang | rang sngags rgyas kyi theg pa dang | theg pa chen po’o [po DC] zhes gsungs so ||. See also the *Ita ba’i khyad par* (P, fol. 254a3; D, fol. 215a2; S, vol. 116, p. 565.8–9): theg pa gsum ni nyan thos kyi theg pa dang | rang sngags rgyas kyi theg pa dang | theg pa chen po’o ||.

40 See BHSD, s.v. yāna; Mahāvastu (vol. 2, p. 362.8–15).

41 See SEYFORT RUEGG 2004: 28, n. 38, 30, n. 42.
(kauśalya) of a bodhisattva are enumerated, the last three being expertise in the three vehicles (i.e. Śrāvakayāna, Pratyekabuddhayāna, and Mahāyāna). It is unclear if the term yānatraya is actually employed in this context since the pertinent reading of the Sanskrit text is somewhat uncertain, and it is found elsewhere only in a compound. In any case, it is accepted in general that a bodhisattva should be proficient in matters pertaining to the Śrāvakayāna and Pratyekabuddhayāna so that he is capable of assisting śrāvakas and pratyekabuddhas in their soteriological endeavours. Also, one of the commitments in Vajrayāna is to uphold the Sublime Doctrine (saddharma) of the three vehicles (traiyānikā). According to the Viniścayasamgrahāṇī, the vehicles are three in number owing to the three different capacities of sentient beings.

In later Indian sources, the existing three-vehicle model has been reinterpreted in such a way that Vajrayāna can be incorporated into it. This is clearly the case, for example, in Ratnākaraśānti’s Triyānayavavasthāna, where the expression ‘vehicle endowed with profundity and vastness’ (zab cing rgya che ba dang ldan pa’i theg pa) is used in place of Mahāyāna or Bodhisattvayāna. The third vehicle is further subclassified into two, namely, Pāramitāyāna (or Pāramitānaya) and Mantrayāna (or Mantranaya). Similarly, according to Rong-zom-pa, the third vehicle in this three-vehicle model is the Highest Vehicle (bla na med pa’i theg pa). I have, however, not been able to trace an equivalent Sanskrit term (*niruttarayāṇa or *amuttarayāṇa) in Indian sources.

There is one more three-vehicle model, which is known only in rNying-ma tantric literature, such as the dGongs pa ‘dus pa’i mdo. It consists of the ‘vehicle [characterised by means] of deliverance [from] the origin (or existence) [of samsāra]’ (kun ’byung ‘dren pa’i...
Chapter Five: Mahāyāna, Bodhisattva, and Bodhicitta

The exact meaning of these expressions is, however, not clear. Each of these three are further subdivided into three, and hence form the basis of the nine-vehicle model (at least for later RNyin-ma doxographers), to which we shall later return.

(iv) The Four-Vehicle Model

There are several four-vehicle models: In what seems to be virtually a citation from the Kṣitigarbhasūtra, Kṣaṇapāda mentions four kinds of yānas, namely, *Svargayāna (i.e. the vehicle that leads to good destinations), Śrāvakayāna, Pratyekabuddhayāna, and Mahāyāna. 50 The four-vehicle model Rong-zom-pa proposes consists of one outer (bāhya) vehicle, that is, non-tantric Mahāyāna, and three secret (guhya) vehicles, that is, the three tantric vehicles pertaining to kriyātantra, carīyātantra, and yogatantra. 51 The Mañjuśrīnāmasaṅgiti seems to suggest another four-vehicle model, namely, three causal vehicles (i.e. Śrāvakayāna, Pratyekabuddhayāna, and Bodhisattvayāna, i.e. non-tantric Mahāyāna) and one resultant vehicle (i.e. Mantrayāna). 52 Although the idea of a resultant vehicle (*bras bu’i theg pa) is found in Indian tantric sources, the Sanskrit term (*phalayāna) does not seem to be attested. 53

49 dGong pa ‘dus pa’i mdo (P, fol. 192a8–b1; D, fol. 204a3):
  don dam nges pa’i theg pa na ||
  gsum du nges par snang ba ste ||
  kun byung ‘dren dang dka’ thub rig ||
  dbang sgyur thabs kyi theg pa’o ||.

For mKhan-po Yon-tan-rgya-mdszzo’s explanation of these terms, see the Rīg ’dzin ’jug ngogs (p. 13.6–8): theyeg pa de gsum po sangs rgyas kyi zhing kun tu ‘byung zhing gdul bya thar par ‘dren pa’i lam yin pas kun ‘byung ‘dren pa’i theg pa zhes kyang bya’o ||; ibid. (p. 15.17–19): de gsum gyis phyi’i dka’ thub la brien nas nang gi don rig par byed pas dka’ thub rig byed kyi theg pa zhes bya’o ||; ibid. (p. 21.10–12): de gsum gyis nyon mong thams cad ched du gnyen pos spong mi dgos par rig pa’i ye shes kyi dbang sgyur te lam du byed pa’i thabs dang ldan pas dbang bsgyur thabs kyi theg pa’o ||.

50 Kṣitigarbhasūtra, as cited by Kṣaṇapāda in his Mañhayānاملālayānāpačaṇa (P, fol. 234a6–7; D, fol. 2b1–2; S, vol. 41, p. 572.18–21):
  gang la mtho ris theg pa yod min ||
  de la nyan thos theg pa yod de ||
  gang la nyan thos theg pa yod min ||
  de la rang rgyal theg pa yod de ||
  gang la rang rgyal theg pa yod min ||
  de la theg pa yod de ||.

51 dKon mchog ’grel (A, fol. 19b6–20a2; B, p. 47.1–7): theyeg pa bzhihr yang bstan te || gsang ba’i thig le nor bu’i rgyud la sogs pa’i padma’i rigs kyis sdom pa gzang ba’i skabs las || phyi nang (= dang) gsang ba’i theg pa gsum ||

  mthun nyid kyi theg par bsdu pa’i mtha’ dag go || gsang ba’i theg pa gsum ni || bya ba’i rgyud dang || spyod pa’i rgyud dang ||
  rnal ’byor gyi rgyud de || ‘di gsum ni sku gzung thugs kyi gsang ba’i bstan pa yin te || ‘di dag gi don ni ‘og nas rgyud kyi dbye ba bstan pa’i skabs su ’chad pas der rig par bya’o ||; cf. n. 44.

52 Mañjuśrīnāmasaṅgiti 9.17cd: yānatinrāyaniryaṭa ekayāṇaphale sthitah ||; cf. n. 58.

53 He ru ka’i gal po (NyG, p. 225.7):
  mthun nyid rgyu yi theg pa yis ||
  sems nyid sangs rgyas rgyu ru shes ||
  ‘bras bu sngags kyi theg pa yis ||
  sems nyid sangs rgyas nyid du bsgom ||.
(v) The Five-Vehicle Model

In the Lankāvatārasūtra, the following five yānas are mentioned:54 (1) Devayāna, (2) Brahmayāna, (3) Śrāvakayāna, (4) Pratyekabuddhayāna, and (5) Tathāgatayāna. It is not clear why Brahmayāna has been treated separately from Devayāna and whether deva in Devayāna is meant to refer only to celestial beings in the celestial realm of desire (kāmādhātu) or to such human beings as kings as well. The Aksayamatinirdeśasūtra for its part seems to propose the following five vehicles:55 (1) Devayāna, (2) Manuṣyayāna, (3) Śrāvakayāna, (4) Pratyekabuddhayāna, and (5) Mahāyāna. In substance, the concepts Lokottarayāna and Laukikayāna found in the Aksayamatinirdeśa, mentioned above, can be expressed in terms of these five vehicles and vice versa; that is, Devayāna and Brahmayāna can be subsumed under the mundane vehicle and the remaining three under the supramundane vehicle.

A similar division of vehicles is proposed in the Guhyagarbhatantra:56 (1) Devamanuṣyayāna, (2) Śrāvakayāna, (3) Pratyekabuddhayāna, (4) Bodhisattvayāna, and (5) Mantrayāna. It goes on to suggest that the first four vehicles are causal vehicles, whereas the last one is resultant.58 The Guhyagarbhatantra remarks that the 84,000 sets of doctrine (caturāsītakṣasrādhamāndakah) said to be taught by the Buddha as antidotes for the 84,000 intellectual-emotional defilements (kleśa) are included in these five vehicles. It may be recalled that bodhicitta is considered by some to be the quintessence of all 84,000 teachings taught by the Buddha.

54 Lankāvatārasūtra 2.203 (pp. 134.16–135.1) and 10.457 (p. 322.13–14):

devayānam brahmāyaṇam śrāvakāyaṇam tathaiva ca

ītāhāgatyām ca pratyekāyaṇam yānāṁ etan vādaṃ āham

II.

iha yī theg dang tshangs pa'i theg ||

nyi tshe ba yi theg pa gang ||

thams cad theg pa chen po yi ||

gnas chen 'dir ni 'du bar 'gyur ||

55 Aksayamatinirdeśasūtra (T, fol. 71a4–6; D, fols. 126b7–127a2): de la byang chub sems dpa'i theg pa 'kun la' [thams cad D] mkhas pa gang zhe na | gsum po 'di dag [om. T] ni theg pa ste 'nges par 'byin pa'o ["byung ngo T] || gsum po gang zhe na | 'di lta ste | nyan thos kyi theg pa dang | rang sangs rgyas kyi theg pa dang | theg pa chen po'o || gshan yang theg pa gnyis te | gnyis gang zhe na | 'ha'i theg pa dang | mi'i theg pa'o ||. Cf. the citation in the gSung rab rin po che (P, fol. 142b5; D, fol. 238b7; S, vol. 115, p. 651.12–13):

56 *Guhyagarbhatantra (P, fol. 111a3–5; D, fol. 113a3–4): 'dul ba'i dbang gis lha dang | mi'i theg pa dang | nyan thos kyi [kyis P] theg pa dang | rang sangs rgyas kyi theg pa dang | byang chub sems dpa'i theg pa dang | bla na med pa'i theg pa dang 'ma rig pa'i rnam par rtog pa nyon mong pa stong phrag bryag bceu [cu D] rtsa bzhis'i gnyen por chos stong phrag bryag bceu [cu D] rtsa bzhis gsungs so || gsum ngo || gsum bā 'gyur ro ||. See also the dKon mchog 'grel (A, fol. 165b5–6; B, p. 43.18–20): theg pa lnga ni | lha dang mi'i theg pa dang | nyan thos kyi theg pa dang | rang byang chub kyi theg pa dang | byang chub sems dpa'i theg pa dang | gsang ba bla na med pa'i theg pa'o ||. Note that the term theg pa lnga recurs also elsewhere in the dKon mchog 'grel (A, fols. 96a4, 97a3; B, pp. 128.2, 129.2).

57 According to a Tun-huang document, mi'i theg pa and 'ha'i theg pa are included in the nine-vehicle scheme (KARMAY 1988: 148, 172).

58 *Guhyagarbhatantra (P, fol. 111b1; D, fol. 113b1–2):

theg pa bzhis yis nges 'byung la ||

theg pa gcig gis 'bras bur gnas ||

Cf. n. 52.
(vi) The Nine-Vehicle Model

The nine-vehicle model is an important doctrinal scheme followed in the rNying-ma\textsuperscript{59} and Bon\textsuperscript{60} traditions. The scheme of nine vehicles in the rNying-ma tradition, which varies slightly from source to source, has been discussed by Samten Karmay in his rDzogs-chen study.\textsuperscript{61} According to the Ita phreng, the nine vehicles are as follows:\textsuperscript{62}

Although it is true that the nine-vehicle model as such cannot be traced in Indian Buddhist sources, such a scheme is not completely at odds with the Indian Buddhist traditions, particularly if we consider the numerous models of vehicles found in Indian sources.

The last three vehicles are called the Mode of Generation (bskyed pa'i tshul), Mode of Perfection (rdzogs pa'i tshul), and Mode of Great Perfection (rdzogs pa chen po'i tshul). The use of ‘mode’ or ‘method’ (tshul) in place of ‘vehicle’ (theg pa) is in agreement with Indian sources, where naya and yäna have been used interchangeably, the former being seemingly even more prevalent than the latter.\textsuperscript{63} We should perhaps also remember that yäna is

\textsuperscript{59} dKon mchog 'gre! (A, fol. 20a2–3; B, p. 47.7–9): theg pa ni rnam pa dgur bstan pa yang yod de | man ngag lta ba'i phreng ['phreng A] ba las gsungs pa ltar | mtshan nyid sde gsun dang | phyi rgyud sde gsun dang | nang rgyud sde gsun mo ||.

\textsuperscript{60} There are said to be two completely different models of nine vehicles in the Bon tradition, namely, those according to the Central Treasure (dbus gter) and Southern Treasure (lho gter); the latter has been studied by David Snellgrove (KARMAY 1988: 148). See also MIMAKI 1994: 126–132 and KAPSTEIN 2000: 14–15, 16 (table containing the nine-vehicle model according to the Central Treasure of Bon).

\textsuperscript{61} KARMAY 1988: 146–149, 172–174 (diagrams of various nine-vehicle models). See also MIMAKI 1994: 123–126, EHRHARD 1990: 8–16, and KAPSTEIN 2000: 13–14, 16 (table containing the nine-vehicle model according to the Ita phreng and a Tun-huang document). There seems to be no study devoted exclusively to the various nine-vehicle models.

\textsuperscript{63} For the employment of the terms pāramitānāya and mantranāya, see, for example, TSD, s.vv. pha rol tu phyin pa'i tshul and sngags kyi tshul.
employed in Pali sources for the eightfold Noble Path, and it is by extension of this use that terms such as Mahāyāna and Hinayāna came to be used. 64

Sa-skya Panḍita Kun-dga'-'rgyal-mtshan (henceforth Sa-pa) asserted that the view (lta ba) of Atiyoga (in the sense of rDzogs-chen) should be taken as gnosis and not as a vehicle. 65 In this context, Sa-pa understands ‘vehicle’ (theg pa) as a doxographical position or system and not as an actual path or means of release; hence for him, a vehicle (which is endowed with manifoldness) and gnosis (which is free from manifoldness) are mutually exclusive. 66 The proponents of the nine-vehicle model, however, understood yāna in a number of ways. For example, Rong-zom-pa states that Mahāyāna can mean path (lam), result ('bras bu), absolute reality (don dam pa), and treatises or philosophical positions (gzhung). 67 If ‘vehicle’ is understood in the sense of path, it is clear that Sa-pa would no longer regard a vehicle and gnosis as mutually exclusive, for occasionally a great vehicle is considered omniscient gnosis. 68

(vii) The n-Vehicle Model

The notion of an inconceivable number of vehicles, which has occasionally been expressed by terms such as nānāyāna, 69 is found, for example, in the Lankāvatārasūtra. 70 The plurality of vehicles, in Ratnākaraśanti’s view, however, does not mean that they cannot be accommodated within the three-vehicle model. For him, a vehicle or view that is not subsumable under the three-vehicle model would be a non-Buddhist view. 71 Nonetheless, he

64 BHSD, s.v. yāna. It has also been pointed out that yāna in early Mahāyāna literature was understood in the sense of ‘path’ or ‘way,’ and this is supported by a very early Chinese translation (Vetter 2001: 64–67).

65 See sDom gsum rab dbye 3.282abc:

lugs ‘di legs par shes gyur na ||
a ti yo ga’i lla ba yang ||

66 If we study the context of sDom gsum rab dbye 3.275–3.282, it becomes clear that the pertinent discussion is about the tantric classification or system (rgyud sde’i rim pa) according to the rNying-ma and gSar-ma traditions and that ‘vehicle’ is understood by Sa-pa strictly in the sense of a doxographical system. It is important to note that Sa-pa does not categorically reject here the idea of nine vehicles or rDzogs-chen. Cf. the discussion in Karmay 1988: 147–148.

67 dKon mchog ‘grel (A, fol. 66a4–5; B, p. 97.4–5): theg pa chen po’i sgra yang lam dang ‘bras bu dang don dam pa dang gzhung gi tshogs dang bcas pa la ’jug pas rtags kyang de lla bur sbyar bar bya’o ||. See, for example, the Suvikrāntavikrāṇiparipṛcchāsūtra (p. 19.18): katamac ca mahāyānam? sarvam jñānam mahāyānam; Tīb. (T. fol. 21a1; D, fol. 31b6–7): theg pa chen po gang the na thams cad mkyen pa’i ye shes ni theg pa chen po’o ||; Yogaratnamālā (p. 105.7–8): mahājñānāni mahāyānapratīṣṭhā dharmāḥ. 72

68 See, for example, the Suvikrāntavikrāṇiparipṛcchāsūtra (p. 19.18): katamac ca mahāyānam? sarvam jñānam mahāyānam; Tīb. (T. fol. 21a1; D, fol. 31b6–7): theg pa chen po gang the na thams cad mkyen pa’i ye shes ni theg pa chen po’o ||; Yogaratnamālā (p. 105.7–8): mahājñānāni mahāyānapratīṣṭhā dharmāḥ. 72

69 Mañjuśrīnāmasaṅgīti 9.17a: nānāyānānayopāyāh.

70 Lankāvatārasūtra 2.204 (p. 135.2–3) and 10.458 (p. 322.15–16):

yānānām nāsti vai nīśāhā yāvāc cītām pravartate |
cītā tu vai parāvṛtte na yānām na ca yāyināh ||. This is also cited in Kapstein 2000: 209. For an English translation of the pertinent verse from the Lankāvatārasūtra, see Suzuki 1932: 116, cf. id. 1930: 360. See also the dKon mchog ‘grel (A, fol. 20a3–5; B, p. 47.9–13): theg pa miha’i yus par bstan pa yang yod de’i cho’s kyi sgo mo bryad khrir bshir stong dang bsam gyis mi khyab pa dang gzhun yang gsang snga’gs kyi gzhung las kyang ’di nyid las ’sarid gsum’ gro ba ji snyed pa’i || tseg ’dul dam shig de snyed spro || jhes gsungs pa lla bu dang mdo sde sngang [langgar B] gshugs pa las kyang ’di srid sems ’jug gnas pa’i bar || theg pa’i miha’i la thug pa med || ces gsungs pa lla bu’o ||.
does state that seventeen vehicles are also taught and that the means of benefiting sentient beings are numerous. As we have already seen, however, it is the one-vehicle model that is for him of definitive meaning (niśāra). For Rong-zom-pa, too, the number of vehicles is indefinite (and possibly infinite), with the Mode of the Great Perfection (rdzogs pa chen po 'i tshul) being the supreme vehicle (paramāṇa). In the dKon mchog 'grel, he maintains that all the inconceivable number of vehicles can be subsumed under the five philosophical tenets (siddhānta).

(viii) The No-Vehicle Model

The term ayāna seems to be employed in the sense of both ‘no-vehicle’ and ‘non-vehicle.’ In the Lankāvatārasūtra, where the term is found, it clearly means ‘no-vehicle.’ In the expression yāṇḍyāṇa, however, ayāna is clearly used as the opposite of yāna, perhaps in the sense of a vehicle or way that leads to an undesirable mode of existence. The logic behind the idea of no vehicle seems to be that vehicles are for delivering different kinds of sattvas (‘sentient beings’) endowed with citta (‘mind’) to the desired (mainly soteriological) destination, and once they arrive there, or once their mind has been transmuted (parāvyṛtta), there is no longer either an act of travelling or a vehicle. In other words, a vehicle is relevant, and its existence possible, only as long as there are sentient beings. Such a notion echoes the idea that a person, upon reaching the soteriological further shore, leaves behind the dharmas (be they wholesome or unwholesome), just as a traveller leaves behind the boat once the river has been crossed. Rong-zom-pa seems to reserve the no-vehicle model for the metaphorical dimension where the frontiers separating vehicle, traveller, and destination dissolve.

See Rong-zom-pa’s explanation of the expression thams cad kyi yang rtse (‘the culmination of all vehicles’) in the Theg chen tshul ‘jug (A, fol. 53a2–b3; B, pp. 473.17–474.8).

The five siddhāntas are grouped as follows: 1. Yogācāra and Yogācāra-Madhyamaka, 2. Vaibhāṣika, Sautrāntika, and Sautrāntika-Madhyamaka, 3. Kriyāntara, Caryāntara, and Outer Yoga, 4. Mahāyoga, and 5. Guhyagarbhaantara. See the dKon mchog 'grel (A, fols. 22b4–23b3; B, pp. 50.5–51.5).

Lankāvatārasūtra 2.130ab (p. 65.11):

triṇānam ekāyānam cāyānam ca vaddhānām ahām

Cited also in TSD, s.vv. theg pa gcig, theg pa gsum, and theg pa med pa. For an English translation, see SUZUKI 1930: 359–360; id. 1932: 58.

See, for example, TSD, s.vv. theg pa dang theg pa ma yin pa, theg pa ma yin pa, etc.

dKon mchog 'grel (A, fols. 20a5–b3; B, p. 47.13–21): theg pa med par yang bstan te | mdo sde de nyid las | "du shes med par gyur pa na || theg pa med cing 'gro ba'ang med || ces gsums pa lta bu dang | yang mdo sde dkon cog brtseg pa las | ade bzhin gshogs pa dge chos zag med ni || chos kyi sku mchog yin te de la ni || de bzhin nyid med de bzhin gshogs pa med || jig rten dag na gzugs brnyan kun tu snang || shes gsums pa lta bu dang | gshang sgongs kyi gshung las kyang | 'brog du med pa lam gyi mchog || ces gsums pa lta bu ste | tshul 'di lta bu'i don gyis na || theg pa dang | 'gro ba po dang | 'brog par bya ba'i gnas rnam thad du gzhag tu (du A) med do || tshul 'dis ni theg pa med par yang 'dod pa'o ||."
Ruegg observes that the deconstruction or ‘zeroing’ of the very notion of yāna is very characteristic of Mahāyāna thought and that the idea of ayāna is no doubt linked with the idea of the so-called Āryan Silence (āryatāṣṇībhava).79

(b) Which Vehicles Are Buddhist?

Both Indian and Tibetan scholars have attempted to make sense of the multiple models of vehicles. One of the concerns of these scholars has been where one ought to draw the line between Buddhist and non-Buddhist vehicles. In India, Vajragarbha, the author of the Hevajrapindārāthaśīka, stated that the Śrāvakayāna, Pratyekabuddhayāna, and Mahāyāna are the three Buddhist vehicles, and so a fourth or a fifth vehicle (if it existed) would not conform to the intention of the Sage (and thus would not be Buddhist).80 In Tibet, this statement has been employed to criticise the rNying-ma concept of nine vehicles.81 For the rNying-ma-pas themselves, however, all nine vehicles can be subsumed under Śrāvakayāna, Pratyekabuddhayāna, and Mahāyāna. In other words, of the nine vehicles, the first two belong to non-Mahāyāna and the remaining seven to tantric and non-tantric Mahāyāna. From a Buddhist perspective, the expressions ‘Buddhist vehicle’ and ‘non-Buddhist vehicle’ seem to be vacuous; one should rather speak of vehicles (as we have seen above) in terms of mundane (laukika) and supramundane (lokottara).

Nonetheless, the question whether a doctrine can be accepted as Buddhist is by no means insignificant. Buddhist traditions of different times and places have different answers to this question, a question which is tantamount to whether release from the bondage of samsāra is possible independently of the Buddhist teachings. Schmithausen, in a typically enlightening manner, explains that although sources such as the Uttiyasutta and the ninth chapter of Vasubandhu’s Abhidharmakośabhāṣya do assert the absoluteness of the Buddhist soteriological means, they premise salvation not upon affiliation with a religious institution but rather upon a certain spiritual practice or theoretical views, thereby leaving some room for ‘anonymous Buddhists.’ Nor is everyone required to tread the Buddhist soteriological path. To be sure, one who does not do so must continue to suffer, and in practice there were naturally problems caused whenever Buddhism was instrumentalised.82 According to some Mahāyāna sources, such as the Adhyāśyasamcudanāśutra, all ‘well-expounded’ (subḥāśita) doctrines are ‘Buddha-expounded’ (buddhabhāśita) doctrines. According to the Angulimālīyāsūtra, all teachings in the world that are consistent with the teachings of the Buddha should be regarded as his teachings.83 From a Buddhist perspective, whether a

79 SEYFORT RUEGG 2004: 9, 57-58, n. 103.
80 Vajragarbha, Hevajrapindārāthaśīka (SHENDE 2004: 10):
yānatritanirūyāīa ekayānaphale śhtiḥaḥ
śrāvakam pratyekā cātra mahāyānaṁ tṛīyakam || 1.39
caturtham nāsti bauddhānam paṃcamaṇ ca maṭaṃ muneḥ || 1.40ab.
For the critical apparatus, see SHENDE 2004: 257. The Tibetan translation is as follows (ibid., p. 70):
theq pa gsum gyi nges 'byung las ||
theq pa gcig gi 'bras bur gnas ||
nyan thos rang sangs rgyas dang 'dir ||
theq pa chen po gsum pa ste ||
sangs rgyas pa la bzhis pa dang ||
Inga ba [= pa] thub pa 'i 'donggs pa min ||.
See also KARMAY 1988: 147, n. 55.
81 See KARMAY 1988: 147–148. One of the sticking points in such a debate is the question whether the number of vehicles can be fixed.
doctrine is admissible or not would thus depend on how consistent it is with those said to be taught by the Buddha. Thus on the premise that the Buddha did not sanction, for example, hate-motivated killing, a doctrine that sanctions such a practice would under no circumstances be permissible, not even according to Vajrayāna.

(c) Mahāyāna

In the following passages, a few matters pertaining to Mahāyāna will be discussed, namely, disagreement regarding its origin, its content, and its professed indispensability. My focus will not be on the historical but rather on the doctrinal (and philosophical) aspects of Mahāyāna; my approach emic rather than etic.

(i) Dissent on the Origin of Mahāyāna

The question regarding the origin of Mahāyāna is a highly controversial one, a fact of which I am only too aware, and yet it cannot be left unstated, given the strong link between the underlying idea of bodhicitta and that of Mahāyāna. At the moment, a consensus among Buddhologists on the origin of Mahāyāna is not in sight. What I shall attempt here, however, is merely to draw attention to the difficulties and controversies surrounding the origin of Mahāyāna Buddhism and provide a sketch of some of the important positions.

Some scholars have alluded to Asoka’s Eighth Rock Edict as containing the idea of Mahāyāna, but this suggestion has not been widely accepted.\[^{84}\] According to L. S. Cousins, even in the second century CE, we “do not yet have anything which we can truly call Mahāyāna Buddhism.”\[^{85}\] The Aṣṭasāhasrikā is the oldest extant Mahāyāna source to mention the term Mahāyāna.\[^{86}\] The important question is: Who initiated Mahāyāna, or how did it come into being? Several theses have been proposed, some not very different from each other. According to scholars such as Har Dayal, the bodhisattva (i.e. Mahāyāna) ideal was introduced as a protest against the monastic elitism and in response to the spiritual needs and concerns of the laity.\[^{87}\]

\[^{83}\] Adhyāyasamcudanasūtra cited in the Śikṣāsamuccaya (BENDALL, p. 15.19; VAI DY A, p. 12.25); yat kimcin maitreya subbhāṣṭam sarvaṃ tad buddhabhāṣītam | Aṅgulimālīyasūtra (T, fol. 255a5–6; D, fols. 197b7–198a1): ‘jam dpal gyis gsal pa | bcom ldan ’das ’jig rten pa’ang ring zhih ishun (tshud T) chad bdag nyid sha za ba la mi gnas so | bcom ldan ’das kyis bka’ stsal pa | gang ’jig rten pa la sangs rgyas kyi tshig dang ’thun pa yod pa de yang thams cad du thams cad sangs rgyas kyi tshig tu rig par bya’o ||; cf. the dKon mchog ’grel (A, fols. 54b6–55a1; B, p. 85.4–6): mu stegs can gyis clegs par bshad [dpyod A] pa’i ’thun dang yang sangs rgyas rnam kyi byin gyis brels pa dang sprul par bshad pa yin pa | sangs rgyas nyid kyi lung bstan pa yin… This idea has been employed by Rong-zom-pa to defend the authenticity of the *Guhyagarbhatantra. See WANGCHUK 2002: 282–285. For additional information on primary and secondary sources, see GETHIN 1998: 47, 281, n. 20.

\[^{84}\] See VETTER 1994: 1243, n. 3, where this suggestion of Arthur L. Basham is treated with scepticism, in view of Schmithausen’s argument that only the idea of attaining heaven occurs in other Asoka inscriptions. See also a similar discussion in ROTH 1982: 372–374, particularly the statement (p. 374): “There are also no traces of the ‘Grand Vehicle’ in Asoka’s inscriptions…. The word Bodhisattva, which so dominantly figures in the Mahāyāna texts, is not used once in all the Asoka inscriptions…. ” Cf., however, SEYFORT RUEGG 2004: 13–4, particularly, n. 17.

\[^{85}\] See COUSINS 2003: 18, where he states: “We certainly have a literature to which the label Mahāyāna can be attached, but even that is to some extent retrospective. Some of the works which are later to be the core literature of the Mahāyāna certainly exist at this time, but in earliest recensions which do not contain all of the distinctive features of later Mahāyāna.”

\[^{86}\] NAKAMURA 1980: 152, n. 22. For an explanation of the meaning of Mahāyāna, see the Aṣṭasāhasrikā (pp. 11.31–12.24); Tibetan translation (T, fols. 18a3–19a5; D, fols. 13a5–14a3).

\[^{87}\] See DAYAL 1932: 2–4, particularly the following passage: “The bodhisattva doctrine was promulgated by some Buddhist leaders as a protest against this lack of true spiritual fervour and altruism among the monks of
worship of *stūpas* has been proposed by Akira Hirakawa and continued and modified by Tilmann Vetter. Hirakawa’s theory, however, has been criticised by Richard Gombrich, while Richard Robinson has criticised the arguments that stress the importance of lay believers. Reginald Ray has spoken of ‘three kinds of actors in Buddhist history,’ namely, ‘forest renunciant,’ ‘monastic renunciant,’ and ‘lay person,’ and suggested that Mahāyāna Buddhism arose in restricted circles, chiefly those of forest renunciants or meditators. Paul Harrison for his part answered his self-formulated question “Who gets to ride in the Great Vehicle?” as follows: Judging by the eleven early Mahāyāna sūtras, those who thought they were riding the Great Vehicle were mostly monks (bhikṣu) or other males, and Mahāyāna remained a minority movement in the land of its origin. Andrew Rawlinson, however, has suggested that a multidimensional model existed in Mahāyāna from the very beginning. In the view of some scholars, such as Paul Mus and Richard S. Cohen, the Mahāyāna is the legitimate evolutionary successor to the earliest Buddhism.

(ii) The Content of Mahāyāna

In primary sources, Mahāyāna is rarely understood in the sense of an institution, as it often is in secondary sources. The *Aṣṭasāhasrikā* explains that Mahāyāna is an appellative (adhibhūṣana) for immeasurability (aprameyata). According to the *Lankavatārasūtra*, the bodhisattva ideal can be understood only against this background of a saintly and serene, but inactive and indolent monastic order. The bodhisattva ideal was taught in order to counteract this tendency to a cloistered, placid, inert monastic life. The bodhisattva doctrine was promulgated also as a protest against this theory of arhatship, which was regarded as doubly defective.” See also ibid., 45, 222–225. For some additional references to such a position, see Harrison 1987: 87, n. 1. See also Ray 1994: 22, 425, n. 18, where Lamotte is referred to as the proponent of a similar position.

89 See Vetter 1994: 1241, where the following thesis has been proposed: “The first [part of the essay] tries to show that lay believers played an important role in what I consider the group of initiators of Mahāyāna Buddhism [sic], custodians and visitors of stūpas which were supposed to contain relics of the Buddha. One or more of them is likely to have conceived the idea to become like the Buddha and to imitate, for that purpose, heroic acts of his former lives, as they were told and depicted at such a site.” For detailed arguments, see the same article.

90 Gombrich 1998. For the assessment of Hirakawa’s theory, see also Sasaki 1997.

93 Harrison 1987.

96 Aṣṭasāhasrikā (p. 12.4): mahāyānam iti subhūte aprameyatāya etad adhibhacanaṃ |; Tibetan translation (T, fol. 18a6; D, fol. 13b1): rab ’byor theg pa chen po zhes bya ba ’di ni gzhal du med pa’i tshig bla dags so ||.

97 Lankāvatārasūtra 6.5 (p. 229.6–7) and 10.638 (p. 344.5–6):

\[\text{pāṇcādharmāḥ svabhāvaś ca vijñānāy asa eva ca |}
\[\text{dve nairātmye bhavet kṛṣṇo mahāyānaparīgrahāḥ ||.}\]

See also Suzuki 1930: 33. For an English translation, see id. 1932: 198.
entire (doctrinal content of the) Mahāyāna is included in (the doctrine of) (a) the five dharmas (or vastus),\(^9\) namely, designation (nāma), characteristics (nimitta), concepts (vikalpa/samkalpa), correct insight (samyagjñāna), and true reality (tathātā); (b) the (three) Natures (svabhāva), namely, the imagined (parikalpitavabhāva), dependent (paratantrasvabhāva), and perfected natures (parinispannasvabhāva); (c) the eight conceptual-perceptual apparatuses (vijñāna), namely, five sense-perceptions, mental perception-or-conception, defiled mind (kliṣṭamanas), and fundamental mind (ālayavijñāna),\(^9\) and (d) two kinds of non-self (nairātmya), namely, nonexistence of a substantial self or of person (pudgalanairātmya) and non-substantiality or non-essentiality of the phenomena (dharmanairātmya). The Aṇgulimālīyāsūtra states that the ‘Middle Way’ (madhyamā pratipat) is an epithet (adhivacana) for Mahāyāna.\(^10\) and according to the Śrīmālāśīmhanādāsūtra, saddharma itself is a similar epithet.\(^10\) Sāgaramegha regards both the path and goal of a bodhisattva as definitive of Mahāyāna.\(^10\) For Nāgārjuna, Mahāyāna consists of the six perfections (pāramitā) and two types of accumulation (sambhāra).\(^10\) For Candrakīrti, the various kinds of emptiness (śūnyatā) distinguish what is called Mahāyāna.\(^10\) Further, a commentary on the Bhadracaryāprāṇidhāna, attributed to Dignāga, states:\(^10\)

It is called the ‘Great Way’ because it is the way of the great bodhisattvas. To be precise, the two accumulations (sambhāra) of beneficial resources (punya) and gnosis (jñāna), which are the means of attaining the awakening of a buddha (buddhabodhi) are called yānas, and [because] they are furnished with the perfections (pāramitā), they are called Mahāyāna.

Ratnākaraśānti for his part explains the term Mahāyāna thus:\(^10\)

---

\(^9\) For a recent study of the early Yogācāra theory of five vastus, see KRAMER 2005.

\(^10\) For a monumental study of the concept of ālayavijñāna, see SCHMITHAUSEN 1987.
In the word Mahāyāna, the term yāna refers to a vehicle (or means of transport) (bzhon pa), since [what it denotes] carries [one] to another [place]; the word mahā [refers to] that which is endowed with the great dharmaṃs. What are the great dharmas? Ārya Nāgārjuna has taught that [the perfections of] giving (dāna), ethical-moral discipline (siła), patience (ksanti), diligence (vīrya), meditative concentration (dhyāna), discriminative insight (prajñā), and compassion (karuṇā) are [collectively] called Mahāyāna. Ārya Asanga has, however, in this [regard], taught that Mahāyāna is that which is endowed with seven kinds of [greatness]: [1] the greatness of the Dharma (dharmaṁmahatva), on account of its vastness (mahāvaiṣṇuta), [2] the greatness of cittaotpāda (cittaotpādamahatva), [3] the greatness of trust (adhimuktimahatva) in the great doctrine, [4] the greatness of altruistic inclination (adhyāsavyamahatva), [5] the greatness of accomplishment (sambhārāmahatva), [6] the greatness of [the extent of] time (kālāmahatva), and [7] the greatness of arrival or attainment (samudāgamamahatva).

Furthermore, in the Sāgaramatipariprcchasūtra, Mahāyāna is described as a yāna that plies against the current of the everyday world.

This Mahāyāna is a yāna that is opposed to the entire world. How so? The sentient beings of the world follow the current. I, however, claim to attempt [to be moving] against the current.

For Sthiramati (ca. 510–570), non-conceptual gnosis (nirvikalpajñāna) is at the core of Mahāyāna. Kamalaśīla, citing the Gayaśūrasūtra in his Third Bhāvanākrama, explains that prajñā and upāya constitute Mahāyāna, and that according to the Tathāgataguhyasūtra the entire path of a bodhisattva can be subsumed under prajñā and upāya. Thus, if bodhicitta is

108 Ratnakaraśānti is clearly referring to Ratnāvalī 4.81.

109 Ratnakaraśānti is evidently alluding to Bodhisattvabhūmi 1.18 (Bodhisattvagunapātala), where the seven greatesses (mahattva) are explained (WOGIHARA, pp. 297.7–298.2; DUTT, pp. 201.20–202.9).

110 See BHSD, s.vv. samudāgama and samudāgamana.

111 Sāgaramatipariprcchasūtra (T, fol. 20a6–7; D, fol. 14a7): 'di lta ste | theg pa chen po 'di ni 'jig rten thams cad dang mi mithun ['thun D] pa'i theg pa'o | de ci phyir zhe na | senses can de dag ni rgyun gyi rjes su 'gro ba dag go || bdag ni rgyun las iddog par rtsol bar [bas T] 'dod pa'o |. This passage is cited in the Śiksāsamuccaya (according to the Tibetan translation) but the corresponding Sanskrit text is missing. For the Tibetan text and an English translation of the passage, see the Śiksāsamuccaya (BENDALL, p. 185–186, n. 2). Cf. the Dharmasamgrhītā (T, fol. 313a6–7; D, fol. 83b6–7): byang chub sms dpa' ni yang dag pa so sor rtag pas | sangs rgyas kyi byang chub khong du chud do || bcom ldan 'das de bas na byang chub sms dpa' [dpa' T] rgyun las bsdog st | 'jug par par bgyi [bgyi'o T] rgyun gyi rjes su [add. mi T] 'jug par mi bgyi'o |.

112 The idea of the Buddha's or Buddhist attitude of moving against (and along with) the current of the world found in Mahāyāna and non-Mahāyāna literature is an interesting theme that would require further studies, and would be particularly relevant to the Madhyamaka system in which one finds both situations of compliance and noncompliance with the worldly norms.

understood as a synthesis of \textit{prajñā} and \textit{upāya}, it would follow that the entire content of Mahāyāna is merely \textit{bodhicitta}. (In the \textit{Guhyasiddhi}, the ultimate sameness of phenomena is similarly called Vajrayāna.\footnote{Third \textit{Bhāvanākrama} (p. 14.16–19): \textit{etavād eva ca samkṣiptam mahāyānam ād uta prajñopāyaś ca | yatvoktam āryagayasīrte | \textit{dvāv imau bodhisatvānām samsāt pāragāvārī samātātāḥ | katamau dvau | yad uta prajñā \textit{copāyaś ca | » āryatathāgata-guhyaśīrte coktām | »imau ca prajñopāya bodhisatvānān sarvapāramītāsāṃgrahāya samvarīte} iti.})

(iii) Is Mahāyāna Indispensable? Is Vajrayāna Indispensable?

There is the tendency to hold one’s own ‘vehicle’ to be indispensable, not only for the attainment of Buddhahood but also for release from \textit{samsāra}. For example, the \textit{Mahāyānāvimśiṭkā} attributed to Nāgārjuna maintains:\footnote{\textit{Guhyasiddhi} 2.11 (p. 13.3–4): \textit{atyantaguptam udghatya vajrayānāṃ anuttaram | sarvadharmasamaikatvaṃ yat tvayā bhāṣitam prabhoh.}}

\begin{quote}
In the ocean of \textit{samsāra}
- Filled with the water of conceptual thought,
- Who will cross over to the [other] shore
- Without embarking on [the ship] of Mahāyāna!
\end{quote}

Similarly, Indrabhūti’s \textit{Jñānasiddhi} states:\footnote{\textit{Mahāyānāvimśiṭkā}, verse no. 28 (TUCCI 1956: 203): \textit{kalpanājālapūrṇasya samsārasamahodadheḥ | anākramya mahāyānaṃ ko vā pāram tarṣayati}. Cf. the English translation in TUCCI 1956: 207.}

\begin{quote}
In the great ocean of \textit{samsāra}
- Filled with the water of conceptual thought,
- Who will arrive at the [further] shore
- [Without]\footnote{Note that the text has no negation.} embarking on [the ship of] Vajrayāna!
\end{quote}

It is clear that the latter is based on the former. Likewise, Candrakīrti has maintained what one might call ‘soteriological exclusivism,’ namely, that one who deviates from the path of Nāgārjuna has no other means of attaining cessation.\footnote{\textit{Madhyamakāvīvatāra} 6.79 (cited in the \textit{Subhāṣītasamgraha}, Part 1, p. 396.3–6): \textit{acārayanāgārjuna-pāramahāsūrya-dharmadānāḥ na śivābhikhyupāyāḥ | bhṛṣṭā hi te samvṛtaiṣayamārgāñ ca tadbhramśatā caś ca na mokṣasッドhīḥ.} The Sanskrit verse is cited also in MIMAĪK 1982: 164, n. 451.} In the \textit{Lokātāstava} attributed to one Nāgārjuna, however, the argument seems to be that release from \textit{samsāra} cannot be attained unless one resorts to signlessness (virtually a synonym of śūnyatā), as has been greatly emphasised in the Mahāyāna.\footnote{\textit{Lokātāstava}, verse no. 27: \textit{animittaṃ anāgamyam mokṣo nāsti tvam uktavān | atas tvayā mahāyāne tat sākalyena deśitaṃ}. For an English translation, see LINDTNER 1997: 11.}

The statement that the Mahāyāna or Vajrayāna is indispensable—not only for the attainment of Buddhahood but also for mere release from \textit{samsāra}—if taken at face value can

\begin{quote}
\textit{Chapter Five: Mahāyāna, Bodhisattva, and Bodhicitta 125}
\end{quote}
cause insurmountable problems historically as well as doctrinally. One of the solutions would be to understand Mahāyāna and Vajrayāna (like bodhicitta itself) in their ontological and gnoseological senses and to interpret them retrospectively, in the way the indispensability of bodhicitta has been interpreted by Māñjuśrimitra. Under such an interpretation, Mahāyāna or Vajrayāna is understood in the sense of true reality (i.e. ontological) or of insight into it (i.e. gnoseological), and a minimum mandatory dosage of Mahāyāna or Vajrayāna is presupposed for all Buddhist saints. Analogously to Māñjuśrimitra’s interpretation of bodhicitta, one might propose that a śrāvaka saint partakes of Mahāyāna or Vajrayāna to a small degree; a pratyaekabuddha, to an intermediate degree; and a bodhisattva saint, to a greater degree still. This is, however, a purely retrospective interpretation prompted by one current of tantric and non-tantric Mahāyāna, and historically inaccurate.

3. The Concepts of Sattva and Bodhisattva

The notion of sattva in general and bodhisattva in particular is of relevance to the study of bodhicitta. Schmithausen has remarked that the Buddhist position on environmental ethics could be described as ‘sentient-centric’ and not as anthropocentric. We can extend this sentiment and describe Buddhism in general as a ‘sentient-centric’ religion, for its target is not limited to human beings but is in fact all sentient beings (including animals). The significance of ‘sentient-centricism’ becomes more conspicuous in Mahāyāna Buddhism. A bodhisattva is in the first place a sattva, and if there were no other sattvas (i.e. if he were the only sattva), the concept of bodhisattva would serve no purpose. Furthermore, a bodhisattva who disregarded the needs of another sattva would run the risk of breaking his bodhisattva vows (and of severing bodhicitta, which is the tendon that binds a bodhisattva and another sattva). In the following few sections, we shall consider the terms sattva, bodhisattva, and vajrasattva, and their link with the concept of bodhicitta.

According to the Buddhist view, the world comprises the ‘container world’ (bhājanaloka) and its content, that is, the ‘world of sentient beings’ (sattvaloka), which includes not only human beings but also other sentient beings, such as animals. Any being capable of feelings, such as pain, is a sattva. Several virtual synonyms of sattva are used in Buddhist literature, such as prāṇa (or prānīṇa), jīva, and bhūta. However, the line of demarcation between sentience and non-sentience in earliest Buddhism was not very clear-cut. Schmithausen has shown that plants were originally regarded in Buddhism as a borderline case, but practical considerations gradually led to ignoring the sentience of plants and finally to denying it.

122 See the discussion in chapter seven.
124 See, for example, Nag-tsho Lo-tsā-ba, bsTod pa rgyad bcu pa 045 (EIMER 2003: 33):
   khyod ni pha rol phyin pa' i sgor zhugs nas ||
   lhag pa' i bsam pa rnam par dag pa yi ||
   byang chub sms kyi' gro rnam gi giong ba'i ||
   blo ldan snying rje can la phyag 'tshal lo ||.
125 I have not been able to locate the Sanskrit term for the Tibetan expression ‘world of content’ (bcud kyi' jig rten). Could it simply be an alternative translation for sattvaloka (sems can gyi' jig rten)?
126 Schmithausen in BSTEH 2000: 364.
127 SCHMITHAUSEN 1991: 1–2, n. 7.
128 SCHMITHAUSEN 1991: 69, n. 106. Schmithausen has thoroughly discussed in this monograph the problem of the sentience of plants in early forms of Buddhism.
Human beings are one among a broad spectrum of sentient beings; a bodhisattva is one among a broad spectrum of sattvas. In this context, we may refer to Schmithausen’s statement that in Buddhism one may speak of not only ‘human dignity’ (Menschenwürde) but also of the ‘dignity of all forms of life’ (Lebewesenwürde). If I may again employ the axiological terminology, a distinction between the various sentient beings cannot be made in terms of their intrinsic value, particularly not if the tathāgatagarbha theory is presupposed. Nonetheless, one could perhaps say that in Buddhism there is a difference in the instrumental value of various sentient beings. Human beings, owing to their possibility and the ability to make the soteriological breakthrough, are conceived of as possessing special value among sentient beings, and in this regard human existence is even more valuable than the state of a celestial being.

(a) No Bodhisattvas without Sattvas

In Mahāyāna, the entire concept of bodhicitta and bodhisattva would collapse or make no sense without sattvas, for a bodhisattva is, in the first place, a sattva whose citta is directed towards attaining the highest state of bodhi for the sake of other sattvas. Not only is the bodhicitta of a bodhisattva dependent on sentient beings, but also his practices of the perfections (pāramitā) are in one way or another connected with them. A bodhisattva becomes a buddha by relying on sentient beings. For Śāntideva, it is impossible for a bodhisattva to possess bodhicitta and yet be unhappy at the well-being of other sentient beings.

For him, both tantric and non-tantric Mahāyāna presuppose that great bodhi is attained with the help of sentient beings and the Three Jewels. Thus a bodhisattva, depending on how he interacts with sentient beings, can either flourish or perish.

According to some Yogācāra sources, a bodhisattva respects all sentient beings the way he respects himself (in the sense of the Golden Rule) and assumes the view of a great self (mahātmadṛṣṭi), for he experiences (on the first bhūmi) the sameness or omnipresence of true reality (dharma-dhātu), or non-substantiality (nairātmya), in all sentient beings. This experience of the omnipresent true reality, which is the self (ātman) shared by him and other sentient beings, imparts to the bodhisattva a new dimension of self and tears down the barriers

sa kim nectchati sattvānām yas tešām bodhim icchati
bodhicittāt kutas tasya yo 'nyasampadi kupyatī|

For an English translation, see CROSBY & SKILTON 1995: 57.

135 Theg chen tshul 'jug (A, fol. 76a6–77a1; B, pp. 499.19–500.10).
136 mDo rgyas (A, fol. 151a3–5; B, p. 246.17–21): gzhan yang sens can rnams la brten te skyes pa 'i dge bā dang mi dge ba'ang de bzhin du gsungs te 'ji skad du | sens can la brten nas byang chub thob par 'gyur zhiṅ | sens can la brten nas lhung ba 'byung bar 'gyur bas | de bzhin gshegs pa dang 'dra bar sens can yongs su gzung bar bya'o || zhes gsungs pa lla bu'o ||. See also the Māyājñātantra (T, fol. 71a6–7; D, fol. 134a2): sens can rnams la brten te byang chub thob par 'gyur bas sens can la bṣu bar mi bya'o || zhes shes par byas nas de bzhin gshegs pa'i lam de nyid la sens can de dag sbyar bar bya'o ||.
137 Theg chen tshul 'jug (A, fol. 76a6–77a1; B, pp. 499.19–500.10).
of the old self, never to be confronted thereafter. Also, for the Tathāgatagarbha tradition, all sentient beings (including animals) should be respected like a tathāgata, for they already bear a tathāgata within them (like an embryo in a hidden form or as a potential).\(^{135}\)

The idea of tathāgatagarbha is also used as an argument in Vajrayāna ethics. For example, the Dam tshig gsal bkra ascribed to Viḷāsavarāja, in explaining one of the five primary tantric commitments (samaya) of the *Guhyagarbhatantra tradition, speaks of four kinds of kindred (mched) towards whom one should be benevolent: (1) general kindred (spyi'i mched), (2) distant kindred (ring ba'i mched), (3) close kindred (nye ba'i mched), and (4) intimate kindred (nang 'dres pa'i mched). First, all sentient beings are general kindred of the Vajrayāna practitioner, for they are bound by one tathāgatagarbha and are potential future buddhas. Second, all Buddhists are his or her distant kindred. Third, all (Buddhists) who share the same view and conduct are his or her close kindred. Fourth, all those with whom he or she has received tantric empowerment are his or her intimate kindred.\(^{136}\)

(b) Faith-oriented and Reason-oriented Sentient Beings

Buddhism in general recognises the diversity of *sattvas*. This is even true in the case of traditions which maintain that all *sattvas* possess the same spiritual disposition, namely, the *tathāgata*gotra, for they accept that different vehicles are necessary (at least temporarily) for *sattvas* with different predispositions and that insisting on one model for everyone makes little sense. Broadly speaking, both Mahāyāna and non-Mahāyāna sources seem to recognise two types of *sattvas*, namely, *śraddhānusārin* (i.e. faith-oriented) and *dharmānusārin* (i.e. reason-oriented),\(^{137}\) and correspondingly two different salvific approaches—that is, one that emphasises the component of *śraddhā* and another that emphasises that of *prajñā*—until a person can combine or possess both. It is also accepted that, in principle, both śraddhā-generated *prajñā* and prajñā-generated śraddhā are possible. Such a stance may serve to revise the perception of Buddhism as being either purely rational or purely devotional.

The varying degrees of emphasis laid on the *prajñā*-oriented and śraddhā-oriented soteriological approaches and the insistence upon only one of the two (from an unwillingness of opposing factions to concede that the authoritative sources upon which they rely contain alternative approaches) seem to have been partly responsible for several of the intra-Buddhist

\(^{135}\) SCHMITHAUSEN 2000b: 449–450.

\(^{136}\) See, for example, Jñānagarbha's Anantamukhanirādhrāraṇītikā (p. 173.1–2): *gdul ba ni nram pa gnyis te* | *chos kyi rjes su 'brang ba dang | dad pas rjes su 'brang ba'o* |. See also TSD, s.vv. *dad pas rjes su 'brang ba* and *chos kyi rjes su 'brang ba*. Sanskrit sources for the corresponding terms *rigs pa'i rjes 'brang* (*nyöyānusārin*) and *lung gi rjes 'brang* (*āgamānusārin*) used in Tibetan (e.g. Tshig mdzod chen mo, s.v.) have yet to be traced. See also PED and CPD, s.v. anusārīn.
doctrinal disputes. One representative instance in the context of bodhicitta: Is bodhicitta an outcome of the realisation of emptiness (sūnyatā) or is it a cause of such a realisation? In other words, should one first generate bodhicitta or should one first seek the correct cognition of emptiness (sūnyatā)? Not everyone, however, categorically insisted upon one approach and ruled out any other option. For example, Śāntarakṣita, who apparently did not consider himself a śraddhānúsārin, recognised two alternative approaches in his Madhyamakālamkāra-vṛtti, one for reason-oriented sattvas and the other for faith-oriented ones. According to him, a reason-oriented sattva should first seek the correct knowledge of true reality (albeit theoretical), then generate compassion towards those who are submerged in wrong views (thereby generating bodhicitta) and engage in the ascetic practice of a sage (munivrata) adorned with both prajñā and karunā. A faith-oriented sattva, on the other hand, should first generate bodhicitta and then seek the correct view.

(c) The Term Bodhisattva

As we have already seen, the term bodhisattva is central to Mahāyāna. In the Brahmaviśeṣacintiparipṛchāśūra we can find several reasons listed why a bodhisattva is called bodhisattva. One of the explanations is as follows:

138 The dispute over which of the two methods of meditation—analytical meditation (dpyad sgom) or non-analytical meditation characterised by keeping (one’s mind in the state of tranquillity and non-conceptuality) ('jog sgom)—is, in my view, a typical example.

139 This issue has been thematised in the report of the bSam-yas debate between the Simultaneists (cig char ba) and Gradualists (rim gyis pa). The former maintained that the method of religious practice that included taking refuge and generating bodhicitta in an ordinary way (rang rgyud du) is the approach by ascent (mas 'dzeg), contrasted with the approach by descent (mas babs), according to which great compassion (i.e. apparently bodhicitta) arises naturally (rang shugs su) once view (lta ba) is realised, so that one abides in a state of the union of emptiness and compassion (stong nyid snying rje chen pa can du gnas). See the Nyang ral chas 'byung (pp. 401.17-402.6).

140 See his Tattvasamgraha (cited in TSD, s.v. dad pa'i rjes su 'brang ba min): vayam aśraddhānās tu ye yuktī prārthayāmahe ||.

141 Madhyamakālamkāra-vṛtti (P, fols. 83b8–84a3; D, fol. 83a4–6; S, vol. 62, p. 973.7–14):

142 The bodhisattva ideal, it is maintained, is found also in Jainism. See NAKAMURA 1980: 154: "The ideal of the Bodhisattva is noticed among the Jains also, parallel to that of Buddhism. But in later days this became peculiarly Buddhistic." I shall leave it up to specialists in Jaina studies to assess the textual evidence for this statement. Cf. DAYAL 1932: 7, where it is stated that some scholars have tried to associate the term bodhisattva with the term buddhisattva, used in the system of the non-Buddhist Yogāśūra, but such a connection is
Bodhi stated: “O Venerable One, it is as follows: If a man or a woman does not digress from the ‘eight-limb sabbath’ (asāṅga-poṣadha) [vow] and abides by [it], [he or she] will be regarded as one who has assumed the eight-limb sabbath [vow]. O Venerable One, likewise a bodhisattva does not deviate from his bodhicitta, beginning from the generation of the initial resolve until the [arrival at the] seat of awakening (bodhimanda). He is for this reason called a bodhisattva.”

The term bodhisattva has been discussed by sundry scholars. Dayal presented seven interpretations of the term bodhisattva in the Buddhist context. I summarise them here, leaving the two components bodhi and sattva untranslated:

<table>
<thead>
<tr>
<th>sattva</th>
<th>Bodhisattva</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. ‘essence’</td>
<td>‘one who has bodhi as his sattva’</td>
</tr>
<tr>
<td>2. ‘sentient being’</td>
<td>‘a sattva who is seeking bodhi’</td>
</tr>
<tr>
<td>3. ‘resolve’ (citta or abhipraya)</td>
<td>‘one whose sattva is fixed on bodhi’</td>
</tr>
<tr>
<td>4. ‘emboyo’</td>
<td>‘one in whom bodhi is latent as a sattva’</td>
</tr>
<tr>
<td>5. ‘intelligence’ (buddhi)</td>
<td>‘one who possesses the sattva of bodhi’</td>
</tr>
<tr>
<td>6. ‘attached’ (sakta)</td>
<td>‘one who is sakta (&lt; sattva) to bodhi’</td>
</tr>
<tr>
<td>7. ‘energy’ or ‘courage’</td>
<td>‘one whose sattva is directed towards bodhi’</td>
</tr>
</tbody>
</table>

Of the seven, Dayal accepts only two (nos. 2 and 6). Kajiyama has reassessed Dayal’s discussion of these seven interpretations and thereby enhanced our understanding of the term bodhisattva. He agrees with Dayal that interpretations 1, 4, 5, and 7 (except the Tibetan interpretation discussed within no. 7) do not yield a simple and natural sense. However, he disagrees with him on several points: (a) He regards Dayal’s rejection and ridiculing of Ghosa’s interpretation of bodhisattva as ‘one who has sattva and bodhi as his object of appropriation (ālambana),’ which is alluded to under interpretation no. 2, as unjustified. (b) Dayal’s rejection of interpretation no. 3 is also considered by him to be unjustified. (c) He disagrees with Dayal’s inclusion of the Tibetan interpretation of the term bodhisattva under interpretation no. 7 and suggests that it should be subsumed under no. 3.

I find the following note by Schmithausen particularly useful for an understanding of the term bodhisattva, and translate it here into English:

apparently unfounded. Historically, it is important to note, as already stated, that there is no trace of Mahāyāna in Asoka’s inscriptions, the term bodhisattva not occurring even once in them. See ROTH 1982: 374; VETTER 1994: 1243, n. 3.

143 Bhramavīśesacintipariprcchāsūtra (T, fol. 216b5–220b4; D, fol. 66a2–68b4).

144 Bhramavīśesacintipariprcchāsūtra (T, fol. 217a4–7; D, fol. 66α-67): byang chub kyi gsol pa | bcom ldan ’das ’di lta ste | skyes pa ’am [pa ’am T] | bud med ji lla bur bs tan pa ’i yan lag brgyad dang ldan pa i gso sbyin [= sbyong] la ma ral ma zhig par nye bar gnas na de yan lag brgyad kyi gso sbyin [= sbyong] yang dag par blangs pa zhes bygi ba’i grangs su mchi’o ’i | bcom ldan ’das de bzihin du byang chub sems dpa’ sems dang po bskyed pa nas bzang ste | byang chub kyi snying po’i bar du byang chub kyi sems las ma g.yos pa lags te | de ni de’i sld du byang chub sems dpa’ zhes bygi’o [l].

145 See PED, CPD, NYANATILOKA 1989, s.v. uposatha; BHSD, s.v. poṣadha.

146 The term bodhisattva has been discussed in great detail in KAJIYAMA 1982; cf. DAYAL 1932: 4-9. For the terms bodhisattva and mahāsattva, see also ZIMMERMANN 2002a: 94–96, n. 10. One fact to be noted is that the term bodhisattva is older than mahāsattva.

147 DAYAL 1932: 4–9. The seven points have been summarised in KAJIYAMA 1982: 253–254.

148 Bodhicaryāvatārapāḍīkā (p. 200.29); JOshi 1971: 70.

The term *bodhisattva* is often rendered as ‘enlightenment being.’ However, in the first place, *bodhi* has metaphoric overtones not of light but of awakening. Secondly, one would naturally associate the expression ‘awakening being’ with a being characterised by awakening, that is, the Buddha himself after his awakening. According to autochthonous explanations, [the term] *bodhisattva* is understood as ‘one whose energy, or heroic attitude, is directed towards awakening’ (cf. also Tib. *byang chub sems dpa’*),\(^{153}\) which is fine as far as content is concerned, but has the disadvantage that *sattva* (or Middle Indic *satta*) does not seem to be attested in this meaning in the old canon (where the term *bodhisattva* already occurs). What is plausible, in my view, is the assumption of an ahistorical Sanskritisation of Middle Indic *bodhisatta* < *bodhisakta* ‘clinging to awakening’ in the sense of ‘striving for awakening,’ traces of which can indeed still be found in the exegetical tradition. That this meaning was given up early on can be explained easily by the fact that *sakta* underwent a negative development in meaning, and later on only meant ‘clinging to’ in a spiritually negative sense.

The compound *bodhisattva*, which was very likely Sanskritised ahistorically from the Middle Indic *bodhisatta*, is open to more than one interpretation.\(^{152}\) Modern scholars have taken note of the Tibetan translation of the term according to the common understanding of it, such as the one recorded in the *sGra sbyor* *bam po gnyis pa*.\(^{153}\) The works of Rong-zom-pa, however, reveal that several other ways of construing the compound *bodhisattva* have also been explored. Explaining the term Bodhisattvayāna in his *dKon mchog ‘gre’,* Rong-zom-pa states:\(^{154}\)

---

150 Schmithausen has often rendered *bodhisattva* into German as *nach dem Erwachen Strebende*. He states: “[Der Begriff *Bodhisattva* wird] oft als ‘Erleuchtungswesen’ wiedergegeben. Aber zum einen schließt *bodhi* keine Lichtmetaphorik ein, sondern die des Erwachens, zum anderen würde man den Ausdruck ‘Erleuchtens-Wesen’ doch natürlicherweise auf ein durch Erwachen charakterisiertes Wesen beziehen, also auf den Buddha selbst nach seinem Erwachen. Einheimische Erklärungen verstehen *bodhisattva* als ‘den, dessen Energie, oder heroische Gesinnung, auf das Erwachen gerichtet ist’ (vgl. auch Tib. *byang chub sems dpa’*), was inhaltlich treffend ist, aber den Nachteil hat, daß *sattva* (bzw. mittelindisch *satta*) in dieser Bedeutung im alten Kanon (wo der Begriff *bodhisattva* bereits vorkommt) nicht belegt zu sein scheint. Näherliegend ist m.E. die Annahme einer unhistorischen Sanskritisierung von mittelindisch *bodhisatta* < *bodhi-sakta* ‘am Erwachen hängend’ im Sinne von ‘nach dem Erwachen strebend’, wovon sich in der Tat in den Auslegungstraditionen noch deutliche Spuren finden. Daß diese Deutung schon früh aufgegeben wurde, läßt sich leicht mit der Tatsache erklären, daß *sakta* eine negative Bedeutungsentwicklung durchlaufen hat und später nur noch ‘haftend an’, in spirituel stets negativem Sinne, bedeutet’ (SCHMITHAUSEN 2002: 13, n. 40).

151 Cf. *Vimalakirtinirdesastūra* 4.§14 (p. 511–2): yathā pratyarthikanirghātāt chūrā ity ucyante, evam eva jāvaẏādhihariṇaṇaḍhupāsanaṇād bodhisattvā ity ucyante |

152 See also the explanation of *bodhisattva* and *mahāsattva* in the *Aṣṭasāhasrikā* (pp. 9.22–10.22); Tibetan translation (T, fols. 14a–15b7; D, fols. 10b2–11b4).

153 *sGra sbyor* *bam po gnyis pa* (no. 65): *bodhisattva* *zhes bya ba bodhā bodhā savatavat yeṣām te bodhisattva* *zhes bya ba ste | bodhi ni byang chub | satta ni sems dpa’* | ’ba’am snying stobs che ba la bya | bla na med pa’i byang chub sgrub pa la gcig tu brtal zhing mi nur bas na byang chub sems dpa’ | . See also the *Samdhinirmanasūtravyākhyāna* (P, fol. 34b2–3; D, fol. 28b6–7; S, vol. 115, p. 1076.12–16): *byang chub sems dpa’ zhes bya ba’i [ba ni PN] tshig gi don ni bla na med pa’i byang chub dang sems can thams cad la dmigs te sems bkshed pa o | yang gcig [cig PN] tu na byang chub ces bya ba ni riogs pa dang ldan pa yin la | sems dpa’ zhes bya ba ni snying stobs dang ldan pa la bya’o | |.

Why is bodhisattva called [so]? [Of the two components of] the term bodhisattva, bodhi is [semantically identical with] avabodhi,155 which means [cognitive] penetration and realisation. Bodhi also refers to the purification and cleansing of all imperfections, and hence [the Tibetan term] byang chub (lit. ‘purification and [cognitive] penetration’) [was coined].156 The [term] sattva is applied in six senses: (1) ‘vital energy’ or ‘vhelement,’ (2) ‘courage’ and ‘firmness,’ (3) ‘resolution,’ (4) ‘consciousness,’ (5) ‘sentient being,’ and (6) ‘essence.’157 Whence, in this [system], [someone] is called a bodhisattva on account of his having a steadfast and unyielding158 resolve to [attain] bodhi, and his fixing on bodhi and sattva as his objects. According to the [system of] Prajñāpāramitā, however, [someone] is called bodhisattva because [he] is a sattva characterised by bodhi.159

A similar explanation can also be found in his commentary to the I'Ta phreng.160

Within the word byang chub sems dpa’, the [first two syllables] byang chub, [used to translate the Sanskrit word] bodhi, mean the ‘purification and exhaustion of all defilements’ and ‘correct realisation and [cognitive] penetration,’ [respectively]. This is the reason why the term byang chub is applied. As for the word sems dpa’, it is derived from [the Sanskrit] word sattva, which signifies [1] ‘desire,’ [2] ‘courage,’ [3] ‘stable and unwavering resolve,’ [4] ‘sentient being,’ [5] ‘consciousness,’ and [6] ‘compendium.’ Here, it is called so because of one’s desire [to attain] awakening, or the stability of [one’s] resolve [to attain] awakening, or one’s possessing [the resolve that] is directed towards awakening and sentient beings, as stated in the following [verse]:161

Awakening, the characteristic [of which is similar to that] of space,
Is free from all [dualistic] concepts;
One who desires to realise this
Is called a bodhisattva.

The Prajñāpāramitā [texts], however, explain that ‘it is because sentient beings are awakened that they are called bodhisattvas.’ This would imply a realisation that sentient beings are of an awakened [nature]. Furthermore, in the phrase ‘a sentient being [resolved to attain] awakening,’

---

155 Mahāvyutpatti, no. 2885; BHSD, s.v. samyagavabodhi. However, note that only avabodha is recorded in Pāli and classical Sanskrit.

156 To render the Sanskrit bodhi, Tibetans have coined the technical term byang chub, which actually contains two components, namely, byang and chub (JASCHKE 1881, s.vv. ‘byang ba and chub pa’).

157 Cf. PW, s.v., where nine meanings of sattva are given (cf. also MW, s.v. sattva).

158 Cf. JASCHKE 1881, s.v. nur ba.

161 This verse is from the Vairocanaḥbhisambodhitānta (T, fol. 153b6–7; D, fol. 251a2). Compare the English translation of the verse in HODGE 2003: 378.
a sentient being is a ‘living creature’ (prāṇin), and a living creature who possesses bodhicitta is called a bodhisattva. Bodhicitta, in short, is the union of insight (prajñā) and compassion (karuṇā).

Jñānagarbha states that one who is endowed with prajñā and upāya is a bodhisattva. It has been pointed out that bodhicitta is sometimes used as an equivalent of bodhisattva. In such a case bodhisattva should perhaps be understood as ‘one whose citta is [directed towards] bodhi.’ To sum up, the term bodhisattva may be explained in the following ways: (1) one who is attached (sakta) to awakening (bodhi), (2) one whose energy (sattva) is directed towards awakening, (3) one who has sentient beings (sattva) and awakening as objects of concern, (4) a sentient being (sattva) who possesses [the resolve to strive for] awakening, and (5) a sentient being (sattva) who is characterised by awakening. The meaning of bodhi obviously affects the way the compound bodhisattva is understood. For example, it would be impossible to explain the compound bodhisattva according to no. 5 if we only allow the conservative Buddhist notion of bodhi, but it would not be if bodhi is understood in a metaphysical or ontological sense. Following Schmithausen, we can assume that meaning no. 1 is the original one and hence also the oldest. Nos. 2–4 may be grouped together as belonging to the non-tantric Mahāyāna in general. And no. 5 is perhaps exclusive to selected Mahāyāna traditions, both tantric and non-tantric.

(d) Synonyms of Bodhisattva

Fifteen synonyms (or more accurately perhaps: metonyms) of bodhisattva are given in Bodhisattvabhūmi 1.18 and Mahāyānasūtrālāṃkāra 19.73–74: (1) bodhisattva (byang chub sems dpa’), (2) mahāsattva (sems dpa’ chen po), (3) dhīma(n)t (blo gros ldan pa), (4) uttamadyuti (gsal ba’i mchog), (5) jinaputra (rgyal ba’i sras), (6) jinādhāra (rgyal ba’i gzhis), (7) vijetr (rgyal bar byed pa’ rim par rgyal bar byed pa), (8) jināṅkura (rgyal ba’i myu gu), (9) vikrānta (rtsal ba dang ldan pa), (10) paramārya (‘phags pa’i)

162 A similar explanation can be found, for example, in the Bodhisattvapiṭakasūtra (T, fol. 43a5; D, fol. 283b2): shā ri’i bu byang chub sems dpa’ bsam [bsams T] pa dang | byang chub kyi sems de lta bu dang ldan pa ni byang chub sems dpa’ zhes bya’o [].

163 Anantamukhanirādharmāsāṣṭāni (p. 117.22–25): shes rab dang thabs dang ldan pa ni byang chub sems dpa’ zhes bya ba ste | sgra ‘di gnyis ni shes rab dang thabs la bya bar don yod zhaps pa’i mdo las ‘byung ba’i phyir ro [].

165 Bodhisattvabhūmi 1.18 (WOGHIARA, p. 299.17–20; DUTT, p. 203.10–12). It is interesting to note that the Tibetan lo tsā bas translated the pertinent prose passage in the Bodhisattvabhūmi into verses almost identical with the translation of the corresponding verses in the Mahāyānasūtrālāṃkāra.

166 Mahāyānasūtrālāṃkārabhāṣya (p. 174.2): bodhisattvasamānyanāmabhiṣagge asṭau ślokāḥ [ ]; ibid. (174.7): etāni goṣṭha sarvabodhisattvānām anvarthanāmāni sāmānyena [ ]; see also the Ratnālokālāṃkāra (P, fol. 261a3–5; D, fol. 222a2–3; S, vol. 64, p. 631.8–13). See also Mahāvyutpatti, nos. 625–643.

167 For the usage of the word mahāsattva in the Asṭāsāhasrikā, see VETTER 2001: 69.

168 See TSD, s.vv. blo gros ldan pa and ldan, where several Sanskrit equivalents (such as buddhimān, dhīman, prajñā, matimā, buddha, and dhīra) are given.

169 Cf. Madhyamakāchārya 1.24:

triratnavanamasthitaye sthāpayitvā gunākārān [ sapatprān devanāgādīcādāhatāsāsanān [ ]

For commentary on the verse, see the Tarkajñalā (P, fol. 50b5–7; D, fol. 47b1–3; S, vol. 58, p. 120.11–17); Ratnāvalīpaṇijikā (p. 13.12). See also Bodhicittavivarāṇa 103.
mchog), (11) sārthavāha (ded dpon), (12) mahāyāyasas (grags pa'i mchog), (13) kṛpālu (snying rje can), (14) mahāpunya (bsod nams che ba), (15) īśvara (dbang phyug), and (16) dhārmika (chos dang ldan pa). The Bodhisattvabhūmi states that these designations reflect the qualities of a bodhisattva, implying that they are not mere empty titles. There may be, of course, several other metonyms, such as bodhiputraka and bodhisattvayinika. Most of these terms are also found in one lexicon or another. According to Paul Harrison, some modern scholars have suggested a distinction between mahāsattva and bodhisattva, for which he sees no evidence, either in the Chinese translations of the eleven earliest Mahāyana sūtras or in later Mahāyāna sources, such as the Mahāyānasūtrālāṃkāra. Jñānagarbha, for example, seems to be referring to the cognitive (i.e. cognition of the great non-essentiality), emotive (i.e. great altruistic inclination), and conative (i.e. great resolution) elements of a bodhisattva in his three alternative explanations of mahāsattva.

(e) Types of Bodhisattvas

One necessary preamble to a discussion of bodhisattva and bodhicitta is distinguishing between the various types of bodhisattvas. The different kinds of bodhisattvas in Mahāyāna are analogous to the various kinds of bhiṅguṣas in the Vinaya tradition. It may be assumed that in the beginning there were not many kinds of bodhisattvas. However, these gradually burgeoned, reflecting the historical development of the concept, and in particular such things as gender, mode of life, degree of magnanimity, background, and spiritual maturity. Reginald A. Ray, in his Buddhist Saints in India, classified bodhisattvas into three types: those of forest, city, and monastery. We find numerous other ways of classifying bodhisattvas, some of which I shall discuss below.

170 Lévi’s edition reads paramāścarya, but according to the Bodhisattvabhūmi and the Tibetan translations of both the Bodhisattvabhūmi and Mahāyānasūtrālāṃkāra it should read paramārya.

171 Bodhisattvabhūmi 1.18 (WOGIHARA, p. 299.17–20; DUIT, p. 203.10–12).

172 See TSD, s.v. byang chub sras. The Hevajratantra is indicated as the source.

173 Ratnālokālāṃkāra (P, fol. 294b4; D, fol. 251a7; S, vol. 64, p. 705.6): rang bzhin gyi rigs dang ldan zhiṅg sems bskyed pas na theg pa chen po pa’o ||; see also HARRISON 1987: 73. It is also noted there that the word bodhisattva is almost always transliterated as pusa in the Chinese translations of early Mahāyāna sūtras, and occasionally translated as kaishi (‘the revealer’) or mingshi (‘the awakened one’).

174 For example, see the mNgon brjod thsig mdzod, s.vv. byang chub sems dpa’ and byang sems.

175 HARRISON 1987: 79.

176 Anantamukhanirśrāṅgīrāṅgī (pp. 117.25–118.4): stong pa nyid la gnas pa dang ldan pa ni sems dpa’ chen po zhes bya ba ste | chos thams cad kyi ngo bo nyid med pa chen po la sems pa’i phyir ro || yang na sems can gyi khams ma lus pa yongs su bskyab pa’i bsam pa dang ldan pa ste | bsam pa che ba’i phyir ro || yang na smon lam chen po dang ldan pa ste | sngon byang chub tu smon lam btab pa’i phyir te | de bas na de dag gi bsam pa che ba’i phyir sems dpa’ chen po smos so ||.

177 mChims chen (p. 378.19–21).

178 See, however, SKILLING 1996: 160–165, where the concept of three types of bodhisattas found in Theravāda sources is discussed.

(i) Historical, Celestial, and Earthly Bodhisattvas

From the point of view of the historical development of the concept of bodhisattva, the following three types may be distinguished: (1) the Bodhisattva who was the historical Buddha prior to his awakening (found also in the Pāli canon and presupposed by the Mahāyāna systems), (2) celestial bodhisattvas such as Maitreya, Avalokiteśvara, Vajrapāni, and Mañjuśrī, and (3) those sentient beings who aspire to become buddhas. These three types of bodhisattvas will be referred to here as 'historical,' 'celestial' and 'earthly' bodhisattvas, respectively. It is the latter that we are particularly concerned with in this study.

While it may be possible that the idea of celestial bodhisattvas came into existence under outside influence, I hold the idea of a bodhisattva endowed with bodhicitta to be uniquely Buddhist. We have seen that only two bodhisattvas are mentioned in the early Pāli sources: the bodhisattva who later became Gautama Buddha, and the bodhisattva who will become the future buddha Maitreya. However, the bodhisattva Maitreya is mentioned only once in the early Pāli canon. Elsewhere he is mentioned as the fifth buddha of this aeon. According to Mahāyāna, Maitreya is a celestial bodhisattva, like Mañjuśrī, but according to the non-Mahāyāna tradition, he belongs to the category of historical bodhisattvas, like Gautama Buddha prior to his awakening. It is conceivable that, for an earthly bodhisattva, a celestial figure may be a more attractive ideal or model than a historical one. This may perhaps explain why some celestial bodhisattvas, such as Avalokiteśvara, Vajrapāni, and Mañjuśrī, occasionally play a more important role than the historical Buddha himself.

The concept of historical bodhisattvas is undoubtedly older than that of celestial and earthly bodhisattvas. Nevertheless, as we can assume that the concepts of the various celestial bodhisattvas came into existence gradually over a fairly long period of time, some of them may be older than that of earthly bodhisattvas. Historical and celestial bodhisattvas are perhaps possible without the notion of bodhicitta, but the concept of earthly bodhisattvas is

---

180 According to the conservative tradition, the historical Buddha had been a bodhisattva not only in his previous lives but also in his last earthly life before he became a buddha, which implies that he was not born as a buddha. For additional sources on the bodhisattva concept in the Pāli canon and Theravāda tradition, see Seyfort Ruegg 2004: 11, n. 15.

181 Note that some earlier scholars, including Sir Charles Eliot and A. Basham, have maintained that the idea of a future buddha (Maitreya) came into being under Zoroastrian influence (Kitagawa 1980: 93–94).

182 The classification of bodhisattva into these three types has been, as far as I am concerned, not made explicit by previous scholars. Nonetheless, it has been in one way or another implied, for example, in Snellgrove 1987a: 58–79 and id. 1987b.

184 Cf., however, Nakamura 1980: 152, where it is stated: “In early Buddhism there was only one Bodhisattva (singular) who was regarded as the Śakyamuni in his previous existences. The Bodhisattva idea was fused later into Jātaka stories.” See also Vetter 2001: 69.

188 For a general outline of such a development, see Snellgrove 1987a: 59–61.
clearly not, either historically or doctrinally. Nevertheless, it may be presumed that the idea was later retrospectively imposed upon all three types of bodhisattvas, thereby creating a uniform concept according to which, doctrinally, bodhicitta serves as the universal mark of a bodhisattva.\(^{189}\)

It is noteworthy that celestial bodhisattvas are identified with proper names, whereas earthly bodhisattvas are commonly anonymous. We may consider, for example, the Vimalakīrti of the Vimalakīrtinirdesāsūtra, as a named bodhisattva belonging to the category of earthly bodhisattvas, but we do not know whether such a person ever existed. Such a model was perhaps felt necessary in order to forestall the social problems that might ensue as a result of individuals claiming themselves to be bodhisattvas.\(^{190}\) To be sure, a person with altruistic traits might be designated as a bodhisattva by others, but to my knowledge, rarely would a person advertise himself or herself as one. Doing so would be blatant self-praise in contradiction of the very norms of a bodhisattva. Yet have not historical persons made that claim for themselves? Śāntideva states:\(^{191}\)

```
Today my birth is fruitful.
My human life is justified.
Today I am born into the family of the Buddha.
Now I am the Buddha’s son.
```

From both the tone and context of the verse, however, it is clear that Śāntideva is here celebrating the arising of bodhicitta in himself with joy and extreme humbleness. He compares himself to a blind man who happens to stumble upon a precious jewel in a heap of rubbish. In stating that he is fortunate to be born into the buddha-family, he manages to assign more weight to the buddhas than to his being a bodhisattva. This may thus be seen as an attempt to avoid or lessen such intellectual-emotional defilements (kleśa) as arrogance. The first two kinds of bodhisattvas are meant to serve as models for the third kind. For example, Mañjuśrī—who is seen as a paragon of insight and the father of all buddhas, and who is invoked with songs of praise, mantras, mudrās, and samādhi—is ultimately explained (particularly in the tantric context) as nothing less than bodhicitta itself.

(ii) Human and Non-human Bodhisattvas

It has been stated above that Buddhism may be designated as a sentient-centric religion and that sentient-centrism is conspicuous in Mahāyāna Buddhism. It is hence not surprising to find the presence of non-human bodhisattvas in Mahāyāna literature. There are several Mahāyāna scriptures where non-humans are portrayed as generating bodhicitta or conceived as highly developed bodhisattvas.\(^{192}\) This is in keeping with the notion that it is the attitude (i.e. bodhicitta) that makes one a bodhisattva and not one’s temporary physical frame. We shall see, however, when discussing the two bodhicittotpāda traditions, that the more conservative-practical Maitreya-Asaṅga tradition rejects non-human candidacy for bodhicittotpāda, whereas the more liberal-idealistic Mañjuśrī-Nāgārjuna tradition admits such

---

\(^{189}\) See also Ray 1994: 261.

\(^{190}\) Schmithausen has remarked on the bodhisattva ideal and the tension caused in society by it; see BSTEH 2000: 388–390.

\(^{191}\) Bodhicaryāvatāra 3.25:
```
adya me saphalalfl janma sulabdho mānuṣo bhavai
adya buddhabhūte jāto buddhaputro ‘smi śāṃpratam [= 9tam] ||
```
The English translation is according to CROSBY & SKILTON 1995: 22.

\(^{192}\) For example, see the Rāstrāpāliparipṛchchāsūtra (p. 59.17–19): asmin khalu punar dharmaparyāye bhāṣyamāne trīṣaṭām nityuṇāṁ sadevamāṇāṣāsūryāyām ca praṇāya anutpadantapūrvāṇi anuttarasvāṁ samyaksambodhau cītāṁ utpānāṁ |
candidates. Interestingly, the idea that a bodhisattva can be non-human can be traced back to non-Mahāyāna sources. The Buddha, while still a bodhisattva, is said to have assumed various forms of life, including those of different animals, as illustrated in the Jātaka stories. Thus even the historical bodhisattva is not always conceived as a human being. It is, however, maintained that in his last incarnation, in which he attains Buddhahood, he is inevitably a male human being.

(iii) Male and Female Bodhisattvas

It is beyond the scope of this study to delve into gender issues in Buddhism, but because the question as to whether a woman can be a bodhisattva or not is indeed pertinent to the study of the bodhisattva—and thus also of the bodhicitta—concept, a brief treatment of the issue seems called for. There is, however, no single position on (or interpretation of) the matter that is binding for all Buddhist traditions. In general, it has been claimed that a female cannot attain the following statuses: (1) a universal king (cakravartin), (2) Śakra, (3) Brahmā, (4) the four guardian gods, (5) Māra, the evil one, (6) a solitary awakened one (pratyekabuddha), (7) a bodhisattva who is irreversible (avīnivartanīya), and (8) a perfectly awakened one (samyaksambuddha). Of the eight, the Kāranaprajñāpti, a non-Mahāyāna text, indicates that it requires extraordinary will (chanda: 'dun pa), strength (bala: stobs), and faculties (indriya: dbang po) to attain the status of a universal king, Indra, Brahmā, Māra, a pratyekabuddha, and a buddha, and because only a male is endowed with these qualities, only a male can attain these statuses.193 In the Saddharmapundarīkasūtra, a Mahāyāna text, Śāriputra tells the daughter of Sāgara, the Nāga king, that there are five stations a female cannot occupy, namely, those of Brahmā, Indra, the four guardian gods, a cakravartin, and an irreversible bodhisattva. The Nāga princess nonetheless becomes a buddha by transforming herself into a male.194 The ability of a woman to attain Arhatship, however, has never been questioned.195

Peter Harvey, who discusses sexual equality in his book on Buddhist ethics, devotes several passages to the issue of whether a woman can be a bodhisattva or not.196 In my view, the question as to whether an earthly bodhisattva can be female is especially pertinent, and thus it is imperative that the concept of historical, celestial, and earthly bodhisattvas be taken into account. For the non-Mahāyāna traditions that do not recognise the three types of bodhisattvas, a bodhisattva (understood in the sense of the historical bodhisattva) can be said to be invariably a male.197 While there is some doubt as to whether the idea of a female historical bodhisattva can be traced in the Mahāyāna sources,198 the existence of female celestial and earthly bodhisattvas seems to be simply taken for granted.199

193 Kāranaprajñāpti (P, fols. 166b8–167a5; D, fol. 139a6–b3; S, vol. 78, pp. 980.18–981.10); Harvey 2000: 371–372.

194 Kajiyama 1982: 56.

195 See, for example, Harvey 2000: 357–361.

196 Harvey 2000: 373–376.

197 Hence the expression ‘... no Bodhisattva can be female’ in Gombrich 1980: 70, refers only to the non-Mahāyāna idea of bodhisattva. In the Jātaka stories of the Pāli canon, there indeed seem to be no female bodhisattvas. See also Harvey 2000: 373.

198 I have not been able to trace a Mahāyāna source where the historical Buddha (as the Bodhisattva) is said to have taken birth as woman. But there is an idea prevalent in Tibet that the historical Buddha had taken five hundred pure births (dag pa'i skye ba lnga brgya) and five hundred impure births (ma dag pa'i skye ba lnga brgya). See, for example, the Nyang ral chos 'byung (p. 62.15–16): ... bom idan 'das kyis dag pa'i skyes rabs
However, the fact that certain sources concede the ability of a female to become a bodhisattva does not automatically imply that such sources concede her ability to become a buddha. For example, Bodhisattvabhumi 1.7 does not rule out the Bodhisattvahood of female aspirants, but it does explicitly state that they cannot attain bodhi (clearly meant in the sense of the samyaksambodhi of a buddha). This statement of Bodhisattvabhumi 1.7 and the statement in the Kāraṇaprajñāpāti that a female cannot attain the status of a buddha are perhaps based on the idea that a historical bodhisattva in his last existence, during which he is destined to become a buddha, must be a male human being, and that too a full-fledged monk (bhikṣu: dge slong)—an idea which is probably professed by both Mahāyāna and non-Mahāyāna traditions.

This gender inequality is, of course, subject to scrutiny and interpretation, an example of which can be found in the aforementioned book by Peter Harvey, and in an article by Yuichi Kajiyama. It is perhaps up to the modern Buddhists to resort to creative and constructive interpretations, without, however, denying the historical past by failing to acknowledge the fact that some of the sources indeed contain elements of androcentrism that are unacceptable by modern standards.

It is necessary to make a distinction between the ways a woman is perceived in non-Mahāyāna, tantric and non-tantric Mahāyāna, and try to determine how and why a woman is perceived in a certain way in the ethico-spiritual context of the prātimokṣa, bodhisattva, and mantra vows. It may be that some of the alleged misogynistic components are not so misogynistic as they first appear to be, or some of the apparently feminist images depicted in a number of tantric and non-tantric Mahāyāna sources so feminist as we would like to have them.

I do not believe that the sexual disparity in the Vinaya has much to do with machismo, misogyny, or misogamy, but may be best understood in its socio-cultural and spiritual contexts. In a culture or society where a woman who chose not to commit herself to a marital relationship could easily be perceived as having chosen immorality or infidelity instead, the difficulty in gaining the respect of a society, without whose support she could not live as a nun, is not at all difficult to comprehend. Perhaps the only viable way for a full-fledged Buddhist nun (bhikṣunī: dge slong ma) to win a degree of acceptance, support and respect from the society in which she lived, and thus be able to pursue her salvific quest, was to set a standard of integrity higher than that of her male counterpart, a full-fledged Buddhist monk (bhikṣu: dge slong pa). This seems to have been indeed the strategy of the Buddha, and it serves to explain, too, why a bhikṣunī has more vows to keep than a bhikṣu.

Inga rgya dang | ma dag pa'i skye ba Inga brgya ste stong bzhes pa'i sa na.... (This statement, however, suggests that the one thousand births occurred in one place.) The impure births may refer to various non-human species such as animals. It would be surprising if the Bodhisattva was conceived of as having taken birth only as a male human or non-human being. It may be that some of the alleged misogynistic components are not so misogynistic as they first appear to be, or some of the apparently feminist images depicted in a number of tantric and non-tantric Mahāyāna sources so feminist as we would like to have them.

I do not believe that the sexual disparity in the Vinaya has much to do with machismo, misogyny, or misogamy, but may be best understood in its socio-cultural and spiritual contexts. In a culture or society where a woman who chose not to commit herself to a marital relationship could easily be perceived as having chosen immorality or infidelity instead, the difficulty in gaining the respect of a society, without whose support she could not live as a nun, is not at all difficult to comprehend. Perhaps the only viable way for a full-fledged Buddhist nun (bhikṣunī: dge slong ma) to win a degree of acceptance, support and respect from the society in which she lived, and thus be able to pursue her salvific quest, was to set a standard of integrity higher than that of her male counterpart, a full-fledged Buddhist monk (bhikṣu: dge slong pa). This seems to have been indeed the strategy of the Buddha, and it serves to explain, too, why a bhikṣunī has more vows to keep than a bhikṣu.

199 See, for example, *Kalyāṇadeva’s Bodhisattvacarayāvatārasamskāra* (P, fol. 27b5–6; D, fol. 22b2–3; S, vol. 62, pp. 52.19–53.2): byang chub sems dpa’i so sor [so PN] thar pa las kyang rigs kyi bu mo zhes gsungs te | bud med nyon mongs pa’i shas chung ba byang chub don du gnyer ba byang chub sems dpa’i bslab pa la slob par ’dod pa dag la yang byang chub kyi bar du sdom pa ‘di skye bar ‘gyur zhin | skye ba gzhon dag tu yang ‘gyur ro ||; and also Vibhūṭīcandra’s *Vīśeṣayodotani* (P, fol. 253b6; D, fol. 213a2; S, vol. 62, p. 558.4–5): sdom pa ‘di bud med la yang nyon mongs pa chung zhing ‘gro la ba phan pa’i phyir byang chub ’dod ‘pas skye’o [pa skye P ||]. As noted by SNELLGROVE 1987a: 65, in the Sūraṅgamasamādhisūtra, too, women are portrayed as generating bodhicitta.

Chapter Five: Mahāyāna, Bodhisattva, and Bodhicitta

(iv) Ordained and Lay Bodhisattvas

The historical bodhisattva in his last existence, like a pratyekabuddha, is conceived of as a self-ordained monk. Interestingly, a celestial bodhisattva is never regarded as a monk or nun, but as a princely male or female, such as Mañjuśrī or Tārā (although these are mainly thought of as buddhas). One of the reasons perhaps for not portraying a celestial bodhisattva as a monk or nun is that according to the Vinaya tradition a non-human bhikṣu or bhikṣunī is impossible. This, however, does not rule out the possibility of a celestial bodhisattva manifesting as a monk or nun, just as a nāga sometimes does. The fact that an earthly bodhisattva can be either a householder (grhapati) or ordained mendicant (pravrajita) is confirmed by a number of tantric and non-tantric Mahāyāna sources.\(^2\) One, however, also occasionally comes across references where the distinction between the laity and mendicancy of a bodhisattva is played down. The Asokadattavyākaraṇasūtra, for instance, states that a bodhisattva should not be viewed in terms of being a householder (i.e. living in family surroundings) or ordained mendicant (i.e. homeless), for a bodhisattva is defined not on the basis of livelihood but on that of altruistic inclination (āsaya), discerning insight (prajñā), and gnosis (jñāna).\(^2\) In theory, a bodhisattva could dwell anywhere, in a forest, city, or monastery, or may not have a fixed place of residence at all. However, a bodhisattva who apart from observing his bodhisattva vows also observes full prātimokṣa vows is more esteemed than a lay bodhisattva who observes only bodhisattva vows.\(^3\)

(v) Bodhisattvas with Different Backgrounds

As already stated, according to the Yogācāra school, which considers the plurality of spiritual dispositions (gotra) and vehicles (yāna) as definitive, an individual who possesses the gotra of a śrāvaka would follow the Śrāvakakṣeyāṇa, and one who possesses the gotra of a bodhisattva the Bodhisattvayāṇa. Even those whose gotra has not yet been fixed or decided may follow one of the vehicles. But according to the Madhyamaka and Tathāgatagarbha traditions, which postulate the singularity of gotra and yāna as definitive, even the śrāvakas and pratyekabuddhas will have to one day enter the Bodhisattvayāṇa. It is under this doctrinal presupposition that three kinds of bodhisattvas are theoretically possible: (1) a bodhisattva with a śrāvaka career behind him, (2) a bodhisattva with a pratyekabuddha career behind him, and (3) a bodhisattva who began his career from the very outset as a bodhisattva. In the Tibetan tradition, the first and the second are collectively called 'bodhisattvas who have a

---

\(^{2}\) For example, see the Vairocanaḥbisambodhitantrāra (T, fol. 208b2–3; D, fol. 220b1–2): gsang ba pa'i bdag po de la byang chub sms dpa' ni rnam pa gnis te | gnis gang zhe na | 'di 'ita ste | [itar D] khyim pa dang | rab tu byung ['byung D] ba'o |. For an English translation, see HODGE 2003: 341. This is cited also in the mDo rgyas (A, fol. 206a1; B, p. 257.5–6). See also NAKAMURA 1980: 151.

\(^{2}\) Asokadattavyākaraṇasūtra (T, fol. 394a6–7; D, fol. 236a7–b1): btsun pa rab 'byor byang chub sms dpa' sms dpa' chen po la ni khyim pa'am | rab tu byung ba zhes gzung bar mi bya'o || de ci'i phir zhe na | de dag ni bsam pas phybe ba yin | ye shes kyi phybe ba yin | ye shes kyi phybe ba yin pa'i phir ro ||. The passage is also cited by sKa-ba dPal-brtsegs in his gSung rab rin po che (P, fol. 153a6–7; D, fol. 248a3–4; S, vol. 115, p. 673.7–10).

\(^{3}\) The Bodhisattvabhūmi, while recognising both ordained and lay bodhisattvas, also clearly recognises the hierarchical difference between the two. See, for example, Bodhisattvabhūmi 2.2 (WOCHIARA, pp. 310.10–311.4; DUPT, p. 213.12–24). See also Ratnākaraśānti’s Ratnālokālambakā (P, fol. 300b6–7; D, fol. 256b5–6; S, vol. 64, p. 718.15–18). In SKILLING 1997: 605–606 attention is drawn to an issue taken up in Bhavya’s Tarkajvāla and Candrakīrti’s Trisārasanapti regarding whether a monk abiding by prātimokṣa vows should show his respect to a bodhisattva who is a householder, and to ‘the practical ramifications of the controversy,’ as exemplified in the biography of Chag Lo-tsā-ba Chos-rje-dpal (1197–1263/64). Cf. the account of King Khri-srong-lde'u-btsan’s encounter with Sāntarakṣita and Padmasambhava in the dBa’ bzhed (pp. 40–41, 54, n. 152).
lesser path behind them' (dman lam sngon song gi byang chub sems dpa’), and the third a ‘bodhisattva whose spiritual disposition has been certain [from the very beginning]’ (rigs nges kyi byang chub sems dpa’).204

(f) The Śrāvaka-Bodhisattva Distinction

Understanding how the difference between the śrāvaka and bodhisattva is conceived of in Mahāyāna literature will help us to better understand the concept of bodhisattva, and hence also of bodhicitta. In general, it may be stated that in India the Yogācāra-Tathāgatagarbha tradition played up the difference between a śrāvaka and a bodhisattva, whereas the Prajñāpāramitā tradition played it down. The position of the Madhyamaka tradition is varied and open to debate.

The Viniscayasaṃgrahani, before discussing at length the śrāvaka-bodhisattva distinction, mentions four kinds of śrāvakas:205 (1) manifested śrāvakas, (2) concealed śrāvakas, (3) śrāvakas who have turned to the supreme awakening, and (4) śrāvakas who are on a single-track journey to cessation. It is clear from the explanations that follow that the first kind is in reality a bodhisattva who has manifested in the form of a śrāvaka; the second kind is one who merely knows the non-existence of a substantial self or person (pudgalanairāmya) and has a misconceived notion of the non-substantiality of phenomena (dharmanairāmya); the third kind is one who has been a śrāvaka before and is now striving for the attainment of the supreme awakening; and the fourth kind is a main-stream śrāvaka.206

The fourth kind is compared with a bodhisattva on the basis of thirteen points:207

Suppose that there are two princes born in similar circumstances and equal in terms of royal luxury. Of the two, one is skilled in the fields of royal administration, science, and art; the other is not. The two would be distinguished merely on this basis, and the distinction would not be on account of [their] royal luxury. So should the distinction in the undefiled sphere between a bodhisattva and a śrāvaka who is on a single-track journey to cessation be understood. The distinction between the two should be understood on the basis of the following: [1] inclination

---

204 These two terms, which require verification, seem to correspond to two other types of bodhisattva (or mahāyānikā), namely, one whose spiritual disposition is certain (rigs nges pa) and one whose is not (ma nges pa). See the Tshig mdzod chen mo (s.v. theg chen pa gnyis). That two such kinds of bodhisattvas are presupposed can be deduced from the context of several Tibetan controversies, such as the ones regarding the status of a bodhisattva with a śrāvaka career behind him and whether a third category of Buddhist saint (‘phags pa phung gsum pa) is possible. See, for example, the Yid bzhin mdzod ’grel (vol. 2, p. 541.1–4) and Grub mtha’ mdzod (pp. 160.2–161.2).

205 Viniscayasaṃgrahani (P, vol. ‘i, fol. 127b3–5; D, vol. zi, fols. 113b7–114a1; S, vol. 74, p. 1015.5–10): nyen thos ni du | ... nyen thos ni rnam pa bzhis h’i | ... sprul pa’i nyan thos dang | mgon pa’i nga rgyal can gyi nyan thos dang | byang chub tu yongs su ’gyur pa’i | ’gyur ba’i PN nyan thos dang | zhi ba’i bygrod pa geig pa’i nyan thos so ||

The Viśñucayasaṃgrahani then goes on to explain the thirteen features distinguishing a śrāvaka from a bodhisattva as follows:208

[1] A śrāvaka is characterised by the inclination to abide alone in [the state of] cessation for [he] is not predisposed to impulses (samskāra) or intellectual-emotional defilements or to the welfare of sentient beings. A bodhisattva, on the other hand, is opposed to it (i.e. cessation), despite [his] attainment of cessation.209 [2] A śrāvaka is endowed with a few wholesome qualities that cause his own happiness to increase. A bodhisattva, on the other hand, is endowed with countless wholesome qualities that cause the happiness of all sentient beings to increase.210 [3] A śrāvaka renders himself free (lit. ineffective or hollow) of [his] intellectual-emotional defilements through [his] insight into the non-conditioned (i.e. nirodha). A bodhisattva, on the other hand, [renders the intellectual-emotional defilements of] all sentient beings of the four directions [ineffective].211 [4] A śrāvaka, despite having arrived (samudāgata) [at his soteriological goal] by focusing his attention on the supreme qualities of complete release (vimukti), is not the son of the Buddha. A bodhisattva, on the other hand, despite having arrived [at his soteriological goal] by focusing his attention on impulses (samskāra), sentient beings, and negative phenomena, is the son of the Buddha.212 [5] A śrāvaka may have exerted himself, be skilled in the [four noble] truths (satya), and [be able to] properly place the mind in meditative equipoise, but lacking the characteristics of a buddha’s spiritual disposition (or lineage), he is, unlike a bodhisattva, not embraced (parigṛhīta) by the buddhas. With a bodhisattva, however, the case is just the opposite.213 [6] A śrāvaka, despite [having acquired] matured faculties, is afterwards incapable of carrying out the activities of a buddha, since [he] has come to the ultimate end [of his career]. A bodhisattva, on the other hand, is capable [of doing so] the very instant he generates his initial resolve.214 [7] A śrāvaka, despite having come to the ultimate end [of his career], is not worthy of the tributes and praise of gods or humans, [not even] like a beginner bodhisattva who has [just] launched upon [his] practical undertaking. A bodhisattva, on the other hand, is [worthy of such tributes and praise].215 [8] A bodhisattva, despite not having come to the ultimate end [of

208 Viśñucayasaṃgrahani (P, vol. i, fols. 128a8–129b2; D, vol. zi, fols. 114b3–115b2; S, vol. 74, pp. 1016.20–1019.3). The Tibetan text has been numbered and inserted as separate footnotes after the corresponding translations.

his career], is [able to] overwhelm all śrāvakas and pratyekabuddhas by [his] splendour (prabhāva) and knowledge. A śrāvaka, despite having obtained the medicine of insight to heal the disease of intellectual-emotional defilements, does not heal the disease of intellectual-emotional defilements of sentient beings. The case of a bodhisattva, however, is just the opposite, for [he] is one who engages in benefiting other [sentient beings]. A śrāvaka, despite having come to the ultimate end [of his career], is not like a bodhisattva; who has not [yet] exhausted [all] intellectual-emotional defilements [and yet] is worthy of the offerings of the world [of sentient beings], including gods, because [he] provides the light of insight to sentient beings. A bodhisattva, on the other hand, is [worthy of such offerings]. The tathāgatas greatly transcend śrāvakas at all times. Bodhisattvas transcend them both even more, since the latter originate among them (i.e. bodhisattvas). It should be known that bodhisattvas greatly transcend [tathāgatas and śrāvakas] for two reasons, namely: [i] they cause sentient beings to mature completely and [ii] cause the qualities of a buddha to mature completely. For these [two reasons], a result, awakening, is attained. They [also] make [other] sentient beings attain release according to the manner in which they have caused them (i.e. sentient beings) to mature. For example, a sense of amazement (or admiration) arises towards one who arranges and prepares [delicacies], not towards one who eats. It should be known that this case is similar. A śrāvaka, despite having correctly taken on and supported the cause of the absolutely pure dharma (i.e., perhaps, nirvāṇa) and having been taken care of by many [spiritually] favourable companions, will not accomplish the result, namely, great awakening. A bodhisattva, on the other hand, will accomplish [it] even under the opposite [conditions]. Ā Śrāvakas arise on account of bodhisattvas. Bodhisattvas do not arise on account of śrāvakas.

(g) The Concept of Vajrasattva

The idea of vajrasattva is particularly relevant to the concept of ontological bodhicitta, as we shall see in chapter seven. Although vajrasattva is commonly depicted and understood as a tantric deity, it is the adamantine true nature of all sattvas (including bodhisattvas), of all
cittas (including bodhicitta, as understood in its conventional sense), and, in fact, of all phenomena. In other words, vajrasattva is conceived of as a new and deeper metaphysical dimension of sattvas, bodhisattvas, and bodhicitta, as something which transcends all manifold divisions, and yet is the indivisible and universal foundation of all manifold existence. In the world of Vajrayāna, all conceivable phenomena are expressed and viewed in terms of their adamantine vajra-like nature, and vajrasattva forms the common substratum and common nucleus of everything. There are various principal deities in Vajrayāna Buddhism, but all of them are expressed either implicitly or explicitly as vajrasattva. Perhaps one could call vajrasattva the ‘grandfather’ of all principal deities in Vajrayāna. The one and the same vajrasattva is given different names and appearances in different tantric systems.222

The Bodhicittabhāvanānīrdeśa attributed to Mañjuśrīmitra explains the term vajrasattva in the following manner:223

[It] is not destroyed by anything in any place or time, and if one realises it, the nets of obscuration are cut away. Hence [it] is called ‘diamond’ (vajra), while the non-erroneous cognition of the reality (dharmatā) of the mind (citta) is called vajrasattva. [It] is also called bodhicitta. On account of the non-cognition of the characteristics (laksana) of the mind, [things] appear wholly as defiled phenomena, but then when one realises the unmistakable diamond-like (vajra) nature of the mind, [they] appear as a cluster of the excellent results of liberation (vimukti).224

Rong-zom-pa provides a very comprehensive and systematic explanation of vajrasattva225—something rather rare. Given the difficulty in identifying his sources, a translation of the entire passage will, however, not be attempted here. I shall merely summarise his presentation. He basically seems to classify vajrasattva into two parts, namely, the signified and the signifier (without, however, employing these terms). The expressions he uses are the ‘intrinsic nature of reality’ (don rang gi ngo bo) and ‘its appearance [in the form] of symbolic signs’ (de’i rtags kyi phyag rgyar snang ba). The signified vajrasattva is nothing but bodhicitta, designated by him as bodhicitta par excellence (samantabhadrām bodhicittam), an expression also found in Indian sources.226 The signifier vajrasattva is the representation of bodhicitta par excellence in forms of deities, explained by him according to Mahāyoga, Yogatantra, Kriyātantra, and non-tantric Mahāyāna. What is interesting is that the bodhisattva Vajrapāni is considered the signifier vajrasattva according to the non-tantric Mahāyāna. In the tantric context, one also encounters terms such as samayasattva, samādhisattva, and jñānasattva,227 and it remains to be seen if these are in one way or another related to the idea of vajrasattva.

222 See, for example, Yogaratnamālā (p. 105.7–8): vajrasattva ity evam kathito dharmakāya | Gunavatī (pp. 27.19–28.5): vajrasattvah śīrerukah, tena samah sadr̥ṣah | Ratnāvaliṣṭaṭikā (p. 44.17): vajrasattva eva kṛṣṇa iti kṛtvā....

223 Bodhicittabhāvanānīrdeśa (P, fol. 57b3–5; D, fol. 46b4–6; S, vol. 33, p. 185.13–19): dus dang gnas kun tu cits kyang mi [ma PN] shigs la | de rtogs na sgrīph pa’i dra ba good pas rdo rje ste | sens kyi chos nyid ma nor bar rig pa la rdo rje sens dpa’ zhes kyang bya | byang chub kyi sens zhes kyang bya ba ste | sens kyi mtshan nyid ma rig pa’i bla thabs kyi [kiyis PN] sgo nas | kun nas nyon mongs pa’i chos thams cad du snang la | sens kyi rang bzhi mna nor ba’i rdo rje la sens pa [dpa’ PN] de’i tshe | rmam par grol ba’i ‘bras bu phun sum tshogs pa rmams su yong san...  

224 See also Hevajraṭantra 1.1.4:
abhidhām vajram ity uktam sattvam tribhavasyaikaitś | anayā prajñāyā yukṣāya vajrasattva iti smṛtah |.

dKon mchog ’grel (A, fols. 24b6–26b4; B, pp. 52.14–54.11).

225 Caryāmelāpakaṇḍapradīpa (p. 43.1): ... samantabhadrām bodhicittam.... See also the Samayasamgraha (P, fol. 258b3–4; D, fol. 48a6; S, vol. 41, pp. 700.19–701.1).

226 For a long note on these terms, see ENGLISH 2002: 470–472, nn. 411–413.
One cannot help but wonder if these three terms correspond to śīla, samādhi, and prajñā, respectively.

4. The Term Bodhicitta and Its Definition

Terminologies and ideas often go hand in hand, and hence an attempt will be made in the following passages to understand the development of the concept of bodhicitta on the basis of its terminological development. Two early Mahāyāna sūtras (the Aṣṭasāhasrika and Drumakīnnavarājāpariprcchāsūtra) and one early Mahāyāna śāstra (the Bodhisattvabhūmi) will be considered here. I shall argue that the concept of bodhicitta in the Bodhisattvabhūmi is more archaic and conservative than the one found in the two early Mahāyāna sūtras.

(a) The Term Bodhicitta in the Aṣṭasāhasrika

The Aṣṭasāhasrika and its metrically corresponding Ratnagunasamcaya are generally regarded as the oldest extant Mahāyāna scriptures. The relative chronology of the two has, however, not yet been fixed.228 In any case, the Ratnagunasamcaya is the only known Prajñāpāramitā text composed in Buddhist Hybrid Sanskrit, and according to some scholars its first two chapters, which represent the initial phase of Prajñāpāramitā thought, may well go back to 100 BCE.229 The first chapter of the Aṣṭasāhasrika, in which the term bodhicitta appears,230 may be the oldest part of the text and thus significant for the study of the development of the bodhicitta concept. However, as Schmithausen has demonstrated, the textual history of the first chapter of the Aṣṭasāhasrika is full of incoherencies and other complex problems. What is more, the term bodhicitta lies at the very centre of these textual problems.

The decisive question is whether the term bodhicitta featured at all there ab initio or was a later interpolation. Which of the two readings—*bodhisattvacitta (in Chinese translations) and bodhicitta (in the Sanskrit text)—is authentic? According to Schmithausen, neither of the two is without its problems. It is conceivable that either the original but incoherent reading tenāpi bodhicittena was replaced by the smoother reading tenāpi bodhisattvacittena; or that the original but non-terminological *bodhisattvacitta was replaced by the later terminological bodhicitta.231 If tenāpi bodhicittena is the authentic reading, then the first chapter of the Aṣṭasāhasrika can be regarded as one of the earliest Mahāyāna sources (if not the earliest) that documents the term bodhicitta.232

The Aṣṭasāhasrika—assumed to be the earliest Mahāyāna scripture to mention the term bodhicitta—seems to represent a stage of development where the process of de-emotionalisation of bodhicitta was seen to be necessary. The Aṣṭasāhasrika professes that a bodhisattva should practise the prajñāpāramitā in such a way that he or she, by relying on bodhicitta, does not fall into a misconceived haughtiness. The reason given is that citta in reality is not citta at all, its true nature being luminously pure.233

229 NAKAMURA 1980: 162.
230 See, for instance, the Aṣṭasāhasrika (p. 10.5); Tibetan translation (T, fol. 15a3–5; D, fol. 11a4).
231 SCHMITHAUSEN 1977b: 47ff.
232 The term bodhicitta occurs also in the Ratnagunasamcaya but, as already stated, its chronological relation to the Aṣṭasāhasrika has not yet been determined.
(b) The Term *Bodhicitta* in the *Drumakinnarājāparipṛcchāsūtra*

Although no Sanskrit text of the *Drumakinnarājāparipṛcchāsūtra* is extant, on the basis of the Chinese and Tibetan translations it can confidently be asserted that the *sūtra* must have explicitly mentioned the term *bodhicitta*. The *sūtra* belongs to a small group of Mahāyāna scriptures translated into Chinese in the second half of the second century CE (i.e. 170–190 CE) by the Indo-Scythian Lokakṣema. Lokakṣema's translation of the *sūtra* is therefore one of the earliest datable literary sources for the study of Mahāyāna. The second Chinese translation is by Kumārajīva from the early fifth century. The *sūtra* was translated into Tibetan roughly six centuries after Lokakṣema's Chinese translation. A comparison of the three versions made by Paul Harrison has yielded the following results: the two Chinese versions are very close, and they do not vary substantially from the Tibetan. 234

The first occurrence of the term *bodhicitta* in the *Drumakinnarājāparipṛcchāsūtra* is at the very beginning of the *sūtra*, where numerous attributes of the *bodhisattvas* gathered there to listen to the pertinent teaching are listed. 235

... [those who] themselves do not abandon *bodhicitta*, [those who] cause other sentient beings to assume *bodhicitta*... The position of these two attributes associated with *bodhicitta* in the list is noteworthy, given that the list is not arranged randomly but obviously follows a certain (if not strict) sequential pattern. The two attributes are preceded by āśaya, adhyāśaya, and prayoga, and followed by the pāramitās. My impression is that already at this stage *bodhicitta* roughly corresponds to both āśaya and adhyāśaya, and prayoga to the pāramitās. The fact that one or more near synonyms of certain elements are given by way of explanation can be noticed elsewhere in the list.

The second occurrence of the term *bodhicitta* is in the context of ethical-moral discipline (*śīla*). One of the several questions the *bodhisattva* *Divyamukūta* (*Lha'i-cod-pan*) asks after paying homage to the Buddha is: 236

How are *bodhisattvas* adorned with the ornament of impeccable ethical-moral discipline (*śīla*)?

The Buddha answers: 237

O Son of a noble family (*kulaputra*), *bodhisattvas* are adorned with the ornament of impeccable ethical-moral discipline (*śīla*) if [they are] endowed with four attributes. What are the four? [1] Being endowed with the ornament of *bodhicitta* [even] while being a universal king (*cakravartin*), [2] being endowed with the ornament of *bodhicitta* [even] while being Indra, the king of gods, [3] being endowed with the ornament of *bodhicitta* [even] while being Brahma, the lord of the world (*sahāpati*), [4] being endowed with the ornament of *bodhicitta* [even] while taking birth as gods or human beings once they have terminated all lower destinations. O Son of...
a noble family, know that bodhisattvas endowed with these four attributes are adorned with the ornament of impeccable ethical-moral discipline.

It should be noted that the term bodhicitta is obviously not understood here as the initial generation of the resolve to strive for awakening, but rather as its maintenance.

The third occurrence of the term bodhicitta is the Buddha’s answer to the following question:

In what way are bodhisattvas those who never fail to see the tathāgatas?

The Buddha answers:

O Son of a noble family (kulaputra), bodhisattvas are those who never fail to see the tathāgatas if [they are] endowed with four attributes (i.e. if they fulfil four criteria). What are the four? They are the following: [1] causing sentient beings to take on themselves [the meditative practice of] encountering buddhas, [2] causing sentient beings to take on themselves [the practice of] listening to the teachings, [3] causing sentient beings to assume bodhicitta, and [4] not parting from the meditative absorption (samādhi) of recollecting or visualising buddhas (buddhānusmṛti). O Son of a noble family, those bodhisattvas endowed with these four attributes never fail to see the tathāgatas.

Associating bodhicitta with the practice of buddhānusmṛti is from a historical perspective significant, for we have seen in chapter three that one of the measures taken by Buddhists to meet their psychological need to compensate for the absence of the historical Buddha was the practice of buddhānusmṛti, and that the conception of bodhicitta, too, could have been triggered by a similar motive, namely, to propagate the lineage of the Three Jewels so as to guarantee their continual felt presence in the world.

The questions and answers conclude with two more references to bodhicitta, one while presenting the idea that those sentient beings who do not part from bodhicitta are under no circumstances endowed with inferior basic wholesome virtues (kusālamāla), and the other while stating that after the teaching bodhicitta arose in 84,000 gods and human beings.

The chapter that follows begins with a piece of 'propaganda,' in which the Buddha tells the bodhisattva *Divyamukūṭa that those who uphold and teach such a sūtra are endowed with eight qualities. Although the term bodhicitta is not explicitly mentioned, near synonyms of it, such as āsāyā, are listed among the attributes. The next occasion bodhicitta occurs is in a somewhat polemical context. The spectacular arrival of the powerful bodhisattva Drumakinnarāja with thousands in his retinue and the demonstration of their magnificence, miracles, and music unsettle the śrāvakas, causing them to shake and quiver like small children. The bodhisattva *Divyamukūṭa asks Mahākāśyapa the cause of their nervousness.

238 Drumakinnarāja-productsūtra (p. 21.8–9): ji litar na byang chub sems dpa’ de bzhin gshags pa rnams mthong ba dang mi ‘bral ba rnams lags |.

239 Drumakinnarāja-productsūtra (pp. 40.9–41.1): rigs kyi byang chub sems dpa’ chos bzhī dang ldan na | de bzhīn gshags pa mthong ba dang mi ‘bral ba rnams yin te | bzhī gang cbe na | ‘di lla ste | sems can rnams sangs rgyas la lla ba yang dang par ‘dzin du ‘jug pa dang | sems can rnams chos nyan pa yang dang par ‘dzin du ‘jug pa dang | sems can rnams byang chub ki sems yang dag par ‘dzin du ‘jug pa dang | sangs rgyas rjes su dran pa’i ting nge ‘dzin dang mi ‘bral ba yin te | rigs kyi byang chub sems dpa’ chos bzhī po ‘di dang ldan na | de bzhīn gshags pa mthong ba dang mi ‘bral ba rnams yin no |.

240 Drumakinnarāja-productsūtra (p. 45.7–8): byang chub ki sems dang mi ‘bral ba’i sems can de dang ni dge ba’i rtsa ba ngan ngon dang ldan pa ma lags te |.

241 Drumakinnarāja-productsūtra (p. 46.5–6): lha dang mi’i sro chags brgyad khri bzhī stong ni bla na med pa yang dang par rdzogs pa’i byang chub tu sems skyes so |.

242 Interestingly, the sūtra is not referred to here as the Drumakinnarāja-productsūtra (or any similar name) but as the *Tathāgata-parinirvāṇasūtra (Drumakinnarāja-productsūtra, p. 47.8–9).

243 Drumakinnarāja-productsūtra (pp. 47.8–48.12).
Kāśyapa explains that the aspirations (pranidhāna), beneficial resources (punya), and meditative insight (jñāna) of the bodhisattva King Drumakinnarāja far surpass those of the śrāvakas. In response the bodhisattva *Divyamukta* tells Mahākāśyapa:244

O Venerable Mahākāśyapa, the music of the vīnā cannot move or sway the irreversible bodhisattvas, on account of their glory (śrī), splendour (ōajas/tejas), and power (bala). Therefore, O Venerable Mahākāśyapa, who would not [then] generate the resolve for the sake of the highest perfect awakening (samyakṣambodhi)! Why [should one do] so? Just consider that this music from a vīnā [is able to] overshadow the power and splendour of those endowed with limited insight [but] is not able to overshadow the power and splendour of those who have set out on the path of Mahāyāna.

It is interesting to note that the power and splendour of a bodhisattva are obviously portrayed here as incentives (if not as primary motives) for the generation of bodhicitta.245 It is clear from the context that it is the pranidhāna, punya, and jñāna of a bodhisattva that lend him his power and splendour, and not vice versa.

Further on in the sūtra, Drumakinnarāja requests the Buddha to give teachings on the samādhi of the bodhisattvas called the ‘Jewel Mine’ (ratnakara). The Buddha proceeds to talk about eighty jewels of cittotpāda (*cittotpādaratna*), beginning thus:246

O Drumakinnarāja, a bodhisattva observes these eighty cittotpāda jewels in order not to allow a break in the continuity of the Buddha Jewel, the continuity of the Dharma Jewel, and the continuity of the Saṃgha Jewel. What are the eighty? They are: [1] not forgetting the jewel thought of omniscience, [2] not abandoning the jewel thought of altruistic inclination (āśaya), ... [58] the jewel thought of remembering ethical-moral discipline (śīlānusmṛti) in order not to deviate from bodhicitta....

All eighty jewels of cittotpāda are seen to be measures that the bodhisattvas take to guarantee the continuity of the Three Jewels (triratna). The eighty ‘jewel thoughts’ include major Buddhist topoi found elsewhere in the Mahāyāna literature. (The eighty ‘inexhaustibles’ in the Aksayamatinirdeśasūtra may be related to them.) It may be noted that our list apparently begins with the term bodhicitta, although the term is not explicitly used there, but first occurs in the fifty-eighth item—again, in the context of remembering ethical-moral discipline (śīlānusmṛti). The term bodhicitta also occurs several times in the later part of the sūtra, but these instances will not be discussed here.247

244 Drumakinnarājaparipṛcchāsūtra (pp. 59.9–60.4): bsun pa 'od srungs chen po phyir mi ldog pa'i byang chub sams dpa' rnam kyi dpal dang | gzi brjīd dang | stobs la gang gi phyir pi wang gi sgra des bsulg ba'am | bsyod par mi nus pas | bsun pa 'od srungs chen po su zhig bla na med pa yang dag par rdzogs pa'i byang chub tu sems mi skyed | de ci'i phyir zhe na | gang nyi tshe ba'i ye shes dang ldan pa rnam kyi stobs dang | gzi brjīd de ni pi wang gi sgra 'dis zil gyis non to || gang theg pa chen po la yang dag par zhugs pa rnam kyi stobs dang | gzi brjīd de la ni zil gyis gnon par mi nus pa la Itos |.

245 Various motives for becoming a buddha seem to be implied.

246 Drumakinnarājaparipṛcchāsūtra (pp. 77.7–82.12): mi 'am ci'i bdag po 'di la byang chub sams dpa' ni sangs rgyas dkon mchog rgyun mi 'chad pa dang | chos dkon mchog rgyun mi 'chad pa dang | dge 'dun dkon mchog rgyun ni 'chad par bya ba'i phyir | sems bskyed pa rin po che bryagad cu po 'di dag la 'jug go || bryagad cu gang zhe na | 'di lta ste | de thams cad mkhyen pa'i sems rin po che mi brjed pa dang | lhaq pa'i bsam pa'i sems rin po che mi gtong ba dang | ... byang chub kyi sams las mi g.yo ba'i phyir | ishul khrims rjes su dran pa'i sems rin po che dang |.

247 In addition to the passages already discussed, the term bodhicitta (byang chub kyi sams) is found in the Drumakinnarājaparipṛcchāsūtra (pp. 96.10, 120.9–10, 134.11, 147.12, 152.7–10, 153.2–5, 161.13–16, 190.5–6, 259.8–10, and 284.4). Likewise the expression byang chub tu sams bskyed can be found in ibid. (pp. 150.7–8, 173.5–7, 185.11–12, 205.1, 225.2–9, 247.11–14, 251.6, 256.11–12, 274.7, and 276.1–6).

---
(c) The Term Bodhicitta in the Bodhisattvabhūmi

The *Bodhisattvabhūmi* belongs to the earliest strata of the *Yogācārabhūmi*. It must have already been in existence in the early third century CE. There are reasons to believe that, within the *Bodhisattvabhūmi* itself, the first part (*yogasthiinā*), containing the chapter on *cittotpāda*, may well be the oldest.\(^{248}\) However, since we do not know how long it took to compile the entire *Yogācārabhūmi*, we do not know to what extent the oldest material of the *Bodhisattvabhūmi* goes back to before the third century.

The term *bodhicitta* does not seem to be attested in the *Bodhisattvabhūmi*. All three instances in which the term *bodhicitta* occurs certainly do not represent the original reading.\(^{249}\) The absence (or the rarity) of the technical term *bodhicitta* in the *Bodhisattvabhūmi* suggests that, at this stage, it had not yet been fixed or established. We cannot, however, assume that the compiler (or compilers) did not know or was not concerned with the theory of *bodhicitta*. In fact, one whole chapter is devoted to the idea of *cittotpāda*, the generation of *bodhicitta*. It seems that the idea of *bodhicitta* in its rudimentary stages merely entailed a verbal (or conceptual) formulation of the aspirational wish (*prāṇidhāna*) to become a *buddha*, but that formulations such as *cittam utpadyate bodhīya* and *bodhīya cittal[ī] prāṇidhāṇa*\(^{250}\) in particular contributed to the eventual crystallisation of the compound *bodhicitta*.

(d) The Relative Chronology of the *Aṣṭasāhasrikā* and the Bodhisattvabhūmi

Virtually nobody contests the chronological anteriority of the *Aṣṭasāhasrikā* to the *Bodhisattvabhūmi*. However, in view of the history of the *bodhicitta* concept, this chronology can be called into question. If we assume that the term *bodhicitta* indeed stood *ab initio* in the *Aṣṭasāhasrikā*, we shall have to conclude that the concept of *bodhicitta* was already fixed terminologically in the milieu in which that work was compiled (or composed), whereas it had just begun to form in the milieu in which the *Bodhisattvabhūmi* was compiled.

What conclusion if any can one draw from this? One possibility would be to challenge the hitherto assumed relative chronology of the *Aṣṭasāhasrikā* and the *Bodhisattvabhūmi* and propose that the former is in fact not older than the latter. Such a proposition, however, would cause insurmountable problems and needs to be ruled out. The other possibility is to assume that although the *Aṣṭasāhasrikā* is indeed older than the *Bodhisattvabhūmi*, the parts of the text containing the term *bodhicitta* are a later interpolation. This is conceivable, but how could one then explain the fact that other Mahāyāna sūtras that are older than the *Bodhisattvabhūmi* also contain relatively developed ideas of *bodhicitta*. The third and perhaps best solution may be to assume that although the redaction of the *Aṣṭasāhasrikā* took place earlier than that of the *Bodhisattvabhūmi*, the *Bodhisattvabhūmi* contains elements or strata that are even more archaic than those of the *Aṣṭasāhasrikā*. At least this seems to be the case in the context of the development of the *bodhicitta* concept.

---

\(^{248}\) ROTH 1975/76: 171–172.

\(^{249}\) *Bodhisattvabhūmi* 1.7 (NAKAMURA 2004: 28): *yasminn eva divase paśe māse sāṃvatsare ekena 'bodhau cittal[ī] prāṇidhiṁ| asminn eva divase paśe māse sāṃvatsare sarvaiḥ* |. Note that the readings of several manuscripts (recorded by NAKAMURA 2004: 28) tell against the reading *bodhicittal[ī]* in WOGIHARA, p. 92.12–15. This is also the case in *Bodhisattvabhūmi* 1.2 (§1.2.1 and §4.6.0), where the reading *bodhicitta* in some versions of the text is opposed by other readings.

\(^{250}\) See below, n. 255 and BHSD, s.vv. *pranidhāhi* and *pranidheti*. See also, for instance, the *Aṣṭasāhasrikā* (p. 52.3): *... prasannacitto bodhīya cittal utpādyā...*. The Tibetan translation reads (T, fol. 77a6; D, fol. 57b1): *... sems dang bas byang chub tu sems bskyed nas* |.
The Terms Cittotpāda, Bodhicitta, and Bodhicittotpāda

We have seen in the chapter on previous studies of bodhicitta that Gareth Sparham attempted to differentiate cittotpāda, bodhicitta, and bodhicittotpāda in terms of their origin and meanings. According to him, the origin of the term cittotpāda is what he calls the Origin-Passage of the Aṣṭasāhasrikā. He does not specify the origin of the term bodhicitta, but merely states that the opening verses of the Ratnagūnasamcaya ‘refer explicitly to bodhicitta,’ without, that is, asserting that these verses or the passage in the Aṣṭasāhasrikā containing the term bodhicitta coined it. For Sparham, bodhicittotpāda is the outcome of a later systematisation of the early notions of cittotpāda and bodhicitta, with the original cittotpāda being designated as conventional bodhicittotpāda and the original bodhicitta as absolute bodhicittotpāda. Later, however, bodhicitta came to be used (in a historically inappropriate way) as an abridged form of bodhicittotpāda. Sparham’s attempted explanation, if not quite convincing, is certainly food for thought.

In the following few paragraphs I intend to assess Sparham’s discussion of these terms and point out where I agree or disagree. Firstly, I find it necessary to distinguish between the idea as such and the corresponding technical term for it (cittotpāda, bodhicitta, and bodhicittotpāda), which Sparham does not seem to do. For example, although the term cittotpāda (i.e. a noun) does not occur in what he calls the Origin-Passage, he treats it as if it does. In general, it can be presupposed that the attempt to express an existing idea in words gives rise to a technical term and not vice versa. That is, a certain idea may be extant for some time before a technical term for it is coined.

Secondly, it is useful to distinguish technical terms from their non-terminological counterparts. This seems to be particularly necessary in the case of the term cittotpāda. (As far as I can tell, the terms bodhicitta and bodhicittotpāda are employed in the Mahāyāna context only terminologically, and hence there does not arise the need to distinguish them from non-terminological expressions.) The term cittotpāda is apparently not used in non-Buddhist sources, and, according to Franklin Edgerton, it is a common Hybrid Buddhist Sanskrit term,251 its Pāli equivalence being cittuppāda.252 However, even in the Buddhist context it need not necessarily mean an ‘act of generating the resolve to strive for awakening,’ but can also refer to the resolve to attain any profane goal driven by any profane motive. Also, even if the term is employed in a soteriological sense, it does not necessarily mean generating the resolve to become a buddha, since three kinds of bodhi are presupposed, namely, those of a śrāvaka saint, pratyekabuddha, and buddha.

Must generating the resolve to strive for perfect awakening (samyaksambodhi), then, necessarily mean cittotpāda in its technical Mahāyāna sense? Not necessarily. As I have tried to make clear in the chapter on the doctrinal and historical background of the bodhicitta concept, the non-Mahāyāna traditions have their own idea of the historical Buddha (and also of other buddhas, such as the Buddha Dīpamkara), and accordingly their own idea of the initial resolve to strive for perfect awakening supposedly made by them in the past. I differentiate such ideas found in non-Mahāyāna sources from those found in Mahāyāna sources. The former may have been the historical or doctrinal precursors of the latter, but the two cannot be treated as though they were identical. I thus contend that cittotpāda in its Mahāyāna technical sense always denotes the resolve to become a bodhisattva or a buddha, which can be generated by ordinary individuals equipped with the correct and sufficient emotive, cognitive, and conative prerequisites.

251 BHSD, s.v. cittotpāda.
252 PED, s.v. cittuppāda.
Some Tibetan scholars, such as Sa-pal), felt the necessity to distinguish between various kinds of cittotpāda, even when used in the Buddhist soteriological context. Sa-pal) classifies cittotpāda into two categories: non-Mahāyāna and Mahāyāna. He further classifies non-Mahāyāna cittotpāda into three types, namely, those of a śrāvaka saint, pratyekabuddha, and buddha, and the Mahāyāna cittotpāda into those of the Madhyamaka and Cittamātra traditions. Particularly noteworthy is his distinction between generating the resolve to strive for the supreme awakening according to the non-Mahāyāna and Mahāyāna traditions. It is clear that for him, too, such generation according to the non-Mahāyāna traditions should be understood primarily as involving the resolve to become a buddha made by the historical Buddha sometime in the distant past, whereas according to the Mahāyāna as involving the resolve to become a buddha that can be made by any sentient being with the right prerequisite.

Given the multiple applications of the term cittotpāda, it was perhaps necessary to specify it as bodhicittotpāda. Occasionally generating the resolve to become a śrāvaka saint or pratyekabuddha is also referred to as bodhicittotpāda, but such cases should be considered to be non-terminological. Apparently the term bodhicittotpāda came to be used in these senses only retrospectively, and in analogy to the bodhicittotpāda of a bodhisatva. If this were not the case, we ought to find the term also in non-Mahāyāna sources, where it is, to my knowledge, not attested.

Thirdly, although Sparham somehow makes clear that the original terms cittotpāda and bodhicitta are more archaic than the term bodhicittotpāda, he does not specify which of the former two is more archaic. It is perhaps reasonable to assume that the technical term cittotpāda is more archaic than the term bodhicitta. Having said that, I hasten to recall that a terminological archaism need not necessarily correspond to the age of a text, for even a recent work may contain very archaic terms and conservative ideas.

Fourthly, Sparham has sought to point out the difference in origin, and the original meanings, of cittotpāda and bodhicitta, as if they had originally nothing to do with each other. Examination of the conventional-absolute classification seems to indicate that there existed two strands: Strand A (represented by texts such as the Bodhisattvabhūmi and the Mahāyānasūtrālāmākāra), which conspicuously employs terminologies such as pāramārthikacittotpāda and sāmkṣetikacittotpāda, and Strand B (represented by the Prajñāpāramitā and Madhyamaka literature), which rather employs terms such as pāramārthikabodhicitta and sāmvrṭibodhicitta in making this particular distinction (see chapter eight). The two strands seem to have conceived the conventional-absolute classification differently, at least in the beginning. However, in some later texts the two strands have converged, or else the distinctions between them have become less pronounced.

In addition, I find the implication that the term bodhicitta from the very beginning had a gnoseological and ontological connotation quite problematic. My own hypothesis is that the terms cittotpāda, bodhicitta, and bodhicittotpāda have enjoyed varying degrees of
terminological predominance in various Mahāyāna texts and traditions, but semantically they have always been associated with the resolve to become a buddha or a bodhisattva, that is, even in cases where citta is described as acitta, as in the Aṣṭasāhasrikā. The fact that bodhi and citta (like all other phenomena) are deconstructed in the context of the doctrine of emptiness (śūnyatā) is, in my view, by no means an indication that bodhicitta has a different origin and meaning in the Prajñāpāramitā. On the contrary, it is an indication that even such traditions have presupposed the conservative idea of bodhicitta. Thus we can regard the attempts made by the Prajñāpāramitā and Madhyamaka traditions to establish all phenomena as empty (śūnya) as attempts to expose the underlying essencelessness of all phenomena, so that the deconstruction, or rather de-emotionalisation, of bodhicitta is in itself an indication of the basic presupposition regarding bodhicitta.

Fifthly, Sparham’s claim that cittotpāda in its original sense was later called conventional bodhicittotpāda, and bodhicitta in its original sense was later called absolute bodhicittotpāda requires further investigation. What I merely want to point out here is that both cittotpāda and bodhicitta seem to have each been subdivided into conventional and absolute forms, while, as already mentioned, the technical term cittotpāda (if not always explicitly) seems to have meant bodhicittotpāda. I argue that the terms cittotpāda (in the sense of the generation of the resolve to become a buddha), bodhicitta, and bodhicittotpāda all owe their formation to expressions such as: cittam utpadyate bodhīya. In any case, bodhicitta and cittotpāda came to be understood synonymously. For instance, the Madhyamakāvatārabhāṣya (at least in the Tibetan translation) equates bodhicitta with cittotpāda. In the pre-commentary to verses 1.4cd and 1.5ab, it states: 256

Desiring to explicate the ten types of bodhicitta of the bodhisattvas [and] taking into consideration the first [type of] bodhicitta.... The post-commentary of the same verses goes on: 257

The bodhisattva stage (bhūmi) of Utter Joy (pramuditā) is the first [type of] cittotpāda of the bodhisattvas, and the Cloud of Dharma (dharmaṃghā), [which is] the last, is the tenth cittotpāda.

The fact that the ten stages of the bodhisattvas are designated by Candrakīrti as either bodhicitta or cittotpāda suggests that, for him too, the two terms are synonymous. No semantic distinction between the two is made either among Tibetan scholars, as can be seen in various writings on the topic. 258

(f) Some Definitions of Bodhicitta or Cittotpāda

There is no formal definition of bodhicitta or cittotpāda given in the Bodhisattvabhūmi or its two commentaries. However, the Bodhisattvabhūmi, in explaining the (intentional) aspect (ākāra) of cittotpāda, states: 259

255 See, for example, Bodhisattvabhūmi 1.2 (§1.1.2, 2.2.0 and 4.5.0); see also ibid. 1.11 (WOGIHARA, p. 191.26; DUTT, p. 132.7–8): ... bodhāya cittam utpādayatā....

256 Madhyamakāvatārabhāṣya (p. 11.15–16): byang chub sems dpa’ rnam kyi byang chub kyi sems kyi dbye ba rnam pa bcu bijd par ’dod pas | je [= de] byang chub kyi sems dang po ’i dbang du byas nas....

257 Madhyamakāvatārabhāṣya (p. 12.13–15): de la byang chub sems dpa’ i sa ral tu dga’ ba ni byang chub sems dpa’ rnam kyi sems bskyed pa dang po la mthar chos kyi sprin ni sems bskyed pa bcu pa’o ||.

258 See, for example, the Theg chen tshul ’jug (A, fol. 77a4–5; B, p. 500.16–17): de la byang chub kyi sems ni ’drol shes rab dang snying rjes bsdus pa’i sems bskyed pa’o ||.

259 Bodhisattvabhūmi 1.2 (§1.1.2).
Furthermore, the bodhisattva, when fixing his thought on awakening, collects [his] thoughts and articulates [his] words thus: "Oh, may I be perfectly awakened unto the highest, perfect awakening, may I be the benefactor of all sentient beings and may I establish [them] in the absolutely perfect (or firm) extinction and in the insight of the tathāgata!" In this way, one generates the resolve [to become a buddha] when striving for one's own awakening and for the welfare of sentient beings.

And in explaining the objective support (ālambana) of cittotpāda, the Bodhisattvabhūmi states: 260

Furthermore, one strives to generate the resolve [to become a buddha] by taking this awakening and the welfare of sentient beings as an [objective] support for it (i.e. the resolve) [and] under no circumstances without taking [them] as [an objective] support. Thus generation of resolve [to become a buddha] has awakening [as its objective] support, and the welfare of sentient beings [as its objective] support [as well].

The Bodhisattvabhūmiyiritti by Guṇaprabha (only on Bodhisattvabhūmi 1.1–1.9) and the Bodhisattvabhūmiyākhyāyā by Sāgaramegha contribute little to the definition of cittotpāda. What is striking in the latter work is that, while some significant developments can be noticed in it, the term bodhicitta is not employed by Sāgaramegha. The Mahāyānasūtraśālaṃkāra states: 261

The arising of the resolve [to become a buddha, comprising] two objectives, is the will of the bodhisattvas,

[Characterised by] great enthusiasm, great endeavours, Great purpose, [and] great outcome.

The Mahāyānasūtraśālaṃkārabhasya makes it clear that the verse deals with the definition of generating the resolve (cittotpādalakṣana): 262

A verse concerning the definition of generating the resolve [to become a buddha]: ...

[Mahāyānasūtraśālaṃkā 4.1]...

[The generation of the resolve] is characterised by: [1] great enthusiasm (mahotsāha), in view of [the preparatory] perseverance in [putting on] the armour (saṃnāhavārya), knowing that [it] will withstand serious (gambhirā), difficult (ādusakāra), and long-lasting (dirghakāla) obstacles (pratipakṣa); [2] great undertaking (mahārāmbha), in view of [his] persevering in practical application in accordance with [the preparatory putting on of] the armour; [3] great purpose (mahārtha), in view of [his being dedicated to] the benefit of oneself and others; and [4] great outcome (mahodaya) due to the complete attainment of the great awakening (mahābodhi). The following three merits are elucidated in this [verse]: the merit of exertion (puruṣākāra),263 as expressed by two words (i.e. mahotsāha and mahārāmbha), and the merit of salvific activity [for the sake of others] (arthakriya) and that of accepting the result (phalaparīgraṇa), as expressed by two [other] words (i.e. mahārtha and mahodaya, respectively). [The generation of resolve is] characterised by a twofold purpose, for [it has] the great awakening and activities for the welfare of sentient beings as its objective supports. Thus a

260 Bodhisattvabhūmi 1.2 (§1.1.3); JOSHI 1971: 71.

261 Mahāyānasūtraśālaṃkāra 4.1:

mahotsāha mahārāmbha mahārūṭha mahodaya]
cetanā bodhisattvānām dvāyārthā cittasambhavah ||.

For a French translation of the verse, see LÊVI 1911: 32; see also JOSHI 1971: 71.

262 Mahāyānasūtraśālaṃkārabhasya (pp. 13.18–14.4): cittotpādalakṣane ślokaḥ | ...

[Mahāyānasūtraśālaṃkāra 4.1]...

mahotsāha saṃnāhavāryena gambhirādusakāra dirghakāla pratipakṣotsahanāt | mahārāmbha yathāsamāhānanaprayogavāryena | mahārūṭha atmapararāṭhādikārāt | mahodaya mahābodhisamudgāmatvāt | so 'yam trividhā gunah paramīpitāḥ puruṣākāraguṇo dvāyāḥbhāyān padabhyām artakriyāyugunā phalaparīgraṇaṃ ca dvāyāḥbhāyaṃ | dvāyārthā mahābodhisattvārthakriyālambanatvāt | iti triguṇā dvāyālambanā ca cetanā citotpāda ity ucyate |

263 The term puruṣākāra is called so because of the resemblance to manly activity. See the Abhidharmakosabhāṣya (p. 95.2–4): puruṣabhāvāyatirektāḥ puruṣakārāḥ puruṣa eva | tasya phalam puruṣam | ko 'yam puruṣakāraṃ nāma | tasya dharmasya yat kāritram | puruṣakāra iva hi puruṣakāraḥ |. See also PRUDEN 1988–90: 288; COX 1995: 357, n. 25.
will which possesses the three merits and two objective supports is called generating the resolve (cittotpāda) [to become a buddha].

What is noteworthy here is that the Mahāyānasūtramārkarabhāṣya still does not use the term bodhicitta. However, *Asvabhāva does seem to use the expression bodhicittotpāda at this point. He also correctly takes cittasambhava in the verse to be semantically equivalent to cittotpāda.²⁶⁴ Sthiramati for his part used the term bodhicitta profusely, to judge by the Tibetan translation of the *(Mahāyāna)sūtramārkaravyākhyā.

The Abhisamayālāṃkāra, the locus classicus for the definition of bodhicitta not only for traditional exegetics but for modern scholars as well, defines the generation of bodhicitta as follows:²⁶⁵

To generate the resolve [to become a buddha]
Is to desire perfect complete awakening for the sake of other [sentient beings].

The Abhidharmasamuccaya does not mention the term bodhicitta, unlike the Mahāyānasārṣṭra, which mentions it in the context of the thirty-two attributes of a bodhisattva.²⁶⁶ However, one cannot deduce from this fact that the author of the former work did not know of the concept or was opposed to the theory associated with it. The Abhidharmasamuccaya indeed presupposes the concept of bodhicitta, the reason for not mentioning the actual term having to do with the immediate purposes of the work itself. The work, as its title shows, is not meant to be a typical discourse on the theory and practice of a bodhisattva, unlike the Mahāyānasamgraha, which, again as its title shows, is precisely such an exegesis.

The first chapter of the Madhyamakahrdaya deals with the non-abandonment of bodhicitta (bodhicittaparītyāga). The pertinent verses that contain the term bodhicitta shed light on the concept of bodhicitta in this Madhyamaka work, and the status assigned to it. It states:²⁶⁷

Not abandoning bodhicitta,
Seeking support in the discipline of the Sage,
And questing for the knowledge of reality
Are the [three] practices leading to the achievement of all goals.

It again states:²⁶⁸

Bodhicitta is the seed of Buddha[hood] (buddhabhāja),
Which has great friendliness (maitrī), compassion (karunā)
And gnosis (jñāna) as [its] ornaments (bhuṣana).
Therefore the wise exerts himself not to abandon it.

The Tarkajvalā provides the following explanation of this verse:²⁶⁹

²⁶⁴ Mahāyānasūtramārkarabhāṣya (P, fol. 60b3; D, fol. 53b3; S, vol. 71, p. 135.3–4) states: sems ’byung ba zhes bya ba la | ’byung ba dang bskyed pa zhes bya ba ni don tha dad pa ma yin no ||.

²⁶⁵ Abhisamayālāṃkāra 1.18ab: cittotpādaḥ parārthāya sanyaksambodhikāmatā |.

²⁶⁶ Mahāyānasamgraha 2.§34 (p. 45.18–19): spyod lam thams cad du byang chub kyi sms yongs su spyod par byed pa…. See also ibid. (p. 46.3): byang chub kyi sms de sngon du ’gro ba….²⁶⁷

²⁶⁷ Madhyamakahrdaya 1.5:

bodhicittaparītyāgo muntvratasamāśrayah |
tattvajñānaśaṇā ceti caryā sarvārthasiddhiyate ||.

²⁶⁸ Madhyamakahrdaya 1.6:

bodhicittam mahāmaitrīkarunājñānahubbham |
buddhabhiṣam yato vidvām tadatyāgāya yujyate ||.

What is so-called bodhicitta? ...[Madhyamakahrdaya 1.6]... ‘[Endowed with] great friendliness’ means having the [following] four [reasons for] generating resolve (cittotpāda): [1] all sentient beings are to be rescued [from samsāra], [2] [I am] rescuing (or going to rescue them), [3] [I will] cause [them] to become fully awakened, and [4] [cause them to] attain complete extinction (parinirvāṇa). ‘[Endowed with] great compassion’ means having the [following] four [reasons for] generating resolve (cittotpāda): [1] carrying out [beneficial activities] for the sake of all sentient beings, [2] protecting [them] from lower destinations, [3] retrieving [them] from lesser vehicles (kīnāyāṇā), and [4] establishing them in the correct path. ‘Great gnosia’ is of two kinds: the gnosia of strategic means (upāya) and the gnosia of discriminating insight (prajñā). Of the [two], the gnosia of strategic means implies perfecting the three [kinds of] accumulation[270] [by, for example], generating all basic wholesome virtues endowed with the total purity of the ‘three circles’ (trimāṇḍala),[271] sharing [them] with all sentient beings, dedicating [the anticipated beneficial resources] to [the attainment of] the highest perfect awakening, confessing misdeeds, rejoicing at beneficial resources, and so forth. The gnosia of discriminating insight (prajñā) implies the generating of gnosia (jñāna), both [of the type] characterised by analytical investigation and [that] endowed with one moment (ekakṣaṇa or ekakṣamācittā),[272] for all factors of existence (dharma) are imperceptible, without signs [of appearance] (nimitta), without agitating impulse, unborn, without substance, and wholly non-existent. The seed of Buddha[hood] adorned with these is bodhicitta. [As for] bodhi, [it] is the knowledge, perfect in all respects, of all factors of existence. Bodhicitta is resolve (citta) [gathered up] for the sake of awakening (bodhi). Because it is the seed of Buddha[hood], it is judicious on the part of the wise, who have [the welfare of] sentient beings in view, not to abandon [altruistic] inclination (āsaya), superior [altruistic] inclination (adhyāśaya), confidence (adhimokṣa), and great confidence. 

Later exegeses determined whether bodhicitta is mind (citta) or a mental associate (caitta), but this will have to be dealt on another occasion.

(g) How Indispensable Is Bodhicitta for a Bodhisattva?

The importance of bodhicitta has been expressed in numerous ways: through logical reasoning, authoritative scripture, similes, and eulogies. Although it is by no means conceived

270 It is not clear what the three kinds of accumulation (samabhāra) are.

271 See BHSD, s.v. trimāṇḍala. From a Mahāyāna perspective, the practice of giving (dāna), for example, is only pure (or supramundane) if the giver, act of giving, and recipient can be viewed as empty (śūnya) and if there is no attachment to the three. See, for example, Madhyamakāvatāra 1.16, 2.9, 3.10.

272 I do not understand the meaning of this expression, but I should guess that jñāna characterised by analytical investigation is conceptual gnosia (perhaps in the post-meditative state of a bodhisattva) and jñāna endowed with one moment (ekakṣaṇa) the non-conceptual gnosia that is the direct perception of true reality in the meditative state. For the occurrence of terms such as ekakṣaṇa, see, for example, Abhisamayālaṃkāra 7.5.
of as the only (i.e. as a self-sufficient) cause of Buddhahood, it is considered to be virtually an indispensable cause—a sine qua non. It determines the very nature of a bodhisattva. The question is: Is bodhicitta really indispensable in all forms of Mahāyāna Buddhism? I shall contend that the concept of bodhisattva is accentuated or presupposed in all forms of Mahāyāna, and that the idea of bodhicitta is as well. In other words, it will be argued that bodhicitta is explicitly or implicitly considered to be indispensable, both within traditions that propose or presuppose the validity of multiple spiritual dispositions and vehicles, and within others that propose or presuppose the validity of one ultimate spiritual disposition and one ultimate vehicle. The Bodhisattvabhūmi, which propounds the theory of five spiritual dispositions and three vehicles as final and valid, states explicitly that the generation of bodhicitta is indeed indispensable for the attainment of Buddhahood.273

Moreover, by generating that resolve, a bodhisattva gradually awakes completely unto the highest, perfect awakening, and by failing to do so does not, under any circumstances.274 Therefore, this generation of the resolve [to become a buddha] is the basis of the highest, perfect awakening.

If we view the structure of the Bodhisattvabhūmi as encapsulated in its synoptic verses (uddāna), we see that the work is conceived in such a way that its ten topics encompass the entire bodhisattva path (mārga) and its fruition (phala).275 In particular, gotra, citotpāda, and bodhisattvacaryāprayoga ('exertion in accomplishing the deeds of a bodhisattva') form an integral part of the first topic, called the 'substratum' (ādhāra).276 The gotra is conceived as indispensable for citotpāda, citotpāda indispensable for bodhisattvacaryāprayoga, and bodhisattvacaryāprayoga indispensable for Buddhahood.277 The Bodhisattvabhūmi, however, makes unequivocally clear that while the presence of the right gotra is no guarantee for the attainment of Buddhahood,278 the absence of such a gotra totally undermines the possibility of

273 Bodhisattvabhūmi 1.2 (§1.2.2).

274 Cf. Bodhisattvabhūmi 1.18 (WOGIHARA, pp. 290.24–291.2; DUTT, p. 197.10–13), where the generation of the resolve to become a buddha for the first time is counted as one of the five things a bodhisattva aspiring to complete awakening cannot afford to do without.

275 Bodhisattvabhūmi 1.1 (DUTT, p. 1.1–6): daśe me dharmāḥ saphalaśya bodhisattvamārgasya mahāyānasya samgrahidaya samvantaraṃ | katame daṣa | ādhaṭho līṅgāṃ pakṣo 'dhyāṣayo vihāra upapattih pari graho bhūmiḥ caryā pratiṣṭhā ca || uddānaṃ |

ādhaṭho līṅgāṃ pakṣo 'dhyāṣayo vihāra upapattih |
parigraho bhūmiḥ caryā pratiṣṭhā paścimaḥ bhavet ||

a līṅgāṃ em., līṅga DUTT, b pakṣo b em., pakṣādhvyāṣayavihāra WOGIHARA, DUTT. Note that the metre of pādas a and b in the uddāna verse is obviously an Aryā, but as it stands it is flawed. Gustav Roth has asked the question why this uddāna, which introduces the whole text, is of such an aberrant type. According to him, the structure of the introductory uddāna seems to be closely linked with the history of the composition as a whole (ROTH 1975/76: 171–172). Note that the Sanskrit text at the beginning of Bodhisattvabhūmi 1.1 does not appear in WOGIHARA.

276 Bodhisattvabhūmi 1.1 (DUTT, p. 1.7–8): "What is the [one] among these [called] the substratum? [It is] one's own spiritual disposition (i.e. that of a bodhisattva), the first act of generating the resolve [to become a buddha]; and all the factors having to do with the awakening are here called the substratum" (tatrādhaḥ katamaḥ | iha bodhisattvasya svagotaṃ prathamaṃ citotpādaḥ sarve ca bodhipaksāḥ dharmā ādhaṭhayta ity ucyate ).

277 See Bodhisattvabhūmi 1.1 (DUTT, pp. 1.8–2.3).

becoming a buddha.\textsuperscript{279} According to it, the excellence of the spiritual disposition (gotrasampad) is the first of the four prerequisites (hetu) for the arising of the resolve to become a buddha.\textsuperscript{280} It also makes clear that the first of the four causes (kārana) of the relapse (vyāvṛtti) of cittotpāda is not being endowed with the spiritual disposition (gotrasampanna) of a bodhisattva.\textsuperscript{281} This shows that a person without the bodhisattvagotra may generate bodhicitta and may temporarily even follow the path, but he or she is prone to relapse. What is important to note here is that works such as the Bodhisattvabhūmi do not question the validity of the bodhi of a śrāvaka saint or a pratyeakabuddha, nor do they contend that the generation of bodhicitta is mandatory for all who seek release from samsāra.

Other forms of Mahāyāna Buddhism, such as Madhyamaka, Prajñāpāramitā, Tathāgatagarbha, and Vajrayāna, all of which propose the validity of one ultimate spiritual disposition and one vehicle, would not reject the indispensable role of bodhicitta for the attainment of Buddhahood either. Those who maintain the immanence of buddha qualities in all sentient beings (and follow the revelation or nature model of soteriology) and those who do not accept the immanence of buddha qualities (and follow the generation or nurture model), may disagree in regard to what bodhicitta is or how it is brought about, but none of them would deny the indispensability of it. Nagarjuna’s Ratnāvalī states that those who wish to attain Buddhahood should rely on bodhicitta.\textsuperscript{282} Likewise, the Bodhicittavivarana ascribed to Nagarjuna asserts that the very best feature of Mahāyāna is bodhicitta and that other than bodhicitta no means of benefiting oneself and others has ever been discovered by the buddhas.\textsuperscript{283} Occasionally we may get the impression that the notion of bodhicitta is undermined in the Prajñāpāramitā sources, but, as already pointed out, if we consider the bodhisattva ideals proposed there, it should become clear that such a process is not meant as a denial of bodhicitta, but rather as an attempt to de-emotionalise the attitudes and actions of a bodhisattva. I may, however, point out what seems to be an anomaly. In the Āṅgulimāliyasūtra, one of the Mahāyāna sūtras expounding the tathāgatagarbha theory, it is

\textsuperscript{279} Bodhisattvabhūmi 1.1 (DUTT, p. 1.16–18; cf. WOGIHARA, p. 2.13–17): agotrasaṭṭhaḥ pudgalo gotre ‘sati cittotpāda ‘pi yatnasamāśraye saty abhayasya ca ānuttarāyāḥ samyaksambodheḥ pariśāraye; ibid. (WOGIHARA, p. 11.18–19; DUTT, p. 7.23–24): asati tu gotre sarveṇa sarvam sarvathā bodher apraptir eva veditavyā. For a discussion, see D’AMATO 2003.

The Sanskrit text is said to be extant in Tibet (or China) but not accessible. For an English translation, see LINDTNER 1997: 69. See also Bodhicaryāvatāra 4.3; CROSBY & SKILTON 1995: 25.
stated that one can become a bodhisattva by merely hearing the name of Buddha Śākyamuni.284

By merely hearing the name of Tathāgata Śākyamuni, one in whom the resolve [to become a buddha] has not [yet] arisen285 will become a bodhisattva.

Such a statement gives the impression that there is an alternative to bodhicitta, and if taken at face value could be problematic within the general Mahāyāna system. However, we know quite well that the main concern of such texts is not bodhicitta (in a conservative sense) but rather the tathāgatagarbha doctrine, and that their tone is fairly propagandistic. The firm conviction is that even if those who condemn the theory of tathāgatagarbha doctrine were to hear the name of Śākyamuni Buddha, they would become bodhisattvas and ultimately buddhas, on account of the aspirational wish made by him in the past. One may, of course, interpret this statement as meaning that hearing the name of Śākyamuni Buddha would cause bodhicitta to arise in one, for being a bodhisattva automatically implies possession of bodhicitta. This is essentially the same as in the cases where the resolve to become a buddha is made possible by hearing about the excellent qualities of a buddha. In any event, it will be instructive to collect more such passages, which seemingly bypass or subordinate the role of bodhicitta.

In general, the extent to which the role of bodhicitta is relativised or absolutised seems to depend on how narrow or broad bodhicitta is defined. If bodhicitta is understood in the narrow sense of the resolve to become a buddha (sometimes even oblivious of the need for compassion and discriminating insight), as apparently in Madhyamakāvatārā 1.1cd (where bodhicitta is juxtaposed to kṛpācitta and *advayamati), its role is accordingly relativised. But if it is understood in such a way as to incorporate all conative, emotive, and cognitive components, and as both the initial resolve and the resolve that accompanies all of the bodhisattva’s attitudes and actions at all stages of the path, then its role is absolutised, and it is regarded as the single necessary and sufficient condition for attaining Buddhahood. The idea of bodhicitta as such a condition is perhaps best demonstrated by dPal-sprul’s comparison of bodhicitta to a panacea, a single medicine for a hundred ills, which we encountered in chapter one.286

The question whether bodhicitta is indispensable also in the eyes of the Pure Land Buddhism, a form of Mahāyāna called by some the ‘school of devotionalism,’ according to which one can be assured entry into the pure realm of Sukhāvatī by invoking the grace of Buddha Amitābha (or Amitāyus) with absolute devotion, may best be answered by specialists. One could tentatively argue that the indispensability of bodhicitta is implied in Pure Land Buddhism by the idea of a bodhisattva propounded, for example, in the two sūtras called the Larger and Smaller Sukhāvatīvyūhasūtra. That is, to be born in Sukhāvatī means to become a bodhisattva (although perhaps not invariably, because śrāvakas are also said to exist there), and the idea of bodhisattva (as understood in the Mahāyāna sense) always implies bodhicitta. The fact that Pure Land Buddhism emphasises śraddhā (‘faith’) would pose no doctrinal inconsistencies, for, as I have tried to show above, Buddhism offers both faith-oriented and

284 Aṅgulimālīyasūtra (T, fol. 249a7; D, fol. 193b4): gang de bzhin gshegs pa shākya thub pa'i mshdan [add. de T] thos pa tsam gyis kyang sms ma skyes [bskyed D] pa yang byang chub sms dpars [dpa' T] 'gyur ro |].
285 According to the reading in D, “one who has not [yet] generated the resolve [to become a buddha].”
286 dPal-sprul’s use of the metaphor of the ‘sufficient white remedy’ (dkar po gcig thub) recalls the Tibetan controversies surrounding the issue of awakening by a single means (studied in JACKSON 1994 and 1990), and one cannot help but feel a subtle sense of irony. He seems to suggest that if there is any necessary and sufficient remedy in Mahāyāna Buddhism at all, it is bodhicitta and nothing else.
reason-oriented soteriological models. According to some Tibetan scholars, the generation of bodhicitta is considered to be one of the criteria for entry into Sukhāvati.\(^27\)

The indispensability of bodhicitta (in its most conservative meaning of the resolve to become a buddha) is also presupposed in Vajrayāna Buddhism. The Subāhupariprcchātantra states that one will be ruined if magical formulas (vidyā) and tantric commitments (samaya), without having compassion (karuṇā), without having generated bodhicitta, without having respect for buddhas, and by relying on other deities.\(^28\) The Vajrapānyabhisekatantra states:

\[O Maṇjuśrī, only those bodhisattvas who are engaged in the practice of bodhicitta and have become accomplished in bodhicitta should, O Maṇjuśrī—if they wish to resort to bodhisattva practices [involving] the methods (sgo) of Mantra[yāna]—be permitted into this manḍala of mnemonic formulas (dhārani) [employed] for initiating [candidates] into the great gnosis [or empowering them with it]. Those whose bodhicitta has not been perfected should not be permitted into the manḍala, and they should not even be permitted to look at it. They should not be shown the mudrās and mantras either.\]

Rong-zom-pa adds that the foundation stone (rdo gzhi) for the recipient of tantric teachings is endowment with bodhicitta.\(^29\) He also notes in passing that relying on bodhicitta in the effort to harness one’s body, speech, and mind to the yogic practice associated with tantric deities is endowment with (vidyā) and tantric commitments (samaya)—an idea shared by both the Kriyā and Yoga tantric systems—and that the Vajrapānyabhisekatantra seeks to reinforce this point by appealing to three authorities, namely, valid instructions (man ngag tshad ma), valid scriptures (lung tshad ma), and valid logical reasoning (rigs pa tshad ma).\(^30\) The Subāhupariprcchātantra for its part avers that the practitioner, having generated bodhicitta, should not resort to worldly deities in order to obtain the fruits of tantric accomplishment (siddhi);\(^31\) in order to obtain such fruits the practitioner should rather be the bearer of a stable

bodhicitta.293 The Vajraśīkhāratantra also makes it clear that in order to attain siddhi, the practitioner must generate bodhicitta, be without doubt, follow instructions, and have faith (śraddhā).294 A commentary on the Vairocanaśīhambodhitānta states that even those who are proficient in the tantras should be initiated only after practising bodhicitta.295 The stability of bodhicitta is considered by the Trisamayarāja to be one of the factors responsible for the success of mantras,296 although Santideva clarifies that the stability of bodhicitta as a prerequisite for the attainment of the goal is meant for worldly people (prthiṇijana), not for those on the bodhisattva stages.297 He further states that the force of bodhicitta (bodhicittavega) along with the force of faith (śraddhāvega) and similar factors is more important than the precision of mantra recitation.298 Indeed, not generating bodhicitta is often seen as one of the hindrances to the attainment of tantric accomplishments.299

- vicitkṣāṁ nātā kartavyā tasyedam siddhyati dhravum ||

For an English translation, see BENDALL & ROUSE 1922: 137.

297 Śīksāsamuccaya (BENDALL, p. 140.4–5; VAIYA, p. 77.30–31): bodhicittadṛṣṭāḥ cātā prthogjanaśacalacitatāyām niyāmārthāṁ uktā na tu bhūmi-pravīṣṭām adhikṛtyām || a Note that the Tibetan translation of the Śīksāsamuccaya (P, fol. 92b1; D, fol. 79a2–3; S, vol. 64, p. 1191.1–3) reads: so so [so’i DC] skye bo’i stobs dang idan pa, suggesting that the Tibetan translators read bala instead of cala.

298 Śīksāsamuccaya (BENDALL, p. 140.10–12; VAIYA, p. 78.2–3): kīm tu śraddhāvegam bodhicittavegam sarvotnāravegam ca pramāṇikṛtyāvīcārataḥ pravattitavyām avāsyaṃ buddhabodhisattvam iti haśva yathatāstiddhiḥ ca bhavati || a The Tibetan translation suggest here a different reading, perhaps bodhisattvasarvānām (byang chub sems dpa’ mthong ba). The exact meaning of the passage is, however, not clear to me. For an English translation of the passage, see BENDALL & ROUSE 1922: 137–138.

299 One of the four hindrances to the attainment of tantric accomplishments is not generating bodhicitta. See the mNyam sbyor ’grel pa (A, fol. 25b1; B, p. 485.8–9): dngos grub kyi gregs kyi rtsa ba byang chub kyi sems ma
(h) Benefits and Functions of Bodhicitta

Countless positive effects are attributed to bodhicitta. The Bodhisattvabhūmi, for example, presents six pairs of such effects that accrue to the bodhisattva from having generated bodhicitta. The first pair is the so-called two unique (lokāsādhārāṇa) qualities:300

These two are the unique, amazing, [and] extraordinary qualities of a bodhisattva who has firmly generated the initial resolve [to become a buddha]. What are the two? [a] [He] embraces301 all sentient beings as [though they were his] wife, and [b] yet is not tainted by the fault of having taken a wife. In this regard, the fault of taking a wife is this: the defiled gratification or hostility (kiśṭāmunrodhavirodha) that comes from the benefit [received or] detriment [sustained by one’s] wife. But these two are not found in a bodhisattva.

The second pair of benefits attributed to the bodhisattva who has generated bodhicitta is the two kinds of altruistic inclination (adhyāśaya):302

These two sublime altruistic inclinations of a bodhisattva who has firmly generated the initial resolve [to strive for] awakening [that are directed] towards the sentient beings originate-and-continue. [What are the two?]303 [a] An altruistic inclination [aimed at] benefitting (hitādhyāśaya) [sentient beings], and [b] an altruistic inclination [directed towards] the happiness (sukhādhyāśaya) [of sentient beings] as well.304 The altruistic inclination [aimed at] benefitting [sentient beings] consists in [his] being desirous of establishing [them] in a wholesome state (i.e. a state characterised by wholesome attitudes and activities) after first lifting [them] up out of an unwholesome state.305 The altruistic inclination [directed towards] the happiness [of sentient beings] consists in being desirous of providing gratifying things—

300 Bodhisattvabhūmi 1.2 (§4.1.0).

301 The choice of the verb parigṛhṇātī is noteworthy here because it means not only ‘to embrace’ and ‘to assist’ (among many other things), which fit the context better when sentient beings in general are the object, but also means ‘to take (a wife)’ or ‘to marry’ (MW, s.v. pari-vgrah). The pun, which is certainly intended, conveys the idea that a bodhisattva cares for all sentient beings as a man does for his wife but still remains unaffected by the worldly aspects of such a bond. This issue is addressed once again in Bodhisattvabhūmi 3.2 (WOGIHARA, p. 362.5–10; DUTT, p. 249.5–7): “Even upon his having first generated the resolve [to become a buddha], all sentient beings are embraced by a bodhisattva as [though they were his] wife. [He will make the following resolution:] ‘For them, all types of [resources required for] their benefit and happiness will be gathered by me to the best of [my] ability and to the best of [my] power.’ And [he indeed] does just that. This is the bodhisattva’s simultaneous embracing of all sentient beings” (prathama eva citośpade bodhisattvana sarvah sattvadhiitah kalatrabhāvena parigṛhṇāḥ | esām mayā yaihāsakti yaihābalam sarvakārahitasukhopasamhārah karaṇyā iti | tathaiva ca karo t | ayaṃ bodhisattvasya sakṛtsarvasatvaparigrhahāḥ |). This simile was already noted by DAVAL 1932: 63.

302 Bodhisattvabhūmi 1.2 (§4.2.0).

303 The Tibetan translation adds the question gnys gang zhe na (*katamau dvau) which is not found in any of the Sanskrit manuscripts.

304 The terms hitādhyāśaya and sukhādhyāśaya seem to be, respectively, synonymous with the terms hitāśaya and sukhaśaya, which are enumerated as two of the fifteen adhyāśayas in the Adhyāśalapatatā in Bodhisattvabhūmi 2.3 (WOGIHARA, p. 314.1–3; DUTT, p. 215.12–13). The two are defined there in the following manner: “The desire to confer wholesome virtues upon sentient beings is called benefit-directed altruistic zeal. The desire to confer favours (in matters concerning the present life) upon sentient beings is called happiness-directed altruistic zeal (sattvesu kuśalopasamhurtukāmatā hitāśaya iti ucyate | sattvesv anugrahopasamhurtukāmatā sukhaśaya ity ucyate |).

305 Note that the relative pronoun yā is used here and in the following paragraph (i.e. §4.2.0) as a periphrastic idiom and hence is not rendered in the English. See SPEUEER 1886: 352–353.
excluding defiling ones (i.e. things that lead to unwholesome attitudes or activities)—for sentient beings who are needy (vighāti), helpless (anāthāna), or without protection (apratisarāṇāna).

The third pair of benefits is the two kinds of exertion (prajñā): These two are the exertions (prajñā) of a bodhisattva who has firmly generated the initial resolve [to become a bodha]: [a] the exertion entailed by altruistic inclination (adhyātasastraprajñā), and [b] the exertion entailed by conduct (pratipatiprajñā). The exertion entailed by altruistic inclination is the daily enhancing of exactly the same altruistic inclination [just mentioned], [aimed at] benefiting [others] and [advancing] their happiness. The exertion entailed by conduct is the daily exertion of ripening one’s own buddha qualities (buddhadharmaparipākaprajñā) and the exertion of conferring benefit and happiness (hitasukhopasadikaprajñā) upon sentient beings by simply relying on the altruistic inclination to exert oneself to the best of [one’s] ability [and] with all [one’s] power.

The fourth pair of benefits is the two sources of income (āyadvāra) in the form of wholesome factors:

These two are great sources of income (āyadvāra) [in the form] of wholesome virtues (kuśaladharmas) in a bodhisattva who has firmly generated the initial resolve [to become a bodha]: [a] exertion for one’s own sake (svārthaprajñā), so that [one] completely attains the highest, perfect awakening, and [b] exertion for others’ sake (parārthaprajñā), so that all sentient beings are freed from all [types of] suffering (sarvadhikhannimokṣa). Just as the two sources of income [have been explained], so [too] should the two great gatherings of wholesome virtues, the two immeasurable (aprāmeṣa) heaps of wholesome qualities (kuśaladhammaskandhas), and so forth [be understood].

The fifth pair of benefits is the two kinds of superiority in terms of possessing wholesome virtues (kuśalaparīgrahavaiśeṣyā), which is explained as follows:

These two are the two [kinds of] superiority in terms of acquiring wholesome virtues (kuśalaparīgrahavaiśeṣyā) [required] for the awakening—ever since the initial generation of the resolve [to become a bodha]—of a bodhisattva who has [firmly] generated the initial resolve [to attain the state of] awakening, [the attainment of which stands out] when compared to the acquiring of wholesome virtues (kuśalaparīgrahas) other than that. [The two are]: [a] the

306 The Sanskrit text of these two definitions has been cited and translated into German by Mathrimurthi 1999: 238–239, n. 64, where he also discusses the term upasamharana at length.

307 Bodhisattvabhūmi 1.2 (§4.3.0).

308 Both Bodhisattvabhūmi 1.6 (Paripākapatala) and the ninth chapter of the Mahāyānasūtraśālākāra are devoted to the theme of ‘ripening’ (paripāka). According to the former, one of the twenty-seven strategies directed towards ripening (paripākapāya) is that of exertion (prajñā).

309 Bodhisattvabhūmi 1.2 (§4.1.0).

310 The Tibetan has yang here.

311 According to Edgerton (BHSD, s.v. peyāla), the Buddhist Hybrid Sanskrit word peyālam (probably an accusative adverb) occurs regularly, whereas the instrumental form peyālena is rarely found. He assumes peyālam to be a Middle Indic form (Pāli peyālam, for which see PED, s.v.) for the classical Sanskrit paryāya (in the accusative case). Following Edgerton, I have translated peyālam here as the equivalent of et cetera. However, the Tibetans have regularly translated it as sbyar ba ‘apply’ (e.g. Mahāvutpatti, no. 5435). Thus, de bzhin sbyar ba ‘applying similarly,’ gong ma bzhin du sbyar ba ‘applying as [stated] above,’ snga ma bzhin du sbyar ba ‘applying as [stated] earlier.’

312 Bodhisattvabhūmi 1.2 (§4.5.0).

313 WDN read upanidhāya; W reads upadhāya. In Sanskrit, the former reading means ‘having put down near to’ (MW, s.v.), and the latter ‘having placed or rested upon’ (MW, s.v.). Contextually, the reading upanidhāya, which in both Buddhist Hybrid Sanskrit (BHSD, s.v. upanidadhāti) and in Pāli means ‘comparing or drawing a comparison between,’ is definitely preferable here.
superiority of the cause (hetuvaiserusa) and [b] the superiority of the result (phalavaiserusa). This very acquiring of wholesome virtues (kuSulaparigraha) by a bodhisattva is the cause of the highest, perfect awakening—and this [highest, perfect awakening] is the result of it. [An acquiring] other than that, [315] [that is], the acquiring of all the wholesome virtues by śrāvakas and pratyekabuddhas, [315] is not [the cause of the highest, perfect awakening], and how much less (prāg eva) [the acquiring of the wholesome virtues] by sentient beings other than them! Therefore, the acquiring of wholesome virtues by bodhisattvas is distinguished from the acquiring of all wholesome virtues other than that [definable] in terms of causality and fruition.

The sixth pair, which is explicitly referred to as the two ‘benefits of generating resolve’ (cīrīpūdānusāmsa), is explained as follows: [316]

These two are the benefits of generating the resolve of a bodhisattva who has firmly generated the initial resolve [to become a buddha]: [a] On the one hand, immediately after the generation of the resolve, [he] becomes a [worthy recipient] of reverential offerings (dakṣināyabhūta), a venerable [person] (gurūbhūta), [316] a field of beneficial resources (punākṣetra) for all sentient beings, and like a father (piṭkalpa) [316] for the people, and [b] on the other hand, [he] comes into possession of beneficial resources that produce invulnerability. [320]

---

314 Note that WDN read na tadanyah, whereas P reads na tv anyah.

315 I am not certain if sarva in the compound sarvārāvakpratyekabuddhakusulaparigraha should be construed with kuśala or with śrāvakapratyekabuddha, as the Tibetan translation apparently does: nyan thos dang rang sangs gya s thams cads kyi dge ba yongs su ‘dzin pa.

316 Bodhisattvabhumī 1.2 (§4.6.0).

317 Cf. Bodhicaryāvatāra 1.9; Crosby & Skilton 1995: 5.

318 In general, the so-called ‘field’ (kṣetra) in such Buddhist contexts seems to be the domain (usually sentient beings, ordinary or transcendental) in which one can sow the seeds of either positive or negative thoughts or actions and from which one would consequently reap the corresponding beneficial or unpleasant fruits. Vasubandhu (Abhidharmakosābhadhyāya, p. 271.10) defines it thus: “[The object] upon which [the thoughts or acts of] benefit and harm are exercised is called the field” (kṣetram nāma yatra kārāpākarāh kriyante ). Four types of ideal ‘fields’ are mentioned (Abhidharmakosa 4.17ab): “The field is distinguished on account of the state of existence, suffering, benefit, and quality” (gatidukkopārikārtvagyaiḥ kṣetram viśisye ). Hence one may use the terms ‘field with reference to state of existence’ (*gatiksetra), ‘field with reference to suffering’ (*dukkharakṣetra), ‘field with reference to benefit’ (*upakāraksetra), and ‘field with reference to qualities’ (*gūnākṣetra), as is done by Yaśomitra (Abhidharmakosāvāyikhyā, p. 435.9; gatidukkopārikārtvagūnakṣetra). The compound gūnāpakārīkṣetra also occurs in Bodhicaryāvatāra 5.81cd. For the use of the terms sukṣetra and kukṣetra, see the Abhidharmakosāvāyikhyā (p. 463.23–29). In our passage, a bodhisattva is said to become the punyākṣetra of all sentient beings. However, it is equally true that all sentient beings may conversely be considered the punyākṣetra of the bodhisattvas, although the term used is sattvakṣetra (‘sentient beings who are the fields’) in contradistinction to jīnakṣetram (‘the Victorious Ones who are the fields’). See Bodhicaryāvatāra 6.122ab: sattvakṣetram jīnakṣetram ity ato muninātītaḥ; Crosby & Skilton 1995: 59-61. The term buddhakṣetra used in the Dharmasamgrhītiśūtra (cited in the Śīksāsamuccaya, Bendall, p. 153.7–8; Vaidya, p. 85.9–8) does not seem to be semantically identical with jīnakṣetram: “For a bodhisattva, the sentient beings [who are] the fields are the field of a buddha, and it is [that] field of the buddha from which buddha qualities are obtained” (sattvakṣetram bodhisattvasa buddhabhakṣetram yataḥ ca buddhabhakṣetṛd buddhadharmānām lābhāgam bhavati ). Here, buddhakṣetra does not seem to mean a ‘field [that is] a buddha’ but rather a ‘field [from which] buddha [qualities] can be obtained.’ Cf. Bendall & Rose 1922: 152. One also comes across other related terms elsewhere, such as siddhikṣetra in the Śīksāsamuccaya (Bendall, p. 155.7; Vaidya, p. 86.15): “There is no field of attainment [of Buddha qualities] in the world other than sentient beings” (siddhikṣetram nānyat satvabhyo vidyate jagati ). Cf. also Bodhicaryāvatāra 6.113–118; Crosby & Skilton 1995: 59–60.

319 See also Mahāyānasūrālaṃkāra 19.12–13, where a bodhisattva is said to be like a father to all sentient beings on account of five actions engaged in by him: “[1] On account of planting [seeds of] faith in all sentient beings at all times, [2] coaching [them] in ethical-moral discipline and so forth, and [3] directing [them] to freedom, [4] appealing to the buddhas [on their behalf], and [5] freeing them from hindrances. [In playing these] five kinds of roles, the Sons of the Victorious One are like a father to sentient beings” (sārādhyāyā sarvasatvaseṣa sarvadā cāvaroṣanāt | adhisthāṇīṣṭkṣāyām vimuktau ca nīyojanāt || buddhādhyeṣanataś caiṣām āvṛtes ca)
Chapter Five: Mahāyāna, Bodhisattva, and Bodhicitta

The beneficial resource that produces invulnerability is [i] one thanks to which a bodhisattva endowed with [it] is protected (lit. by a protection) twice as strongly as a universal king (cakravartidvīgūṇerakṣenarāksa). The protection [provided] by it (i.e. punya) being always present, wild animals (tyāda), malignant beings (yakṣa), demons (or perhaps ‘inhuman beings’) (amanuṣya), or monsters (naivāsika) are not able to do [him] any harm, even during sleep, insanity, [or] carelessness.

[ii] Further, this bodhisattva, who has exchanged [his] life [for another] (i.e. in his next and following lives), [will,] possessing as he does the beneficial resources, become someone who hardly suffers from disease, [someone who] is healthy by nature and [will] never be affected by either long-term or severe disease. And when he strains [himself] bodily for the sake of sentient beings, concerning the affairs of sentient beings, and expounds the teachings of sentient beings.

vivarjanāt | pañcabhīṣ karmaSabhīṣa sattvapitrkalpā jinātmajāḥ ||. See also the gunādhikāra of the Mahāyānasūtramānākāra, where a bodhisattva is compared to a mother (mārī), a relative (bandhu), a friend (mīra), a servant (dāsa), a teacher (ācārya), and a preceptor (upādhyāya) of sentient beings, based on corresponding sets of five roles that he plays.

320 For the term avyābādhyā, see CPD, s.v. avyāpajja, where two meanings are provided: (a) ‘not (to be) injured,’ and (b) ‘not injuring.’ Cf. also BHSD, s.v. avyābādhyā. In the Bodhisattvabhūmi, avyābādhyā has been used to refer to beneficial resources (punya) (as in this case), to happiness (sukha), and to a bodhisattva. See Bodhisattvabhūmi 1.3 (WOGIHARA, pp. 25.11–13, 26.9–12, 27.6–8; DUTT, pp. 17.14–15, 18.3–4, 18.17–18), ibid. 1.5 (WOGIHARA, p. 73.20–21; DUTT, p. 51.20–21).

321 In my division of the passage (i–v), I follow here Sāgaramegha’s Bodhisattvabhūmiśākyā (P, fol. 35a5–6; D, fol. 30b7; S, vol. 75, p. 679.15–16), who comments under five points on the advantages for a bodhisattva in possessing beneficial resources that produce invulnerability. According to him, such a bodhisattva enjoys: (i) invulnerability in this lifetime and the next, (ii) indefatigability (i.e. experiencing neither mental nor physical exhaustion), (iii) ideal physical and mental bases (i.e. being free from baseness), (iv) effectiveness of speech (i.e. mantras used by him are effective), and (v) magnanimity of mind (i.e. tolerance and benignity).

322 It should be noted that the text does not intend to imply here that a universal king (cakravartin) is defended or protected (ārakṣita), or needs protection at all. On the contrary, a universal king is portrayed as being invincible. He is said to be accompanied by a spontaneous presence of his armed forces at all times. See SCHMITHAUSEN 1999a: 55a.

323 W and MS N add ‘or human’ (manuṣyā vā). Nevertheless, its omission by D and MS P, and by both Chinese and Tibetan translations as well, is too significant to be brushed aside. I have the impression that manuṣyā vā could well be a secondary reading. The phrase could have been added by the scribe/s as a result of the erroneous presumption that manuṣyā vā must be preceded by its antithesis manuṣyā vā (as is commonly the case when listing classes of sentient beings). Contextually, however, the text obviously does not intend to provide such a list but rather to express the notion that a person who has generated the resolve to become a buddha is immune to harm caused by yakṣas or any potentially dangerous non-humans, even when in the most vulnerable states, such as sleep, insanity, or carelessness.

324 The word naivāsika as an adjective of nivāsa (PW, s.v. naivāsika)—also recorded by BHSD, s.v. naivāsika, PED, s.v. nevāsika and CPD, s.v. āvāsika—means ‘resident.’ Especially when referring to Buddhist monks, naivāsika is used in contradistinction to āgantuka ‘visiting.’ See CPD, s.vv. āgantuka and āvāsika. In the present context, however, naivāsika is used to denote a category of beings explained by Edgerton (BHSD, s.v. naivāsika) as ‘some sort of monster, python or the like.’ This meaning does not seem to be known in Pāli or in classical Sanskrit. The Tibetan translation does not appear to have taken naivāsika as a category of beings but rather as an adjective qualifying other categories, which may indicate that the manuscript(s) used by the Tibetan translators did not read vā after naivāsikā: gdu gpa’am gnod sbyin nam | mi ma yin pa gnyug mar gnas pa rnams kyis gte bar mi nus pa’o |. The Chinese translation has characters for ‘house spirit.’

(dharma) verbally, [his] body does not become at all exhausted, or [his] attention lax, [and his] concentrative thought (citta) does not deteriorate.

[iii] A bodhisattva who abides in [his] spiritual disposition (gotrastra) is, in the first place, of lesser baseness by [his] very nature. However, a bodhisattva who has generated the resolve [to become a buddha] (utpāditacittā) becomes of much less baseness, [as far as] the baseness of body (kāyadauṣṭhulya), the baseness of speech (vāgadauṣṭhulya), and the baseness of mind ( cittadauṣṭhulya) are concerned.

[iv] And even those magical formulas (mantrapada) and formulas of knowledge (vidyāpada)—[namely], the pacifiers of plague, calamities, [and] contagious diseases—that affect sentient beings—that were previously ineffective in the hands of sentient beings other than that bodhisattva, become effective [once they] have come into his hands. What need is there to speak of [formulas being] effective [in the hands of other sentient beings]!

[v] And [he] happens to be endowed with additional patience [and] benignity (ksaṇīsausraya). [He] is someone who endures the pain caused by others but who does not inflict pain on others. [He] is extremely distressed upon perceiving someone being hurt by somebody else. And [even if] his defilements, such as wrath, jealousy, deviousness, and evasiveness, occasionally arise in him, yet [their] impetus is impeded, and being weakened, [they] soon recede. And in whatever locale in the village [he] resides, the hitherto unarisen hazards of danger, terror, [and] famine and calamities caused by non-humans do not arise there, while [those that have already] arisen become pacified. Moreover, if a bodhisattva who has generated the initial resolve [to become a buddha] happens to be (re)born in the hell realms, the...
lower destinations, he is freed from hell very quickly, experiences the feeling of suffering less vehemently and generates intense agitation (samvega) (i.e. a great sense of renunciation) and compassion in his heart (karuṇācitta) towards these sentient beings, in virtue of possessing the beneficial resources that produce invulnerability.

In this way, a bodhisattva who has generated the initial resolve [to become a buddha] experiences many such benefits, because he possesses the beneficial resources that produce invulnerability.

One finds similar eulogies of bodhicitta in several other Mahāyāna sources. For example, it is said that all the remaining bodhisattva practices are ancillaries of bodhicitta. According to Atiśa, bodhicitta is that which causes the erosion of all lower modes of existence, release from all obstructions, and bestows the state of complete awakening. According to the Ratnakūṭasūtra, as cited in the Śikṣāsamuccaya, bodhicitta precedes all courses of actions of a bodhisattva. The Bodhicittavivarana states that the benefit of meditating upon bodhicitta even a moment cannot be estimated even by the Buddha, while precious bodhicitta free from intellectual-emotional defilements (kleśa) is the only supreme wealth that can be neither damaged nor stolen by any robber like Māra who takes the form of intellectual-emotional defilements (kleśamāra). In the Bhadrakalpitasūtra, it is stated that

333 Note that the Tibetan translation does not have an equivalent for the term narakebhyaḥ.

334 The term samvega translated as ‘perturbation’ (BHSD, s.v.) or as ‘eine heftige Gemüthsaufregung’ (PW, s.v.) does not seem to mean in a Buddhist spiritual context such as this any kind of normal agitation, but rather a specific sense of agitation at what Johnston calls ‘the inherent rottenness of the world’ (JOHNSTON 1936: 32, n. 4), and one which causes a person to renounce worldly aspirations and to seek spiritual goals such as Buddhahood. Note, however, that all editions of the Tibetan translation consulted read skye ba, which makes no sense. This faulty reading does not seem to reflect a mistake made by the translators, for in the preceding chapter (Gotrapatala) the contextually relevant expression adhīmāraṃ samvegam utpādayati (Bodhisattvabhūmi 1.1, WOIGHARA, p. 10.16–17; DUTT, p. 7.4) has been correctly translated as shas cher skyo ba bskyed par ‘gyur ro. Thus the misreading of the word skyo ba as skye ba, which can easily be explained orthographically, must have been made during the textual transmission, and that too, perhaps, at a relatively early stage, for all editions unanimously read skye ba. Repeated occurrences of words like skye ba and bskyed in the neighbouring text may have been the main reason why the editors of the various Tibetan editions did not become aware of the misreading. The reading skye ba does not make sense here, but since expressions such as skye ba'i skye ba (jātijāti) and skye ba skye ba (utpāda utpadyate) are not unknown to Tibetan scholars, they may have interpreted the adverb shin tu in the sentence skye ba yang shin tu skye bar ‘gyur ro as ‘repeatedly,’ thus reading ‘birth is also taken repeatedly.’ Having an acceptable, if improvable, reading, the editors doubtless felt no need to emend the text, let alone look for similar readings elsewhere in it.

335 Bodhicittavivarana 100: 
gzungs rnams dang ni sa rnams dang ||
sangs rgyas pha rol phyin gang dag ||
de dag byang chub sans kyi char ||
kun mkhyen rnams kyi gsungs pa yin ||

For an English translation, see LINDTNER 1997: 67.

336 Cittotpādasamvaravidhi (P, fol. 284a2; D, fol. 245a3; S, vol. 65, p. 667.5–7): 
ngan song thams cad 'jig pa dang ||
gsrib pa thams cad las grol zhing ||
rdzogs sangs go 'phang stsol mzas pa ||
byang chub sans la phyag 'tshal lo ||

338 Bodhicittavivarana 108–109: 
skye bu gang zhig skad cig tsam ||
byang chub sans ni sgom byed pa ||
the amount of merit acquired by generating *bodhicitta* once would surpass even the amount of merit accrued by providing happiness to all sentient beings for thousands of aeons.\(^339\) The generation of *bodhicitta* is also praised as one of the three best ways to honour and render service to the Buddha.\(^340\) The following stanza from the *Viradattaparipṛchchāsūtra* has often been cited by Indian and Tibetan authors to demonstrate the potentiality of *bodhicitta* to generate an immeasurable amount of merit:\(^341\)

If the beneficial resources [accrued] from *bodhicitta* were material,

They would fill the sphere of space, and would [even] exceed [it].

### 5. Concluding Remarks

The sum and substance of this rather long chapter is that *bodhicitta*—fundamentally, the desire to become a *buddha* for the sake of other *sattvas*—is what defines a *bodhisattva* and sets him apart from a normal *sattva*, and that the vehicle in which a *bodhisattva* (or a *sattva* with *bodhicitta*) advances is called Mahāyāna. We have also considered various models of vehicles corresponding to sentient beings with various predispositions and alternative destinations. According to the general Mahāyāna perception, the only way to Buddhahood is through Mahāyāna, the only person eligible to enter Mahāyāna is a *bodhisattva*, and the only factor that makes one a *bodhisattva* is *bodhicitta*. I have also tried to argue, albeit only briefly, that analysing the concept of *vajrasattva* may reveal at least a piece of the underlying philosophy of Vajrayāna or tantric Mahāyāna. Specifically, the notion that the quest for *bodhi*

\[\text{de phyir byang chub sens kyi bsod nams de la gzugs yod na}||\]

\[\text{nam mkha' bar snang de yang snod du chungs [chugs D] zhes rgyal bas mshungs par gsungs}||\]
in a sattva’s citta itself, and that the true nature of bodhi, citta, and sattva is one, indivisible, and indestructible, like a diamond (vajra), seems to be crucial for understanding the concepts of Vajrayāna, vajrasattva, and bodhicittavajra. An attempt has been made to trace the historical roots of the term bodhicitta and discuss its definitions, benefits, and functions on the basis of some of the most important Mahāyāna sources.
Chapter Six

The Two Bodhicittotpāda Traditions

Those who hold the reins of logical reasoning (nyāya) While riding the chariots (ratha) of the two systems (naya), Would, for that [very] reason, Earn the meaningful [appellation] 'Mahāyānīka.'

— Śāntarakṣita, Madhyamakālaṃkāra 93

1. Introductory Remarks

Sa-paṅ raised three important issues concerning the generation of bodhicitta by ritual procedure (vidhi). 2 Firstly, he made a case for recognising the existence of two ritual traditions relating to bodhicittotpāda, namely, that of the Yogācāra and that of the Madhyamaka, and argued for clearly distinguishing them from one another. Secondly, he critically examined the authenticity of generating absolute bodhicitta by means of ritual. Thirdly, Sa-paṅ criticised what he called the tradition of the ‘dream-based cittotpāda [rite]’ (sems bskyed rmi lam ma) attributed to dGe-bshes Phya-gsor-ba. 3 The two traditions of bodhicitta (or cittotpāda) seem to be of great significance for the theory and practice of the

For an English translation, see RHOTON 2002: 81. The ‘some’ (la la) in the verse has been identified by Gom-rams-pa bSod-nams-seng-ge (1429–1489) as dGe-bshes Phya-gsor-ba (RHOTON 2002: 92, n. 3; JACKSON 1994: 167–168, n. 343).
Indo-Tibetan Mahāyāna doctrine. I shall, therefore, attempt to present in this chapter an account of the Tibetan perceptions of the two bodhicittotpāda traditions, with particular reference to the ritual procedures of each. In the process, I shall demonstrate how some Tibetan scholars have sought to distinguish or pry apart the two traditions, whereas others have tried to harmonise or synthesise them.

2. The Two Bodhicittotpāda Traditions

It has widely been accepted in Tibet that two traditions of bodhicittotpāda once existed in India, and were designated, for example, by Sa-paṅga as the Madhyamaka tradition (dbu ma'i lugs) and Cittamātra tradition (sems tsam pa'i lugs). Some Tibetan authors have made a case for the need to keep these two traditions separate by emphasising their differences, whereas others have argued for a syncretism of the two by de-emphasising the same. Did two such traditions, however, indeed exist in India, or were they purely Tibetan inventions? While I am not sure whether the Indian authors actually employed the terms ‘Madhyamaka tradition’ and ‘Cittamātra tradition’ (which, although certainly justifiable, have for doctrinal reasons been found problematic by some Tibetan scholars), they clearly recognised the existence of two bodhicittotpāda traditions often associated with two distinct groups of textual authorities, such as the Bodhicaryāvatāra and Bodhisattvabhūmi, and personal authorities, such as Nāgārjuna and Asaṅgā. Moreover, the Tibetan attempts to segregate or syncretise the two traditions also seem to have their Indian antecedents.

Broadly speaking, two traditions of Mahāyāna Buddhism have existed in India, namely, Prajñāparamitā-Madhyamaka and Yogācāra-Tathāgatagarbha. Following Tibetan and some modern scholars, we may designate these traditions as the Mahājñāta-Nāgārjuna ‘negative-intellectual’ school and the Maitreya-Asaṅga ‘positive-mystical’ school, respectively, around which the entire history of the Tibetan reception and systematisation of Indian Mahāyāna Buddhism (including Vajrayāna) is, in one way or another, centred. For Indian scholars such as Śāntarakṣita and Kamalaśīla, the entire Mahāyāna doctrine can be contained in the dual systems (naya: tshul) of Yogācāra and Madhyamaka,7 which by and large correspond to the two pioneering Mahāyāna traditions designated by Tibetans (and probably based on Madhyamkālaṃkāra 93 cited above) as the ‘Two Chariots’ (shing rta gnyis).

In the context of bodhicitta or cittotpāda, too, as I have indicated in chapter four and shall show in chapter seven, two strands of Mahāyāna can be traced in Indian sources—designated by me as Strand A and Strand B—each of which seems to differ in its

---

4 It will be interesting to know whether any comparable doctrinal issue has been raised in other Mahāyāna traditions, such as Chinese or Japanese Buddhism.

6 For a discussion of the ‘negative-intellectual’ and ‘positive-mystical’ currents in India and Tibetan ways of dealing with them in the context of the tathāgatagarbha theory, see WANGCHUK 2004: 191–203.

7 For n. 1 and the Madhyamakālaṃkārayutta (P, fols. 79b7–80a3; D, fols. 79b7–80a3; S, vol. 62, pp. 964.20–965.10), where *Lankāvatārattra* 6.5 and 10.638 (see chapter five, n. 97) is also mentioned in this regard. See also Kamalaśīla’s Madhyamakālaṃkāraparijīkā (P, fol. 138b7; D, fol. 129b6; S, vol. 62, p. 1094.9–10) which states: *tshul gnyis zhes bya ba ni dbu ma pa dang rnal byor spyod pa zhes bya o* [the attempt to harmonise the positions of Nāgārjuna and Asaṅgā can be seen, for example, in Ratnakaraśānti’s Ratnālokālaṃkāra (P, fol. 340a6–b1; D, fol. 291b2–3; S, vol. 64, p. 807.8–12)]. See also SEYFORT RUEGG 1981: 122–124.
terminological preferences, perhaps also in regard to the place and time of inception and in its degree of conservatism. Strand A seems to more or less correspond to the Cittamātra tradition, and Strand B to the Madhyamaka tradition. This is particularly conspicuous if one compares the criteria for candidates as prescribed in the two traditions, a point to which we shall return. It is said that according to the Madhyamaka tradition one does not even need to be a human being in order to generate bodhicitta, whereas according to the Cittamātra tradition one is required to have taken some sort of prātimokṣa vow as a prerequisite. I believe that, disregarding the various Tibetan interpretations for the time being, this point simply shows that Strand A, which corresponds to the Cittamātra tradition, is conceived along less idealistic lines and is indeed quite realistic and down-to-earth in its approach. For example, the Bodhisattvabhūmi (which I said represents the textual tradition of Strand A) was very likely compiled for human beings who wanted to become bodhisattvas; the possibility of a nāga-king reading it was not entertained! I have, however, also mentioned that the two strands do not seem to have run parallel to each other all the way along, but merged at a certain point in time.

We should certainly like to know when and where the two traditions of bodhicittotpāda are explicitly spelt out for the first time in Tibet. Although Sa-paṅ was indeed responsible for emphasising the distinction between the two traditions, neither he nor his Indian teacher Śākyasrībhadrā (1140–1225)8 appear to have been the first scholar to introduce or thematise them. The position that Sa-paṅ criticised in his sDom gsum rab dbye must have existed even before his time. If the dating of bKa’-gdams-pa dGe-bshes Sha-ra-ba Yong-tan-grags (1070–1141)9 is correct, and if the relevant citations from his Lam rim10 are reliable, then there must have been a position that is similar to, if not identical with, the one proposed by Sa-paṅ, for it is precisely such a position that Sha-ra-ba seems to reject. We shall, however, return to this point later. Sha-ra-ba’s own position may be traced back to the works of Atiśa (or works ascribed to him), for Sha-ra-ba was a direct disciple of Po-to-ba Rin-chengsal (1031–1105), who in turn was a disciple of ’Brom-ston rGyal-ba’i-’byung-gnas (1005–1064), one of the three main Tibetan disciples of Atiśa. But what about the position that Sa-paṅ himself maintained? While Śākyasrībhadrā influenced Sa-paṅ in these matters, he had apparently not been his only source. In fact, Sa-paṅ’s response to the query of Chag Lo-tsa-ba Chos-rje-dpal, or simply Chag-lo (1197–1264), suggests that while Śākyasrībhadrā influenced Sa-paṅ in these matters, he had apparently not been his only source. In fact, Sa-paṅ’s response to the query of Chag Lo-tsā-ba Chos-rje-dpal, or simply Chag-lo (1197–1264), suggests that while Śākyasrībhadrā recognised the existence of the two traditions in India and disproved the mixture of the two, he did not in fact properly transmit either of them, for he had forgotten to bring the relevant manuals with him to Tibet. This suggests that the local Tibetans were already knowledgeable about the two traditions.11 Sa-paṅ seems to have thus thematised and systematised the two traditions of bodhicittotpāda known to his Indian and Tibetan predecessors.12

---

8 For some bibliographical details of Śākyasrībhadrā, see JACKSON 1987: 183. n. 24, and for accounts of Sa-paṅ’s studies with Śākyasrībhadrā and his disciples, see ibid. 26–27, 107–112; RHOTON 2002: 11–12.

9 SEYFORT RUEGG 2000: 26. See also Tshig mdzod chen mo, s.v. sha ra ba.

10 This may be what is also known as the Be’u ’bum dmar po (SEYFORT RUEGG 2000: 25–26). Cf. Tshig mdzod chen mo, s.vv. be’u bum khra bo and be’u bum sngon po.

11 In his response to the next query, Sa-paṅ once again underscores the differences between the two traditions. For the pertinent queries, see the Chag lo’i zhul ba (pp. 456.5–457.2). For Sa-paṅ’s responses, see the Chag lo’i zhul lan (pp. 463.1–466.5; 473.4–475.4). For an English translation, see RHOTON 2002: 215–218.

12 Sa-paṅ’s uncle Grags-pa-rgyal-mtshan (1147–1216), in his sKyabs sens cho ga (p. 438.3–5), discusses the custom of two lineages (brgyud pa gnyis kyi legs) in regard to the bodhicittotpāda ritual procedures. It is clear, however, that the two lineages in question are those of the Nāgārjuna-Nāropa and the Virūpa-Gayādhara lineages, and not to be equated with the Madhyamaka and Cittamātra traditions. Kong-sprul also notes that the
3. Tibetan Assessments of the Two Bodhicittotpāda Traditions

As I have just pointed out, the two strands of the bodhicittotpāda tradition had probably existed in Tibet prior to Sa-paṅ, although it was clearly he who spelled out the differences for the first time and thus left an indelible mark on the history of the bodhicitta doctrine in Tibet. This, however, by no means implies that Sa-paṅ’s view of this issue was received with unanimous approval. On the contrary, it received mixed reactions from various Tibetan scholars, whom I categorise into three groups:

(a) The first group comprises mainly mainstream Sa-skya-pas along with scholars from other traditions including the rNyin-ma scholars Klong-chen-pa13 and mNgag-'ris Pab-chchen Padma-dbang-rgyal (1487–1542) who looked upon Sa-paṅ’s proposition approvingly, and so for the most part followed the Madhyamaka tradition. Let us call this group, which emphasised the qualitative distinctions and other differences between the two bodhicittotpāda traditions, ‘Group A.’14

(b) Another group, which judged the two traditions of Nāgārjuna and Asaṅga to be of equal rank, seems to have viewed Sa-paṅ’s position with a certain degree of ambivalence. In principle, they probably had no difficulty with the distinction between the two traditions as such, only with the basis upon which the distinction was made, namely, the philosophical view (lta ba). Thus this group, while accepting the distinction, attempted to harmonise them. The shift of terminology from dbu ma'i lugs and sms tsam pa'i lugs to zab mo lta ba'i srol and ryga chen sbyod pa'i srol, respectively, is, in my view, not coincidental. We shall call this group ‘Group B.’

(c) The third group represents the rival position towards which Sa-paṅ’s critique was directed, namely, the followers of the bKa'-'gams-pa tradition (such as Sha-ra-ba) and their successors, primarily the dGe-lugs-pas. Sha-ra-ba argued that if the bodhicittotpāda ritual taught by Asaṅga had been exclusively according to the Cittamātra tradition, the Mādhyamikas would not have followed it, but Atiśa, who was a Mādhyamika, did. In addition, Kamalāśīla, who was also a Mādhyamika, explained in his Second Bhāvanākrama the generation of the resolve to strive for awakening according to the ritual taught in the Śīlapatīla of the Bodhisattvabhiṃa (ascribed to Asaṅga). Therefore, for Sha-ra-ba, the difference between the two traditions is unclear or superfluous.15 One of the main concerns of this group seems to be to associate Atiśa and the bKa'-'gams-pas with the Cittamātra tradition. This group obviously makes a case for the syncretism of the two traditions by adopting two strategies, namely, (i) by arguing that the two traditions are essentially the same and that the claims regarding the dissimilarities between them is not justified, for they see no

Sa-skya-pas have yet another Madhyamaka-like bodhicittotpāda tradition transmitted from Virūpa and Nāropa, which is, however, not counted as a third tradition. See the Shes bya mdzod (p. 354.18–20); yang grub chen bi rū pa dang nā rō pa'i gdamgs ngag rje byung skya pa chen po la bka' babs pa dbang gi sngon 'gro'i sms bsksmed kyi cho ga dbu ma dang cha mthun pa zur du bsrgugs kyang shing rta'i ring srol logs su mi bgrang ngo ||.

13 It must be said, however, that although Klong-chen-pa mainly followed the Madhyamaka tradition, a slight tendency to harmonise the two bodhicittotpāda traditions can be noticed in his writings.

14 Shes bya mdzod (p. 354.13–15): bod 'dir klu thogs rnam gnyis dbu sms lta bu'i rkang bsugs mghan du bzhed pa mang bas sms bsksmed lugs gnyis kyang dbu sms kyi lugs gnyis zhes shin tu tha dad cing mchog dman che bar mdaṣad la....

15 sPyod 'grel bum bzang (pp. 130.22–131.3): lugs de gnyis la dbu ma lugs dang sms tsam lugs kyi thāa snyad mdaṣad pa sogs mi 'thad par dge bshes sha ra ba'i lam rim du bshad do || de nyid las || lta ba tha dad pas kyang khyad par de dag sgrub par mi nus pas dbu ma pa dang sms tsam gyi sms bsksmed pa gnyis mi mthun par 'dod pa gzhung gi dgongs pa ma yin no || zhes dang 'phags pa thogs med kyi gsungs pa'i cho ga sms tsam kha na'i lugs su nges na dbu ma pas de mi byed par 'gyur na || jo bo rje dbu ma pa yin yang cho ga de'i lugs su mdaṣad pa dang || slob dpon ka ma la sht la sgom rim bar pa las tshul khrims le'u las bstan pa'i cho gas sms bsksmed par bshad pas lugs nges pa med par gsal lo || zhes gsungs |
basis of such dissimilarities, and (ii) by pointing out that such a syncretic tradition has its Indian antecedent, which, according to them, was practised by various Indian masters such as Bodhibhadra, Abhayākaragupta, and Atiśa. The line of demarcation that Sa-paṅ drew between the two bodhicittotpāda traditions seems to have put this group into a state of doctrinal discomfiture, and it wanted this line deleted. We shall call the third group ‘Group C.’ Followers of sGam-po-pa such as Kun-mkhyen Padma-dkar-po (1527–1592) and dPa’-bo gTsug-lag-phreng-ba (1504–1564/1566) also belong to this group, which rejects any difference as far as both terminologies and contents are concerned. Padma-dkar-po even resorted to authoritative scriptures and logical reasoning to establish the uniformity and equality of the two traditions and to criticise the position which held the two traditions to be separate and qualitatively different. In the following few paragraphs, we shall take a closer look at each of the attributed distinctions between the two traditions and see how each is assessed, broadly speaking, by these three different groups of scholars.

4. The Names of the Two Bodhicittotpāda Traditions

The first issue I should like to discuss is the terminology used to designate the two traditions, which, as I have already noted, may vary from one group to another. As indicated above, it is doubtful whether any of the terminologies employed by Tibetan scholars to do so can be traced as such to Indian sources. Group A, represented by Sa-paṅ, labelled the two as the Madhyamaka and Cittamātra traditions. This is easily justifiable if, as one is very inclined to accept, the Bodhicaryavatāra by Sāntideva is regarded as a Madhyamaka work, and the Bodhisattvabhāumi, attributed to Asaṅga by the Indo-Tibetan tradition as a Yogācāra work. However, it seems that the designation of the Maitreya-Asaṅga tradition as Cittamātra was found by Group B to be imprecise, or perhaps denigrating, since the Cittamātra or Yogācāra system is considered only second in rank in the fourfold Buddhist doxographical schema. The less-favoured term ‘Cittamātra tradition’ was therefore replaced by the term ‘Tradition of Vast Conduct’ (rgya chen spyon pa’i srol), while the Mañjuśrī-Nāgarjuna tradition came to be called the ‘Tradition of the Profound View’ (zab mo lta ba’i srol). Group C rejected the terms ‘Cittamātra tradition’ and ‘Madhyamaka tradition’ in deference to dGe-bshes Sha-ra-ba’s Lam rim, according to which Atiśa (in his commentary on the Bodhipathapradīpa) made a distinction between the ritual procedure of bodhicittotpāda and that of the bodhisattva vow.

16 Tsong-kha-pa is said to have maintained that the Indian masters Bodhibhadra and Abhayākaragupta performed the bodhicittotpāda ritual as a mixture of the two traditions. See the sPyod 'grel 'bum bzang (p. 131.4–5): gzhan yang slob dpon byang chub bzang po dang mkhas pa chen po a bhyā [‘bha yā] ka rabs shing rta chen po gnis kyi lugs bses nas mdzad pa dang [, Cf. the Shes bya mdzod (p. 354.16): slob dpon a bha yas [‘yās] de gnis khyad par med par bzhed la ].

17 Shes bya mdzod (p. 354.16–18): kun mkhyen pad dkar zhab sogs kyi sbyor de mthungs su sgrub cing snga ma la lung rigs kyi ‘gog par mdzad | dpal ldan gtsug lag phreng ba sogs kyang rje sgam po ba’i rjes su ‘brang ngo || Padma-dkar-po’s discussion of the two bodhicittotpāda traditions in general can be found in his sDom gsum snying po (pp. 358.5–558.2); sDom gsum rgyan (pp. 604.3–611.3); sDom gsum rgyan ‘grel II (pp. 6.6–99.2). The position of gTsug-lag-phreng-ba regarding the two traditions can be found in his sPyod ‘jug rnam bshad (pp. 52.2–55.1).

18 These designations are used, for example, by mNga’-ris Pan-chen. See his sDom gsum rnam nges (p. 20.1–2): ‘jam dbyangs bka’ bsdu sbyor sogs kyi bskral || zhi ba lhas sgrub zab mo lta ba’i lugs || byams pas bka’ bsdu thogs med sku mchad bskral || jo bo rjes sgrub rgya chen spyan pa’i srol ||. Padma-dkar-po (sDom gsum rgyan, p. 604.3–4), however, uses terms such as the ‘Two Traditions of the Great Chariots’ (shing rta chen po’i srol gnis), specified in his sDom gsum snying po (p. 538.5–6) as the ‘Route of the Vast Conduct’ (rgya chen spyon pa’i phyogs) and the ‘Route of the Profound View’ (zab mo lta ba’i phyogs).
but since his own tradition in this regard accords with the traditions (lugs) of Nāgārjuna, Asaṅga, and Śāntideva, there is in reality (don la) no difference between the bodhicittotpāda ritual procedures of Nāgārjuna and Asaṅga.¹⁹ This is why the terms ‘Tradition of the Profound View’ and ‘Tradition of Vast Conduct’ are preferable from the standpoint of Group C. It will be interesting to find out when these terms were used for the first time in Tibet, and whether they can be traced in Indian literature.²⁰

Gro-lung-pa Blo-gros-'byung-gnas (fl. the second half of the eleventh century and early twelfth century), in his bsTan rim chen mo,²¹ obviously recognised these two traditions of the bodhicittotpāda ritual procedures, but he did not use the terms ‘Cittātmātra tradition’ and ‘Madhyamaka tradition.’²² This is also the case in the Dwags po thar rgyan.²³ Both Gro-lung-pa and sGam-po-pa have apparently followed the Bodhimārgapradāpipaṇijīka (ascribed to Atiṣa)²⁴ in this regard. Gro-lung-pa, however, mentions Atiṣa in the lineage of the Maitreyan tradition. In the following, I shall employ the terms ‘Maṇjuśrī-Nāgārjuna tradition’ and ‘Maitreya-Asaṅga tradition’ instead of the designations ‘Tradition of the Profound View’ and ‘Tradition of Vast Conduct’ or the designations ‘Madhyamaka Tradition’ and ‘Cittātmātra Tradition’ employed by Tibetan scholars.

¹⁹ sPyod 'grel bum bzang (p. 130.19–21): jo bos sens bskyed dang sdom pa'i cho ga so sor mzdad la de yang shing rta chen po klu sgrub thogs med gyis dang rgyal sras zhi ba'i lha dang gsum ka'i lugs yin par lam sgron 'grel pa gsungs pas na klu thogs gyis sdom pa len pa'i cho ga la don la khyad par med do ||. Atiṣa outlines positions of several Indian masters in the Bodhimārgapradāpipaṇijīka (P, fols. 287b2–288b3; D, fols. 249b3–250b1; S, vol. 64, pp. 1670.21–1673.3; SHERBURNE 2000: 72–73), and adds that, according to his masters, one should follow the traditions one has received from one’s guru and that since his own gurus, Bodhíchadra and Suvamādhvipa, followed the traditions of Nāgārjuna, Asaṅga, and Śāntideva, he does the same. He explicitly states that the bodhicittotpāda ritual procedure he has written is in accordance with the traditions of these three masters. See ibid. (P, fol. 288b3–7; D, fol. 250b1–4; S, vol. 64, p. 1673.3–14).

²⁰ Of course, compounds such as gambhirodāra (zab cing rgya che ba) and gambhirodāradhārma (zab cing rgya che la/ba/i sens) inasmuch as it is understood as a cīta directed towards gambhirodāradhārma having the nature of emptiness and compassion (śyāntākarunātmaka). See the Vimalaprabhā ad 3.4 (vol. 2, p. 7.12–13; TSD, s.v. zab cing rgya che la sens): iti gambhirodāradharme śyāntākarunātmake cītan yasya sa gambhirodāracitta iti.... Also note that Mahāyāna has already been described as extremely vast and profound by Nāgārjuna (RāDryāvali 4.79): atyaudāryātigambhiryād viśaṇṇaṃ akṭūmabhīḥ nindyaite 'dya mahāyānaṃ mohāt svaparavaibhīḥ ||.

²² bsTan rim chen mo (fol. 205b4–5): ‘di la dam pa'i skye bo mkhas pa dag gis lung so so la brten pa bla ma bryud pa'i man ngag cho ga'i tshul tha dad pa du ma snang ste sloph dpon rje btsun dpal mar me mzdad ye shes kyis ni mgon po byams pa nas bla ma gser gling pa la thug pa'i man ngag bryud pa las.... See also ibid. (fol. 206a2): sloph dpon byang chub sems dpa' zhi ba las ni bden pa gzigs pa'i slob dpon klu sgrub nas bryud pa'i man ngag las....

²³ sGam-po-pa speaks about the Śāntideva tradition transmitted in succession from Nāgārjuna and the Suvamādhvipa tradition transmitted in succession from Maitreyan and Asaṅga. See the Dwags po thar rgyan (p. 145.12–18): byang chub kyi sens de blang ba'i cho ga ni | bla ma mmahas pa dag gi bryud pa'i man ngag las | tshul lugs tha dad pa du ma snang nga || de liar snang yang ni | 'dir 'pha's pa jam dpal nas sloph dpon klu sgrub na mar la bryud pa sloph dpon zhi ba la'i lugs dang | 'pha's pa byams pa nas sloph dpon thogs med na mar bryud pa | jo bo gser gling pa'i lugs dang gyis su shes par bya'o ||. See also the Shes bya mzdod (p. 354.15–16): rje zla 'od gzhon dus dbu shes kyi ming ma biags ||.

²⁴ See SEYFORT RUEGG 1989: 104, where it is stated that the Bodhipathapradāpipaṇijīka [\textit{= Bodhimārgapradāpipaṇijīka}] is perhaps incorrectly ascribed to Atiṣa.
5. The Two Bodhicittotpāda Traditions: The Basis of the Distinctions

Let us now consider what the distinctions made between the two traditions are based on. Group A, again represented by Sa-paJ!, maintained that the philosophical-doctrinal view (lta ba) was the basis for distinguishing between the two traditions. Group B has rejected this claim, either implicitly or explicitly. For it there is no qualitative difference between the philosophical-doctrinal views of the Mañjuśrī-Nāgārjuna and the Maitreya-Asaṅga traditions. In this context, mKhan-po Yon-tan-rgya-mtsho (b. nineteenth century), (who, I believe, represents Group B) notes that the rNying-ma philosophical-doctrinal view accords with the Madhyamaka view professed by both traditions. That is, according to him, Asaṅga, too, had maintained a Madhyamaka view. He adds that this does not contradict the fact that Asaṅga mainly taught Yogācāra doctrines. For Sha-ra-ba (who in retrospect represents Group C), the two traditions may differ in their philosophical-doctrinal views but not in their bodhicittotpāda ritual. The philosophical-doctrinal view has always been a complicated and sensitive issue. All three groups would agree, though, that the philosophical-doctrinal view of the Yogācāra or Cittamātra system takes second place to the Madhyamaka view. The dispute is, therefore, not really about ‘rescuing’ or promoting the status of Yogācāra.

Varying motives seem to be behind these disputes, and often it is the pursuit of subtle doctrinal agendas. The reason why Group B cannot accept the philosophical-doctrinal view as the basis of the distinctions between the two traditions is that such a basis implies a qualitative difference between the philosophical-doctrinal views of the two traditions. That is, if Asaṅga’s tradition is regarded as the Yogācāra tradition, this would imply that his tradition is qualitatively inferior to that of Nāgārjuna. The motive of Group B, therefore, is to preserve the prestige of Asaṅga’s view by detaching it from the Yogācāra view and thus give it due place of honour alongside Nāgārjuna’s view, namely, Madhyamaka. The question now comes down to what the Madhyamaka view is—a question representing the tip of the iceberg of the complex Tibetan controversy over ‘intrinsic’ and ‘extrinsic’ emptiness (rang stong and gzhan stong). The primary motive of Group C for rejecting the basis of the distinction seems to be still another: not to raise the status of Asaṅga’s view but rather to preclude any association of Atiśa’s bodhicittotpāda tradition with Asaṅga’s, and thus with Yogācāra.

6. The Two Bodhicittotpāda Traditions: Personal Authorities

A second distinction between the two traditions can be made on the basis of the pertinent personal authorities in India and their followers in Tibet. The ‘Tradition of the Profound View’ is said to have come down from Mañjuśrī and been transmitted to the Sa-skya-pas. Thus it is quite justifiably designated as the ‘Mañjuśrī-Nāgārjuna tradition.’ The ‘Tradition of Vast Conduct’ is said to go back to Maitreya and Asaṅga and to have been passed down to the

See also RHOTON 2002: 81.

26 Rig ’dzin ’jug ngogs (p. 120.9–13): lta ba ni srol gnyis ka dang mthin par snang ngo || de yang rgya chen spyod pa’i srol ‘byed pa por grags pa’i ‘phags pa thogs med sogz kyi lta ba dbu mar nges kyang grub mtha’ gdul bya rnamz kyi ngor sms sems tsam du bkral ba shas che yang ’gal ba med do ||.

27 Shes bya mdzod (p. 354.7–9): dang po ni | rje btsun ‘jam dbyangs nas ‘phags pa klu sgrub yab sras la brgyud de rgyal sras zhi ba lha’i phyaq srol jo bo pu nye [= nya] shri las byung ba rje btsun sa skya pa rnamz kyi phyaq len du mdzad pa ‘di nyid yin la |.
bKa'-gdams-pas and Dwags-po bKa'-brgyud-pas. Thus the designation ‘Maitreya-Asaṅga tradition’ is from this traditional point of view also quite justified. mNga'-ris Pañ-chen states that the tradition inspired by Padmasambhava conforms to Nāgārjuna’s tradition. He is, it is clear, making a fine distinction here. He is not claiming that Padmasambhava’s tradition is identical with Nāgārjuna’s. There is good reason for this intended nuance. The issue of lineage in the rNyin-ma tradition is, in general, a delicate one. Yon-tan-tṣga-mtsho also explains that the rNyin-ma boddhisattva tradition, that is, the boddhisattva ritual prescribed in the rNyin-ma tantras, along with most of the precepts that follow from it, is in conformity with Nāgārjuna’s tradition. The distinction between the two traditions in terms of personal authorities and followers may be expressed thus in tabular form:

<table>
<thead>
<tr>
<th>Personal Authorities</th>
<th>Mañjuśrī-Nāgārjuna Tradition</th>
<th>Maitreya-Asaṅga Tradition</th>
</tr>

Group C, consisting of the followers of or other persons connected with the Old and New bKa'-gdams-pa traditions, cannot, of course, accept the distinction presented above, particularly in view of the fact that the proposed distinction excludes Atiśa from the ‘Tradition of the Profound View.’ As already stated, according to this group, Atiśa inherited the traditions of both Nāgārjuna and Asaṅga.

7. The Two Bodhicittotpāda Traditions: Scriptural Authorities

In the bsTan-'gyur, we find some practical manuals describing the ritual procedure for conferring bodhisattva vows. One such manual is attributed to Nāgārjuna, one to Bodhībhadra, one to Jetūri, one to Atiśa, and one to Abhayakaragupta. There is also one manual by Mañjuśrīmitra and one by an anonymous author. Furthermore, short manuals attributed to Nagarjuna and Asaṅga, such as the bodhicittotpāda and bodhisattva rituals, were also present in the rNyin-ma tradition.

30 Rig 'dzin 'jug ngogs (p. 120.6-9): padma sam [= sam] bha ba'i rjes su 'jug pa snga 'gyur gyi ring lugs pa rnams ni sngags kyi rgyud sde rnams las gsums pa'i byang sdom gyi thob tshul dang | de'i bslab bya'i rkang grangs phal cher nā gā rdzu na'i lugs dang mthun pa'i gnad kyi de dang mthun la ....

31 Bodhicittotpādavidhi (P 5361; D 3966; S 3197, vol. 65).

32 Bodhisattvasamvaravidhi (P 5362; D 3967; S 3198, vol. 65).

33 Bodhicittotpādasamādānavidhi (P 5363; D 3968; S 3199, vol. 65). According to Sa-pan's answer (no. 8) to the query of Chag-lo, this must be Jetūri's manual of bodhicittotpāda rites (in accordance with the Madhyamaka tradition), which Śākyāśrībhadra forgot to take with him to Tibet (Rhoton 2002: 216).

34 Cittotpādasamvaravidhi (P 5403; D 4490; S 3200, vol. 65).

35 Bodhisattvasamvaragranavidhi (P 5365; D 3970; S 3201, vol. 65). This must be the ritual text which Chag-lo said was used by Abhayāśrīkaraṇa to confer the bodhisattva precepts upon all people, and which was not seen by Sa-pan. See the eighth question posed by Chag-lo to Sa-pan (Rhoton 2002: 215–216).
manuals can be found imbedded in other works. The dBu ma'i lugs kyi sems bskyed kyi cho ga by Sa-pan may be one of the earliest among the numerous ritual manuals for bestowing and taking the bodhisattva vow composed in Tibet (all of them cannot be mentioned here). It must be said that, strictly speaking, most of these manuals are not compositions but rather compilations, for the greater part of such texts merely consists of passages or verses found in Indian sources, the most popular being verses from Sántideva’s Bodhicaryāvatāra. There are several reasons why we cannot find one uniform and standardised bodhicittotpāda manual, the most important being variations in the performance of the rituals. Occasionally such texts would consist of only the minimum necessary components of the procedure. The bodhicittotpāda ritual prescribed in the Bodhisattvabhūmi may be one of the oldest, if not the oldest, of its kind. The scriptural authorities associated with the two traditions are as follows:

8. The Historical Background of the Bodhicittotpāda Ritual

Before I move on to discuss the likely doctrinal and historical background of the bodhicittotpāda ritual, it is perhaps necessary to devote a few words to the term ‘ritual procedure’ or ‘ritual’. I use the expression ‘ritual procedure’ in the sense of the Sanskrit term vidhi, which can (among other things) mean ‘method, manner or way of acting’ or ‘any prescribed act or rite or ceremony.’ The term vidhi has been translated into Tibetan as cho

---

36 Mañjuśrīmitra’s Cittotpāpadavidhi (P 3388; D 2561; S 1467, vol. 33) is found in the tantric section of the bsTan-'gyur. The names of the translators are not given in the colophon.

37 The Cittotpādasamāskiptavidhi (P 4743; S 2619, vol. 43) by an anonymous author is not found in the sDe-dge bsTan-'gyur. Cf. the 'Phang thang ma (p. 33.10), where a certain Byang chub tu sems bskyed pa (containing forty-seven ślokas) is mentioned.

38 See, for example, the Trisamvarakrama (P, fol. 304a7–b4; D, fol. 258a1–5; S, vol. 65, pp. 714.14–715.8) and the Caturangadharmacaryā (P, fol. 298a2–8; D, fol. 258b1–4; S, vol. 65, p. 718.7–11).

41 The śāstra sources are mentioned by Kong-sprul in his Shes bya mdzod (p. 354.9–10): de’ang klu sgrub kyi sems bskyed kyi cho ga dang | dze tā ri'i yi dam blangs pa'i cho ga dang | zhi ba lha'i spyod 'jug bslab btsos las 'byung ba litar ro ||. Note that Sa-pan did not mention the Bodhicittotpāpadavidhi attributed to Nāgārjuna and the Śākyasamuccaya explicitly by name but simply stated that the Madhyamaka tradition relating to bodhicittotpāda can be found also in the writings of Nāgārjuna and Sántideva (sDom gsum rab dbye 2.11cd; RHOTON 2002: 82).

42 Shes bya mdzod (p. 354.13): de'ang byang sa dang sdom pa nyi shu pa soogs las 'byung ba litar ro ||.

43 MW, s.v. vidhi. See also the PW (s.v.) particularly in the sense of (b) ‘Verfahren, Weise, Art’ or (e) ‘ein feierlicher Act, Ceremonie’.
which commonly means ‘the way or method of doing a thing.’ Jäschke, however, expressed doubt as to whether the term can be used safely to mean religious rites or ceremonies in general. The term ‘ritual’ is defined or described in the *Encyclopaedia Britannica* as ‘the performance of ceremonial acts prescribed by tradition or by sacerdotal decree.’

Buddhism in general is not a ritual-oriented religion. It has been already pointed out that early Buddhism (according to the canonical texts) rejected Vedic-Brahmanical ritualism. Buddhist criticism was directed particularly against two aspects of ritualism: (a) the externality of ritual performances such as washing and their ineffectiveness regarding the post-death state or salvation, and (b) the killing of living animals, felling of trees, and razing of grass, which are incompatible with Buddhist ethics. Two types of reaction occurred: (1) the introduction of bloodless rituals (including ‘non-injury of plants’) as substitutes, and (2) the ethicising or spiritualising of rituals in the sense that the word ‘sacrifice’ (*yañña*) has been retained but *de facto* the ritual has been replaced by such practices as donations, the observation of moral codes and spiritual practices on the actual path of salvation. The former reaction led, in course of time, to more and more ritual elements gaining admission in or toleration by Buddhism. It may have also even led, in certain strands of development, to a reverse process. That is, contrary to the old tendency of replacing rituals with moral and spiritual practices, moral and spiritual practices have been ritualised or even repressed. Thus several kinds of ritual can be found in the Vinaya tradition, not to mention ones in Mahāyāna Buddhism, particularly in Vajrayāna. Several types of texts that are entitled ‘ritual procedure’ (*vidhi*) can be found in the bsTan-'gyur, including ritual procedures for the confession of transgressions (*āpattidesānavidhi*), consecrations (*pratiśṭhāvidhi*), [tantric] configurations (*mandalavidhi*), sacrificial fires (*homavidhi*), [offerings of] sacrificial cakes (*balividhi*), [tantric] initiations (*abhiśekavidhi*), [ritual] baths (*snānavidhi*), and feast [offerings] (*ganacakravidhi*).

For our purposes here, I shall define the ‘ritual procedure for the generation of the resolve [to strive for] awakening’ (*bodhicittotpādavidhi*) as ‘a modus operandi for formally generating bodhicitta or for taking the bodhisattva vow (*bodhisattvasamvara*)—individually or collectively, with or without an officiant, for the first or nth time—which has a beginning (or preparatory phase), a middle (or main phase), and an end (or concluding phase), and during which the candidate is involved mentally, verbally, and physically.’ The middle or main part may be seen as the compact nucleus of the ritual. The whole may be incorporated into other tantric and non-tantric Mahāyāna rituals, and may even take place in totally unritualised or minimally ritualised contexts. Rituals are, I believe, tendentially spontaneous and simple by nature, although they may start off complex and be simplified or otherwise modified. One may categorise *bodhicittotpādavidhi* into two types: (a) one that is self-contained and complete in itself, whether used for the generation of bodhicitta or the bestowal and assumption of the bodhisattva vow, and (b) another which has been incorporated into and become an integral part of a whole ritual of much broader dimensions. The one we are concerned with here is the former kind.

---

44 Of course, several synonyms and near synonyms of *vidhi* (e.g. *vidhāna*, *samvidhāna*, *kalpa*, *ācāra*, *cārīra*, *upacāra*, *prayoga*, and *tantra*) have also been translated into Tibetan as *cho ga* (see TSD, s.v.).

45 See JÄSCHKE 1881, s.v. *cho ga*.

46 For an outline of the leading theories of ritual over the past century and a discussion of the role of ritual in Zen Buddhism, which has long been regarded as the least ritualised form of Buddhism, see SHARF 2005.

Chapter Six: The Two Bodhicittotpāda Traditions

Like the concept of bodhicitta itself, the bodhicittotpāda ritual must have a history of its own. The ritual of taking the bodhisatvatva vow may have been modelled on the procedure of taking the prātimoksa vows of the Vinaya tradition. The Vinaya sources known in Tibet speak broadly of two kinds of procedures for ordination: (a) the previous ritual procedures (purākālpa: sngon gyi cho ga) and (b) the present ritual procedure (da ltar gyi cho ga).\(^49\) However, only the one said to have been devised by the Buddha himself and conducted by a committee of monks consisting of five or ten members depending on the remoteness of the place in which it is conducted, and which is found in both previous and present ritual procedures, is regarded as a ritual by definition.\(^50\) The first of the ten kinds of previous ritual procedures is a sort of self-ordination. Indeed, most of the ten cases are characteristically spontaneously effectuated in the presence of the Buddha. They are simply the result of an unpremeditated decision to become a bhikṣu upon encountering the Buddha and obtaining his immediate consent. Such procedures were, of course, possible only as long as the Buddha still walked the earth. We can perhaps reasonably assume that not only the formalised ritual of taking the bodhisatvatva vow of ethical-moral discipline (śīlasamvara) was inspired by or modelled on the formalised Vinaya ordination (as found in the Pravrajyāvastu); the ritual procedures for confession (as in the Posadhavastu) and the restoration (pratikriyā) of broken vows, along with the Mahāyāna conventions relating to cardinal (or mortal) transgressions (mūlāpatti) or cardinal offences (pārājika), were also styled according to the corresponding Vinaya conventions. The idea of taking the bodhisatvatva vow on one’s own, that is, without an officiant, may be compared to, and indeed was probably modelled on, the self-ordination of pratyekabuddhas and of the historical Buddha himself, who is, by the way, conceived in the Vinaya tradition as the bhikṣu par excellence. Similarly, the Buddha’s first five disciples are said to have become bhikṣus in virtue of their glimpse of true reality (dharmaṭā).\(^51\)

Some Tibetan scholars have realised that a formalised ritual procedure for taking the bodhisatvatva vow of ethical-moral discipline (śīlasamvara), which is equated by some with the assuming of prasthānacitā, can be found in the Bodhisattvabhiṁṇi, but not the corresponding ritual procedure of assuming pranidhicitta. They knew, of course, that Atiśa had explained the ritual procedure of assuming pranidhicitta according to the Maitreya-Asanga tradition—a procedure for which there seemed to exist no scriptural evidence. In order to resolve this discrepancy, somebody seems to have conjured up a new explanation: The tradition of conferring the vow of pranidhicitta was initiated by Maitreya and transmitted orally (snyan brgyud) down to Atiśa.\(^52\) Nevertheless, the actual reason why the ritual procedure of assuming pranidhicitta is not found in the Bodhisattvabhiṁṇi or any other work attributed by the Tibetans to Asanga seems to lie elsewhere. I have already stated that the terms pranidhicitta and prasthānacitā are not typical of Strand A (represented by the Bodhisattvabhiṁṇi) but rather of Strand B (later represented by works such as the Bodhicaryāvatāra). Having said

\(^{48}\) The fact that the generation of bodhicitta has been incorporated into most ritual procedures in Tibetan Buddhism has, in my view, adequately demonstrated by Stephan Beyer in his studies on the cult of Tārā. See the index in BEYER 1973: 537–538, under the entry ‘Thought of enlightenment.’

\(^{49}\) While the Sanskrit term for sngon gyi cho ga is attested (e.g. Mahāvyutpatti, no. 9281; TSD, s.v. sngon gyi cho ga; cf. MW, s.v. purākālpa), the Sanskrit term for da lta'i cho ga has not been traced. For a detailed discussion of sngon gyi cho ga and da ltar gyi cho ga, see the mTso tīk (pp. 46.3–61.21).

\(^{50}\) See, for example, the Rig ‘dzin ‘jug ngogs (p. 37.6): sngon chog mshan nyid pa ni gsal bzhi’o ||; ibid. (p. 39.10–11): sngon chog gi rjes su bcas pa'i gsal bzhi'i cho ga 'khor bcas da lta'i cho ga dngos yin zhiung |.

\(^{51}\) Such a precedent could be used by a lay tantric practitioner to claim the status of not only a normal bhikṣu but indeed of a bhikṣu par excellence.

\(^{52}\) Shes bya mādzod (p. 358.7–8): len pa'i cho ga thogs med sogs kyi gzhung du smon smsen len pa'i sgrs mi gsal yang jo bo rjes gsal bar gsungs pa byams mgon nas brgyud pa'i man ngag snyan brgyud du bzhed....
that, this does not mean that the Bodhisattvabhūmi of Strand A has no parallel for the terms pranidhīcita and prasthānacitta. In fact, pranidhīcita can be equated with or subsumed under the prathamacittotpāda of the Bodhisattvabhūmi, which is defined there as the most excellent of the pranidhānas, while prasthānacitta can be equated with or subsumed under pravṛtta or caryā, which includes the śīlasamvara formally taken by a bodhisatva as part of the ritual procedure (explicitly described in Bodhisattvabhūmi 1.10). The candidate taking the śīlasamvara is spoken of as either a householder or an ordained bodhisattva.53 It is significant that he is further described as someone who has already made a resolution (kṛtparāśīhāna) to strive for the highest enlightenment.54 The question now is: at what point does the Bodhisattvabhūmi teach about formally becoming a bodhisattva?

The complex ritual procedure for the generation of pranidhīcita according to the Maitreya-Asaṅga tradition said to have been transmitted by Atiśa may have been based on Bodhisattvabhūmi 1.2 (§1.1.2), where the method for formally becoming a bodhisattva, that is, for generating the initial resolve (prathamacittotpāda) to become a buddha, is given in clear and simple terms, which in turn may be, as I have already tried to show, modelled on the initial resolve said to have been produced by the historical Buddha in the past. But although such initial resolve can be made during or by means of a ritual, I do not contend that the method of generating bodhicitta taught in Bodhisattvabhūmi 1.2 (§1.1.2) is a full-fledged bodhicittotpāda ritual, at least not in the sense of what we know from later manuals. What is perhaps worth recollecting here is that the initial resolve to become a bodhisattva seems to be less formal or even less significant in the Bodhisattvabhūmi than in the Maṇjuśrī-Nāgārjuna tradition, probably because, according to its theory of spiritual disposition (gotra), only those who by nature possess the spiritual disposition of a bodhisattva can become bodhisattvas.

9. What Is Actually Generated by the Ritual?

There does not seem to be one simple answer to the question what is actually generated by means of the ritual. Prajñākaramati, in commenting upon the expression sugatāmajaśaṃvarāvatāra (in Bodhicaryāvatāra 1.1c), obviously distinguishes two consecutive processes, namely, ‘taking hold of bodhicitta’ (bodhicittagrahaṇa) and ‘fully accepting the bodhisattva vows’ (bodhisattvaśaṅkṣāsamādāna).55 In other words, the generation of bodhicitta and the formal commitment to keep the bodhisattva vow are considered by him to be two different consecutive steps. According to some, it is only the ‘conventional’ bodhicitta that is generated by ritual, whereas according to others the ‘absolute’ bodhicitta is too. We shall return to this controversy below. Even among those who maintain that ‘conventional’ bodhicitta is generated by means of ritual, there does not seem to be a consensus. According to Kong-sprul’s understanding of the Maṇjuśrī-Nāgārjuna tradition and of Śāntideva, the arising of the ‘mere thought of attaining bodhi’ (byang chub ‘thob pa ’i blo tsam) is not dependent on ritual, whereas pranidhīcita, identified with the actual cittotpāda, and prasthānacitta, identified with the actual vow (samvara), are both dependent on ritual procedures.56 The Sa-skya-pas are said to make distinctions between pranidhīcita and pranidhīcittotpāda, and between prasthānacitta and prasthānacittotpāda as well. Mere pranidhīcita and prasthānacitta are, according to them, not vows (samvara),

53 Bodhisattvabhūmi 1.10 (WOGIHARA, p. 152.22–23; DUTT, p. 105.8).
54 Bodhisattvabhūmi 1.10 (WOGIHARA, p. 152.24–25; DUTT, p. 105.8–9).
55 Bodhicaryāvatāraparijñākā (p. 2.17–18): teṣām saṃvarāvatām | saṃvaroṣaṃ samvriyate vā aneneti saṃvarah, bodhicittagrahaṇapūrvakaḥ bodhisattvaśaṅkṣāsamādānaṃ |.
56 Shes bya mdzod (p. 352.30–33).
whereas pranidhicittotpāda and prasthiinacittotpāda are. Kong-sprul himself distinguishes three kinds of bodhisattva vow taken in accordance with ritual procedures: one common (taken together with prātimokṣa), one uncommon, and one undergone in the tantric context. In any case, we can take for granted that what is hoped will be generated by means of the ritual is resolve to become a buddha. In reality, as 'Jigs-med-gling-pa puts it, what is decisive here is not the act of generating bodhicitta but the actual arising of it.

10. The Optionality of an Officiant in the Two Traditions

An officiant is not considered indispensable for either tradition. If no officiant is available, one can perform the rites on one’s own before a reverential object that represents the buddha’s body, speech, or mind, such as a statue, scripture, or stūpa, respectively. If something like this is not available, one should visualise buddhas and bodhisattvas in the space in front of and above oneself. Although the absence of an officiant is permissible in both traditions, the Maitreya-Asanga tradition is stricter in its definition of situations in which this exception is made. There, one can proceed without an officiant only after searching far and wide for one, or if one’s life or celibacy (in case of ordained monks and nuns) is at risk. It is said that according to Bodhibhadra and others an officiant may be absent only during conferral rites, and not, therefore, during rites of restoration. The difficulty is that there seem to be several kinds of restoration depending on the nature and extent of the damage, and it is not quite clear what kind of restoration is meant here. In any case, the ritual procedure for the initial bodhisattva vow is described in the Bodhisattvabhūmi in such a way that it seems impossible to perform without an officiant. By contrast, for the ritual of reconfirming the bodhisattva vow, the optionality of an officiant is there made explicit. Kong-chen-pa offers an alternative explanation of the optionality and obligatoriness of an officiant. According to

57 Shes bya mdzod (pp. 352.33–353.4).
58 Shes bya mdzod (pp. 353.32–354.4).
59 Yon tan mdzod (p. 44.3–4): sems mchog bskyed pa mi gtso skyes pa gtso ||.
60 The optionality of an officiant in both traditions is made clear in the Bodhimārga-pradīpa-pañjikī. For the text and translation of the pertinent passage, see SHERBURNE 2000: 154–155. See also the Yid bzhin mdzod (p. 77.2–3):
   
   ji ltar bskyed tshul rnam pa gnyis yin te ||
   bla ma mchog dang dkon mchog drung du len ||.
   sDom gsam rnam nges (p. 21.4):
   rgyal ba ’i rten la’ang rung bar srol gnyis mthun ||.
   See also the Shes bya mdzod (pp. 355.1–3, 358.3–4).

61 To authenticate this statement, Kong-sprul (Shes bya mdzod, p. 358.4–6) cites a passage from the Bodhisattvabhūmi, which I have not been able to locate, at least not in the Śīlapaṭalā.
62 Shes bya mdzod (p. 358.6–7): nyams na gso ba la bla ma nges pa [= par?] dgos pa gnas brtan byang bsang sogs bzhed do ||. The position of Bodhibhadra, however, seems to be rather more complex and requires further verification.
63 See Bodhisattvabhūmi 1.10 (WOGIHARA, pp. 152.22–155.21; DUTT, pp. 105.7–107.5).
64 Bodhisattvabhūmi 1.10 (WOGIHARA, p. 181.15–18; DUTT, p. 124.25–27): etat api bodhisattvasamvarasamādānam | yadi tair gunair [= ṣnaḥ WOGIHARA] yuktāḥ pudgalo na samihitāḥ syāḥ | tato bodhisattvena tathāgatapratimāyāḥ purataḥ svayam eva bodhisattvaśīlasamvarasamādānam karanīyam |. The fact that the optionality of an officiant here applies to the reconfirmation and not the initial acceptance of the bodhisattva vow is clear from the context. See ibid. (WOGIHARA, pp. 180.21–182.5; DUTT, p. 124.10–16).
him, some superior individuals from the very outset take the *bodhisattva* vow before the Three Jewels on their own. As for average people, they take it from a master (*guru*) for the first time, but later, at the time of restoration or while repeating the acceptance of the *bodhisattva* vow, they can do so without a master before the Three Jewels.\(^{65}\) However, Yontan-rgya-mtsho adds that the practice of performing ritual oneself (if one is capable of doing so) is in accordance with Atisa’s *Bodhipathapradipā*, which explains this practice according to the *Mañjuśrībuddhasahāsirasāstra*.\(^{66}\)

The optionality of an officiant in the *bodhicittotpāda* ritual mentioned in some sources is traditionally interpreted in such a way as to bring it into harmony with the obligatoriness of an officiant expressed in other sources. If, however, we ignore such interpretations, the practice seems to reflect the historical background of the *bodhicitta* doctrine, for it is reminiscent of self-ordination in the Vinaya tradition. In the later systematised ritual procedure of the *prātimokṣa* vow, a committee of ten (or five) members chaired by the leading officiant is indispensable. The only cases of self-ordination mentioned in the Vinaya context are that of a *pratyekabuddha* and that of the Buddha himself. Since *bodhicitta* is fundamentally the resolve to become a *buddha*, it is historically conceivable that the generation of such resolve was originally not envisaged along the lines of a ritual dependent on an officiant, but as in the case of the Buddha or of a *pratyekabuddha* in the Vinaya context. Nevertheless, for traditions that insist on the continuity and indispensability of a lineage and on dependence on a master (*guru*), the optionality of an officiant would be counterproductive, for it would render a transmission lineage redundant. In my view, it is for similar reasons that a *pratyekabuddha* came to be later reinterpreted as one who had once been a śrāvaka of special calibre and who, in his last existence, awakened independently, without, that is, any formal teacher and in the absence of an established teaching tradition.

### 11. Qualifications for Officials in the Two Traditions

The Tibetan discussions of qualifications for teachers according to the Vinaya and the tantric and non-tantric Mahāyāna require a separate study. One may consult the writings of Klongchen-pa, where the various qualifications are discussed in great detail.\(^{67}\) What we shall look at here is the qualifications of the officiant performing the *bodhicittotpāda* rites. The qualifications are more or less the same within the two traditions. The following verse from the *Bodhicaryāvatāra* is often cited in Tibetan sources as the scriptural authority of the *Mañjuśrī-Nāgarjuna* tradition relating to the criteria for an officiant:\(^{68}\)

---

\(^{65}\) Yid bzhin mdzod ’grel (vol. 2, p. 824.4–6): gang zag dam pa kha cig dkon mchog drung du rang gis len pa yin la | phal pa dag bla ma las len to || len tshul ’dra’o | phyis gso dus sam yang nas yang du bskyed dus bla ma las gzhan dkon mchog gi drung du byed pa yin no ||.

\(^{66}\) Rig ’dzin ’jug ngogs (p. 128.7–9): rang stobs kyi nus pa yod na rten med kyang rgyal ba sras bcas mdun mkhar bsam la de’i drung du len par yang ’jam dpal zhing bkod kyi mdo las gsungs paitar lam sgron du bshad do ||. See Eimer 1978: 116–117; First *Bhāvanākrama* (p. 193.9–8): yathā mañjuśrīya ’mbararājabhūtena bodhicittam utpāditam tathotpādanīyāḥ |.

\(^{67}\) See, for example, the Yid bzhin mdzod (pp. 38.3–44.4); Yid bzhin mdzod ’grel (pp. 204.2–272.3); Sems nyid ngal gso (pp. 38.5–49.3); Shing rta chen po (vol. 1, pp. 369.5–421.2). See also the *Shes bya mdzod* (pp. 303.9–310.24).

\(^{68}\) Bodhicaryāvatāra 5.102: sadā kalyāṇamitrāṃ ca jīvitarthe ‘pi na tvajet | bodhisattvavratadharanā mahāyānārthakovidam ||.
Never, even at the cost of one's life, should one forsake a spiritual friend who upholds the bodhisattva vow and is skilled in the meaning of the Mahāyāna. 

Correspondingly within the Maitreya-Asaṅga tradition, the following verse from the Bodhipatapradaipa is often cited:

One who is skilled in the ritual of the vow—
Who himself abides by the vow,
Shows readiness to confer the vow, and is compassionate—
Should be known as a good master.

Generally, it is agreed that the spiritual friend or teacher who confers the vow should have taken the bodhisattva vow himself, be an expert in the ritual procedure, have no material interests and be benevolent.

12. The Eligibility of Candidates in the Two Traditions

Tibetan scholars, in discussing the eligibility of candidates, often speak about two kinds of receptacles (rten), namely, the receptacle for the arising (skyé ba'i rten) and the receptacle for the subsistence (gnas pa'i rten) of bodhicitta or the bodhisattva vow. The former is further subdivided into a physical receptacle (lus kyi rten) and mental receptacle (bsam pa'i rten). It is very clear that according to the Mañjuśrī-Nāgārjuna tradition it is the mental receptacle, that is, the mental receptivity, that is decisive, and not the physical receptacle, or the physical form of life. In other words, being a woman, a lay person, a non-Buddhist, someone who has committed one of the five heinous deeds, or even a non-human being is in principle no barrier to the generation of bodhicitta or to the acceptance of the bodhisattva vow. The notion that even non-humans can generate bodhicitta is based on sūtra references where gods (deva), nāgas, demigods (asura), and so forth are said to have generated the resolve to strive for the highest awakening. According to the Maitreya-Asaṅga tradition, the physical receptacle

See also ibid. (p. 24.5–6), where reference to the verse from the Ratnolkādharaṇī cited in the Śikṣāsamuccaya (BENDALL, p. 2.16–17; VAIDYA, p. 4.22–23) is made.
must be under at least one of the seven kinds of prātimokṣa vow (i.e. must be a human being who is a lay or ordained Buddhist). All the criteria a candidate for the prātimokṣa vow is expected to fulfil according to the Vinaya tradition are thus automatically presupposed here. Needless to say, according to both traditions there must be a mental receptacle that is saturated with the desire to become a buddha for the sake of all sentient beings. Unlike the prātimokṣa vow, which is automatically annulled after death, the bodhisatṭva vow is supposed to persist. And hence, according to Klong-chen-pa, any of the five forms of existence can be the ‘receptacle for the subsistence’ of the bodhisatṭva vow. This, however, presents a problem for the Maitreya-Asanga tradition, especially when it insists on the need for the physical receptacle to be under a prātimokṣa vow.

One of the Tibetan scholars who attempted to harmonise the two traditions regarding the eligibility of candidates was Klong-chen-pa: [I] take the two traditions to be non-contradictory in essence for the following [reasons]: When one generates the resolve [to strive for awakening], [it] may not be called a prātimokṣa vow, but in reality it must be something essentially similar, such as the capacity to pledge not to kill sentient beings. Hence, from this standpoint, the similarity of the receptacles is ascertained. In fact, [bodhicitta in both cases] is certain to arise [only in an individual whose] mind has turned away from [the thought of] injury. [According to both traditions, the candidate] must be someone who is capable of observing one of the prātimokṣa vows; otherwise [bodhicitta] cannot arise in [the continuum of] anybody, inasmuch as [the non-observance of the prātimokṣa vow] contradicts the cittoṭpāda vow.

The point Klong-chen-pa is trying to make is that there cannot possibly be a bodhisatṭva who is incapable of observing at least one of the prātimokṣa vows. This notion is very much consistent with the ethical-moral discipline of the three vehicles (yāna), according to which a śrāvaka strives to refrain from harming or injuring others, a bodhisatṭva not only refrains from harming or injuring others but even tries to benefit them, and a practitioner of Vajrayana not only tries to benefit other sentient beings, but attempts to do so in the manner of a buddha. And therefore, so long as there is the thought of injuring others, there cannot be the thought of benefiting others, these two thoughts being simply incompatible.

Yon-tan-rgya-mtsho who to a great extent followed Klong-chen-pa and incorporated his method of harmonising the two traditions, recorded an alternative way of resolving the apparent contradiction between the two traditions: The criteria prescribed by the Mañjuśrī-Nāgārjuna tradition for candidates are interpreted as applying merely to the generation of

80 Shing rta chen po (vol. 1, p. 539.2–6): lugs ’di gnyis kyang don gya mi ’gal bar go ste | ’di itar smsn bsbyed dus so sor thar pa’i sdom par ming ma btags kyang | don ’dra bar srog mi gcod par dam ’cha’ nus pa la sogs pa dgos pas | de’i cha nas rten ’dra rlung du nges te | don la gnod pa las blo log pa zhi g lha skye nges so || so sor thar pa’i sdom pa gang rlung sdom nus pa zhi g med na gang la’ang mi skye ste | smsn bsbyed de nyid kyi bslab pa dang ’gal ba’i phyir ro ||.
pranidhícitta, not, that is, to the generation of prasthānācitta. Conversely, the criteria prescribed by the Maitreya-Asaṅga tradition are interpreted as applying merely to the generation of prasthānācitta, not to the generation of pranidhícitta. In this way, even by the standards set by the Mañjuśrī-Nāgārjuna tradition, a candidate must be a human being who abides by at least one of the prātimokṣa vows in order to qualify as a candidate for the generation of prasthānācitta. Likewise, by the standards set by the Maitreya-Asaṅga tradition, a candidate need not be a human being who abides by at least one of the prātimokṣa vows in order to generate merely pranidhícitta. And therefore, according to this solution, although the two traditions may appear to differ in regard to the range of the receptacles (ṛten ṛgya che chung), the flexibility of admission ('jug sgo yangs dog), and so forth, they are, in reality, of the same quintessence (gnad gcig). 

Thus Tibetan scholars have, exegetically speaking, made quite ingenious attempts to harmonise the two bodhicittotpāda traditions, namely, the naïve or idealistic Mañjuśrī-Nāgārjuna tradition and the rather pragmatic and realistic Maitreya-Asaṅga one. I offer my own assessment of the two traditions in terms of the receptacle (ṛten). These idealistic and realistic perceptions of the receptacle seem, in my view, to be rooted in doctrinal or philosophical differences between the two traditions as regards sentient beings, particularly in their theories of the spiritual disposition (gotra). The reason why the Mañjuśrī-Nāgārjuna tradition professes a rather idealistic view of the receptacle is probably due to its ekagotra theory, according to which there is only one universal spiritual disposition, which implies that there is no sentient being that does not possess the capacity or potential to become a buddha. The universal spiritual disposition presupposed by it was not, however, understood in a positive sense, as was done in the Tathāgatagarbha tradition.

The pragmatic and realistic notion of the receptacle in the Maitreya-Asaṅga tradition, on the other hand, seems to be rooted in the Yogācāra theory of five kinds of spiritual dispositions, according to which not all sentient beings possess the same desire and capacity to reach the goal of Buddhahood, and certain sentient beings possess no spiritual disposition at all. The Bodhisattvabhūmi, representing the Maitreya-Asaṅga tradition, makes it unequivocally clear that while the presence of the right gotra is no guarantee that Buddhahood will be attained, 

Thus the differences in the perceptions of the eligibility of a bodhicittotpāda candidate in the Mañjuśrī-Nāgārjuna and Maitreya-Asaṅga traditions is, in my view, doctrinally connected with the differences in their perceptions of gotra. This explanation not only supports my theory of different grades of conservatism in the two strands of bodhicittotpāda traditions but also supports Sa-paṅ’s proposition that the differences of the two traditions rest on the differences in their philosophical view (ltab ba). However, later Tibetan scholars seem to have understood Sa-paṅ as referring to philosophical views only in connection with reality or emptiness. If my assessment here holds, it would imply that Sa-paṅ’s designation of this

---

81 Rig ‘dzin ‘jug ngogs (p. 155.1-10).

82 Bodhisattvabhūmi 1.1 (DUTT, p. 1.19-20): sa cet punar gotrastraḥ cittaṃ notpādayati bodhicaryāsu na pravyujate na kṣipram bodhim ārāgyati [= ārāḥayati?] .... The Tibetan translation (WOGHARA, p. 2.20-23) here reads byang chub myur du ‘grub par mi ‘gyur ro and seems to indicate na kṣipram bodhim ārāḥayati. See also ibid. (WOGHARA, p. 11.2-18): caturbhīḥ kāraṇāḥ evaṃ gotrasampanno ‘pi bodhisattvah na śaknoty anuttaraṃ samyaksambodhīṃ abhisambodhīṃ ....

tradition as the ‘Cittamātra tradition’ is justified purely from the viewpoint of the gotra theory, especially if one takes works such as the Bodhisattvabhūmi as the scriptural authority of this tradition.

13. The Preparatory Procedures of the Bodhicittotpāda Ritual

The bodhicitta ritual traditionally consists of three steps, namely, the preparatory procedures (sbyor ba), main procedures (dgnos gzhi), and concluding procedures (rjes or mjug), collectively referred to as sbyor dngos rjes (or mjug) gsum. For several reasons, it is quite difficult to form a clear and comprehensive picture of the supposed differences between the ritual procedures of the two traditions. Nonetheless, in order to convey an impression of how at least some Tibetan scholars have perceived these distinctions, I shall attempt to present them mainly along the lines of Yon-tan-rgya-mtsho’s Rig ’dzin ’jug ngogs:

<table>
<thead>
<tr>
<th>Preparatory Procedures (sbyor ba)</th>
<th>Mañjuśrī-Nāgarjuna Tradition</th>
<th>Maitreya-Asanga Tradition</th>
</tr>
</thead>
<tbody>
<tr>
<td>(1) Rectifying one’s attitude (blo bcos pa) through three special instructions (gdams ngag khyad par can gsum)</td>
<td>(1) Verifying the receptacle (rten nges par bya ba), i.e. rectifying one’s attitude (blo bcos pa) on the basis of three instructions (gdams ngag khyad par can)</td>
<td>(1) The candidate’s making the [initial] request (gsol ba ’debs pa)</td>
</tr>
<tr>
<td>i.e. three methods of generating enthusiasm (spro ba bskyped pa ’i thabs gsum) for bodhicitta</td>
<td>(2) Executing preparatory procedures, consisting of three steps, i.e. (a) making a mandala offering and request, (b) taking refuge in the special receptacle (rten khyad par can), and (c) accumulating beneficial resources by special methods (thabs khyad par can)</td>
<td>(2) The officiant’s scrutinising the attitude (bsam pa brtag pa) of the candidate</td>
</tr>
<tr>
<td>(2) Making a mandala offering to the special referential object (yul khyad par can), i.e. the officiant</td>
<td></td>
<td>(3) The candidate’s requesting [the officiant] to bestow [the vow] without delay (myur du sbyin par gsal ba debs pa)</td>
</tr>
<tr>
<td>(3) Taking refuge in the special receptacle (rten khyad par can), i.e. the Three Jewels</td>
<td></td>
<td>(4) The officiant’s enquiring after [the candidate’s hidden] obstacles (bar chad dri ba)</td>
</tr>
<tr>
<td>(4) Accumulating beneficial resources (punyata) by special methods (thabs khyad par can), i.e. the seven-limb supplication</td>
<td></td>
<td>(5) Making [the candidate] aware of the precepts (bslab pa’i gnas go bar bya ba)</td>
</tr>
</tbody>
</table>

The pranidhicitta and prasthānacitta vows are bestowed on the same occasion according to the Mañjuśrī-Nāgarjuna tradition, but separately according to the Maitreya-Asanga tradition. The three methods of generating enthusiasm for bodhicitta mentioned in the table above are (1) generating a sense of discontent with the extreme of samsāra (’khor ba’i mtha’ la skyo ba bskyed pa), (2) putting a stop to the attachment to the extreme of nirvāṇa (zhi ba’i mtha’ la zhen pa bkag pa), and (3) avoiding the two extremes of samsāra and nirvāṇa (mtha’ gnyis spong ba). The preparatory procedures (sbyor ba) of the bodhicittotpāda ritual seem to differ from source to source. I have followed Yon-tan-rgya-mtsho’s Rig ’dzin ’jug ngogs both

---

84 sDom gsum rnam nges (p. 21.2–3):

for the Mañjuśrī-Nāgārjuna tradition and for the pratidhīcitta of the Maitreya-Asaṅga tradition, and Kong-sprul’s Shes bya mdzod for the prasthānacittotpāda of the Maitreya-Asaṅga tradition. Some of the preparatory processes of the Maitreya-Asaṅga tradition, such as the candidate’s initial request, can be found in the Bodhisattvabhūmi.

14. The Main Procedures of the Bodhicittotpāda Ritual

The most significant part of the ritual is of course the main procedure (dngos gzhi), in regard to which the two traditions again differ. The differences may be summarised as follows:

<table>
<thead>
<tr>
<th>Main Procedures (dngos gzhi)</th>
<th>Mañjuśrī-Nāgārjuna Tradition</th>
<th>Maitreya-Asaṅga Tradition</th>
</tr>
</thead>
<tbody>
<tr>
<td>(1) Training one’s mind (blo sbyong) by practising the exchange of one’s happiness for the sufferings of others (bde sdog gton len)</td>

<td>Drawing the attention [of buddhas and bodhisattvas] three times (dgongs gsol gsum)</td>
</tr>
<tr>
<td>(3) Reciting the ritual text (cho ga’i tshig) which contains the ritual words for generating both pratidhīcitta and prasthānacittotpāda three times</td>
<td>Reciting the ritual text (cho ga’i tshig) which contains the ritual words for generating both pratidhīcitta and prasthānacittotpāda three times</td>
<td>Reciting the ritual text (cho ga’i tshig) which contains the ritual words for generating both pratidhīcitta and prasthānacittotpāda three times</td>
</tr>
<tr>
<td>(4) The vow is complete at the end of the third recitation</td>
<td>The vow is complete at the end of the third recitation</td>
<td>The officiant asks the candidate three times if he or she wants to take the vow of ethical-moral discipline (śīla), and each time the candidate answers: “Yes, [I want to] take it.”</td>
</tr>
</tbody>
</table>

The three notions are, according to Kong-sprul, discontentment with samsāra (‘khor ba la skyo ba), detachment from nirvāṇa (myang ‘das la mi zhen pa), and enthusiasm for bodhicitta (byang chub kyi sems la spro ba). We have seen that the three are also called three

16. Observances and Offences Presented in the Two Traditions

As Ratnākaraśānti’s \textit{Ratnālokālāmākāra} suggests,\textsuperscript{101} there must have been various positions in India regarding the precise number of \textit{mūlāpattis} taught in the \textit{Ākāśagarbhāsūtra}, which has been cited by both the \textit{Śūtrasamuccaya} and the \textit{Sīkṣāsamuccaya}. In order to show how \textit{bodhicitta} was cultivated in the broader context of \textit{bodhisattva} ethical-moral discipline, I here briefly present, primarily following the \textit{Rig ’dzin ’jug ngogs}, the cardinal transgressions and venial offences (\textit{duṣkṛtā}) according to the two traditions. It should be noted in general that according to the \textit{Rig ’dzin ’jug ngogs}, these transgressions are relevant only for \textit{bodhisattvas} (humans and non-humans) who are still worldly beings (\textit{prthagjana}), that is, those who have not yet attained the path of seeing (\textit{darṣanamārga}), since the \textit{bodhisattva} saints are considered to be ethically and morally incorruptible.\textsuperscript{102} This is reminiscent of the non-

\textsuperscript{95} \textit{Rig ’dzin ’jug ngogs} (p. 126.12–14).
\textsuperscript{96} \textit{Shes bya mdzod} (p. 358.12–13).
\textsuperscript{97} \textit{Rig ’dzin ’jug ngogs} (p. 127.12–14): “From ‘I, who am called by name so and so, in this lifetime and …’ until ‘will liberate [them] into the state of nirvāṇa’” (… bdag ming ‘di zhes bygi ba skye ba ’di dang | zhes pa nas mya nyen las ’da’ bar bygi’o zhes pa ’i bar….).
\textsuperscript{98} \textit{Shes bya mdzod} (p. 355.5–6); \textit{Rig ’dzin ’jug ngogs} (p. 126.19–20). Note that whereas Yon-tan-rgya-mtsho places ‘offering gifts of thanks’ at the end, Kong-sprul has ‘explaining precepts in brief.’
\textsuperscript{99} \textit{Shes bya mdzod} (p. 358.14–15); \textit{Rig ’dzin ’jug ngogs} (p. 126.19–20).
\textsuperscript{100} \textit{Shes bya mdzod} (p. 355.18–20); \textit{Rig ’dzin ’jug ngogs} (pp. 127.20–128.2).
\textsuperscript{101} Ratnākaraśānti, \textit{Ratnālokālāmākāra} (P, fol. 319b5–320a4; D, fol. 273a4–b2; S, vol. 64, pp. 760.17–761.17).
\textsuperscript{102} \textit{Rig ’dzin ’jug ngogs} (p. 134.15–17): \textit{de dag byang sems kyi skyod pa la zhugs pa yan chod [= chad] la rtsa ltung ’byung ba mi srid pas so skya’i [= skye’i] gang zag mi dang gnod sbyan [= sbyin] sogs gang yang rung
Mahāyāna notion that an *arhat* is incapable of deliberately hurting another sentient being. The infallibility (or fallibility) of the ethical-moral discipline of Buddhist saints is in itself an interesting theme, but one which cannot be elaborated in this study. The cardinal transgressions and venial offences, as presented in the *Rig 'dzin 'jug ngogs*, are as follows:

<table>
<thead>
<tr>

(a) The Cardinal Transgressions in the Mañjuśrī-Nāgarjuna Tradition

The *Rig 'dzin 'jug ngogs* lists twenty cardinal transgressions in the Mañjuśrī-Nāgarjuna tradition. Eighteen out of the twenty are cited according to the *Ākāśagarbhasūtra* in the *Śikṣāsamuccaya* by Śāntideva. The number eighteen is, however, not explicitly mentioned in the latter. For the sake of convenience, Śāntideva has summarised these cardinal transgressions in verses.\(^{103}\) An additional cardinal transgression, found in the *Upāyakausālasyāsūtra*, is also cited by Śāntideva without being termed the ‘nineteenth cardinal transgression’ (described by Yon-tan-rgya-mtsho as the abandonment of *pranidhicitta*).\(^{104}\) The twentieth cardinal transgression, which is apparently not mentioned by Śāntideva, is drawn from the *Ratnakūṭasūtra* and described by Yon-tan-rgya-mtsho as the abandonment of *prasthānacitta*.\(^{105}\)

---

\(^{103}\) *Śikṣāsamuccaya* (BENDALL, pp. 66.15–67.13; VAIDYA, p. 41.1–18); for an English translation, see BENDALL & ROUSE 1922: 70–71.

\(^{104}\) See the *Śikṣāsamuccaya* (BENDALL, pp. 66.9–14; VAIDYA, p. 40.25–30); for an English translation, see BENDALL & ROUSE 1922: 70. See also the *Rig 'dzin 'jug ngogs* (pp. 134.17–135.1).

\(^{105}\) *Rig 'dzin 'jug ngogs* (pp. 134.17–135.3). Cf., however, SOBISCH 2002: 91, n. 249: ‘… they are nineteen or twenty roots according to the Mādhhyamikas. They are nineteen according to Śāntideva’s *Śikṣāsamuccaya*, which quotes the *Ākāśagarbhasūtra*, and twenty according to the *Ratnakūṭa*…’ There seems to be some confusion here. Śāntideva’s citation of the *Ākāśagarbhasūtra* does not contain all nineteen cardinal transgressions. According to the Tibetan tradition, it contains only eighteen. The nineteenth cardinal transgression is drawn from the *Upāyakausālasyāsūtra*, and the twentieth (and not all twenty!) from the *Ratnakūṭasūtra*. 
The five cardinal transgressions liable to be committed by (or occur to) kings (rgya po la 'byung nye ba)\textsuperscript{106} may be summarised as follows:\textsuperscript{107} (1) plundering or causing to plunder the property of the Three Jewels, (2) denouncing the Buddhist doctrine (be it Mahāyāna or non-Mahāyāna) and causing it to be destroyed, (3) causing any member of the ordained Buddhist community (samgha) to be disrobed, assaulted or killed, (4) committing one of the five deeds of immeasurable gravity (i.e. patricide, matricide, killing an arhat, causing a schism in the Samgha, and malevolently causing a tathāgata to bleed), (5) holding false views (such as the denial of the principle of cause and effect and future existences) and causing other sentient beings to exhibit unwholesome attitudes or actions.

Of the five cardinal transgressions liable to be committed by ministers, the first four are identical with the first four relating to kings. The fifth cardinal transgression is the extermination of villages, towns, and cities out of malevolence.\textsuperscript{108} The eight cardinal transgressions liable to occur to normal citizens may be paraphrased as follows: \textsuperscript{109} (1) prematurely giving teachings on emptiness (śiññyatā) to other beginner bodhisattvas and thereby provoking fear in them and thus causing them to abandon bodhicitta, (2) discouraging other beginner bodhisattvas by telling them that since they are incapable of practising the six perfections (pāramitā) and attaining Buddhahood, they would do better to generate resolve according to the Śrāvakaśāna and Pratyekabuddhāśāna so as to be released from samsāra soon, (3) discouraging a beginner bodhisattva from observing prātimokṣa and the Vinaya ethical-moral discipline in favour of the Mahāyāna precepts, (4) discouraging a beginner bodhisattva from reading the scriptures of the Śrāvakanśāna and encouraging him instead to read and teach only scriptures of the Mahāyāna, (5) disparaging others and praising oneself out of jealousy and attachment to worldly concerns (e.g. possessions and admiration), (6) glorifying oneself with lies about one’s spiritual achievements, (7) creating discord between powerful laity and ordained individuals and exploiting the situation for one’s benefit, and (8) depriving practitioners (of meditation) of their daily necessities and giving them to those studying, or else causing them to abandon their spiritual practices, such as śamatha, by introducing adverse political rules.

Yon-tan-rgya-mtsho explains that the eighteen cardinal transgressions are based merely on the likelihood of committing them, so that one type of person may commit a cardinal transgression applicable to another type. In fact, all eighteen cardinal transgressions can be committed by all types of persons. He also clarifies that the number eighteen is only nominal (ming du) and that actually (rdzas su) there are only fourteen, since the first four cardinal transgressions liable to occur to kings are identical with the first four liable to be committed by ministers. The cardinal transgressions also reflect the faculties of bodhisattvas.

\textsuperscript{106} The expressions ‘liable to occur to kings’ (rgyal po la 'byung nye ba) and so forth are not employed in the Śikṣāsamuccaya.

\textsuperscript{107} See the Śikṣāsamuccaya (BENDALL, pp. 59.10–60.8; VAIĐYA, p. 37.1–16; for an English translation, see BENDALL & ROUSE 1922: 61–62); Śūtrasamuccaya (pp. 82.13–84.3; Buddhaghoṣa’s Dīttagunānirdeśa (P, fols. 202a5–b7; D, fols. 165b2–166a2; S, vol. 93, pp. 1202.12–1203.15); Rig 'dzin 'jug ngogs (pp. 131.17–132.14). The five cardinal transgressions kings have to answer for are explicitly enumerated in the Śikṣāsamuccaya and the Śūtrasamuccaya.

\textsuperscript{108} Rig 'dzin 'jug ngogs (p. 132.14–20). Cf. the Śikṣāsamuccaya (BENDALL, p. 60.8–9; VAIĐYA, p. 37.16–17); for an English translation, see BENDALL & ROUSE 1922: 62; Śūtrasamuccaya (p. 84.4–26). All five cardinal transgressions liable to occur to ministers are enumerated in the Śūtrasamuccaya but not in the Śikṣāsamuccaya and the Dīttagunānirdeśa (P, fols. 202b7ff.; D, fols. 166a2ff.; S, vol. 93, pp. 1203.15ff.).

\textsuperscript{109} Śikṣāsamuccaya (BENDALL, pp. 60.9–64.13; VAIĐYA, pp. 37.17–39.31); for an English translation, see BENDALL & ROUSE 1922: 62–68. The eight cardinal transgressions are explicitly enumerated in the Śikṣāsamuccaya but not in the Śūtrasamuccaya. See also the Rig 'dzin 'jug ngogs (pp. 133.1–134.10).
Chapter Six: The Two Bodhicittotpāda Traditions

Those with sharp faculties are expected to refrain from all eighteen, while those with medium faculties are to refrain from the four cardinal transgressions mentioned also in the Śikṣāsamuccaya, and those of dull faculty only from the abandonment of prāṇidhīcittā.\(^{110}\)

(b) The Cardinal Transgressions in the Maitreya-Asaṅga Tradition

There are commonly said to be four cardinal transgressions according to the Maitreya-Asaṅga tradition. Candragomin's *Samvaravimāśaka*\(^{111}\) is given as the scriptural source, which is in turn said to be based on the *Bodhisattvabhūmi*.\(^{112}\) The four are: (1) praising oneself and disparaging others out of a desire for material gain or admiration, (2) not affording (or giving) teachings and wealth to those who are in need or in pain, (3) beating sentient beings despite pleas by others not to do so, and (4) abandoning Mahāyāna and teaching spurious Buddhist doctrines. The *Rig ‘dzin ’jug ngogs*, however, considers these four to pertain to prasthānacittā and analyses them as four in terms of attitude (*kun slong gi sgo nas bzhi*), namely, attachment (*zhen pa*), greediness (*ser na*), fury (*khrö ba*), and confusion (*gti mug*), and ‘eight in terms of actions’ (*sbyor ba’i sgo nas brgyad*), namely, praising oneself, disparaging others, not affording others teachings and wealth, scolding and beating others, and abandoning Mahāyāna and propagating pseudo-doctrines. The four cardinal transgressions pertaining to prāṇidhīcittā are the engaging in the so-called ‘four black practices’ (*nag po’i chos bzhi*) or the failure to engage in the ‘four white practices’ (*dkar po’i chos bzhi*).\(^{114}\) The four black practices are: (1) deceiving those worthy of respect, (2) having regrets about things that are...
not regrettable, (3) disparaging sublime personalities, and (4) deceiving sentient beings. The textual source is the *Ratnakūṭasūtra*, which is cited in the *Śīkṣāsamuccaya*. The expressions ‘four black practices’ and ‘four white practices’ are, however, not employed in these citations. We shall return to these qualities in chapter eleven.

(c) The Venial Offences in the Two Traditions

The following table contains an enumeration of venial offences:

<table>
<thead>
<tr>
<th>Venial Offences (diṭṭhakā)</th>
<th>Mañjuśrī-Nāgarjuna Tradition</th>
<th>Maitreya-Asaṅga Tradition</th>
</tr>
</thead>
<tbody>
<tr>
<td>(a) Disregarding the pain and pleasure of others: 2 (not removing pain and grief of others despite the ability to do so) &amp; not engendering well-being and happiness of others despite the ability to do so) x 2 (physical &amp; mental pain) x 2 (pertaining to the present &amp; future) x 3 (striving physically, verbally, and mentally)</td>
<td>24</td>
<td>34</td>
</tr>
<tr>
<td>(b) Disregarding the practice: (i) 2 (not engendering small antidotes for greater pain and grief) x 2 (in this &amp; the next life) x 2 (in the continua of oneself &amp; others) = 8 (ii) 2 (letting small prerequisites for greater well-being and happiness decline) x 2 (of this &amp; the next life) x 2 (in the continua of oneself &amp; others) = 8</td>
<td>16</td>
<td>12</td>
</tr>
<tr>
<td>Total x 2 (temporarily &amp; permanently)</td>
<td>8</td>
<td>8</td>
</tr>
</tbody>
</table>

The thirty-four lapses opposed to the accumulation of wholesome virtues (*kuṣala-dharmasamgraha*) in the table above are said to be in accordance with the *Samvaravimśaka*.[118] It is, however, not the *Samvaravimśaka* but Bodhibhadra’s commentary that explicitly mentions the number of venial offences, forty-six, indicated above.[117] Concerning the twelve lapses opposed to striving for the welfare of the sentient beings (*sattvārthakriyā*), Yun-tan-rgya-mtsho notes that in the various commentaries the degree of accountability in each case can be classified under one of three possibilities, depending on the underlying cause: (a) If the failing occurs as a result of lack of respect (probably for the precepts and sentient beings) or slothfulness, it is a defiled failing (*nyon mongs pa can gyi nyes pa*); (b) If the failing occurs as a result of forgetfulness, it is an undefiled failing (*nyon mongs pa can ma yin pa'i nyes pa*); (c) If the failing occurs as a result of a disturbed state of mind (*sems 'khrugs pa*), it is, in reality, not a failing, the bodhisattva being in such a case innocent.[118]

---

116 *Samvaravimśaka* 9–20b (P, fol. 192a7–b7; D, fol. 166b6–167a5; S, vol. 78, pp. 448.7–449.8). These verses are paraphrased in the *Rig 'dzin 'jug ngogs* (pp. 139.1–142.2). For an English translation of the pertinent verses, see TATZ 1982: 370–371; id. 1985: 28–29, 34–38 (commentary).

117 See the *Samvaravimśakapaijin* (P, fol. 236a2ff.; D, fols. 204b6ff.; S, vol. 78, pp. 547.14ff.).

*mchod 'os bslu dang 'gyod med 'gyod pa bskyed ||
dam par skur 'debs 'gro la g.yo sgyus spyod ||
nag po'i chos bzhis spang zhung ldog pa ni ||
dkar po'i chos bzhis yin pas kun tu spyad ||.
Some sources explicitly count the abandonment of *bodhicitta* as one of the four cardinal breaches of the *bodhisattva* vow. Even according to the tradition that does not explicitly count the abandonment of *bodhicitta* as one of the cardinal transgressions, it is contextually clear that loss of it can remove the very foundation upon which all other *bodhisattva* vows are based. In fact, the very existence of a *bodhisattva* hinges on his *bodhicitta*.

17. Reestablishing a Broken Vow in the Two Traditions

Most vows of a *bodhisattva* can either be invalidated or damaged. According to the Mañjuśrī-Nāgārjuna tradition, the vow is completely nullified if the *bodhisattva* loses or renounces his *pranidhicitta*, which is the whole basis (*rten gzhi*) of his vow, or if he violates or repudiates the vows. Should one of these two occur, the *bodhisattva* is faced with the choice of whether to reestablish the *bodhisattva* vow. If a cardinal transgression other than the abandonment of *pranidhicitta* occurs, he must apply the appropriate antidote within the following period of four hours (*thun*). Otherwise such a transgression is called a ‘transgression whose deadline has expired’ (*thun 'das kyi ltung ba*) or a ‘transgression [resulting in] deterioration’ (*nyams pa'i ltung ba*). A particular restoration procedure is called for in this case.\(^\text{119}\) It is said, however, to depend on the person’s faculties. A person with weak faculties (*dbang po dman pa*) restores the vow by confessing on the basis of the four strengths (*stobs bzhi*).\(^\text{120}\) A person with average faculties (*dbang po 'bring*) restores it by confessing in front of the *bodhisattva* Akāśagarbha.\(^\text{121}\) A person with superior faculties (*dbang po rab*) restores it by confessing verbally before all *buddhas* and *bodhisattvas* in a dream-like manner and by abiding in the meditative state of true reality.\(^\text{122}\) Moreover, the recitation of the *Triskandhakasūtra* is recommended for the recovery from venial offences (*duśkṛta*).\(^\text{123}\)

According to the Maitreya-Asaṅga tradition, the primary cause leading to *pranidhicitta* being abandoned is an unequivocal sense of resignation as far as other sentient beings are concerned, and the secondary cause is the perpetrating of four black practices (*nag po'i chos bzhi*). The abandonment of *pranidhicitta* would of course automatically entail the abandonment of *prasthānācitta*. According to this tradition, the transgressions are classified under three categories, namely, transgressions caused by fetters (*paryavasthāna*) which are excessive (*adhimātra*), medium (*madhya*), or mild (*mrūd*).\(^\text{124}\) A transgression is major if four criteria are fulfilled, namely, perpetrating the four black practices (a) constantly, (b) shamelessly, (c) with great delight, and (d) indeed even cherishing the quality of such acts. A

---

\(^{118}\) *Rig 'dzinjug ngogs* (pp. 141.17–142.2).

\(^{120}\) *Ibid.* (p. 160.13–19). The four strengths are: the strength of reproaching (‘one’s misdeeds’) (*rnam par sun 'byin pa'i stobs or sun 'byin pa'i stobs*), (2) the strength of support (*rten gyi stobs*), including taking refuge in the Three Jewels and not abandoning *bodhicitta*, (3) the strength of applying antidotes (*gnyen po kun tu spyd pa'i stobs*), and (4) the strength of recovering from (one’s) transgressions (*sor chud pa'i stobs or nyes pa las sia rdog pa'i stobs*). The *Caturdharmakasūtra* cited in the *Śīkṣāsamuccaya* (BENDALL, p. 160.4–11; VAI DY A, pp. 89.28–90.3) is the common source text on the four strengths. For an English translation, see BENDALL & ROUSE 1922: 158–159. Of the four, only two are attested in the form of compounds, *āśrayabala* and *pratipattibala*.

\(^{121}\) *Rig 'dzinjug ngogs* (pp. 159.17–160.13).

\(^{124}\) The three kinds of fetters (*paryavasthāna*) are explicated in the *Bodhisattvabhūmi* (WOGIHARA, pp. 189.26–181.11; DUTT, p. 124.14–22).
transgression is medium if one of the four criteria is fulfilled and if the bodhisattva, being ashamed, gives up his deeds at the suggestion of others. A transgression is minor if one of the four criteria is fulfilled and if the bodhisattva, being ashamed, immediately gives up his acts on his own. If a transgression caused by major fetters occurs, a bodhisattva invalidates his vow and must take it anew by confessing and by performing acts of purification before at least four bodhisattva teachers. The vow, according to the Maitreya-Asaṅga tradition, cannot be reassumed more than three times. If a transgression caused by medium fetters occurs, a bodhisattva should confess and perform acts of purification before at least three bodhisattva teachers. If a transgression caused by minor fetters occurs, a bodhisattva should confess before at least one bodhisattva teacher. The Saṃvaravimsāka is here cited as scriptural authority. Yon-tan-rgya-mtsho adds that the vow and the methods of restoring it within the Maitreya-Asaṅga tradition are meant for beginners (las dang po pa) and are hence very strict.

18. Concluding Remarks

What I have attempted in this chapter is to present the two traditions in terms of their bodhicitta doctrine, and particularly in regard to their bodhicittotpāda ritual. I have argued that there are two bodhicittotpāda traditions in India and tried to describe the way Tibetan scholars have systematised and assessed these two traditions. The two traditions are seen to differ in a number of ways, including the categorical distinctions they make and the scriptural and personal authorities they follow, above all in regard to their ritual procedures, precepts, and definition of transgressions, and in the methods they employ to restore broken vows. I have also tried to show how several Tibetan scholars attempted to harmonise or synthesise the two traditions.

125 For the methods of restoring vows according to the Maitreya-Asaṅga tradition, see the Rig 'dzin 'jug ngogs (pp. 161.14–163.4).

126 Rig 'dzin 'jug ngogs (p. 163.4–6).
Chapter Seven

A Typology of Bodhicitta

By seeing the Dharma, one sees the Buddha. By seeing the Buddha, one sees all sentient beings. By seeing all sentient beings, one sees causes and conditions. By seeing causes and conditions, one sees emptiness. Seeing emptiness is not seeing [any phenomenon]. O Illustrious One, not seeing any phenomenon is the correct seeing!

– Subhūti in the Dharmasamgītisūtra⁰

1. Introductory Remarks

Anyone who has worked with the concept of bodhicitta in tantric and non-tantric Mahāyāna Buddhism can easily be baffled by the diverse employment of the term. Although the primary, standard meaning of bodhicitta is the resolve (citta) to attain the highest state of awakening (bodhi), that is, the resolve to become a buddha, one sees, particularly in the later tantric and non-tantric Mahāyāna sources, that bodhicitta can also mean other, sometimes even unexpected things. For example, śūnyatā and tathāgata-garbha are referred to as bodhicitta. Occasionally, the gnosis or insight of a bodhisattva or buddha is also referred to as bodhicitta. In the tantric systems that contain sexual-yogic practices, the seminal fluids of ‘virility’ and ‘fertility’ are designated as bodhicitta. In addition, tantric deities such as Kālacakra and Hevajra are called bodhicitta.

These facts raise a number of questions: Are these various meanings of bodhicitta at all related to each other? Is it sheer coincidence that different things, most of which have nothing to do with the original term and its meaning, are called bodhicitta? Are they, that is, related to each other only nominally, and hence can be dismissed as irrelevant to the study of the concept of bodhicitta? I for my part believe that the various kinds of bodhicitta are doctrinally and historically related to each other, and that a study of bodhicitta that does not take all these types into consideration will not be complete. Several modern scholars have

---

⁰ Dharmasamgītisūtra (T, fol. 291a5–7; D, fol. 69b5–6): chos mthong bas sangs rgyas mthong ngo || sangs rgyas mthong bas sems can thams cad mthong ngo || sems can thams cad mthong bas rgyu dang rkyen mthong ngo || rgyu dang rkyen mthong bas stong pa nyid mthong ngo || stong pa nyid mthong ba ni mthong ba ma mchis pa’o || bcom ldan ’das [add. gang de ltar T] chos thams cad ma [mi T] mthong ba ni yang dag par [pa D] mthong ba’o ||
taken note of most types of bodhicitta. None of them, however, as far as I can tell, has come up with a typology that can explain their entire spectrum of meaning. I have therefore made an attempt to devise a typology which accounts for the concept of bodhicitta in all its phases of historical development and doctrinal usage. The typology proposed here lays no claim to being perfect, and may certainly require much improvement or refinement. Nonetheless, it is hoped that this attempt will stimulate the interest of other scholars working in this field.

2. An Overview of the Five Types of Bodhicitta

I have categorised bodhicitta under the following types:

(a) ethico-spiritual
(b) gnoseological
(c) ontological
(d) psycho-physiological
(e) semeiological

I shall first of all explain what I mean by these terms: (a) ‘Ethico-spiritual’ bodhicitta is the idea of bodhicitta in its most basic sense, that is, the resolve to become a buddha out of compassion or altruism, that is, for the sake of other sentient beings. It is only in this sense that the word bodhicitta can be translated as ‘resolve [to strive] for awakening.’ Unless specified otherwise, the term in this study has been employed primarily with this meaning. (b) Occasionally knowledge (vidyā: rig pa), discriminating insight (prajñā: shes rab), or meditative insight or gnosis (jhāna: ye shes) is considered to be bodhicitta. I call such a type of bodhicitta characterised by cognitive insight ‘gnoseological’ bodhicitta. (c) By ‘ontological bodhicitta,’ I mean the concept of bodhicitta in its deepest sense, that is, cases in which the very ultimate reality or ‘being as such’ (i.e. śūnyatā, tathatā, dharmaḥatva, bhūtakoti, etc.) is considered to be bodhicitta. (d) By ‘psycho-physiological’ bodhicitta I mean ‘semen’ (śukra: khu ba) and occasionally also female ‘blood’ (śonita or rakta: khrag), referred to as ‘white’ and ‘red’ bodhicitta, respectively, and closely associated with the sensation of ecstasy or bliss (sukha: bde ba). (e) ‘Semeiological’ bodhicitta denotes a visual, vocal (verbal) or visionary sign or symbol which expresses one or more of the four preceding types of bodhicitta. I have borrowed the term ‘semeiological’ from semiotics or the study or science of signs. Unlike in semiotics, however, I make no distinction between sign and symbol. Although semeiological bodhicitta, as a representative of the other four types, is not exactly on a par with them, it can nonetheless be considered a ‘type’ of bodhicitta because it, like psycho-physiological bodhicitta, is conceived of as an effective means of access to gnoseological bodhicitta, and in a certain sense even as a visual, verbal, or visionary expression of ontological bodhicitta itself.

Since I have not been able to locate any Indian source that suggests these five types of bodhicitta in one place, I shall present here a translation of a passage from Rong-zom-pa’s commentary on the *Guhyagarbhatantra, which seems to do so.3

---

2 As for my preferring the term ontological to the term metaphysical, see the EB (s.v. ontology) where ontology is described as “the theory or study of being as such; i.e., of the basic characteristics of all reality,” and where it is also stated that “though the term was first coined in the 17th century, ontology is synonymous with metaphysics or ‘first philosophy’ as defined by Aristotle in the 4th century BC.” Because metaphysics came to include other studies (e.g. philosophical cosmology and psychology), ontology has become the preferred term for the study of being.”

3 dKon mchog 'grel (A, fol. 111a5–b1; B, p. 144.2–5): de la spyir byang chub sems zhes bya ba stong pa nyid dang snying rje ‘brel ba la yang ‘jug | dbyings dang ye shes gnyis su med pa’i don ma nor ba rtags pa’i rig pa ‘byung ba la yang ‘jug | sems kyi rang bzhin ji bzhin pa la yang ‘jug ste | de’i rtags kyi phyag rgya dang sgror gyur pa ni lhag pa’i byang chub sems so ||
The term bodhicitta is generally employed [1] to designate the union of emptiness (śūnyatā: stong pa nyid) and compassion (karunā: snying rje). [2] It is also employed to designate the arising of knowledge (vidyā: rig pa) of properly realising the reality consisting in the oneness of the sphere [of reality] (adhātu: dbyings) and gnosis (jñāna: ye shes). [3] It is also employed to designate the nature of mind as it actually is. [4] The symbolical signs (mudrā: phyag rgya) corresponding to these and [5] the means of access [to them] are called ‘surplus bodhicitta’ (*adhibodhicitta: lhag pa’i byang chub kyi sems).

Broadly speaking, one can describe most types of bodhicitta as being characterised by the union of emptiness and compassion. However, in the passage above, the expression is obviously employed in a narrow sense to refer to only ethico-spiritual bodhicitta, and thus the first three types mentioned there seem to correspond to our ethico-spiritual, gnoseological and ontological bodhicitta, respectively. The fourth and fifth, which Rong-zom-pa designates collectively as *adhibodhicitta, can be perhaps equated with our semeiological and psycho-physiological bodhicitta, respectively. As for the term *adhibodhicitta, I have not been able to trace it in Indian sources. It is, however, obvious from the context that it does not mean ‘superior bodhicitta’ but rather ‘surplus bodhicitta.’ In any case, the last two types of bodhicitta are, for Rong-zom-pa, obviously not on the same level as the first three types.

3. Ethico-Spiritual Bodhicitta

The term bodhicitta is primarily understood in its ethico-spiritual sense, that is, as an earnest, compassion-driven wish to become a buddha, which is unique to Mahāyāna or the bodhisattva doctrine. Whether bodhicitta or cittotpāda is mind per se (citta: sems) or a mental derivative (caitasika or caitta: sems las byung ba) has been spiritedly argued over in India and Tibet. Some scholars have maintained that it is a principal mind and some a mental derivative or factor. Others have attempted to resolve the issue by contending that a mind and its mental factors, as a rule, never arise in isolation from each other, and thus the two positions are not contradictory. Accordingly, this would mean that bodhicitta possesses components of both mind and the mental factors. Indeed we have seen in the second chapter that ethico-spiritual bodhicitta should be viewed as possessing conative, cognitive, and emotive forces corresponding to the elements of will (chanda: ’dun pa), discriminative insight (prajñā: shes rab), and compassion (karunā: snying rje), respectively.

An attempt was made in chapter three to present a number of factors that could have contributed to the conception of ethico-spiritual bodhicitta. The idea of ethico-spiritual bodhicitta in its early historical phase was probably limited to the initial resolve to become a buddha, but in the course of time not only the altruistic inclination (āśaya: bsam pa) but also the actual undertaking (prayoga: sbyor ba), including the spiritual practice of the six perfections (pāramitā: pha rol tu phyn pa), came to be regarded as part of bodhicitta or cittotpāda. Such a development doubtless went hand in hand with subclassifying it into various double sets, namely, into the resolve characterised by aspiration (pranidhīcitta: smon pa’i sems) and the resolve characterised by (or present during) the act of setting out (praśṭhānacitta: ’jug pa’i sems); into generation of the resolve that is gestural (or indicatory) (sāmkheti-kacittotpāda: brdar btags pa’i sems bskyed) and generation of the resolve that is actual or ultimate (pāramārthi-kacittotpāda: don dam pa’i sems bskyed); or into conventional bodhicitta (saṃyrtibodhicitta: kun rdzob kyi byang chub kyi sems) and absolute bodhicitta (pāramārthikabodhicitta: don dam pa’i byang chub kyi sems). Such a traditional classification of bodhicitta would accommodate not only ethico-spiritual bodhicitta but the proposed ontological and gnoseological types of bodhicitta as well. Attempts were obviously also made to interpret entire theories and practices, including the paths and attainments of a bodhisattva, in terms of bodhicitta or cittotpāda.
Ethico-spiritual bodhicitta remains essential even in highly developed forms of tantric Buddhism. However, the underlying idea of it may vary according to the soteriological model followed; that is, the notion of the resolve to ‘become’ a buddha is no longer applicable in a system that presupposes that all sentient beings already ‘possess’ the Buddha Nature or ‘are’ already buddhas. In such cases, one resolves merely to ‘expose’ the buddha within or to ‘recognise’ one’s state of being a buddha.4

4. Gnoseological Bodhicitta

It is not possible to do full justice here to such a weighty topic as gnosis, upon which the concept of gnoseological bodhicitta is largely based. What I shall merely attempt instead is to explain what I mean by gnoseological bodhicitta and to discuss some of its potential synonyms or near synonyms, its salient features and the question regarding who actually possesses it. In addition, the idea that gnosis exists in the body—particularly relevant to psycho-physiological bodhicitta—and the different modes of its emergence as propounded in some rNying-ma sources will be presented.

(a) What Gnoseological Bodhicitta Is

One may say in general that a Buddhist saint is primarily defined by gnosis (jñāna: ye shes). It is, however, necessary to determine an exact relationship between gnosis itself and gnoseological bodhicitta. Not all kinds of gnosis will be regarded here as gnoseological bodhicitta. If no qualitative difference is recognised between the gnosis of a śrāvaka saint, pratyekabuddha, and a buddha, one could, theoretically and retrospectively, designate the gnosis of non-Mahāyāna saints as gnoseological bodhicitta, but I see no benefit in doing so, because, in the first place, the term bodhicitta is not applicable to non-Mahāyāna Buddhism. Nor should the so-called ‘subsequently obtained gnosis’ (prṣṭhalabdhajñāna: rjes las thob pa’i shes)—that is, gnosis which is present only during the post-meditative state of a bodhisattva who has gained direct meditative access to reality, or ontological bodhicitta—be considered gnoseological bodhicitta. In some specific non-tantric Mahāyāna sources (such as the literature dealing with the tathāgatagarbha theory) and related tantric sources, gnosis is conceived of as being immanent or innately present in all sentient beings. Such gnosis in a subliminal state will not be regarded as gnoseological bodhicitta either, but rather as the ontological type. In short, by gnoseological bodhicitta I mean a kind of gnosis, be it generated or merely exposed, that has ontological bodhicitta as its veritable and immediate object. A subject-object dichotomy is, however, not posited.

(b) Some Synonyms of Gnoseological Bodhicitta

There are several references where bodhicitta is understood in its gnoseological sense. For example, in the commentaries of the Mahāyānasūtrālaṃkāra, what is known as absolute bodhicitta in the traditional sources is defined in its gnoseological sense, and concretely as non-conceptual gnosis (nirvikalpajñāna: rnam par mi rtog pa’i ye shes). Likewise, the Bodhicittavivaranaṭīkā explains that bodhicitta is a ‘diamond-like gnosis,’ which cognises all phenomena correctly.5 In one tantric commentary, the knowledge of the non-substantiality of

---

4 See, for example, the dGongs pa’ dus pa’i mdo (P, fol. 152a5–6; D, fol. 162b5):
bdag cag mtha’ ‘yas sms can rnam ||
don gyi sangs rgyas yin mod kyang ||
rtog pa’i dbang gyis ’khor ba la ||
byang chub mchog tu sms bskyed do ||.
phenomena \((\text{dharmanairātmya: chos kyi bdag med pa})\) is also identified as \textit{bodhicitta} in its gnoseological sense.\(^6\) In some other tantric sources, the mirror-like gnosis seems to be equated with \textit{bodhicitta}.\(^7\) In the \textit{Madhyamakapradīpa}, the self-arisen gnosis \((\text{svayambhūjñāna: rang byung gi ye shes})\) is apparently used in apposition to \textit{bodhicitta} in its gnoseological sense.\(^8\)

Not only \textit{bodhicitta} but also any term in Mahāyāna that is understood in a gnoseological sense can be regarded as a synonym of it. In the non-tantric Mahāyāna, so long as terms such as \textit{bodhi, buddha, prajñāpāramitā, and madhyama pratipat} imply a veritable non-conceptual gnosis that cognises true reality (i.e. \textit{sūnyatā}, \textit{tathatā}, etc.), they can be equated with gnoseological \textit{bodhicitta}. In the tantric context, too, several terms that denote direct cognition of true reality, such as the term \textit{tantra} itself, can be considered synonyms of gnoseological \textit{bodhicitta}.

**(c) Some Salient Features of Gnoseological Bodhicitta**

The concept of gnoseological \textit{bodhicitta} is based on the general Buddhist notion that the actual soteriological breakthrough comes in the form of an intellectual event, gnosis, and not an emotional one, no matter how positive, such as benevolence \((\text{maitrī: byams pa})\)—a point which has been explicated by the Buddhist logician Dharmakīrti.\(^9\) It is one’s view of or insight into \textit{sūnyatā}, then, which actually releases one from the fetters of \textit{sāsāra}.\(^10\) This notion of release upon seeing true reality is found in several Mahāyāna sources, such as the \textit{Abhisamayālaṃkāra} and \textit{Ratnagotravibhāga}.\(^11\) According to the \textit{Hevajra tantra}, one is called

11 Abhisamayālaṃkāra 5. 21; Ratnagotravibhāga 1.154:

\(\text{nāpaneynam atah kimcid upaneynam na kimca |}\)
a buddha because of one's understanding of phenomena. The Caturdevipariprcchātantra states that all the 84,000 teachings of the Buddha will be fruitless if one does not know true reality. Correct cognition always seems to imply the notion of knowing true reality without superimposition (adhyāropa/samāropa: sgro 'dogs pa) or depreciation (apavāda: skur ba 'debs pa), although here too the concept of superimposition and depreciation differs from system to system.

Since a detailed analysis of the salient features of gnoseological bodhicitta is not possible here, I shall merely summarise them as follows: (1) Gnoseological bodhicitta is non-conceptual (nirvikalpa: rnam par mi rtog pa) by nature. (2) It is undefiled (aniisrava: zag pa med pa). It is no longer subject to the ills of saTf1siira. (3) It is a direct yogic perception and hence a valid cognition (pramiilJa: tshad ma). Thus it neither superimposes qualities on its object nor denies it the ones it has. In other words, it is fully objective. (4) It is born of meditation (bhāvanāmaya: sgom pa las byung ba), that is, the combined practice of quietude (samatha: zhi gnas) and superior insight (vipasyāṇa: lhag mthong). (5) It has ontological bodhicitta as its object and is free from the subject-object dichotomy. (6) Its has a soteriological impact on the person who possesses it. (7) It is by nature stronger than the factors opposed to it, and thus never succumbs to them. (8) Its soteriological effect is irreversible. (9) It destroys the very foundations of immoral attitudes and actions. Thus a person who possesses it is incapable of deliberately inflicting pain on others. (10) It is the only means of access to ontological bodhicitta. Without it, ontological bodhicitta will never be experienced as a spiritual event.

dbyings dang ye shes gnyis med rang bzhin gnyis || 
chos kyi sku ste..... This verse is apparently a quotation.

For an analogy drawn with eliminating darkness through light, see, for example, Kāṇha’s Yogaratnāmālā (p. 137.5–8): namu sāgaropamād vipaksarāṣṭrāb kathāṃ devatāyogamārāt samuttarāṇam | yathā giriguḥāyaṃ sakrd jvalito vahiniḥ | cirākālam upacātom tamasskandham upahantī | tathāyām api nairātāmevahajrabhāvanāviśesā iti bhāvaḥ |

200 The Resolve to Become a Buddha

200
(d) Who Possesses Gnoseological Bodhicitta?

The question regarding who possesses gnoseological bodhicitta is tantamount to the complicated Indian and Tibetan issue of who realises the non-substantiality of phenomena (dharmanairāmya: chos kyi bdag med pa), or in other words, to the issue regarding whether the śrāvaka saints and pratyekabuddhas realise dharmanairāmya, a question that is answered differently in different scriptures and systems. In keeping with my definition of gnoseological bodhicitta, it will be argued that only those bodhisattvas (including tantric yogins) who have direct access to true reality as defined in the Mahāyāna—that is, bodhisattvas who have at least attained the path of seeing (darśanamārga: mthong ba'i lam)—will be regarded as bearers of gnoseological bodhicitta.

Two different viewpoints traceable in certain Mahāyāna sources may prima facie suggest that bodhicitta is common to all Buddhist saints. The first one is that śrāvaka saints, pratyekabuddhas, bodhisattvas, and buddhas arise from bodhicitta. It can be assumed that bodhicitta in such a context is to be understood in its ethico-spiritual sense. The second viewpoint is that Buddhist sainthood is possible only through realisation of bodhicitta, obviously here understood in its ontological sense. According to this position, one who does not realise bodhicitta even to the smallest degree has not the slightest chance to attain release (mokṣa: thar pa). Both of these viewpoints may be used to argue that all Buddhist saints indeed possess both ethico-spiritual and gnoseological bodhicitta.

Nonetheless, a closer look at the explanation of the first point of view reveals that ethico-spiritual bodhicitta is not attributed to all Buddhist saints. It is not presupposed that śrāvaka saints and pratyekabuddhas must generate ethico-spiritual bodhicitta in order to attain their soteriological goal. The rationale behind such a perception is that ethico-spiritual bodhicitta gives rise to a bodhisattva, a bodhisattva to a buddha, and a buddha to śrāvaka saints and pratyekabuddhas, and hence the origin of all Buddhist saints can be traced back to ethico-spiritual bodhicitta. This is, of course, by no means the same as contending that one must generate ethico-spiritual bodhicitta to become, for instance, a śrāvaka saint. In the Prajñāpāramitā systems, all Buddhist saints are born from the Prajñāpāramitā—a position

16 Mañjuśrīmitra, Bodhicittabhāvanā (P, fol. 2b1–3; D, fol. 2a1–2; S, vol. 33, p. 810.3–7); Bodhicittabhāvanānirdeśa (P, fol. 57a2–b2; D, fol. 46a5–b3; S, vol. 33, pp. 184.12–185.9).

17 Vajraśikharatrantra (T, fol. 120a7–b2; D, fol. 230b2–4):
  byang chub sems ni ma riogs par ||
  thog ma med ldan 'khor ba las ||
  'byung ba cung zad yol ma yin ||
  nyan thos dang ni rang rgyal dang ||
  byang chub sems dpa'i rnam 'phrul ni ||
  byang chub kyi ni sms med par ||
  'gas kyang mya ngan 'da mi nus ||
  gal te sngs rgyas 'byung med na ||
  nyan thos dag ni ga las 'byung [byung D] ||
  sngs rgyas 'byung ba yod min na ||
  rang rgyal de ni 'byung mi 'gyur ||
  gal te byang chub sems dpa' med ||
  sngs rgyas rnam ni gang las 'byung ||.

Cf. also Madhyamakāvatārā 1.1 (p. 1.12–15):
  nyan thos sngs rgyas 'bring rnam shtub dbang skyes ||
  sngs rgyas byang chub sems dpa' las 'khrungs shing ||
  snying rje'i sms dang gnyis su med blo dang ||
  byang chub sems ni rgyal sras rnam kyi rgyu ||.

See also the Madhyamakāvatārārabhāṣya (pp. 2.1–7.14).

which is prone to all kinds of interpretations and is bitterly disputed in Tibet. Similarly, for Mañjuśrimitra, all Buddhist saints arise from the realisation of (ontological) bodhicitta, but this does not mean that all those who realise ontological bodhicitta automatically become bodhisattvas. For him, realisation of (ontological) bodhicitta to a small, medium, or great degree gives rise to a small, medium, or great degree of soteriological attainment, respectively. One who does not realise it at all will not attain even the least soteriological goal. Mañjuśrimitra has, in this way, clearly attempted to reinterpret the entire non-Mahāyāna and Mahāyāna Buddhist soteriology in terms of ontological and gnoseological bodhicitta. Thus, for him, it would be correct to maintain that a śrāvaka saint possesses a small dose of gnoseological bodhicitta, a pratyekabuddha an intermediate dose, and a Mahāyāna saint a greater dose still.

(e) Gnosis as Abiding in the Body

The idea that gnosis abides in the body is widespread, and is particularly interesting in the context of psycho-physiological bodhicitta. The underlying reason seems to be this: Gnosis can be elicited from the body by manipulating the latter skilfully, just as oil and butter can be gained from sesame and milk, respectively, inasmuch as gnosis pervades the body. The idea of gnosis abiding in the body can be found in several Mahāyāna sources. For example, the Dharmadhatustava attributed to one Nāgārjuna states:

For example, in a container
Water is mixed with milk;
A swan drinks the milk
And the water remains as it is.
Similarly, gnosis abides in the body
Wrapped in klesas;
A yogin receives the gnosis
And the ignorant one rejects [it].

According to the Hevajra Tantra, the great gnosis abiding in the body is devoid of all conceptual thought; it abides in the body and yet is not born in it. The Caryāmelāpakapradīpa cites two verses (apparently a rough citation from the Dharmadhatustava), which state:

| 19 | Cf. also Ratnagunasamcaya 5.5–8. |
| 20 | Cf. the Tattvasamgrahapaññikā ad 2843–2846 (vol. 2, p. 639.8–9; also cited in TSD, s.v. til mar): na hy asanto vyomakusumādāyah kvacid api śakyante kartum, sikatāsu vā tailam | Note, however, the context. For an English translation, see JHA 1937/39: 1284. |
| 21 | Dharmadhatustava (P, fol. 76a2–3; D, fol. 66a2–3; S, vol. 1, pp. 183.19–184.2): jî ltar ‘o ma dang ’dres chu || snod gcig la [na DC] ni gnas pa las || ngang pas [pa DC] ‘o ma ‘thung byed cing || chu ni ma yin de bzhin gnas || de bzhin nyon mongs kyi s yogs nas || ye shes lus ‘dir gcig gnas kyang || rnal ‘byor pa yis ye shes len || mi shes pa ni ‘dor bar byed || |
| 22 | Hevajra Tantra 1.1.12: dehastham ca mahājñānam sarvasaṃkalpavājītam | vyāpakah sarvavastūnām dehastho ‘pi na dehajah || |
| 23 | Cited in the Caryāmelāpakapradīpa (p. 61.7–10): yathā dīpo ghaṭāntahsthō bāhye naivāvabhaśate |
For example, a lamp inside a pot
Will not shine outside [the pot];
But if that pot is broken,
The flame of the lamp will then shine.
In the same way, one's body is like a pot,
And reality is like a lamp;
If [the former is] broken completely by the master's organ of speech,
The gnosis of a *buddha* will become manifest.\(^{24}\)

In some sources, it is said that also the *Prajñāpāramitā* exists in the body.\(^{25}\) The *Guhyasiddhi* states that the supreme pure gnosis that exists in one's body can be realised with effort, by the grace of a master.\(^{26}\) In the *Caturdevi viparītprachātāntara*, the role of psycho-physiological *bodhicitta* in the evolution of the psycho-physical world is underscored.\(^{27}\) All elements are called *dharmaḥātā*, and from them arises what is apparently psycho-physiological *bodhicitta*. The *Yogaratnāmālā* states that there is no bliss without physicality and no physicality without bliss.\(^{28}\) According to the *Hevajra tantra*, ecstasy (or inexplicable bliss) and gnosis should arise from within.\(^{29}\)
The Three Modes of Emergence Open to Gnosis

Kuddālapāda, one of the eighty-four mahāsiddhās, states in his Acintyādvayakramopadeśa: 30

Gnosis, a great mystery comprising insight [and] efficient strategy,
Having compassion [and other] inconceivable characteristics,
[And] beyond [expression] by verbal means,
Arises on its own [spontaneously].

Some rNying-ma sources, such as Mi-pham’s bKa’ brgyad rnam bshad (which is apparently based on much older sources), allude to three modes of emergence open to gnosis (ye shes ’char lugs gsum), namely, (a) the emergence of gnosis posteriorly (ye shes chen po rgyab nas ’char ba), (b) the emergence of gnosis anteriorly (ye shes chen po mduṅ nas), and (c) the emergence of gnosis interiorly (ye shes chen po khong nas ’char ba). To put the concept of gnosis and gnoseological bodhicitta into perspective, a translation of the pertinent passage from the bKa’ brgyad rnam bshad is presented here. Firstly, the posterior emergence of gnosis is described as follows: 31

The mode of emergence of gnosis pertaining to the three causal vehicles of characteristics (*lalqCllJayana) is called the ‘emergence of great gnosis posteriorly.’ How does it come about? It is maintained that just like the emergence of a reflection upon the clearing up of turbid water, omniscience [emerges] upon one’s becoming a buddha at the [eleventh] stage of ‘Total Radiance’ (samantaprabhā) at the end of the ten stages and after the dregs of conceptuality, consisting of intellectual-emotional defilements (kleśa), have been gradually cleared away. Because such a gnosis is said to arise after three countless aeons and so forth, [the arising of gnosis according to these three systems] is called the ‘emergence of gnosis posteriorly.’

Secondly, regarding the emergence of gnosis anteriorly, the bKa’ brgyad rnam bshad states: 32
[According to the] three outer tantric systems of the Mantra[yaṇa], it is called the ‘emergence of great gnosis anteriorly.’ That is to say, [according to these systems], the Victorious Ones, comprising three or five families (kula), together with their entourage—all residing at present in Akanisṭha—are invited and seated in front of the space [above oneself] and elsewhere, and then after homage is paid and the [appropriate] offerings are made, the tantric attainments (siddhi) are received. Thus the view [of these tantric systems] is that tantric attainments are bestowed by these deities. And because the way of those who maintain that the ultimate result is achieved in seven or sixteen human life spans and so forth is swifter—as far as achieving the result is concerned—than the causal vehicles of characteristics, due to the employment of profound methods of producing a favourable constellation of oneself, deities, and substances, [the arising of gnosis according to these three systems] is called the ‘emergence of great gnosis anteriorly.’

---

30 Acintyādvayakramopadeśa 2 (p. 195.5–6):
praṭñāpāyam mahāguhyaṃ karuṇācintyālakṣaṇam | svaṃ utpadyate jīlaṇaṃ vākpaññāttagocaram ||
Cf. also ibid. 15 (p. 196.15–16).

31 bKa’ brgyad rnam bshad (pp. 43.6–44.3): rgyu mtshan nyid kyi theg pa gsum gyi ye shes ’char lugs ni ye shes chen po rgyab nas ’char ba zhes bya ste | ji ltar na chu rnyogs pa dwangs pa las gugs brnyan ’char ba ltar rnam par mi rtog pa la yun ring gnas par byas pas rim gyi nyon mongs pa’i rnam rtog snyigs ma dwangs nas sa bcu’i mthar kun tu ’od kyi sa la sangs rgyas nas thams cad mkhyen par ’dod pa ni | ye shes de ltu bu bskal pa grangs med gsum sogs nas phyis ’byung bar ’dod pas ye shes rgyab nas ’char ba zhes bya’o ||

32 bKa’ brgyad rnam bshad (p. 44.3–5): sngags phyi rgyud sde gsum ni ye shes chen po mduṅ nas ’char ba zhes bya ste | da lta nyid du ’og min na bzhugs pa’i rgyal ba rigs gsum mam riggs lnga ’khor bcas sphyan drangs te mdun mkha’ sogs su bzhugs pa la phyag ’tshal zhung mchod pa phul la dngos grub nod par byas pas lha des dngos grub ster bar lta zhung | bdag dang la dang rdzas kyi rten ’brel zab mo’i thabs kyis bsgrub (= sgrub?) pas | mi tshed bdun dang bcu drug la sogs pa mthar thug gi ’bras bu ’grub par ’dod pa de dag gi lam rgyud mtshan nyid kyi theg pa las ’bras bu ithob pa la myur ba’i phyir ye shes mduṅ nas ’char ba zhes bya’o ||
Thirdly, the emergence of gnosis interiorly is described as follows:  
[According to] the three vehicles of means (*upāyayāna) of the inner Mantra[yāna], [the arising of gnosis] is called the ‘emergence of great gnosis interiorly.’ Because no phenomenon [ever] diverges from the nature of self-arisen gnosis (svayambhūjñāna), [gnosis] becomes manifest in this very lifetime, there being no need to seek [the state of] a buddha elsewhere, for the state of one’s own mind abides in the nature of the great bliss. Thus [the arising of gnosis in these three systems] is called the ‘emergence of gnosis from the interior.’

I have not been able to locate any Indian source for such an idea.

5. Ontological Bodhicitta

In the following few paragraphs, an attempt will be made to explain the concept of ontological bodhicitta. The term bodhicitta is very pregnant and expressive, particularly if one thinks of Buddhism as a ‘bodhi-oriented religion’ or as a ‘citta-oriented religion.’ As has already been pointed out, the compound bodhicitta allows fundamentally of two interpretations: (1) as citta that is aimed at the attainment of bodhi and (2) as citta which is characterised by bodhi (or citta which is in essence bodhi). The latter understanding of the compound combined with the philosophical reflection on the deeper meanings of citta and bodhi may have contributed to the formation of the idea of ontological bodhicitta. For example, the Bhadrapālasūtra explicitly states that one’s own citta is in essence bodhi.  

Similarly, the Vairocanābhisaṁbodhitāntra states:  

\[ \text{Boddhi is the complete knowledge of one's citta just as it is.} \]

In other Vajrayāna contexts, bodhicitta is explicitly explained as citta characterised by bodhi.  

\[ \text{The Kosalālāmkāra states that it is because it is both bodhi and citta that it is called bodhicitta (implying that the compound has been taken as a karmadhāraya).} \]

This is also primarily the stance taken in the rDzogs-chen system. In addition, the words bodhi and citta can be employed conveniently in a number of ways to express pithily various aspects of Mahāyāna philosophy. For example, bodhi is nothing other than the correct knowledge of one’s citta.

---

33 bKa’ brgyad rnam bshad (pp. 44.6–45.1): sngags nang pa thabs kyi theg pa gsum ni ye shes chen po khong nas ‘char ba zhes bya ste | chos thams cad rang byung gi ye shes bdag nyid chen po ‘i ngang las ma ‘das pas na | rang gi sems nyid bde ba chen po ‘i de nyid la gnas bzhin du sangs rgyas gzhan du tshol mi dgos pa tshe ‘di nyid la mgon du ‘char ba nas ye shes khong nas ‘char ba zhes bya ‘o |].

34 Bhadrapālasūtra (p. 37.13–20): 

\[
\begin{align*}
\text{sems kyi }& \text{sangs rgyas byed pa ste } | \\
\text{sems nyid kyi }& \text{kyang mthong ba } ‘o | \\
\text{sems nyid nga yi }& \text{sangs rgyas te } | \\
\text{sems nyid de }& \text{bzhin gshegs pa } ‘o | \\
\text{sems nyid nga yi }& \text{lus yin te } | \\
\text{sangs rgyas }& \text{sems kyi mthong ba } ‘o | \\
\text{sems nyid nga yi }& \text{byang chub ste } | \\
\text{sems nyid rang }& \text{bzhin med pa } ‘o |.
\end{align*}
\]

35 Vairocanābhisaṁbodhitāntra, as cited in the Caryāmelāpapradīpā (p. 38.11–12): svacittasya ‘yathābhūtam pariñānān” bodhiḥ |. * Perhaps to be read as a compound.

37 Kosalālāmkāra (P, fol. 23b1; D, fol. 20b6; S, vol. 28, p. 50.6–7): byang chub kyang yin la sms kyang yin pas na byang chub kyi sms te [ta P] |.

one’s citta as being bodhi at its core. One attains bodhi by penetrating one’s citta with insight. Citta when bound is called samsāra; a citta free from all fetters—intellectual-emotional defilements and conceptual thought—is called nirvāṇa (or bodhi). Of course, bodhicitta yields to interpretation depending on how bodhi and citta, and the correlation between them, are understood. It is only when it refers to true reality, not the cognition of true reality, that the given type of bodhicitta can be called ontological bodhicitta.

(a) The Conception of Ontological Bodhicitta

Already in the non-tantric Mahāyāna sources bodhicitta is described as luminously pure. For example, the Sāgaramatpariprcchāsūtra states:

One could [hypothetically] defile space [with intellectual-emotional defilements];
One could [hypothetically even] leave behind [one’s] footprints there (i.e. in space).
One could, however, never defile the perfect bodhicitta,
Which is by nature luminous.

Such a statement is, of course, open to more than one interpretation. For example, the type of bodhicitta referred to here may be simply understood as ethico-spiritual bodhicitta, which has been described as luminous because of its pure altruistic nature, free from negative emotions such as hatred. If the term sambodhicitta is interpreted as the buddha’s omniscience, it would qualify as gnoseological bodhicitta but not necessarily ontological bodhicitta.

Nonetheless, there are instances where the nature or luminous nature of the mind is referred to as bodhicitta, and where it can only be interpreted as ontological bodhicitta. For example, the Bodhisattvatapitaśakasūtra explains:

Moreover, O Śāriputra, the mind (citta) is what has awakening (bodhi) as [its] nature, and hence it is called bodhicitta.

In the eleventh century, Ratnakarāśānti in India and Rong-zom-pa in Tibet explicitly described the luminous nature of mind as bodhicitta. Ratnakarāśānti in his Guhyasamājamandalavidhiṭīkā states:

That which is by nature luminous
Is the unsurpassable bodhicitta.
Rong-zom-pa, too, explains:

Because the nature of the mind is primordially free from all stains, it is called bodhicitta. It transcends the domain of thoughts, in [its] profundity and vastness is the source (or foundation) of the inexhaustible attainment of bliss, and is unyielding like a diamond (vajra). Therefore, it is vajrasattva.

39 Sāgaramatpariprcchāsūtra (T, fol. 19a6–7; D, fol. 13b4):
\[
\text{ji ste nam mkha' nyon mongs bya bar nus} \quad | \\
\text{de la rjes kyang bstan par nus srid kyi} \quad | \\
\text{rang bzhin 'od gsal rdzogs pa'i byang chub sems} \quad | \\
\text{de ni nam yang nyon mongs byar mi nus} \quad |.
\]
See also the ‘Od gsal snying po (p. 197.3–4), where this passage is cited.

The question now is: how did the luminosity of the mind come to be regarded or described as bodhicitta? We know that the concept of luminous mind is pervasive in Sravakayana, Paramitāyana, and Vajrayāna. Not all non-Mahāyāna Buddhist schools that can be subsumed under Śrāvakayāna, however, accepted the concept. In two different articles Eli Franco has brought to our notice the issue of whether consciousness is luminous by nature (prakṛtiprabhāśvara), as debated in the so-called Spitzer Manuscript,43 which according to him is ‘the earliest philosophical manuscript that has come down to us,’ being datable palaeographically to the Kuṣāṇa period.44 Although he has had to base himself on only scanty fragments, Franco has managed to piece together some of the intricate arguments for and against the concept of natural luminosity of mind, and so shed some light on the historical development of the concept among non-Mahāyāna schools. The fact that an entire chapter was devoted to the controversy suggests that the issue was quite significant.45 Jikido Takasaki identified four non-Mahāyāna schools which accepted this concept, namely, Sthāvira (or Theravāda), Vaibhāṣika, Vātsīputrīya, and Mahāsaṃghika.46 Johannes Rahder added to the list a fifth school, the Vibhajyavāda.47 The concept of purity of mind can be traced in several Pāli sources, such as the Ānguttarānīkāya48 and Saṁyuttanīkāya. There are also several scriptures of the Pāramitāyāna, including the Aṣṭasāhasrikā,49 Drumakīmarājaparipṛcchāsūtra,50 Jñānālokālaṁkārasūtra,51 and Bhadrāpālasūtra,52 where the nature of mind is described as luminously pure. The concept seems to have become even more pronounced in the Vajrayāna, as can be seen, for example, in Nāropa’s Sekoddesaṭīkā.53 However, in Mahāyāna sources such as the Bhadrāpālasūtra54 and the

54 Bhadrāpālasūtra (p. 131.23–24): chos ’di dag thams cad ni rang gzhin gyis ’od gsal bas mya ngan las ’das pa
    dang mnyam pa’o ||.
Ajītaśatrukauprayāvinodanāśūtra,55 it is not simply the nature of mind which is described as luminously pure but the nature of all phenomena.

The concept of luminosity is pervasive in Buddhism but it is by no means homogeneously so. And not all allusions to it can be regarded as allusions to the concept of ontological bodhicitta. If this were the case, one could posit that the idea of ontological bodhicitta is found already in non-Mahāyāna sources, such as the Anguttara Nikāya—a thesis that would be, in my view, hard to defend. Thus the luminous nature of the mind as understood on the relative level of momentariness—for instance, in the Pramāṇavārttika56—cannot be designated as ‘ontological’ bodhicitta, for it is obvious that only the luminosity or purity of mind in the sense of absolute reality, as understood in certain Mahāyāna traditions, can fulfil the criterion of ontological bodhicitta. It will thus perhaps be necessary to classify the luminosity of the mind under two types, namely, one that is conditioned (or momentary) and one that is unconditioned (or not momentary), it being the latter that came to be equated with ontological bodhicitta. One other important point is that both these types of luminosity seem to be presupposed on the level of sentient beings, that is, to refer to the nature of mind of any sentient being.

For the sake of discussion, let us designate the luminosity characterised by momentariness as ‘luminosity on Ground A’ and the luminosity that is not characterised by momentariness as ‘luminosity on Ground B.’ The question that needs to be addressed is how the luminosity on Ground B has come to be regarded as ontological bodhicitta, whereas the luminosity on Ground A not. Did the idea of luminosity on Ground A, found in the non-Mahāyāna and in certain conservative Mahāyāna systems, directly lead to the formation of the concept of ontological bodhicitta in tantric and some non-tantric Mahāyāna systems? In other words, can we assume a direct historical link between the two concepts of luminosity? I would like to propose the following hypothesis: The idea of ontological bodhicitta or the luminosity on Ground B, traced only in some Mahāyāna traditions, does have a historical link with the idea of luminosity found in the non-Mahāyāna sources, but this link seems to be only an indirect one. That is to say, the original or conservative idea of luminosity on Ground A does not seem to have given rise to the idea of the luminosity on Ground B directly, but rather seems to have been first attributed to the Buddha as one of his several supreme qualities—to the level of the ultimate result, as it were—and this development in turn led to the formation of the idea of ontological bodhicitta.

Thus I hypothesise that the extension of the idea of luminosity on Ground A to that of luminosity on Ground B is connected with the development of the notion of the historical Buddha or of any buddha. The original idea of luminosity is that the nature of the mind is such that it is capable of clearing up the intellectual-emotional defilements (kleśa: nyon mongs pa), for these are merely adventitious and actually do not belong to the inherent nature of mind, just as muddied water is capable of clearing up because mud does not belong to the inherent nature of water. Such an idea could have also implied that in becoming a buddha, one has eliminated one’s intellectual-emotional defilements, with one’s pristine and immaculate mind being what remains behind.

Theoretical reflections on the nature of the Buddha have been carried out systematically, particularly in Mahāyāna Buddhism. Nevertheless, one can find decisive steps in this direction being taken already in some non-Mahāyāna Buddhist schools. The old

55 Cited in the Sūtrasamuccaya under the title Ajītaśatruparivarta (p. 149.20–23): rgyal po chen po chos thams cad rang bzhin gyis ’od gsal bas ’brel ba med pa’o || rgyal po chen po chos thams cad dag pas rang bzhin gyis ’od gsal ba’o ||; ibid. (p. 150.13–15): rgyal po chen po chos thams cad rang bzhin gyis ’od gsal ba’i phyir sdug pa’o ||.

canonical texts, especially those of the Theravāda, still present a human picture of the Buddha that is relatively close to that of a historical person. What was crucial, however, according to the Buddha himself (and his disciples) was that he was able independently to gain liberating insight into the Four Noble Truths and thereby to stifle the seeds of future births in samsāra and pass away into nirvāna without remain (nirupadhiśesanirvāna). Liberating insight and nirvāna were accessible to other human beings, too, but this required the teachings of the Buddha. It also presupposed an exceptional strength of mind, as characteristic of the Buddha himself, whose distinct supremacy over other sentient beings imparted to him a sense of uniqueness. Still, he did not keep his insight to himself but—however reluctant in the beginning—taught his fellow human beings. These teachings, the liberating truth transmitted in them, and the practices are what is essential; the Buddha as a person often retreats into the background. The fact that the Buddha disappears with his death from the world is insignificant. His visible material body is meaningless, and it, like all conditioned phenomena, is subject to impermanency and repulsiveness. It is merely a ‘stinking body’ (pūtikāya), and nothing is lost with it. What is essential in the Buddha is the salvific insight contained in his teachings. He who comprehends the teachings sees the Buddha, and the essential part of him. He sees the actual—the essential—‘body’ of the Buddha, the dharma-kāya. In short, it is the ‘mind’ (citta) of the Buddha characterised by liberating insight and his salvific activities (karman) or teachings expressed in the form of his speech (vāc) that are crucial, and not his physical or material body (kāya).

The development of Buddhology, however, did not stop here. Already during the lifetime of the Buddha, despite counsel against it, there must have been a tendency among many of his disciples, particularly among the lay ones, to transpose the dignity the teachings were treated with onto the teacher, thereby destining the Buddha to become an object of reverence in his own right. This tendency, in the course of time, led to ever increasing supramundane qualities being ascribed to the Buddha, particularly in the school of the Mahāsāṃghikas, where he is extricated from the earthly domain and divinised into a transcendent realm. In the process, magical and paranormal powers were attributed to him—which he used (contrary to Brāhmanical ascetics) for salvific purposes—and his knowledge reinterpreted. Originally, his knowledge was considered superior to that of others only because he had won his liberating insight (into the wholesome and unwholesome) by dint of personal capacity. Now his knowledge was elevated to total omniscience. While other non-Mahāyāna schools saw in the Buddha’s omniscience merely the ability to cognise any desired object at any time, just as a fire has the ability to burn all kinds of fuel without having to burn perpetually, the Mahāsāṃghikas went so far as to postulate that every moment the Buddha is cognisant of each individual phenomenon. It is understandable, in view of the fullness of power and knowledge attributed to the Buddha, that his physical body could no longer be allowed to retain an impure character. The image of a stinking body was no longer befitting. His physical body, recognised as the result of an extraordinary richness of wholesome virtues accumulated by him during his previous existences, must thus be distinguished from the bodies of other, ordinary beings. To his body were attributed the so-called ‘thirty-two major signs of a great man’ and the ‘eighty minor signs.’

There had often been attempts to summarise the multiple excellent qualities of the Buddha, one of which was to express them in terms of the body (kāya), speech (vāc), and mind (citta). It is not surprising that the mind of the Buddha is now described as luminously pure and immaculate.57 What is surprising is that even his body, once described as stinking, is

57 Samādhīrasūtra (p. 55, verse no. 27):

\[\text{yasya ca mṛduki samjñā nāmarūpasmi varttate | agrādham nāmarūpasmi cittaṁ bhoti prabhāsvaram ||}\]

See also ibid. (p. 55, verse no. 29a): \text{anāsravam ca me cittam}; for an English translation, see REGAMEY 1938: 91–92.
now considered luminously pure. The speech or voice of the Buddha is also considered luminously pure. The body, speech, and mind of the Buddha (and sometimes also of a bodhisattva) came to be regarded as the ‘Three Inconceivable Secrets (or Mysteries)’ (gsang ba bsam gyis mi khyab pa gsun), namely, as the ‘Secret of the Body’ (kāyaguhya: sku yi gsang ba), the ‘Secret of the Speech’ (vāgguhya: gsun gi gsang ba), and the ‘Secret of the Mind’ (cittaguhya: thugs kyi gsang ba). There is also the tendency to describe the body, speech, and mind of the Buddha as being ‘endowed with all excellent features’ (sarvākāraravopetā: rnam pa kun gyi mchog dang ldan pa). This is significant because the concept of ‘emptiness endowed with all excellent features’ (sarvākāraravopetā sūnyatā: rnam pa kun gyi mchog dang ldan pa ’i stong pa nyid) seems to have thereby assumed an ontological sense, particularly in the Tathāgatagarbha and Vajrayāna traditions. The primary motive for laying extreme emphasis on the positive qualities of the body, speech, and mind of the Buddha seems to have been to contrast them sharply with those of ordinary sentient beings. The body, speech, and mind of ordinary beings are imperfect, impermanent, and unreliable, and hence are not worth the striving done in their name, whereas the Buddha’s body, speech, and mind are perfect, permanent and reliable, and hence are worth such effort.

In short, sentient beings were therefore motivated to generate ethico-spiritual bodhicitta and thus become buddhas. Such an emphasis on the perfection and permanency of the Buddha’s qualities, however, seems to have led to unanticipated historical and doctrinal consequences. If the perfect qualities of the Buddha are permanent, he must have had them already when he was an ordinary sentient being endowed with intellectual-emotional defilements. If he, as an ordinary sentient being, had all these perfect permanent qualities, why cannot we, as ordinary sentient beings, also possess them now? Such reflections could have easily contributed to the development of the idea that all sentient beings possess the perfect permanent qualities of the Buddha here and now. This tendency to attribute the resultant qualities of the Buddha, such as the luminosity, to ordinary sentient beings may be given here as an example of the ‘process of ontologisation.’ In my view, such a process may have contributed to the formation of not only the idea of ontological bodhicitta but also several other notions usually considered identical with it.

58 Samādhīrajasūtra (p. 53, verse no. 14):
  punānirjātu buddhasya suḍḍhaḥ kāyaḥ prabhāśvarah
  sameti so ‘tarīkṣena nānātvam nāsya labhyate ||.

See also ibid. (p. 58, verse no. 49):
  aprameyā hi te dharmāḥ kalpakotyo niśevitāḥ
  tena acintyāḥ kāya nirvṛto me prabhāśvarah ||.

For an English translation of these verses, see REGAMEY 1938: 89 and 96, respectively. See also the Tathāgatācintyayugyanirdeśasūtra (T, fol. 160a5; D, fol. 109b6): rang bzhin gyis ’od gsal ba ’i sku |. Perhaps better nirvṛto (Tib. grub).

59 For example, see the Daśabhūmikasūtra (p. 87.5–6; TSD, s.v. thugs kyi gsang ba): samyaksaṃbuddhānāṁ guhyasthānāṁ yad uta kāyaguhyaṁ vā vāgguhyaṁ vā cittaguhyaṁ vā. See also the Tathāgatācintyayugyanirdeśasūtra (T, fol. 185b2–3; D, fol. 126b1–2): zhi ba ’i blo gros gsun po ’di dag ni de bzhin gshegs pa ’i gsang ba’o || gsun gan zhe na ’di lta ste | sku ’i gsang ba dang | gsung gi gsang ba dang | thugs kyi gsang ba’o ||.

60 For the expression sarvākāraravopetā sūnyatā, see SEYFORT RUÉGGO 1981: 84, 97, 98; id. 1989: 184, 190. See also id. 2004: 54.

61 Note that the idea of the adamantine body (vajrasārāsarā: rdo rje snying po ’i sku) can be found also in the Bodhisattvabhūmi 1.15 (WOGIHARA, p. 229.9–10; DUTT, p. 157.15–16).
(b) An Outcome of a Philosophical Quest?

The historical Buddha is said to have discouraged pure philosophical speculation as being irrelevant or obstructive to soteriological aspirations. It may be assumed, however, that to certain inquisitive Buddhist thinkers some philosophical enquiry did appear to be of relevance. Perhaps the role of human beings’ curiosity and quest for new and more satisfactory explanations should not be underestimated either. The various kinds of bodhicitta, particularly ontological, gnoseological, and psycho-physiological bodhicitta, suggest that there had been a continuing enquiry into the origin of existence, that is, the receptacle-world or habitat (bhājanaloka: snod kyi 'jig rten) and the world consisting of sentient beings or inhabitants (sattvaloka: sens can gyi 'jig rten).

According to Vasubandhu’s Abhidharmakośa, which is representative of the non-Mahāyāna Buddhist traditions, the diversity of the world arises from karma, that is, the volition and volition-driven actions of sentient beings.62 As karma in turn is not possible without intellectual-emotional defilements (klesā: nyon mongs pa), the root (mūla: rtsa ba) of existences (bhāva: srid pa) is the underlying defilements (anuṣaya: phra rgyas), namely, passion (rāga: dod chags), anger (pratigha: khong khro), pride (miśra: nga rgyal), ignorance (avidyā: ma ríg pa), (false) views (drṣṭi: lta ba), and doubt (vicikitsā: the tshom).63 These are identified the way a disease is diagnosed, so that one can be treated and cured as soon as possible. From a purely practical and soteriological point of view, such a diagnosis seems to be adequate. From a philosophical point of view, however, the question as to where these underlying defilements come from still remains unanswered.

For the Yogiācāra school of Mahāyāna Buddhism, for one—according to the Viniścayasaṃgrahāni—the so-called ‘fundamental mind’ (ālayavijñāna: kun gzhi rnam par shes pa) is said to be the root cause of the physical world and its inhabitants.64 It needs to be made clear that ālayavijñāna is understood as a substratum only of mundane phenomena pertaining to samāśāra and not of supramundane phenomena pertaining to nirvāṇa. Thus, when one becomes a buddha, ālayavijñāna is either eliminated or transmuted. Candrakīrti, who represents the Prāśāṅgika-Mañjuśrī school, has stated:65

Mind alone designs the extremely manifold
World of sentient beings and the receptacle-world,
For the entire world is taught as having arisen from karma;
But once the mind has been discarded, karma no longer exists.

Leaving aside the problematic issues regarding Candrakīrti’s stance on the external world and ālayavijñāna, it is clear that he regards mind, however one defines it, as the shaper of the world and as an entity that ceases or is emptied upon one’s becoming a buddha.66 The question regarding the origin of mind itself is, however, not addressed. These Buddhist

64 SCHMITHAUSEN 1987: 203.

65 Madhyamakāvātāra 6.89 (cited in the Bodhicaryavatārapaiṇīkā, p. 52.4–5; Subhāṣitasamgraha, p. 19): sattvalokam atha bhājanalokam cītīm eva racayaty aticītram |
karmajām hi jagad uktaṃ aśeṣaṃ karma cītīm avadhūṭa ca nāsti ||
See also SEYORT RUEGG 2002: 204.

66 See also Madhyamakāvātāra 11.2.8d (p. 361.14): sens 'gags pas de sku yis mngon sum māt dā ||.
systems apparently limit themselves to identifying the origin of samsāra, comprising the physical world and its inhabitants. The Ratnagūnasaṃcaya states that the root of samsāra is ignorance (avidyā: ma rig pa), and the root of nirvāṇa the ‘Perfection of Insight’ (prajñāpāramitā).

Some Mahāyāna sources, however, apparently go a step further. For example, in the Vimalakīrtinirdeśasūtra Vimalakīrti tells Mañjuśrī that no phenomena are based on any substratum.

[Vimalakīrti] asks: “What is the root of wholesome and unwholesome [attitudes and actions]?”
[Vimalakīrti] replies: “The root is the assemblage of [perishable] existences.”

[Vimalakīrti] asks: “What is the root of the assemblage of [perishable] existences?”
[Vimalakīrti] replies: “The root of the assemblage of [perishable] existences is desire and attachment.”

[Vimalakīrti] asks: “What is the root of desire and attachment?”
[Vimalakīrti] replies: “The root of desire and attachment is incorrect conceptual thoughts.”

[Vimalakīrti] asks: “What is the root of incorrect conceptual thoughts?”
[Vimalakīrti] replies: “The root of incorrect conceptual thoughts is wrong notions.”

[Vimalakīrti] asks: “What is the root of wrong notions?”
[Vimalakīrti] replies: “The root of wrong notions is the lack of a substratum.”

[Vimalakīrti] asks: “What is the root of the lack of a substratum?”
[Vimalakīrti] replies: “O Mañjuśrī, what root could there be of what has no substratum! Thus all phenomena subsist on a root which has no substratum.”

In the Ratnagotravibhāga it is stated:

Earth is supported by water,
Water by air, and air by space;
Space has, however, no support
Either in air, or in water, or in earth.
Similarly, the psycho-physical complex, elements, and faculties
Have [their] substratum in karmas and klesās.
And karmas and klesās always have [their] substratum in erroneous conceptual thoughts.
The erroneous conceptual thoughts have [their] substratum in the purity of the mind.
The nature of the mind has no substratum in any phenomena.

A similar idea can be found also in the Ratnagūnasaṃcaya. Despite the textual difficulties, I attempt an interpretative translation of the pertinent verse as follows.

67 Ratnagūnasaṃcaya 28.5–6.

68 Vimalakīrtinirdeśasūtra 6.55–6 (p. 68.4–16): āha | kuśalasyākuśalasya ca kim mūlam | āha | satkāyo mūlam | āha | satkāyas ca punaḥ kim mūlam | āha | satkāyasatechālohbhau mūlam | āha | icchālohbhayok kim mūlam | āha | icchālohbhayor abhūtaparikalpako mūlam | āha | abhūtaparikalpasya kim mūlam | āha | abhūtaparikalpasya viparyāstā samjñā mūlam | āha | viparyāstāḥ samjñāyāḥ kim mūlam | āha | viparyāstāḥ samjñāyā apratīṣṭhāhā mūlam | āha | apratīṣṭhāyāḥ kim mūlam | āha | yam mañjuśrī apratīṣṭhānarn masya kim mūlam bhaviśyati | iti hy apratīṣṭhānarnam apratīṣṭhātīḥ sarovardhānāḥ |. Cf. the citation in the dKon mchog 'grel (A, fols. 14b5–15a1; B, p. 41.11–17). Note that this saṃdhī (after a vocative case) is not supplied by the editors.

69 Ratnagotravibhāga 1.55–57:

prthivy ambau jalam vāyau vāyur vyojni pratiṣṭhitah | apratīṣṭhitam ākāśam vāyambuksitidhārusu || skandhadhāvinḍrīyaṃ tadvat karmaklesāpratīṣṭhitam | karmaklesāḥ sadāyonimanaśkaraṇapratiṣṭhitah || ayoniṣomanaskāraś cītaśuddhipratiṣṭhitah || sarvadharmesu cītasya prakṛtis tv apratiṣṭhitā ||.

Cf. the English translation in TAKASAKI 1966: 236.

70 Ratnagūnasaṃcaya 20.5 (YUYAMA 1976: 75; Tib. p. 177):
ākāśa niṣṭhā samārūta āpaskandho tahi niṣṭhā ima maḥāprthivy jogac ca | sattvāna karmapabhoganidānam evam ākāsasthānu kutu cintāy etam artham ||.
In space rests air, in the latter rests the mass of water, 
In the latter rests this great earth, in the latter rests the world. 
Such is the cause of (or motive for) sentient beings’ engagement in [their] karma. 
Where does space stand? Reflect on this meaning! 

The idea that the absence of a concrete substratum is the substratum of phenomena can also be found in tantric texts such as the *Guhyagarbhatantra, where mind itself, which has no root, is said to be the root of all phenomena. The Guhyasamājatantra, too, states that all phenomena are based on the mind, mind on space and space on nothing.

The development of the concept of a substratum for nirvāṇa seems to have played a part in the development of the idea of a common substratum for both pollution (saṃklesa: kun nas nyon mongs pa) and purification (vyavadhāna: rnam par byang ba). The seeds (bijā: sa bon) of phenomena—either with defilements (sāsrava: zag pa dang bcas pa) or without defilements (anāsrava: zag pa med pa)—may be particularly relevant in this regard, but they are beyond the scope of this study. It has been pointed out that the role of ālayavijñāna as a substratum of samsāra seems to have been extended, and later on even to have assumed the role of a substratum for nirvāṇa too. The kind of ālayavijñāna envisioned as the common substratum of samsāra and nirvāṇa may be seen as a doctrinal transition from Yogācāra to the Tathāgatagarbha system. Thus, for certain schools of thought, such as the rDzogs-chen tradition in Tibet, it was inevitable that they should differentiate between the two kinds of ālayavijñāna or ‘universal substratum’ (ālaya: kun gzhi), namely, one that is a substratum for only samsāra and one that is a substratum for both samsāra and nirvāṇa. Of the two strands of non-tantric Mahāyāna Buddhism in India, namely, negative-intellectual and positive-mystical, one would expect that the former would posit no concrete substratum, whereas the latter would. Nonetheless, both strands reached a point where they could no longer posit any substratum. For instance, even for the Ratnagotravibhāga tradition, which clearly represents the positive-mystical strand, the purity of the mind, which is the substratum of everything, itself has no substratum anywhere. In certain tantric texts, however, the non-dual gnosis is positively affirmed to be the origin of all individual existence. Further, in the Kun byed

Cf. the readings in OBERMILLER 1937: 72–73. This verse is quoted by Candrakīrti in his Prasannapadā (YUYAMA 1976: 75, n. 5). See also Rong-zom-pa’s dKon mchog ‘grel (A, fol. 15a2–3; B, p. 41.18–20).

71 I follow one of the two completely different interpretations found in the Tibetan translations (see YUYAMA 1976: 76, n. 5d).

72 *Guhyagarbhatantra (P, fol. 113a4; D, fol. 115a5):

\[ \text{rtsa ba med pa'i sems nyid ni} \]
\[ \text{chos rnam kun gyi rtsa ba yin}. \]
Cf. ibid. (P, fol. 113b2; D, fol. 115b4):

\[ \text{gzhi [bzhi P] rtsa med pa'i sems nyid ni} \]
\[ \text{pho mo ma yin ma ning mlin}. \]

73 The *Ita phreng attributed to Padmasambhava states (p. 167.3–4): ji skad du | chos rnam thams cad ni sems la gnas so | sems ni nam mkha’ la gnas so | nam mkha’ ni ci la yang mi gnas so | zhes byung ba dang |. Rong-zom-pa identifies the source of this citation as the Guhyasamājatantra. See the *Ita ’grel (A, fol. 258b2–3; B, p. 340.2–4). The Sanskrit text of the pertinent passage from the Guhyasamājatantra (p. 83.4–7) reads: sarvatathāgatadharmā bhagavan kutra sheitāḥ kva vā sambhūtāḥ | vajrasatva ātha | svakāyavākśitaśamshītiḥ svakāyavākśitasambhūtāḥ | bhagavantaḥ sarvatathāgatā āhūḥ | svakāyavākśitaśravajraṃ kutra shtitam | ākāśāsthitam | ākāśaṃ kutra shtitam | na kvacit. For the Tibetan translation, see the Guhyasamājatantra (T, fol. 61a1–3; D, fol. 132b2–4; NyG, p. 888.1–3).

74 I have elsewhere alluded to these two currents in both non-Mahāyāna and Mahāyāna Buddhism in India in regard to the background to the Tibetan interpretations of the tathāgatagarbha doctrine—there drawing on the works of Lambert Schmithausen, David Seyfort Ruegg, and Louis de La Vallée Poussin; see WANGCHUK 2004: 191–201.
rgyal po and other such rDzogs-chen tantras which lay great emphasis on the idea of ontological bodhicitta, bodhicitta is called the all-creating king (kun byed rgyal po) and regarded as the ultimate origin of all phenomena.

(c) Synonyms and Near Synonyms of Ontological Bodhicitta

The commonest description of ontological bodhicitta is the one given in the Bodhicittavivarana, namely, as being unconditioned and devoid of any defining characteristics or signs, like space and bodhi itself. It is further described as tranquil, because it undergoes no change in regard to the three times and exhibits no characteristic marks or manifoldness.

Ontological bodhicitta has several common synonyms or near synonyms which I should like to discuss briefly. It may be assumed that not all these synonyms were conceived as such from the very outset or at the same time, but rather that their number increased gradually as similar ideas with originally different backgrounds began to overlap. The Caryamālapakapradīpa provides almost one hundred synonyms or near synonyms (nāmaparāyāya: ming gi rnam grangs) of the absolute truth (paramārthasatya: don dam pa'i bden pa), such as prabhāsvara, buddhajñāna, vajrajñāna, nirvāṇa, dharmakāya, bhūtakoti, dharmadhātu, prajñāpāramitā, tathatā, and samatā, all of which could be taken as synonyms of ontological bodhicitta. Similarly, a number of synonyms of ontological bodhicitta can be found in rNying-ma tantras, such as the Kun byed rgyal po. Dharmadhātu, svayaṁbhūjñāna, and dharmakāya are mentioned amongst several others. The Bodhicittavivaranaṇāṭikā makes

explicit that śūnyatā is the best bodhicitta.\(^{80}\) The commentary on the *Guhyagarbhatantra ascribed to Śūryaprabhasimha interprets tathāgatagarbha as absolute bodhicitta.\(^{81}\) The Middle Way (madhyamā pratipat: dbu ma’i lam), which is devoid of appearances (snang med), has also been equated with ontological bodhicitta in the Bodhicittatāvāyanā.\(^{82}\)

The notion of self-arisen gnosis (svayambhūjñāna) is of particular interest in the context of ontological bodhicitta. The term svayambhūjñāna can be found in some of the earliest Mahāyāna sources. However, its meaning seems to have undergone change in the course of time. Very probably svayambhūjñāna originally meant the gnosis or insight of a self-arisen buddha (svayambhubuddha), a self-arisen buddha being either a buddha\(^{83}\) or a pratyekabuddha.\(^{84}\) The idea that buddhas and pratyekabuddhas attain gnosis or make their soteriological breakthrough on their own is an old concept, which continued to figure in the Mahāyāna tradition. In fact, according to the non-Mahāyāna tradition, this is what

See NEUHAUSER-DARGYAY 1992: 164; Chos dbying mdzod (fols. 22a, 23b). Klong-chen-pa, probably inspired by the Kun byed rgyal po, also equates ontological bodhicitta with the nature of the mind, which is identical with praśāpaśārāmā, madhyamaka, zhi byed, mahāmudrā, and rdzogs chen. Shing rta rnam dag (p. 119.3–5): sens nyid gzhis kyi don de mthong ba la || [om.] shes rab kyi pha rol tu phyan pa dang | dbu ma dang | zhi byed dang | phyag rgya chen po don | rdzogs pa chen po la sogs ming ci btags kyang | don [add. du] ngo bo geig steg rig pa byang chub kyi sens kun byed nam mkha’ lla bu’o ||. See also EHRHARD 1990: 259, n. 10. Mi-pham even interpreted Padmasambhava to be, in terms of definitive reality (niḥśrāya), (ontological) bodhicitta, samantabhadra, ābhuddha, dharmadhātu, bhūtakoti, tathātā, paramārthasatya, svayambhūjñāna, tathāgatagarbha, and the so-called ‘Three Great Ones’ (chen po gsum): the Great Middle Way (dbu ma chen po), the Great Seal (phyag rgya chen po), and the Great Perfection (rdzogs pa chen po). See his rNam bshad pad dkar (pp. 320.3–321.2): nges pa don gyi sangs rgyas padma ‘byung gnas nyid ngos bzung ba’o || de’i mthsan gyi rnam grangs gzhana yang | gzhung so so’i dgyongs pas dbang gis btags pa | kun tu bzang po dang | dang po’i sangs rgyas dang | chos kyi dbhyings dang | yang dag pa’i mtha’ dang | chos nyid byang chub kyi sens dang | de zhbin nyid dang | don pa’i bden pa dang | rang byung gi ye she dang | bde gshegs snying po dang | srid zhi kun khyab kyi ye she dang | rang bzhi ‘od gsal gnyug ma’i sens dang | ‘da’ dka’ thugs kyi ye she dang | lhan skyes bde ba chen po dang | rgya’i he ru ka dang | dbu ma chen po dang | phyag rgya chen po dang | rdzogs pa chen po ste chen po gsum gyi gstan la phab pa’i mthar thug gi don dang gzhana yang mdo rgyud rnam nas mtsan gyi rnam grangs du mas bstan pa’i don ‘di nyid kho na’o ||.

\(^{82}\) Bodhicittabhāvanā (P, fol. 4b2; D, fol. 3b6; S, vol. 33, p. 814.4–5): snang med dbu ma’i lam de byang chub sens zhes bde gshegs gsungs [gsung P] ||.

\(^{83}\) For example, see the Tathāgatagarbhasūtra (ZIMMERMANN 2002a: 338–339) where the expression rang byung sangs rgyas myur du ‘gyur occurs. For a translation and remarks, see ibid. 151–152, n. 277. See also TAKASAKI 1966: 296, where the Buddha is referred to as svayambhū.

\(^{84}\) For example, see TAKASAKI 1966: 202, n. 24, where pratyekabuddha is called svayambhū.
distinguishes a *buddha* or *pratyekabuddha* from a *śrāvaka*. The difference between a *buddha* and *pratyekabuddha* is that the former founds a systematic teaching tradition and the latter does not. Of course, later on an increasing qualitative distinction was made between *śrāvakas*, *pratyekabuddhas*, and *buddhas*. It appears that the term *svayambhūjñāna*, although originally used for the gnosis of both *buddhas* and *pratyekabuddhas*, came to be used dominantly in the sense of a *buddha*’s gnosis. For example, it is clear that the term *svayambhūjñāna* that occurs within a long compound in the *Bodhisattvabhūmi* refers to the gnosis of the Buddha. The *Madhyamakapradīpa* not only mentions *svayambhūjñāna* but does so in the context of *bodhicitta*, in its gnoseological sense. What it seems to be suggesting is that the Mādhyamikas cannot be charged with postulating the extreme view of annihilationism, for they posit *svayambhūjñāna*, despite the fact that nothing that may be called absolute *prajñā* or non-conceptual gnosis (*nirvikalpajñāna*) is perceived. Since they maintain that all phenomena are illusion-like on the conventional level, they cannot be charged with postulating the extreme view of eternalism. The term *svayambhūjñāna* appears in the *Madhyamakapradīpa* in another instance, where it is stated that once the *vajropamasamādhī* is attained, a *buddha* is always in a meditative state, because his *bodhicitta*, equated with *svayambhūjñāna*, undergoes no change, inasmuch as it neither advances nor retreats. In the course of time, *svayambhūjñāna* took on additional meanings. Having formerly been conceived as applicable only at the stage of a *buddha*, it was now admitted on the level of sentient beings. The question that still remains is what *svayambhūjñāna* immanent in ordinary sentient beings really means.

(d) Two Distinct Perceptions of Ontological *Bodhicitta*

The list of synonyms mentioned above may create the impression that the idea of ontological *bodhicitta* is, in principle, acceptable to all Buddhist schools and that there is general consensus on the issue of what true reality is. Such an impression is, however, deceptive. The various schools may agree that true reality can be designated as *śūnyatā*, *tathatā*, *dharmaatā*, *tathāgatagarbha*, and so forth. But one and the same term can be interpreted differently in different texts and traditions. It comes as no surprise, then, that ontological *bodhicitta*, although accepted as true reality, should be interpreted in several ways. Ontological *bodhicitta* can be broadly categorised under two types, namely, one as perceived within the so-called positive-mystical current of Mahāyāna Buddhism in India, and the other as perceived within the negative-intellectualist current. The negative-intellectualist current
apparently ascribes no positive qualities to ontological bodhicitta, whereas the positive-mystical one does. Ontological bodhicitta is perceived by both currents to be constant. Both currents would also agree that ontological bodhicitta is directly realised by means of gnoseological bodhicitta. In other words, the immediate soteriological goal is gnoseological bodhicitta, although the existence and persistence of gnosis at the stage of a buddha would be viewed by them differently.

However, the means of generating gnoseological bodhicitta depends on the respective soteriological model presupposed by the two currents. In this regard, it should be recalled that two soteriological models are presupposed in Mahāyāna Buddhism, namely, the generation model and revelation model, or the nurture model and nature model. Although one might think that the negative-intellectualist current would, as a rule, follow the nurture model, and the positive-mystical current the nature model, this does not seem to be necessarily the case. While it is true that the positive-mystical view tends to follow the nature model, not all those who belong to the negative-intellectualist persuasion necessarily follow the nurture model. In any case, according to the nurture model, gnoseological bodhicitta has to be generated from scratch. According to the nature model, by contrast, it is nothing other than ontological bodhicitta revealed or exposed. In other words, gnosis, which lies latent in ontological bodhicitta, is made patent through spiritual practice. In neither of these two models is ethico-spiritual bodhicitta dismissed as redundant. Under the nurture model, it is a generating cause of gnoseological bodhicitta, and under the nature model, an exposing or revealing cause.

(e) Some Salient Features of Ontological Bodhicitta

Of all the various features of ontological bodhicitta, the following two seem to be particularly significant: (1) It remains constant and independent of verbal expressions, concepts, persons, and cognition. It remains unaffected by spatiality and temporality, and can neither be increased nor decreased. The buddhas may come and go but ontological bodhicitta remains. (2) It is soteriologically neutral, and yet the ability or inability to penetrate it with gnoseological bodhicitta correlates with one's freedom or bondage. Thus it is said that it is neither saṃsāra nor nirvāṇa, and yet can cause both.

6. Psycho-Physiological Bodhicitta

Psycho-physiological bodhicitta is a fascinating topic, one which would require much more study than can be devoted to it here to be able to do it justice. What I shall attempt to do in the following few paragraphs is, first of all, to explain the expression ‘psycho-physiological bodhicitta’ and to justify the employment of such an expression. Secondly, and more importantly, I should like to discuss not details of the practical aspects of sexual-yogic exercises associated with psycho-physiological bodhicitta, but rather the doctrinal background, and to propose a plausible historical development.

89 This is the reason why the dharmaññiya can be said to be revealed or exposed ontological bodhicitta, as is apparently propounded, for example, in the Bodhicittabhāvanānirdeśa (P, fol. 56b4–5; D, fol. 46a1; S, vol. 33, p. 183.17–19): shes rab kyi blo dang ldan pas byang chub kyi sems mngon du gyur pa de la longs spod rdzogs pa'i sku la sogs te | sku gsum gyi nang na mchog tu gyur pa chos kyi sku zhes byang chub kyi sems de la bya ste |

90 Cf. Mulamadhyamakakārikā 16.10:
na nirvāṇasamāropo na saṃsārāpaṇkarṣanam |
yatra kātatra saṃsāro nirvāṇam kim vikalpyate ||
(a) What is Psycho-Physiological Bodhicitta?

We already know that in certain Vajrayāna sources semen virile (sukra: khu ba) is called bodhicitta. We also know that the great bliss (or ecstasy) (mahāsukha: bde ba chen po) invariably associated with sexual-yogic practices is likewise called bodhicitta. Semen virile is so designated, for example, in the context of the destruction or loss of bodhicitta (bodhicittapranāśa: byang chub kyi sems nyams pa), which is the fifth cardinal transgression (mūlāpatti: rtsa ba'i ltung ba) of the mantra vows according to several tantric systems in which bodhicitta is identified as semen virile.91 It is true that bodhicitta in its physiological sense is predominantly used for semen virile, male reproductive seed, but it is also true that occasionally both male seed and female menstrual blood are referred to as bodhicitta92—sometimes designated in Tibetan sources as ‘white’ and ‘red’ bodhicitta, respectively.93 The expressions ‘white’ and ‘red’ bodhicitta, however, seem to be alternative renderings of the Sanskrit terms śukra and śonita (or raktā), respectively, since śukra means both ‘semen fluid’ (khu ba) and ‘white’ (dkar po), and śonita or raktā both ‘blood’ (khrag) and ‘red’ (dmar po).94

The quality or function attributed to white and red forms of bodhicitta suggests that they are fluids of virility and fertility, respectively, and thus the identification of red bodhicitta with blood (raktā: khrag), or specifically with menstrual blood (striṣūpa: zla mtshan),95 can be explained perhaps by what one might call Buddhist or Indian metaphysiology. The type of bodhicitta under consideration here seems not to be limited purely to the physiological realm but to include, more importantly, a psychical aspect. Thus sexual-yogic practice culminates in the production of physiological bodhicitta in the form of fluids potent with virility and fertility, and psychical bodhicitta in the form of the accompanying sexual bliss or ecstasy (mahāsukha). In order to capture both of these meanings, I have used the expression psycho-physiological bodhicitta. The fact that this type of bodhicitta has both psychical and physiological components has been made explicit by an Indian tantric commentary.96

The nature of the great bliss connected with psycho-physiological bodhicitta has been disputed in India and Tibet. Some have identified it as a ‘mere sensation of bliss of the [sexual] union’ (snyoms jug gi ishor ba bde ba tsam), ‘mind free of [sexual] desire’ (chaogs bral gyi sems), a ‘mere correlative of the understanding of emptiness’ (stong pa'i go yul tsam), the ‘notion of grasping emptiness’ (stong 'dzin gyi 'du shes), and so forth.97 For some,

---

91 Vimalaprabhād 3.102 (vol. 2, p. 97.21): iha bodhicittam śukram, tasya vināśād acyutāsukham na bhavati | Yogaratnamālā (p. 134.35): bodhicittam śukram. See also TSD, s.v. byang chub sems.
92 See MW, s.v. śukra, where one of the meanings of śukra is given as ‘seed of animals (male and females).’
93 mChod bsgral rnam bshad (A, fol. 183a6; B, p. 51.5–6): gsang bar thabs shes rab kyi byang chub sems dkar dmār gnyis rdo rje'i chu dang sbyar nas | yi ge gsum gyis byin gyis brlab pa'o ||; ibid. (A, fol. 183b3; B, p. 51.10–11): gsang ba ni yab yum gyi byang chub sems las dri byung ba'o ||; ibid. (A, fol. 184a1; B, p. 51.19): gsang ba ni yun gyi byang sems so ||.
94 See MW, s.vv. śukra, śonita, and raktā.
95 See, for example, the Yogaratnamālā, as cited in the TSD (s.v. khrag): raktam iti striṣūpām....
96 Prakāśikāyākhyātikā (P, fol. kī, fol. 205b8; D, fol. kī, fol. 123b6; S, vol. 17, p. 294.3–4): 'on kyang byang chub kyi sems la cha gnyis te | rdzas kyi cha dang bde ba chen po'i cha'o ||.
97 All of these explanations are rejected by Mi-pham. His discussion in the 'Od gsal snying po (pp. 9.4–10.1) actually deals with the 'gnosis of the fourth' (bzhis pa'i ye shes), that is, the gnosia brought forth during or by means of the 'fourth empowerment' (caturthaḥbiḥesika: dbang bzhis pa). Cf. the Marmakalikāpāṇijikā (p. 25.13–
the great bliss in question is not just ordinary sexual bliss but undefiled (anāśrava: zag pa med pa) great bliss—undefiled, that is, by intellectual-emotional defilements (kleśa). The cause of the dispute seems to lie in the fact that those traditions that presuppose the revelation model of soteriology posit a gnoseological component of psycho-physiological bodhicitta, and unlike common sexual bliss, gnosia, by definition, cannot be defiled. For these traditions, the physiological and psychical components are perceived as the bearers of the great bliss that undefiled gnosia is. For those traditions that presuppose the generation model of soteriology, however, psycho-physiological bodhicitta seems to include only the psychical and physiological components, and so not gnosia (i.e. gnoseological bodhicitta), which is regarded as the goal of psycho-physiological bodhicitta.

In addition, there seems to have been a debate as to whether psycho-physiological bodhicitta, when understood as possessing a cognitive nature, is a principal or a secondary mental factor. As we have seen, such a discussion among Indian and Tibetan scholars occurred also in the context of ethical-spiritual bodhicitta. The Ita phreng attributed to Padmasambhava suggests that psycho-physiological bodhicitta emerges when three factors, namely, a sense organ of the body (kāyendriya: lus kyi dbang po), a perception (vijñāna: rnam par shes pa), and an object (viśaya: yul), interact. It is in this connection that the commentators of the *Guhyagarbhatantra in Tibet thematised the nature of psycho-physiological bodhicitta, as is evident from Rong-zom-pa’s report:

Earlier teachers (pārvācārya) have explained that ‘object’ (viśaya: yul) refers to the [awakened] body (kāya: sku), ‘sense organ’ (indriya: dbang po) to the [awakened] speech (vāc: gsung), and ‘perception’ (vijñāna: rnam par shes pa) to the [awakened] mind (citta: thugs). The Popular Tradition of Khams (yongs grags khams lugs pa) maintains that [the phrase] ‘the [psycho-physiological] bodhicitta that has arisen from them’ refers to the element of mind (manodhātu) that arises subsequently to bodily perception (kāyavijñāna). The Tradition of Central [Tibet] (dbus lugs pa) maintains that [psycho-physiological bodhicitta] refers to the sensation that arises from bodily contact (kāyasamsārasājad vедānā). Thus it is asserted [that psycho-physiological bodhicitta] is the experience of bliss [arising from or associated with] the union of efficient strategy (upāya) and insight (prajñā). In general, I see no contradiction in [taking] it as mind (citta) or a mental factor (caitta) that arises from the coming into contact of a bodily sense organ (kāyendriya), an object (viṣaya), and a perception (vijñāna).

The same discussion can be found in Rong-zom-pa’s commentary on the *Guhyagarbhatantra, and reinforces our understanding of the issue. For instance, it

15), where three types of bliss—meagre (mrūdūmāra), mediocre (madhyamāra), and excellent (adhimāra)—associated with psycho-physiological bodhicitta are mentioned.

98 Guhyendutilakatantra, as cited in the Jñānasiṣṭhī (p. 141.18–19):

bodhicittād rte nānyat saukhyam asti trīdhātuka |

The Resolve to Become a Buddha

specifies perception (vijñāna) in the indicated triad as bodily perception (kāyavijñāna). It also makes clear that, for some proponents of the Popular Tradition of Khams, the reason for considering the psycho-physiological bodhicitta as a faculty of thought (manāindriya), which is identical with the element of mind (manodhātu: yid kyi khams), is that the ita phreng has explained it as mind (citta: sems) that arises from the interaction of the triad, and that if expressed in terms of the eighteen elements (dhātu: khams) or the twelve senses and sense objects (āyatana: skye mched), it is logical to consider it as the element of mind. It should, however, be pointed that, following the Abhidharma systematists, manodhātu and mana-āyatana are not coextensive, for all seven elements of perception (vijñānadhātu)—the seventh being manodhātu or manāindriya—are subsumed under mana-āyatana. Thus, for some, psycho-physiological bodhicitta is a principal mental element (i.e. manodhātu, which follows kayavijñāna), while for others it is a secondary mental element (i.e. kāyasamsparśajā vedanā). Rong-zom-pa’s own stance is that there is not much of a contradiction—showing a subtle attempt to reconcile the two positions. He does not, however, provide any reason for this.

(b) Some Salient Features of Psycho-Physiological Bodhicitta

Before attempting to trace its historical route, it is perhaps useful to look at some of the salient features of psycho-physiological bodhicitta: (1) It is found only in the tantric context, and that too, only in certain Vajrayāna scriptures or systems that presuppose sexual-yogic practices. It must be, historically, the last kind of bodhicitta to be recognised as such, in contrast to ethico-spiritual bodhicitta, which is, beyond doubt, the oldest type. (2) Originally it seems to have been conceived as having two components, namely, psychical and physiological ones, but later, as a result of a shift in preference for a certain soteriological model, a gnoseological component entered in too. In order to understand the psychical component, it is useful to consider passion (rāga), particularly sexual passion, within the Buddhist soteriological context; and in order to understand the physiological component, to consider the treatment of ‘metaphysiology’—particularly the role of fluids of virility and fertility, and also the body-mind relationship—in Indian sources. (3) It is, in several respects, conceived parallel to ethico-spiritual bodhicitta, and often the term bodhicitta is consciously employed as a double entendre, denoting simultaneously both ethico-spiritual and psycho-physiological bodhicitta. (4) Its function is soteriological and its goal, like that of ethico-spiritual bodhicitta, is always gnoseological bodhicitta (i.e. a buddha’s gnosis). Thus psychical and physiological elements and sexual experiences that are of no soteriological relevance have nothing to do with it.

(c) Probable Motives for the Conception of Psycho-Physiological Bodhicitta

The theory of psycho-physiological bodhicitta is intricately linked with the sexual-yogic practices prevalent in certain forms of Vajrayāna Buddhism. My concern, however, is not the issue regarding the origin of sexual-yogic practices, but rather questions such as why and with what doctrinal justification such practices could gain admission into the existing Buddhist theories and practices. The most intriguing questions in this regard are why and how the male and female fluids of virility and fertility came to be designated as bodhicitta. In this case, as

dbus lugs pa rnams ni | kun la khyab pa'i spa ri sha zhes bya ste | lus kyi 'dus te reg pa'i rhyen gnyis tshor ba la sbyar bar bya ba yin la | de [da A] yang gtsos bor gyur pa thabs dang shes rab gnyis su med par sbyor ba'i byang chub kyi sems bde ba chen po nyams su myong ba nyid yin no zhes gzung ngo || yongs ni 'di lla bu dag ni gang ltar sbyar yang lhag par 'gal ba ma mthong ngo ||.

Klong-chen-pa has, in a similar manner, attempted to resolve the apparent problem in the context of ethico-spiritual bodhicitta by stating that there is no contradiction, since secondary mental elements always arise in association with a principal one.
in the history of Buddhist ideas in general, multiple and complex factors must have been involved, and hence forming a plausible picture of the course of events would require intensive study on various fronts. What I intend to do here is merely to consider some of the possible motives for the introduction of sexual-yogic practices, along with some of the non-tantric Mahāyāna doctrinal foundations that could have served as justification for doing so.

In attempting to understand the conception and development of psycho-physiological bodhicitta, or any Buddhist idea for that matter, it is always valuable to keep in mind that Buddhism is, in the first place, a religion which sets nirvāṇa—regardless of how it is defined—as its primary soteriological goal, which in any case involves shaking off the shackles of samsāra so as to be no longer subjected to it. The immediate problem facing a Buddhist concerns intellectual-emotional defilements (such as ignorance, hatred, and desire) that seethe from within and the pain and discontent that one experiences and sees around oneself. In other words, Buddhism sees samsāra as a problem and nirvāṇa as the solution. What samsāra basically consists of are kleśas and karmas, and their undesirable consequences, including pain and discontent. Practising the teachings given by the historical Buddha would by itself have sufficed to solve one’s problems. Why, then, did certain Buddhists at a certain point in history adopt or resort to sexual-yogic practices? One explanation, in my view, lies in the tendency of human beings to attempt to gain the same old objective by newer, quicker, easier, and more effective means. The problems of Vajrayāna practitioners and the soteriological goal remained the same as in non-tantric Mahāyāna. It was only their outlook and approaches that were now dramatically augmented or otherwise modified. This fact is expressly confirmed by authors within the tradition of tantric Buddhism. In addition, it has been pointed out that the development of ethico-spiritual bodhicitta can be explained as one of the attempts made by Buddhists themselves to bolster the staying power of the Three Jewels. In a similar way, the idea of psycho-physiological bodhicitta may have been introduced as one of several measures taken by innovative Buddhists to speed up the process of accomplishing the goal set by ethico-spiritual bodhicitta.

One of the questions that comes to mind in this regard is: To what extent were innovative Buddhists able to absorb or adapt practices that had their origin in non-Buddhist traditions and yet retain their Buddhist identity or character? The answer seems to be that as long as one abided by the Mahāyāna guidelines of insight (prajñā) and compassion (karuṇā), there were no restrictions on the employment of one’s mental, verbal, or physical impulses as means of attaining the soteriological goal.103 In other words, all means, regardless of whether they are in origin Buddhist or non-Buddhist, are, in principle, acceptable to Mahāyāna followers as long as they can contribute to the attainment of the soteriological goal. Precisely such an attitude seems to have paved the way for the theory and practice of psycho-physiological bodhicitta.

(d) The Problems of Physicality and Sexuality in Buddhism

In general, the conservative Buddhist traditions consider the psycho-physical complexes (skandha) of a person as impure, impermanent, painful, and non-substantial. Mistakenly holding on to the impure as pure, the impermanent as permanent, the painful as pleasurable, and the non-self as self has been considered to be the root cause of samsāra. In particular, passion and pleasure, especially those types associated with physicality or sexuality, are considered a problem—a hindrance to spiritual progress—and are to be combatted by

103 See, for example, the mDo rgyas (A, fol. 245b1–2; B, p. 357.9–11): sangs rgyas thams cad kyi lam gcig po ni shes rab dang snying rje yin te | gshan du lus dang ngag dang yid kyi ‘du byed thams cad la ‘di la mi brten du mi rung ngo zhes ris su chad pa med do ||.
adopting a negative or at least a neutral stance towards them. A bodhisattva who happens to be an ordained monk could combat desire in general and sexual desire in particular by distancing himself physically from the objects of desire. But the problem of physicality or sexuality threatened to become acute in the case of lay bodhisattvas. Can a lay bodhisattva indulge in sexual passion and yet at the same time pursue his soteriological goal? Or is it possible to engage in sexual acts without sexual desire? From the point of view of Buddhist spirituality, this seems to be a serious problem. However, historically speaking, precisely such difficulties may have given an impetus to the development of new Mahāyāna soteriological theories, thus enabling the innovators to look at the psycho-physical complexes (skandha) from a new perspective.

How can one best make use of the psycho-physical resources that one has at one’s disposal? Already in the context of non-tantric bodhisattva practices, one finds traces of the wish to extract an essence (sāra: snying po) from one’s essenceless body. In some Mahāyāna sūtras the five skandhas are called the five tathāgatas, and the five klesas the progenitors of the tathāgatas. In particular, passion, like compassion, is seen not any longer as a hindrance but rather as being indispensable for guaranteeing the physical presence of a bodhisattva. It is said that just as a lotus grows only in a marshy land full of waste material, so tathāgatas grow from a heap of klesas. From a tantric point of view, however, the treatment of klesas as soteriologically positive has been merely theorised in the non-tantric Mahāyāna systems, and it is only in the tantric Mahāyāna that the practical aspects of such belief are taught. Thus, from a tantric perspective, one could argue that the employment of klesas for soteriological purposes is not only doctrinally justifiable but also historically inevitable. Such a change of attitude or perspective seems to have enabled a bodhisattva (a) to find solutions in the problems themselves, (b) to break the spiritual taboos associated with dualistic concepts such as those pertaining to purity and impurity, and (c) to experiment with one’s physicality and sexuality in such a way that they can be used for soteriological purposes.

Perhaps it should be stated unambiguously that I neither contend nor wish to imply that sexual-yogic practice is an organic inner-Buddhist development. Some scholars have maintained that anticipations of sexual-yogic practices can be found already in non-tantric Mahāyāna sources such as Nairatmyaparipṛcchā 11 and Mahāyānasūtrālaṃkāra 9.46, a position which I do not share. It has been already pointed out that the expression svargamahāsukha in Nairatmyaparipṛcchā 11 is not identified with sexual bliss but rather juxtaposed to it and that Mahāyānasūtrālaṃkāra 9.46 does not speak about sexual practice, but rather about the bodhisattva’s self-extrication from such a practice.

104 Abhidharmakosābhadhāsa (p. 452.7–9): aśubhopeksayoh kāmarāgapraptipakṣate ko viśesah | varnārāgasyāsabhā maithunārāgasyopakṣeti vaibhāṣikāḥ | evam tu yujyate | maithunārāgasyāsabhā mātātiprtpatrajñātirāgasyopakṣeti |. See also SCHMITHAUSEN 1982: 62, 66.

105 Cf. Śīkṣāsamuccaya (BENDALL, p. 26.2; VAIĐYA, p. 18.26): asārāt kāyāt sāram ādātukaḥ ... See also ibid. (BENDALL, p. 200.17; VAIĐYA, p. 111.5–6): lābhā me suledhā yasya me 'sārāt kāyāt sāram ādattataṃ bhavisyati |.

106 See, for example, the Vimalakīrtinirdesāsūtra 7.52 (pp. 77.23–78.7). See also the mDo rgyas (A, fol. 241a3–5; B, p. 352.5–9); dKon mchog 'gral (A, fol. 52a–b6; B, p. 82.1–23); Thug chen tshul 'jug (A, fol. 106a2–4, 106b3–5; B, pp. 531.12–17, 532.5–10); WANGCHUK 2002: 280–282.

107 See ISAACSON 1998: 27, n. 10, where it has been pointed out that sexual-yogic practices were meant ‘to get rid of the ordinary concept of impure and pure.’

108 For a discussion of the expression svargamahāsukha in Nairatmyaparipṛcchā 11 and Mahāyānasūtrālaṃkāra 9.46, see SCHMITHAUSEN 1980: 444. Cf. SNELLGROVE 1988: 1373; DASGUPTA 1962: 17–19. For Tibetan scholars such as Mi-pham, the component of great bliss was taught in Vajrayāna in order to combat the clinging to emptiness. See the Nges shes sgron me (p. 90.1):
(e) Psycho-Physiological Bodhicitta in Yogic Practices

In order to understand the rationale behind the employment of psycho-physiological bodhicitta in yogic practices, it is perhaps useful to take a look at how such practices are conceived. Vajrayāna practices may with justification be subsumed under what is known as two phases or stages (krama: rim pa), namely, a generation phase (utpattikrama: bskyed pa'i rim pa) and completion phase (uppannakrama/nispannakrama: rdzogs pa'i rim pa).109 This scheme of two phases is obviously based on the two-truth model of the non-tantric Madhyamaka tradition.110 This would perhaps explain why utpattikrama is referred to as possessing provisional meaning (neyārtha) and nispannakrama as possessing definitive meaning (nītārtha).111 In content and function, however, the two are very probably meant to denote quietude (samatha) and superior insight (vipaśyanā), respectively. The question as to whether the yogic practice of utpattikrama is sufficient in and of itself (i.e. independently of nispannakrama) for bringing about soteriological attainments may be answered positively or negatively depending on how the two phases are understood and defined in the first place. As a justification for the practices of utpattikrama, which involve various kinds of visualisations and the like, it is maintained that manifold or discursive proliferation (prapāṇa) can be eliminated or pacified by making use of it, so to speak, homeopathically.112 This and similar ideas suggest the soteriological self-efficacy of the utpattikrama practices. For scholars like Mi-pham, however, the practice of utpattikrama, like that of samatha, is not capable of autonomously bringing about salvation.113 Obvious attempts were also made to link the two stages with the two accumulations (salābhara), namely, the accumulation of beneficial resources (punyasaṃbhāra) and the accumulation of gnosis (jiññasaṃbhāra), both indispensable prerequisites for the attainment of Buddhahood. The practices of Five Phases (pañcakrama) of the Guhyasamāja tradition and those of the Six-Limb Yoga (saḍāngayoga) of the Kālacakra tradition (and also found in the Guhyasamājatantra),114 are nispannakrama practices. Rdzogs-chen practices are regarded by

109 Guhyasamājatantra 18.84; Hevajratantra 1.8.24cd–25ab. For improved readings of the pertinent verses and a discussion of Ratnākaraśānti’s understanding of the two phases, see ISAACSON 2001: 467–472. See also the Yogaratnamālā (pp. 104.16–18, 20–21); Muktatilaka (P, fol. 62b1–2; D, fol. 52a1–2; S, vol. 21, p. 973.19–21); Rim pa gnyis pa (P, fol. 210a4–5; S, vol. 44, p. 481.1–2); Pañcakrama 1.2; cf. ibid. 5.20.

110 That the two phases are in a way analogous to the two truths propounded in Mūlamadhyamakakārikā 24.8 has been pointed out and discussed in ISAACSON 2001: 469, particularly, n. 92.

111 See, for example, the bKa’ brgyad rnam bshad (p. 94.2): drang don bskyed rim dang | nges don rdzogs pa’i rim par sbyar ba’i tshul gyis bzhed pa’i dra min yod pa she pa bya zhin... 112 Hevajratantra 2.22.29:

upattikramayogena prapañcaṃ bhāvayed vratī |
prapañcaṃ svapnavat kṛtvā prapañcair nīthrapañcayaḥ .

113 ‘Od gsal snying po (p. 44.5–6): ... bskyed rim rkyang pas’og min gyi bar gyi ’jig rien pa’i dngos grub kun sgrub nus kyi ’das lam mgon du bya mi nus.... See also ibid. (p. 221.2–4): ... bskyed rim rkyang pa rags pa dang phra ba’i gsal snang mthar phyin pa’i tshe na sngags dang phyag rgya la sogs pa grogs su ldan pa’i sgo nas’og min gyi bar gyi ’jig rten pa’i dngos grub mtha’ dag ’grub nus so |.

114 Vimalaprabhā ad 4.112 (vol. 2, p. 207.5–6):

pratyāhāras tathā dhīyānam prāṇāyāmaś ca dhārāṇāḥ |
anusmṛtiḥ samādhiḥ ca saḍāṅga yoga iṣyate |.
The Resolve to Become a Buddha

rNying-ma scholars as signless (nirnimitta/animitta: mtshan ma med pa) nispannakrama practices. The so-called Yoga of Seminal Drops (binduyoga: thig le'i rnal 'byor) and Subtle Yoga (sūkṣmayoga: phra mo'i rnal 'byor)\(^{115}\) can be regarded as special kinds of nispannakrama practices that directly deal with psycho-physiological bodhicitta.

In the rNying-ma tantric tradition there is another way of looking at the various Vajrayāna methods, namely, (1) the thabs lam ("Way of Efficient Strategy") and (2) the grol lam ("Way of Release"). Such a convention has yet to be traced in Indian sources. The thabs lam uses special yogic techniques called 'striking at the core' (marmaprahiira: gnad du bsnun pa)\(^{116}\) of the physical bases (ādhāra: rten), namely, the channels (nādi: rtsa), vital winds (vāyu: rlung), and seminal drops (bindu: thig le), as a result of which the gnosis 'to be kindled' (ādheya: brten pa) emerges inevitably (hāthena: btsan thabs su). The alchemical procedure of transforming iron into gold instantly by the efficient manipulation of a mineral called mākṣika\(^{117}\) is given by analogy with the thabs lam technique. The latter is subdivided into two parts, namely, one involving (a) the upper aperture (urdhvaḍvāra: steng gi sgo) and one (b) the lower aperture (adhoḍvāra: 'og gi sgo).\(^{118}\) These are also called which uses one's own body as an efficient strategy (svadehopāyasamyuktaka: rang lus thabs ldan) and that which uses the body of others as an efficient strategy (*paradehopāyasamyuktaka: gzhan lus thabs ldan), respectively.\(^{119}\) The grol lam, on the other hand, uses special yogic techniques to

See also Guhyasamājatantra 18.141, which reads slightly differently. This verse is cited in TSD, s.v. sbyor ba yan lag drug. The Six-Limb Yoga is explained also in Rong-zom-pa's Theg chen i shul 'jug (A, fols. 120a1-122a6; B, pp. 547.3-549.22).

\(^{115}\) TSD, s.v.

\(^{116}\) TSD, s.v.

\(^{117}\) MW, s.v.

\(^{118}\) The terms urdhvadvāra and adhoḍvāra are attested in Sanskrit sources, for example, in Kṛṣṇācārya's Vasantaṛatnakā (p. 22.4) and Vanaratna's commentary on it, the Rahasyadīpikā (pp. 23.10). However, urdhvadvāra and adhoḍvāra in the tantric context do not seem to mean the 'gate opening into heaven' and the 'anus' (as in MW, s.v.), but rather the openings of two of the three principal channels (pradhānā: gtsos mo gsum), namely, rasanā (ro ma) and latanā (brkyang ma), respectively; the third and the middle channel is avadhāini (kun 'dar ma). See the Hevajratantra 1.13 (cited also in TSD, s.v. gtsos mo): tāsāṁ madhye tīsro nādayaḥ pradhānāḥ; see also TSD, s.vv. rtsa, kun 'dar ma, ro ma, and brkyang ma. The expressions steng sgo and 'og sgo can be found in several rNying-ma tantric sources, for example, in the sGyu 'phrul rgya misho (pp. 10.7–11.1; also cited in the Phyo 'bcu'i mun sel, p. 453.2):

but brag rlung las gyur pa ni ||
ye shes 'byung ba steng 'og sgo ||
See also the *Prajñāprāveśa (P, fols. 413a5; S, vol. 43, p. 836.12-13):

thabs dang shes rab lam gnvis kyi s||
gen gyes sdog [sdon P] la steng 'og thabs ||
See also the bSam gtsan mig sgrow (p. 15.5–6): steng 'og gi sgo i man nag dag...; ibid. (p. 220.2): mdo rtseng 'og gi rlung 'jug gi phyê ba'o ||; ibid. (p. 210.3): 'og gi sgo la rten pa ni ||; ibid. (p. 222.5): rten can ni steng 'og gi gnvis te || steng gi sgo la brten pa ni ||; Theg chen i shul 'jug (A, fols. 122a4; B, p. 549.18). Cf. also the sGyu 'phrul rgya mthosho (p. 25.6):

steng 'og rlung la dbang thob nas ||
bar ma'i rkyen gnvis blus ba med ||
Cf. also the Dam tshig gsal bkra (P, fols. 577a7–8; S, vol. 43, p. 1196.17–18):

thabs kyi lus la brten shes na ||
yon tan brjod las 'das pas [sic?] gsungs ||.

\(^{119}\) The expression svadehopāyasamyuktaka can be found, for example, in the Guhyasiddhi (pp. 22.19–20, 23.7–8), but I have not been able to trace its counterpart *paradehopāyasamyuktaka.
strike directly at the core of the gnosis to be kindled so that the innate gnosis inevitably emerges without having to depend on the nādi, vāyu, or bindu. The alchemic procedure of transforming iron into gold gradually by efficiently manipulating a jewel called kaustubha is given by analogy with the grol lam technique. The main distinction between thabs lam and grol lam is their emphasis on upāya and prajñā, respectively. However, it is maintained that each path is endowed with both upāya and prajñā, and is self-sufficient. It is also said that in general those who practise the thabs lam achieve swifter results than those who practise the grol lam, but a simultaneist engaged in the grol lam is said to be even swifter than a simultaneist engaged in the thabs lam.

The sexual-yogic technique, which involves a skilful manipulation of psycho-physiological bodhicitta, is thus relevant only for those who practise a specific kind of thabs lam. For those tantric traditions that endorse such options, sexual-yogic practices are neither indispensable nor are they meant to be interpreted only symbolically. It is also comprehensible why sexual-yogic practices, although in principle permissible even for fully ordained monks, may in practice be extremely difficult, simply owing to the great risks involved. For the Dwags-po bKa'-brgyud tradition in Tibet, the Six Teachings of Nāropa (na ro'i chos drug) make use of the thabs lam technique, and Mahāmudrā the grol lam technique. In sum, all yogic techniques mentioned here seem to be, in one way or another, concerned with causing gnoseological bodhicitta to emerge.

7. Semeiological Bodhicitta

As stated above, I take semeiological bodhicitta to be a visual, verbal, or visional representation or symbol of the other four types of bodhicitta. Not being a specialist in Indian or Buddhist symbolism, I have relied on Adrian Snodgrass’s The Symbolism of the Stupa for some general understanding of this field. The primary aim of this discussion is to supplement our understanding of the concept of bodhicitta and not of symbolism per se.

(a) General Features of Bodhicitta Symbolism

Adrian Snodgrass remarks that in the Indian view, “the symbol has a horizontal reference that is indefinitely extended and a vertical reference that is truly infinite.” That is to say, a symbol can have more than one referent, and a single referent can be represented by a number of different symbols, and itself have a plurality of meanings. Snodgrass also states that symbols can produce interlocking and inter-reflecting patterns. All of this seems to be true, in particular, of the symbolism of bodhicitta. A single symbol, such as a vajra, can have more than one referent, including bodhicitta. Similarly, the single referent bodhicitta can be represented by a number of symbols—a lotus, the moon, and so forth. It is also true that bodhicitta symbolism ranges over the visual (or physical), verbal (or vocal), and visional (or mental). In what seems to be typically tantric, a single symbol can have a single referent, but that referent will have at least three dimensions, namely, outer (phyi), inner (nang), and secret (gsang ba), and the secret dimension, in turn, may yield other multidimensional patterns. A

---

120 MW, s.v.

121 For a list of the Six Teachings of Nāropa, see, for example, Tshig mdzod chen mo, s.v. nā ro chos drug.

122 Shes bya' i mdzod (p. 832.4): thabs lam chos drug | grol lam phyag rgya chen po'i gdam pa'o ||; ibid. (p. 833.24): ... thabs lam nā ro chos drug tu grags pa....

123 SNODGRASS 1985: 8.
symbol of bodhicitta, then, does not exist in isolation but is connected with other symbols and referents. Moreover, which symbol represents which theme depends on given roles of importance in the given context. One may also assume that new symbols can be superimposed on an existing referent such as bodhicitta, and an existing symbol can be reinterpreted as representing one or more types of bodhicitta.

(b) Putting Symbolism in a Buddhist Philosophical Context

One question that comes to mind is how the primary sources designate symbolical or semeiological bodhicitta and what they mean by it. In this regard, it is interesting to note how such primary sources approach the distinction between that which expresses (abhidhā: rjod byed) and that which is expressed (abhidheya: brjod bya), that which signifies (laksana: mtshon byed) and that which is signified (lakṣya: mtshon bya), and so forth, corresponding, one might say, to imitation (or replication) and the genuine (or actual), respectively. When the symbols are verbal, the former always takes the form of 'words' (vyā̋̊jana: tshig) and the latter that of 'meaning' (artha: don). For example, in the Abhidharmakosā, Abhidharma itself is subdivided into 'designatory' (sāmketu: brdar btags pa) and 'actual' (pāramārthika: don dam pa), which can be equated with 'form' and 'content' or with 'signifier' and 'signified.' This method is later on extended to explain madhyamaka, prajñāpāramitā, and tantra. For example, Ratnākaraśānti, in his commentary on the Mahāmāyātantra called the Gunavatī, clearly uses the expressions ‘causal tantra’ (hetutantra: rgyu’i rgyud), ‘resultant tantra’ (phalatana: ‘bras bu’i rgyud), and ‘tantra of means (or ways)’ (upāyatantra: thabs kyi rgyud), clearly based on the Guhyasamājatantra.124 Such a scheme can be found also in the Yogaratnamālā.125 In the rNying-ma tantric exegeses, tantra is divided into two: (a) ‘the expressed meaning’ (brjod bya don) and (b) ‘the words that express’ (rjod byed tshig). The former is subdivided into basis (gzhi), path (lam), and goal (‘bras bu), and the latter also into three, namely, ‘verbal appearance’ (sgrar snang ba), ‘verbal resonance’ (sgrar grags pa), and their ‘symbols’ (brdar gyur pa).126 Apparently, these three correlate with the visional, verbal, and visual symbols of tantra, respectively. In a similar way, it is clear that of the five types, semeiological bodhicitta is merely designatory, or the signifier, while the remaining four are the signified or the designated, and can be subsumed under bodhicitta as it figures on the basis, path, and goal levels of a bodhisattva.

One particular underlying Buddhist philosophical idea seems to be relevant to the understanding of Buddhist symbolism in general and semeiological bodhicitta in particular. On the whole, it is assumed that the thing-in-itself, or rather reality-in-itself, is always and by nature independent of our conceptions, perceptions, and designations, and that there is in fact no connection between the designation and the designated. Nonetheless, communication is possible because of conceptual thought, which establishes a false but still effective association between the designation and the designated, thereby enabling mental, verbal, and physical communication to occur. Hence, from a Buddhist philosophical point of view, the connection between semeiological bodhicitta and its referents may be a rather arbitrary but nonetheless useful means of gaining access to actual bodhicitta. Genuine bodhicitta cannot be expressed or represented adequately or correctly by means of concepts, words, or images. But it is

124 Guṇavatī (p. 2.11-12): trividha tantram—hetutantram, phalatrantram, upāyatantram ca | ibid. (p. 3.4-5): ... hetutantram phalatrantram upāyatantram vā | tad etat trividha tantram prabhaksye |. See Guhyasamājatantra 18.34-35.

125 Yogaratnamālā (p. 105.20-23): tantram iti prabandhaḥ | tac ca tridhā, hetutantram phalatantram upāyatantraḥ ca |.

126 ’Od gsal snying po (pp. 15.1-17.5).
perhaps precisely because of this limitation that Buddhists dealing with the bodhicitta idea have attempted to symbolise it in various ways.

(c) Three Kinds of Semoiological Bodhicitta: Visual, Verbal, and Visional

Sometimes bodhicitta is symbolised by such objects as the full moon, or—to express its two components, upāya and prajñā—the sun and moon. In the context of sexual-yogic practices, a female is prajñā and the male upāya, and in meditative practices involving the visualisation of deities, the sun is the seat of efficient strategy (upāyāsana) and the moon the seat of insight (prajñāsana). Bodhicitta is also symbolised by a flaming jewel, jewel banner (ratnaketu), lotus, and water in a vase. The ritual sceptre (vajra), too, is said to symbolise bodhicitta, in this case, as efficient strategy (upāya), along with a bell (ghanṭā), which represents insight (prajñā). In the Buddhhasamāyogatantra, the tantric deity Śrīheruka is represented as wearing a crown (dbu rgyan) representing bodhicitta. In fact, jewel crowns of tantric buddhas are generally taken to be symbols (rtags) of bodhicitta. According to a recent Tibetan source, the parasol (gdugs: chatra), which is one of the so-called Eight Symbols of Auspiciousness (bkra shis rtags brgyad), is supposed to symbolise bodhicitta. I have not, however, been able to trace this idea in Indian sources.

134 Ri mo spyi'i rnam gzhag (p. 454.5–8): "As for what these symbols (i.e. the Eight Symbols of Auspiciousness) represent, there are several different positions among the various schools. However, the commonly accepted position is that what is symbolised by the parasol is bodhicitta, characterised by [the thought of] benefiting others (parahīta). [It is] white in colour, [its] handle is made of gold, [and it is] adorned with soaring, fluttering
The syllables man and tra in the word mantra are said to represent the oneness of śūnyatā and karunā, and hence bodhicitta. The vowel a, which is called the supreme letter, is also said to represent bodhicitta. Sometimes the vowels u and ū are said to stand for bodhicitta. At other times, the syllable hūṃ is presented as the essence of bodhicitta. The anusvāra sign, too, is at times considered the seed of bodhicitta. The letter ka, finally, is said to stand for either karunā or bodhicitta.

Sometimes bodhicitta is visualised as a ball of light, in what seems to be a case of visionary symbolism. More often it is personified (either in its gnoseological or ontological sense) as deities such as Samantabhadra, Vajrasattva, Vajradhara, Mañjuśrī, silk streamers of different [colours] and with a jewel top.
Kālacakra,¹⁴⁶ Hevajra, Vajr yogini, and Vajradakini.¹⁴⁷ As such, it is associated with all kinds of colours and features, both peaceful and wrathful forms, and the male and female gender. The reason why such types of bodhicitta have been symbolised in the forms of wrathful, demonical deities seems to lie in the gradually emerging notion among some Buddhist traditions that passive and peaceful means are not always effective enough when it comes to engaging in the activities of a buddha and that it is necessary to resort to more aggressive means. The Buddhāsamāyogatatantra explicitly states that those who are extremely malignant (duṣṭa: dgug pa) and ferocious (canda: gtum po) cannot be benefited by resorting to peaceful means, and hence when necessary all the tathāgatas assume the forms of wrathful deities endowed with insight and efficient strategies.¹⁴⁸ It goes on to state that if an ill-tempered individual can fly into a rage and burn down Tripura, then of course all buddhas, by doing the same, can burn down Tridhatu.¹⁴⁹ According to the Tattvasanāgatasutra (which is actually classified as a tantra), although buddhas are peaceful, they assume wrathful or unruly forms as part of their great efficient strategies.¹⁵⁰ The iconography of peaceful and wrathful deities

¹⁴⁷ Māyāvatī (P, fol. 211b2–3; D, fol. 170b6; S, vol. 13, p. 469.15–16):
byang chub sems ni rdo rje nyid ||
 rdo rje mkha' 'gro zhe gsungs so ||.
¹⁴⁸ Buddhāsamāyogatatantra-1 (T, fol. 273a5; D, fol. 176a1):
shin tu gdug cing drag po la ||
zhī bas phan par mi 'gyur te ||
shes rab thabs kyi sbyor ba ni ||
rnam par rgyal phyir rab tu drag ||.
See ibid. (T, fol. 249a2; D, fol. 157b3–4):
shin tu gdug par gtum po la ||
zhī bas phan par mi 'gyur te ||
shes rab thabs kyi ngo bo yi ||
khrö bor de bzhin gshegs kun mdzad ||.
See also the mNyam sbyor 'grel pa (A, fols. 66b2–3, 81a6–b1, 104a4; B, pp. 532.4–6, 548.20–22, 573.24–574.1).
¹⁴⁹ Buddhāsamāyogatatantra-1 (T, fol. 249a2–3; D, fol. 157b4–5):
khrö bo'i tshul can khrös pas kyang ||
jig rten gsun dag sreg byed na ||
sangs rgyas thams cad khrös pa yis ||
khams gsun ma lus smos ci aigos ||.
It is very clear that the author of the text is alluding to the legend of Śiva (or Mahādeva) burning down, with fire shot from a bow and arrow, the mythical city of Tripura built of gold, silver, and iron by Maya for the Asuras in the sky, air, and earth (MW, s.v. tripura). All the buddhas, when enraged, can similarly burn down the Three Spheres (tridhātu or trai dhātuka: khams gsun) of samsāra with their arrow of insight. Such a comparison is made also in the non-tantric context. See, for example, Udbhātāsiddhisvāmin’s Viśeṣastava 4 (in SCHNEIDER 1993: 52–53; NAGA 1998: 53, 62, 71, n. 5). For the Tibetan text and a German translation of Prajñāvarman’s commentary on the verse, see SCHNEIDER 1993: 88–89. See also id. 1995.
¹⁵⁰ Tattvasanāgatasutra (T, fol. 319b2; D, fol. 17b3):
e ma'o bdag ni sangs rgyas rnams ||
thugs rje can gyi thabs chen te ||
zhī yang sems can don du ni ||
ma rungs par ni ston par 'gyur ||.
may well have been influenced by the theory of Indian dramaturgical aesthetics (rāsa: nyams).

The Tattvasamgrahasūtra states that buddhas assume the form of a woman for the benefit of aspirants. The Tattvasārgrahasūtra states that buddhas assume the form of a woman for the benefit of aspirants. One may wonder how the semeiological bodhicitta manifesting as male and female deities in union came into being? There are ample references where the efficient strategy (upāya: thabs) and discriminating insight (prajñā: shes rab) have been allegorically designated as respectively ‘father’ and ‘mother’—for example, in the Drumakinnararājaparipṛchhāsūtra. Similarly, the Vimalakīrtinirdeśasūtra states that prajñāpāramitā is the mother of the bodhisattvas and upāyakauśalya their father, and that the buddhas are born from them. The same kinship metaphor can be found in the Gāndavyūhasūtras. According to Ratnākaraśanti, some scholars considered upāya and karunā, again equated with father and mother, to be the progenitors of the Three Jewels. In the so-called ‘subsequent tantra’ of the Buddhāsāmyogatāntara too, prajñāpāramitā and upāyakauśalya are referred to as mother and father. Kamalaśīla cites the Paramādyatantra where prajñāpāramitā is designated as mother and upāyakauśalya as father. In the dGongs...
Chapter Seven: A Typology of Bodhicitta

pa 'dus pa'i mdo, one of the main tantras of the Anuyoga class of the rNying-ma school, Vajrasattva identifies his father as the 'unfathomable supreme upāya' and his mother as the 'inexpressible prajñā.'

The Vajrapānyabhisekatantra clearly states that one should not only realise the indivisibility of one's own body, speech, and mind but also those of the deity, the uniting (samāyoga: mnyam par sbyor ba) of one’s triad with the deity’s triad being called the mantrin’s meditative absorption. When this happens, all bodily movements and verbal expressions reveal themselves as mudrās and mantras, respectively. Under such doctrinal presumptions, the gap between visual, verbal, and visional semeiological bodhicitta is bound to close, with semeiological bodhicitta no longer being seen as mere symbolisation of the other four types of bodhicitta, but rather as their visually, verbally, and visionally expressive dynamism.

(d) Vajrayāna Symbolism and Literalism

In connection with semeiological bodhicitta and the father-mother metaphor mentioned above, a few words may be devoted to an interpretation of Vajrayāna. There is a tendency to approach Vajrayāna by swinging from the one extreme of literalism to the other extreme of symbolism. This is true of both modern and traditional students of tantric Buddhism. The harsh judgement passed on the Buddhist tantras by scholars of the nineteenth century, described by John Newman in his doctoral dissertation, seems to have been the result of a too literal interpretation of tantric texts. Nowadays, most modern scholars who orient themselves to the dGe-lugs-pa tantric tradition tend, by contrast, to overemphasise the symbolic interpretation of tantric Buddhism.

Seyfort Ruegg, in discussing the imagery of yab yum ('male' and 'female,' or 'father' and 'mother') as a symbol of the union of karuṇā (or upāya) and prajñā, has pointed out the need to distinguish between 'an iconic sign and a symbolic or conventional sign, and between the 'form and content' of the image of the union of yab yum in Vajrayāna Buddhism, saying that a failure to do so inevitably leads “to confusion and to missing the dimensions, philosophical as well as psychological etc., in the culture in which it was created and used.”

159 dGongs pa 'dus pa'i mdo (P, fol. 87a6; D, fol. 92a7):

Cf. the citation in the mDo rgyas (A, fol. 202a1–b1; B, p. 306.7–22) and Rab gnas bshad sbyar (A, fol. 292b4–6; B, p. 162.8–11).

161 See NEWMAN 1987: 29–32.

162 Note that he here employs the terms 'iconic' and 'symbolic' in a semeiological sense.
While not ruling out the historical possibility that such images were derived from pre-Buddhist or non-Buddhist images, he argues that the interpretation of a ‘symbolic’ yab yum image (which actually stands for a deeper lying ‘content,’ i.e. the syzygy of karunākupāya and prajñā) as ‘iconic’—as having a sexual referent with a material ‘form’—would be misguided. And indeed, by taking literally what is meant to be understood symbolically, we risk distorting the intent of the tantric texts, and this would have undesirable practical implications for the tantric traditions themselves.

While there are certainly some tantric elements which are meant to be understood symbolically, there are plenty of instances where a practice is meant to be taken literally—for example, the consumption of substances which we normally find repulsive. Interpreting such an idea symbolically would again mean distorting the purport of tantric texts. In my view, it is completely legitimate for a tradition to interpret symbolically. Such interpretation, however, should be seen as a pragmatic expedient adopted by a fully ordained monk in order to deal with the problems and risks faced when attempting to combine both tantric and non-tantric practices. The most we can do is to try to find out why a certain tantric text or tradition proposes or prescribes an unusual theory or practice.

8. A Concluding Assessment of the Five Types of Bodhicitta

The five types of bodhicitta are certainly of varying antiquity and may have first been formulated under varying circumstances and milieus. In terms of relative chronology, it is beyond doubt that the idea of ethico-spiritual bodhicitta is the oldest, while the concept of psycho-physiological bodhicitta is very probably the most recent one. The concept of gnoseological bodhicitta is probably older than that of ontological bodhicitta. This is based on the supposition that in the history of Buddhist ideas the formation of the concept of nirvāṇa (or bodhi) as a spiritual event normally precedes that of the concept of nirvāṇa as a metaphysical entity, and not vice versa. In the case of bodhicitta, it can be assumed, then, that gnoseological bodhicitta, which is a spiritual event in the career of a bodhisattva or a buddha, should have surfaced historically prior to ontological bodhicitta, which is considered a metaphysical entity or reality. As for the relative chronology of the idea of semio-logical bodhicitta, it would be reasonable to assume that the use of a sign or symbol such as a lotus to signify ethico-spiritual bodhicitta could not have preceded the idea of ethico-spiritual bodhicitta itself. Since semio-logical bodhicitta is the signifier of the other four types, any determination of its relative chronology would depend on the individual signs or symbols that stand for a certain type of bodhicitta.

The proposed relative chronology of these five types of bodhicitta does not mean that the older types are replaced by the more recent ones. The older types are in fact never relinquished as the newer types come into their own. Hence it is important to note that ethico-spiritual bodhicitta, which is the most archaic, remains an indispensable core throughout all phases in the history of the bodhicitta concept. Thus to expound the tantric concept of bodhicitta without taking all five types into consideration would be misleading, for although psycho-physiological bodhicitta is uniquely tantric, the concept of bodhicitta found in tantric Buddhism reflects the entire spectrum of ideas pertaining to bodhicitta.

All five types are set in a Mahāyāna soteriological framework, and are always soteriological in their nature and function. Ethico-spiritual bodhicitta is the resolve to attain the Mahāyāna soteriological goal, namely, Buddhahood, for the benefit of oneself and others. It is through gnoseological bodhicitta, that is, liberating insight, that a buddha or bodhisattva experiences ontological bodhicitta as a spiritual event. Gnoseological bodhicitta is, as it were,
the very heart of Mahāyāna soteriology. Psycho-physiological and semeiological bodhicitta can be seen as additional means and resources acquired to increase, enhance, facilitate, and accelerate the soteriological process, and hence the designation supra-bodhicitta (*adhibodhicitta: lhag pa'i byang chub kyi sems) seems to be quite apt. Of the five types, it is also clear that ontological bodhicitta is seen as providing the space where the crucial event of Mahāyāna soteriology takes place. Although ontological bodhicitta is independent of the other four types of bodhicitta, it is of utmost soteriological relevance and value, for it is only by penetrating through to it by means of meditative insight that one becomes a buddha. The generation or revelation of gnoseological bodhicitta is the objective of ethico-spiritual, psycho-physiological, and semeiological forms of bodhicitta. There is a striking parallelism between ethico-spiritual and psycho-physiological bodhicitta, with primarily psychical elements being employed to generate gnoseological bodhicitta in the former case, and psycho-physiological elements being skilfully directed towards the same end in the latter. Furthermore, it is philosophically interesting that, according to certain strands of thought, the boundary between ontological and gnoseological bodhicitta seems to evaporate, with gnoseological bodhicitta coming to enjoy an ontological status, in which case it could rather be described as onto-gnoseological. Likewise, if psycho-physiological bodhicitta is understood in the sense of a type of gnosis characterised by great bliss (*mahāsukhajñāna: bde ba chen po'i ye shes), it in turn may be seen as special kind of gnoseological bodhicitta. Within certain Buddhist traditions that presuppose the revelation model of soteriology, there seems to be a tendency to attribute an ontological status not only to gnoseological bodhicitta but also to ethico-spiritual and psycho-physiological bodhicitta, thereby leading to the notion of what one might call primordial bodhicitta, a universal basis for both samsāra and nirvāna. In short, one could say that a tantric or non-tantric Mahāyāna aspirant gains direct insight into ontological bodhicitta by means of gnoseological bodhicitta, which has been attained through the practice of ethico-spiritual or psycho-physiological bodhicitta with the assistance of semeiological bodhicitta.
Chapter Eight

Traditional Classifications of Bodhicitta

A perfect buddha, a source of benefit and well-being,
Is born from a Son of the Victorious One;
A Son of the Victorious One is born from bodhicitta,
Which is characterised by compassion and [insight into] emptiness.

– Sa-skya Paṇḍita Kun-dga’-rgyal-mtshan (1182–1251), Thub pa dgongs gsal

1. Introductory Remarks

Indian and Tibetan scholars have classified bodhicitta in a number of ways. One of the favourite practices has been to classify bodhicitta in an ascending numerical order beginning with one. This is clearly an attempt to systematise all possible classifications under one umbrella. In this chapter, an attempt will be made to approach the idea of bodhicitta by considering the numerous ways of classifying it.

2. Bodhicitta as a Fusion of Śūnyatā/Prajñā and Karuṇā/Upāya

Bodhicitta is often perceived as a single entity, namely, a synthesis or fusion of śūnyatā (‘emptiness’) and karuṇā (‘compassion’) or of prajñā (‘discerning insight’) and upāya (‘efficient strategy’) —a perception that is prevalent in both tantric and non-tantric Mahāyāna Buddhism. Often, too, śūnyatā is equated with prajñā, and upāya with karuṇā, as in Kānha’s Yogaratnamālā. The term śūnyatā in such a context does not seem to refer to śūnyatā per se

1 Thub pa dgongs gsal (p. 3.1):
   phan bde’i ’byung gnas rdzogs pa yi ||
   sangs rgyas rgyal ba’i sras las ’khrungs ||
   rgyal sras stong nyid snying rje yi ||
   bdag nyid byang chub sems las ’khrungs ||.

2 Such a practice can be witnessed, for example, in the Yogācārabhūmi (pp. 62.9ff.).

3 Yogaratnamālā (p. 117.13–14): sarvadharmaśūnyatā prajñā, upāyo mahākaruṇā.
but rather to prajñā, which cognises śūnyatā. The idea of the fusion of śūnyatā/prajñā and karuṇā/upāya may differ from system to system, but for all systems it always seems to mean a certain type of bodhicitta. In the following few paragraphs, we shall consider the key expressions, such as śūnyatākaruṇāgabha and śūnyatākarunābhina, and finally also the role of prajñā and karuṇā as conceived in tantric and non-tantric Mahāyāna Buddhism.

(a) The Term Śūnyatākaruṇāgabha

When bodhicitta is classified as one, it is equated with the union or synthesis of insight (prajñā: shes rab) and either compassion (karuṇā: snying rje) or efficient strategies (upāya: thabs), a union often expressed by the key term śūnyatākaruṇāgabha. We may begin by examining some of the non-tantric and tantric sources where this expression occurs. Perhaps one of the earliest popular sources in which the expression śūnyatākaruṇāgabha occurs is Nāgārjuna’s Ratnāvali:4

[To some he teaches Dharma] not based on duality;
To some [he teaches] a profound [Dharma] terrifying to the fearful;
To others the means of awakening that has emptiness and compassion as its essence.5

Śāntideva employs the expression in two of the verses (kārikā) of his Śikṣāsamuccaya:6

Know that the purity of prosperity
Is [brought about] by purifying right livelihood;
The purification of beneficial resources is [brought about] by a course of action (or manner of life)
That has [the cognition of] emptiness and compassion as [its] essence.

The next verse of the Śikṣāsamuccaya that contains the expression śūnyatākaruṇāgabha is as follows:7

What [can bring about] the increase of one’s welfare?
An increase of vigour and non-lassitude [can].
The increase of prosperity is caused by an act of giving
That has [the cognition of] emptiness and compassion as [its] essence.

Śāntideva’s employment of the expression in these two verses suggests that the bodhisattva’s ethico-spiritual practices are always necessarily accompanied by conative, cognitive, and emotive factors. The conative vigour will lend him impetus, the cognitive knowledge of

4 Ratnāvali 4.96:
   dvyāniṣīrītam ekeśām gambhirāṃ bhūrbhūṣanam |
   śūnyatākaruṇāgabham ekeśāṃ bodhisādhanaṃ ||. 4 keśāṃ LINDTNER 1997: 329.
   Cf. ibid. 3.98, 4.78, 5.37b-d.

5 The English translation is according to LINDTNER 1997: 329. Cf. SCHMITHAUSEN 2000b: 445, n. 54:
   śūnyatākaruṇāgabham ... bodhisādhanaṃ “[der Weg,] mittels dessen man das Erwachen (d.h. die Buddhahschaft) erreicht, Leerheit und Mitfeind umfasst.” See also rGyal-tshab-rje’s sNyin po’i don gsal (pp. 276.10–277.3).

6 Śikṣāsamuccayakārikā 21 (BENDALL, p. xliv):
   bhogaśuddhīm ca jānīyā samyagājñāvāsodhānāt |
   śūnyatākaruṇāgarbhaveṣātīty punyāsodhānām ||.
   The first two pādas are cited in the Śikṣāsamuccaya (BENDALL, p. 262.11; VAIDYA, p. 143.3), and the last two pādas in ibid. (BENDALL, p. 270.8; VAIDYA, p. 144.9). Cf. the English translation in BENDALL (p. xliv) and BENDALL & ROUSE 1922: 245, 247.

7 Śikṣāsamuccayakārikā 23 (BENDALL, p. xlvi):
   ātmabhāvasya kā vyṛddhir balānālasya vardhānāṃ |
   śūnyatākaruṇāgarbha dānād bhogasya vardhānām ||.
   The first two pādas are cited in the Śikṣāsamuccaya (BENDALL, p. 273.16; VAIDYA, p. 146.5), and the last two pādas in ibid. (BENDALL, p. 275.10; VAIDYA, p. 146.25). Cf. the English translation in BENDALL, p. xlvi, and BENDALL & ROUSE 1922: 251–253.
Chapter Eight: Traditional Classifications of Bodhicitta

śūnyatā will keep him emotionally detached from the whole process of spiritual practices, and the emotive component will help him not to lose sight of his objective. Without the conative component, a bodhisattva would not have the will to carry on with his practices; without the cognitive component, he would risk getting carried away by emotions, such as passion and pride; and without the emotive component of karunā, the very status of a bodhisattva would be called into question. Thus even when a bodhisattva is practising the perfection of giving (dānapāramitā) purely out of karunā, he should view all factors involved in the process, such as the giver, recipient, object, action, and motive, as being empty, as if it were all taking place in a dream. Thus an ethico-spiritual practice of a bodhisattva that unfolds in this way can, according to Sāntideva, be described as being characterised by śūnyatākarunāgarbha.

The expression śūnyatākarunāgarbha occurs in both the First and Third Bhaṇavākrama by Kamalaśīla. The given context seems to make it quite clear that a bodhisattva, after meditating, should in the post-meditative state exert himself towards a puṇyasambhāra (‘accumulation of beneficial resources’) that has the combined cognition of śūnyatā and karunā as its garbha (‘essence’). That is to say, even as a bodhisattva practises generosity, he should see to it that his motive is compassion, and all the while make himself aware of the fact that all phenomena are empty and illusory, like a dream. In principle, any ethico-spiritual practice or aspect of a bodhisattva could be said to be characterised by śūnyatākarunāgarbha. It is thus not astonishing to find that bodhicitta is also described as being characterised by śūnyatākarunāgarbha, for example, in Haribhadra’s Abhisamayālamkārālōka and in his Ratnaguṇasamayaparāṇikā. The idea of śūnyatākarunāgarbha is explained by Dharmamitra in his Prasphutapadā as follows:

The reason for mentioning bodhicitta is the following: It has been mentioned in order to demonstrate that since [the bodhisattva practices], commencing from the beginner’s stage to the buddha’s stage, are never [performed] without bodhicitta, either in [its] causal or resultant form, the pāramitās, such as that of giving, are also endowed with it (i.e. bodhicitta). If [the pāramitā practices] such as giving were not hallowed by bodhicitta characterised by śūnyatākarunāgarbha, [they] would not be practices that [lead to] attaining [the desired objectives]. [It is] primarily for this reason that [bodhicitta] has been mentioned.

---

8 See the First Bhaṇavākrama (p. 221.3–4): tataḥ śūnyatākarunāgarbha eva sakaladānādipuṇyasamābhāropājyānā pravartate; Third Bhaṇavākrama (p. 13.13–14): tataḥ śūnyatākarunāgarbha bhānuttarasambhāropājyānāmitasakaladānādipuṇyasamābhāropājyānābhyuktā bhavet.

9 Abhisamayālamkārālōka (p. 24.4): goitrādīsāmarthyenā bodhisattvasamvarasamādānādānā śūnyatākarunāgarbham bodhicittam upādyā.... See also CONZE 1975: 2; SCHMITHAUSEN 2000b: 445, n. 54. Note that the expression śūnyatākarunāgarbha occurs in the Abhisamayālamkārālōka on several occasions (see KEIRA & UEDA 1998: 1057).

10 Ratnaguṇasamayaparāṇikā (P, fol. 6b1–3; D, fol. 5a1–2; S, vol. 52, p. 11.18–20): ... rnam pa thams cad mkhyen pa nyid thob par ’dod pas | thog mar byang chub kyi sems stong pa nyid dang | snying rje’i snying po can bkshed par bya ba yin pas....; ibid. The Resolve to Become a Buddha

The idea of bodhicitta as a fusion of prajñā and upāya is reconfirmed in the discussion found in Abhayākaragupta’s Munimatālaṃkāra: 12

Regarding bodhicitta, it should be generated [in such a way that it has] prajñā and upāya as [its] very nature. Of these, prajñā is the realisation that all phenomena are devoid of manifoldness (nisprapañca). As to upāya, [it] is the Venerable Mother (bhagavati), great compassion (mahākarunā).

After briefly explaining the three kinds of karunā, namely, one that has sentient beings as its object (sattvālambana), one that has phenomena as its object (dharma-lambana), and one that has no object (anālambana), Abhayākaragupta goes on to say that the fusion of prajñā and karunā is possible only in the meditative state of compassion without object (anālambanā karunā), during which prajñā and upāya are meditated upon simultaneously, and that the two are of one nature, any possible distinction between them being made only on the basis of exclusion. 13 For Ratnākaraśānti, śūnyatā and karunā are the spiritual disposition of the Three Jewels. 14 For Tibetan scholars, too, such as Rong-zom-pa, bodhicitta is the union of śūnyatā and karunā. 15

(b) The Term Śūnyatākarunābhinnā

The term śūnyatākarunābhinnā seems to be preferred in the tantric sources, although it is virtually semantically identical with śūnyatākarunāgaṛtha. The Guhyasamājatantra and the Hevajratantra both describe bodhicitta as śūnyatākarunābhinnā. 16 The Sekoddesātiṃkā also identifies bodhicitta with śūnyatākarunābhinnā. 17 Altruistic inclination (adhyaśaya), all but a synonym of bodhicitta, is said to be endowed with the indivisibility of śūnyatā and karunā. 18

13 Munimatālaṃkāra (P, fol. 205b2–206a3; D, fol. 162b4–5; S, vol. 63, pp. 1279.18–1280.2): de la dmigs pa med pa'i snying rje sgom pa'i gnas skabs na | thabs dang shes rab dag de'i ['di DC] bdag nyid du sgom la snying rje'i cig shos' sgom pa'i gnas skabs na ni ma yin te | de'ni dmigs po' r'ang bzhin du dmigs pa'i nyid khyis spros pa med pa nyid med pa'i phyir shes rab kyi rang bzhin du skye ba med pa'i phyir ro || de'i phyir de'i [om. DC] bdag nyid du' sgom [bsgom PN] pas na lhan cigs gsum [bsgom PN] pa kho na ste' sles rab dang thabs kyi tha snyad tha dad pa ni idog pas [pa DC] byas pa'o' ||. For the notion of objectless compassion, see BSTEH 2000: 477–478. 21 gloss in PN: sems can la dmigs pa dang chos la dmigs pa; 22 gloss in PN: dag ni; 23 gloss in PN: rtogs pa; 24 gloss in PN: te bdag geig tu; 25 gloss in PN: de la; 26 gloss in PN: zhes so.

14 Ratnālokaśātiṃkā (P, fol. 280b5; D, fol. 239a7; S, vol. 64, p. 674.14–15): dkon mchog gsum kyi [gyi P] rigs ni stong pa nyid dang snying rje'o ||.

15 I'ta ‗grel (A, fol. 233b2; B, p. 314.2): byang chub kyi [khyi A] sens ni mdor bsdu' na shes rab dang snying rje zung du 'brel ba'o ||. See also the Theg chen tshul' jug (A, fol. 77a4–5; B, p. 500.16–17), cited in chapter five, n. 258.

17 Sekoddesātiṃkā (cited in DASGUPTA 1958: 68. n. 4): śūnyatākarunābhinnām bodhicittam yad aksaram | tena sekena me nātha prasādām kuru sāṃpratam ||.
In the Kalacakra commentary entitled *Vimalaprabhā*, true gnosis is one in which śūnyatā and karuṇā are undivided.19

For the accomplishing of
One’s own objective and that of others,
There is no gnosis other than the lord of the Three Spheres,
[In whom] śūnyatā and karuṇā are undivided.

Even tantric deities have been identified with śūnyatākaruṇābhinnam. The Sekoddeśatikā associates it with Kalacakra,20 while according to the Abhisamayamañjarī of Subhākara-gupta, Vajrayogini is conceived of as having the nature of śūnyatā and karuṇā.21 Similarly, Vajrasattva also stands for the nonduality of upāya and prajñā.22 The Yogaratnamālā for its part defines mantra in terms of the non-duality of śūnyatā and karuṇā.23 In the tantric context, yoga is primarily defined as the union of upāya and prajñā, as has been made very explicit in the *Vimalaprabhā*.24

(c) The Importance of Upāya and Prajñā

Mahāyāna literature is full of references to the importance of upāya and prajñā. A few selected passages are presented here to demonstrate the indispensability of the two components of bodhicitta. The role of upāya and prajñā has been accentuated in the Ratnagūnasamācaya, one of the earliest works of Prajñāpāramitā literature.25 One well-known statement from the *Vimalakīrtinirdesāsūtra*, often cited by Indian authors, runs as follows:26

---

18 Ratnālokālamkāra (P, fol. 267b4; D, fol. 227b5–6; S, vol. 64, p. 646.3–4): stong pa nyid dang snying rje mi phyed pa [om. PN] dang ldan 'pa ni lhag' [om. PN] pa'i bsam pa'o ||.

atah parataram nāsti jñānam traiddhi-tukṣeśvaram || śūnyatākaruṇābhinnam svaparāthraprasiddhaye ||.  This verse is cited in TSD, s.v. stong nyid snying rje 'byer med pa.

20 See the introductory part of the *Vimalaprabhā* (vol. 1, p. 8.7–8):
karuṇāśūnyatāmūrtiḥ kālaḥ samvṛti-rūpiniḥ || śūnyatā cakram ity uktaṃ kālacakro 'dvayo mataḥ ||.  This verse is cited and translated in NEWMAN 1987: 2. Cf. the Sekoddeśatikā (cited in DASGUPTA 1958: 68. n. 1):
karuṇāśūnyatāmūrtiḥ kālaḥ samvṛti-rūpiniḥ || śūnyatā cakram ity uktaṃ kālacakro 'dvayo 'ksaraḥ ||.

21 Abhisamayamañjarī (p. 1.2–3):
namo 'stu vajrayoginīyai śūnyatākaruṇāmame | bīhārti mūrtivāicitryam yo jagadbhāvabhēdataḥ ||.

22 According to a citation in the Buddhasamāyogatikā (P, fol. 350a3–4; D, fol. 312a3; S, vol. 13, p. 1656.1–2):
thāb dang shes rab gnyis med pa'i || dpal 'ldan rdo' rse sems dpam'i sktu ||.

24 Vimalaprabhā ad 5.9 (vol. 3, p. 7.8–9; TSD, s.v. rnal 'byor):
yogopañca-yāna naikāyā prajñāyā bhavet | prajñāpāsāmāpattīr yoga uktaḥ tathātataḥ ||.  See also Vimalaprabhā ad 2.97 (vol. 1, p. 222.4–5; TSD, s.v. rnal 'byor ldan pa): yogāh śūnyatākaruṇābhinnam viśuddhatattvam viśuddhacittam | tena ukta iti yogayuktaḥ ||.

26 Vimalakīrtinirdesāsūtra 4.816 (p. 51.20–22): amūpyasaṃgrhiṇā prajñā bhadhaḥ, upāyasaṃgrhiṇā prajñā mokṣaḥ | prajñāyā sadgṛhiṇā upāya bandhānaṃ, prajñāsāṃgrhiṇā upāya mokṣaḥ |. Cf. the citation in the First
The Resolve to Become a Buddha

Prajñā not embraced by upāya is bondage; prajñā embraced by upāya is release. Upāya not embraced by prajñā is bondage; upāya embraced by prajñā is release.

In the Anavatapta-nāgarājaprāpariprckaśūtra, it is said that resorting to prajñā devoid of upāya and upāya devoid of prajñā is a deed of Māra.27

Furthermore, there are two [kinds of deeds typical of Māra]. What are the two? The two are [the acts of resorting to] prajñā devoid of upāya and upāya devoid of prajñā. Of these, [the act of resorting to] prajñā devoid of upāya is as follows: considering [striving after] the unconditioned phenomenon (i.e. probably nirvāṇa) while disregarding [the plight of] all sentient beings. Upāya devoid of prajñā is as follows: [employing] the four articles of attracting [sentient beings] (sāmghavastu),28 being steeped in a view [obsessed with] objective support.29 These two are the deeds of Māra, and they should be abandoned by a bodhisattva.

The Drumakinnarājaprāpariprckaśūtra also professes that a bodhisattva views sentient beings by means of his upāya, recognises them (and other phenomena) to be empty (śūnya) by means of his prajñā, and brings them to maturity by means of his compassion (karunā).30

The role of upāya and prajñā has been underscored also in the Gayāśīrṣasūtra.31 Following the Gaganagaṇājaprāpariprckaśūtra, a bodhisattva’s abandonment of the intellectual-emotional defilements of sentient beings is possible through the gnosis of prajñā (prajñājñāna) and the non-abandonment of sentient beings through the gnosis of upāya (upāyajñāna).32 The indispensability of prajñā and upāya and the need for a fusion of the two have been emphasised in the Svāvikrāntacintapariprckaśūtra33 and several other sūtras.34 The Brhaṭṭikā attributed to one Daṃṣṭrasena states:35

---

27 Anavatapta-nāgarājaprāpariprckaśūtra (T, fol. 257a1–3; D, fol. 228b3–5): gežan yang gnyis te | gnyis gang zhe na | thabs dang brag ba’i shes rab dang | shes rab dang brag ba’i thabs te gnyis po de dag go || de la thabs dang brag ba’i shes rab ni ’di ila ste | sems can thams cad la mi lia zhang [bar T] ’das ma byas pa’i chos la rtog pa’o || shes dang brag ba’i thabs ni ’di ila ste | dngigs par = [pa’i] ila bar lung ba’i bsdu ba’i dngos po bezhi’o || gnyis po de dag ni bdud kyi las te || de dag byang chub sems dpas yongs su spang bar bya’o ||

28 For a discussion of the term sāmghavastu, see BHSD, s.v.

29 Cf. the expression upalambhadṛśiṣṭa, which occurs in the Rāṣṭrapālapiarpriṣṭātra (pp. 18.18–19.1; TSD, s.v. dngigs pa’i la ba can); upalambhaṛṣṭika rasprāpañā [add. pudgalo TSD] bodhisattvena na sevitavyāḥ.

30 Drumakinnarājaprāpariprckaśūtra (p. 167.13–16):

shes rab kyi ni stong par rtogs ||
thabs kyi sems can rnam la lla ||
snying rje yongs su smin par byed ||
des ni rgya ngen ’das par ’gro ||

31 Gayaśīrṣasūtra (T, fols. 103b7–104b1; D, fols. 288b6–289a4). See also the First Bhāvanākrama (Skt. p. 194.11–15); āryagayaśīrṣe coktam | āvāv imau bodhisattvāṁ samkṣiptau mārgau | dvābhāyāṃ mārgābhāyāṃ samanvāgata bodhisattvā mahāsattvāḥ kṣipram anuttāram samyaksambodhīṃ abhisambodhisyante | kalamau dva | upāyasya ca prajñā cas | iti | (see also Tib. p. 239.4–9). Cf. Tsong-kha-pa’s Lam rim chen mo (fol. 224a1–2); LAMRIM TRANSLATION COMMITTEE 2002: 89. Cf. also Klong-chen-pa, Yid bzhin mdzod ’grel [vol. wan, fol. 138b5–6]: ga ya go = [mgo] ri’i mdo las | thabs dang brag ba’i shes rab ni gol sa’o || shes rab dang brag ba’i thabs ni gol sa’o zhes pa dang ||. This citation as it stands is, however, not to be found in the Gayaśīrṣasūtra.

32 See also the Gaganagaṇājaprāpariprckaśūtra cited in the Śīkṣāsambuccaya (BENDALL, p. 271.1–2; VAIDYA, p. 144.21): prajñājñāna ca saṃsattvavādopariṣṭāyaḥ | upāyajñāna ca saṃtvāparīṣṭāyaḥ |. Cf. BENDALL & Rouse 1922: 247. Cf. the citation in the gSung rabs rin po che (P, fol. 148a4–5; D, fol. 243b2–3, S, vol. 115, p. 662.10–12: shes rab kyi ye shes kyi ni sems can thams cad kyi nyon mongs pa thams cad yongs su ’dor | thabs kyi ye shes kyi ni sems can thams cad mi gtag [btang PN] ba ste ||.

33 Svāvikrāntacintapariprckaśūtra (T, fol. 409a2–4; D, fol. 133a4–5):
Karunā produces conduct that causes the full maturation of sentient beings. Prajñā produces conduct that causes the full maturation of the qualities of a buddha.

And. 36

A bodhisattva, having first performed all activities with karunā, purifies [them] later with his prajñā. Thus [he] accomplishes [what is to be accomplished] by means of karunā; [he] purifies [the same] by means of prajñā. [He] purifies [his] attitude [or altruistic inclination] (āśaya) by means of karunā; [he] purifies [his] actions (prayoga) by means of prajñā. [He] operates by means of karunā while on the conventional level; [he] purifies by means of prajñā while on the absolute level. Karunā is included in the accumulation of beneficial resources (puṇyasaṃbhāra), for all activities performed [by means of it] are [performed] for the sake of all sentient beings. Prajñā is included in the accumulation of gnosis (jñānasamābha), for [all activities performed by means of it] are performed for the sake of awakening (bodhi).

The Bodhisattvabhumī makes it clear that without both accumulations a bodhisattva would not become a buddha. 37 The two accumulations are, according to Sthiramati, contained in prajñā and karunā, the two essential components of bodhicitta. 38 In the Bodhicittavivaranaṇātikā, the realisation of śīyata is said to be for one’s own sake (svārtha), and karunā for the sake of others (parārtha). 39 Sthiramati states: 40

Bodhisattvas, being endowed with prajñā and karunā, do not fully abandon samsāra, out of karunā; and although [they] abide in samsāra, [they] ensure by means of prajñā that [they] are not tainted with intellectual-emotional defilements. For example, although a lotus grows in mud, it does not become a frog. 36

34 See the Śūrasamuccaya (pp. 182.15–187.3), where passages from the Vimalakīrtinirdesāsūtra, Māraddhamaṇasūtra, and Aṣṭakayamataśrīdeśasūtra dealing with prajñā and upāya are cited.

35 Brhatāṭikā (P, fols. 46b8–47a1; D, fol. 42b4–5; S, vol. 55, p. 741.12–14): snying rjes ni sans gnyis la’i, snying rjes ni gnyis tshogs pa’i, snying rjes ni gnyis la’i, and snying rjes ni gnyis tshogs pa’i are cited.

36 Brhatāṭikā (P, fols. 47b7–48a2; D, fol. 43b2–4; S, vol. 55, p. 743.10–18): byang chub sems dpa’i, byang chub sems dpa’i, byang chub sems dpa’i, and byang chub sems dpa’i are cited.

37 Bodhisattvabhumī 1.3 (WOGIHARA, p. 53.5–5; DUTT, p. 23.23–24): punyajñānatadanyataravaikalyād ayaṃ bodhisattwa ‘nuttaraṃ samyaksambodhiṃ nādiheyacchef |

38 See n. 162.

39 Bodhicittavivaranaṇātikā (P, fol. 483a3–4; D, fol. 141b3; S, vol. 18, p. 1143.7–9): nyon mong pa spangs pa’i rang bzhin can stong pa nyid kyi ye shes rang don no || snying rjes [rje’i P] ghan sdug bsngal las thar bar (par P) byed pa ni gzhon don no ||

40 *(Mahāyāna)sūtrasaṃkāravākyāyā (P, vol. tsi, fol. 252b4–6; D, vol. tsi, fol. 218a6–b1; S, vol. 72, p. 525.4–8): byang chub sems dpa’i, gnyis la’i, gnyis la’i, and byang chub sems dpa’i are cited.
[it is] not tainted with mud stains. Because [bodhisattvas] abide [in saṃsāra] in a similar way, [they are] said to be highly efficient in [carrying out] strategies.

According to Candrakīrti, it is only when one’s view of śūnyatā is saturated with karunā that one is bound to become a buddha.\(^{41}\)

In the Bodhisattvabhūmi, it is said that a bodhisattva roams around unsullied in saṃsāra for the sake of sentient beings without giving up his inclination for nirvāṇa.\(^{42}\) The Mahāyānasūtraśālamkāra states that the accumulation of gnosis (jiññāsambhāra) enables a bodhisattva to transcend saṃsāra, while the accumulation of beneficial resources (puṇyasambhāra) enables him to remain immersed in it without being sullied by intellectual-emotional defilements (kleśa).\(^{43}\) The aim of a bodhisattva is hence to strike a balance, by means of prajñā and karunā, between being a normal sentient being, who is trapped in saṃsāra, and a śrāvaka saint, who is trapped in nirvāṇa.\(^{44}\) It is only on the basis of upāya and prajñā that unconventional or problematic practices of a bodhisattva—for example, indulging in the five objects of desire—have been justified, in both tantric and non-tantric Mahāyāna sources.\(^{45}\) Such practices, however, are said to be suitable only for bodhisattvas who are fully ordained monks or nuns.\(^{46}\) The notion that meditating only on śūnyatā leads one to the śrāvakanirvāṇa is found also in the tantric context.\(^{47}\) The concept of the union of upāya and prajñā, too, is reflected in tantric sources, such as the Pañcakrama,\(^{48}\) and in the yogic hymns.\(^{49}\) It has also been recognised by Tibetan scholars such as Rong-zom-pa:\(^{50}\)

[One whose] prajñā does not generate karunā

Is in a state of [dogmatic] views.

Similarly, Klong-chen-pa states:\(^{51}\)

\(^{41}\) Madhyamakāvatārabhāṣya (p. 79.10–11): stong pa nyid kyi lta ba snying rje yongs su zin pa ni sangs rgyas nyid 'dren par byed pa yin gyi gzhlan du ni ma yin no zhes snying rje brten par byed do ||.

\(^{42}\) Bodhisattvabhūmi 2.3 (WOGIHARA, p. 315.4–6; DUTT, p. 216.3–5): tattvārthādhyāsyayenaśaṃkliṣṭās ca saṃsāre sattvahetob saṃsāranit | avintrmuktaśvādhyāsyayās ca bhavantī ||

\(^{43}\) Mahāyānasūtraśālamkāra 18.38: saṃbhāro bodhisattvavānī punyajñānāmayo 'samaḥ | saṃsāre 'bhuyadāyaikāh anyo 'saṃkliṣṭasamsāttau ||.

\(^{44}\) (Mahāyāna)sūtraśālamkāraśrayākhyā (P, vol. tsi, fol. 36b6–7; D, vol. tsi, fol. 31b5; S, vol. 72, p. 77.1–3): shes pas zin pa ni 'khor bar ma thang [lungr DC] ba'i phyir so so'i [so PN] skye bo bzhīn du mi zad do || snying rje chen pos zin pa nyan thos bzhīn du mya ngan las 'das pa'i dbyings su mi zad de ||.

shes rab de yang blta [= lta] gnas nyid ||.
Upāya with prajñā will cause one to be released,
Just as poison charmed by a mantra [causes one to be detoxified].
Upāya without prajñā will cause one to be bound,
Just as medicine that has become poisonous [will cause one to] suffer.

(d) Tension Between the Two Poles of Emptiness and Compassion

A discussion of the tension between the two complementary poles of śūnyatā and karunā is unavoidable when dealing with the idea of bodhicitta, particularly since the primary sources emphatically maintain that bodhicitta is a union of both. This issue, culminating in the need to strike a balance between the two, in both non-Mahāyāna and Mahāyāna Buddhism, is a fascinating and complex matter. It has been treated with all due exactitude by Lambert Schmithausen in the two separate articles to which I referred earlier. His first article, entitled “Gleichmut und Mitgefühl: Zu Spiritualität und Heilsziel des älteren Buddhismus,” deals with upekkṣā (‘spiritual state of equanimity’) and the care and concern for others expressed by the term karunā from the standpoint of early (or non-Mahāyāna) Buddhism, while his second article, entitled “Mitgefühl und Leerheit: Zu Spiritualität und Heilsziel des Mahāyāna,” deals primarily with the tension between the two complementary poles of śūnyatā and karunā in Mahāyāna, a topic of direct relevance to our discussion. It is in order to put the Mahāyāna notion of the two poles of spirituality into historical context that these articles are consulted together.

In the non-Mahāyāna tradition, there is an allusion to the tension between the salvific state characterised by disengagement, on the one hand, and being dedicated to the welfare of others, on the other. A similar tension is said to exist, at least in a latent form, between upekkṣā, characterised by detachment from the world, and concern for the world. This tension is conceived differently depending on how upekkṣā and karunā are understood. The tension between the two poles is fully relieved if upekkṣā is taken in the sense of impartiality. Even in this case, though, the tension is released by balancing the two. This happens, for instance, when upekkṣā is explained as a neutral acceptance of the fact that an attitude such as karunā has no practical influence on the happiness or misery of a sentient being, since these are dependent on an individual’s own karma; or when it is said that the Buddha teaches all śrāvakas out of compassion but remains unaffected by their positive or negative reactions. The tension becomes acute when upekkṣā is understood as a state of total release, which is beyond the reach of any form of pain, and karunā as an equally strong emotional grasp of someone else’s pain. From this standpoint, even the Buddha, while capable of actualising both upekkṣā and karunā in their supreme forms, does not actualise them simultaneously but only successively, given the enormous tension between them. From a Mahāyāna standpoint, too, karunā is not an automatic outcome of the experience of śūnyatā. They represent two poles which, on the one hand, are indispensable for the attainment of Buddhahood, and on the other give rise to tension that needs to be balanced out, yielding a kind of coincidentia oppositorum.

52 SCHMITHAUSEN 2000a; 2000b. Unless specified otherwise, the presentation that follows is based on these two articles.

53 See chapter three on the historical and doctrinal background of bodhicitta.
It has often been maintained that karunā is an inevitable outcome of the experience of śunyatā (or nairatmya ‘non-substantiality’). 54 Schmithausen has shown that in neither non-Mahāyāna nor Mahāyāna contexts, and for neither the Buddha, a bodhisatta, nor a śrāvaka, is the direct experience of śunyatā (or any experience of awakening) conceived of as entailing an automatic outflow of karunā. This is, of course, not to imply that the experience of śunyatā can have no such effect. For a śrāvaka, such an experience would destroy the roots of certain egoistic emotions, but not automatically trigger off positive altruistic feelings or impulses. For a bodhisatta, too, such an experience would remove any form of clinging to worldly phenomena and the fear of samsāra. The actual emergence of karunā from the experience of śunyatā presupposes that karunā has been present or practised for a long period of time, and thus disposed to continue during the experience of śunyatā as objectless. At least some of the texts that intimate that karunā is a spontaneous outflow of the experience of śunyatā may be interpreted in this way. 55 It cannot be ruled out that some texts indeed intended to allow karunā as an outcome of the experience of śunyatā, not, however, exclusively so, for that would contradict the assertion that karunā accompanies the bodhisattva path from the very beginning; rather, the experience of śunyatā provides karunā with a new and deeper foundation. Such a possibility would unfold only if śunyatā is not understood in the sense of the nullity or insignificance of appearance but rather, as in the Tathāgatagarbha tradition and some Yogācāra texts, as the true nature (i.e. Buddha Nature) or true self (ātman) of all sentient beings, and thus all sentient beings deserve equal respect and the great benevolence (mahāmaitri) that makes no distinction between oneself and others. 56

Beside these explanations offered by Schmithausen, there is perhaps also another way to elucidate how karunā may ensue from śunyatā: positive emotional elements such as karunā and śraddhā (‘faith’) may arise from the experience (or even a correct theoretical understanding) of śunyatā, not, however, as a direct and automatic reflex of such an experience or conviction, but rather as an indirect result of reflecting on how a person can be released from samsāra by experiencing śunyatā (or ontological bodhicitta) as a spiritual event, and how others who cannot or do not do so remain bound in samsāra and suffer. In such a case, karunā would arise in view of those who have not realised śunyatā or those who are indisposed to it; śraddhā, in view of those who have realised or taught the doctrine of śunyatā. 57 Such an explanation, however, neither implies that śunyatā is a necessary

54 See Schmithausen’s comments in BSTEH 2000: 475–476, 503–504. Cf. EB, s.v. mysticism: “Mystical experience is flanked with a communication hazard, a ‘polar identity.’ The linguistic liberties and extravagances are part of the logical impossibility of having to describe one order of experience in terms of another. Hence, the rhetoric of mysticism is largely one of symbols and paradoxes. The most striking of the strategies, as the medieval Christian scholar Nicholas of Cusa put it, is coincidentia oppositorum (‘union of opposites’). Since the opposites coincide without ceasing to be themselves, this also becomes an acceptable definition of God, or the nature of the Ground. God, said Heraclitus, is day and night, summer and winter, war and peace, and satiety and hunger—all opposites.” See also HWP, s.v. Coincidentia oppositorum.

55 See SCHMITHAUSEN 2000a: 127, n. 40 and 2000b: 444, n. 48, where a number of proponents of such a stance are mentioned.

56 Such texts include the Bodhicittavivarana ascribed to Nāgārjuna, the Ratnakarandakodghāta by Atiśa, and the Sānyāritibodhicittabhāvanopadesavarnāsangrāha ascribed to Asvaghosa. For the references and translations of the pertinent verses, see SCHMITHAUSEN 2000b: 449, nn. 69–70.

57 Perhaps the ontological status of karunā as proposed in rDzogs-chen literature can be explained in a similar manner.

58 This explanation is inspired by Śāntarakṣita’s Madhyamakālamkāra 96–97 (ICHIGO 1989: 222–223). The context is made clear in his Madhyamakālamkāravṛtti (P, fols. 83b8–84a3; D, fol. 83a4–6; S, vol. 62, p. 973.7–14, cited in chapter five, n. 141), where he proposes two possible ways of launching the career of a bodhisattva, namely, one for ‘those who follow the path of reason (or logic)’ (nyāyānusārin) and one for ‘those who follow

ontological condition for the outflow of karunā, nor does it propose that the experience of śunyatā is a necessary and a direct epistemic cause of the emergence of karunā.

(e) The Union of Emptiness and Compassion: A Tibetan Controversy

There are many points of controversy surrounding śunyatākarunāgārbha in Tibet, to treat all of which would be beyond the scope of this study. Nonetheless, as a representative case, I shall present a passage from Klong-chen-pa’s Yid bzhin mdzod ‘grel, where the union of śunyatā and karunā is thematised. The discussion occurs in the context of explaining the so-called ‘Three Excellent Ones’ (dam pa gsum), which are said to be implemented in any given bodhisattva practice, namely, excellent cittotpāda in the preparatory phase (sbyor ba sems bskyed dam pa), excellent (abiding in the state of) objectlessness or imperceptible (reality) in the main phase (dngos gzhi dmigs med dam pa), and excellent dedicatory transfer (parināmanā) in the concluding phase (mjug bsgo bo dam pa).59 Klong-chen-pa states:60

In this [context], upāya [or] karunā, which is present at the time any wholesome deeds whatsoever are performed, and prajñā [or] śunyatā operate in union [or unite] simultaneously, and hence there is no temporal distinction [between the two]. Some maintain that it is on the occasion of meditating upon reality (dharmatā) that karunā of the preparatory phase and [śunyatā or dharmatā of] the main phase [of meditation] unite. This is simply a misunderstanding. Maintaining the union of a past non-entity and a present entity is laughable. [I] maintain that the mental entity (blo rdzas) that has attained cittotpāda and not disintegrated is karunā, [while its] essence [or nature], which is nowhere to be attested, is śunyatā. These two, which are one [in being] mental entities and separate [in being] facets [of the larger union], unite. Because imperceptible [reality], which is śunyatā, and karunā, which is objectless, are of one taste (ekarasa), they are called a ‘union without separate natures.’ This is a crucial point. It should be added that in general, for Klong-chen-pa (and perhaps for all Tibetan Buddhist scholars), it is śunyatākarunāgārbha that distinguishes Mahāyāna from non-Mahāyāna.

(f) Three Positions on the Fusion of Śunyatā/Prajñā and Karunā/Upāya

In sum, there seems to be at least three more or less varying understandings of the fusion of śunyatā/prajñā and karunā/upāya in common Indo-Tibetan Mahāyāna Buddhism. The first position is that the prajñā present in the meditative state and the karunā present in the pre-meditative (or post-meditative) state should be merged. This seems to be proposed by Kamalāśīla in his First and Third Bhāvanākrama. This position has been rejected by some

the path of faith’ (śraddhānusārīn). In the case of the former, karunā arises only after the correct view of śunyatā has been gained. However, the decisive word skye (‘arise’) as found in Madhyamakālaṃkāra 96d (i.e. snying rje nyid ni rab tu skye |) has bskyed (‘generate’) as a varia lecto. In the occurrence of the verse in the Madhyamakālaṃkāraṃyuttī (P, fol. 82b6; D, fol. 82a6; S, vol. 62, p. 971.3), P and N have bskyed. But equally importantly, Śantarākṣita’s commentary (ibid., P, fol. 83a1; D, fol. 82a7; S, vol. 62, p. 971.9) has skye, and this, in my view, is also supported by the fact that skye is used in reference to śraddhā (Madhyamakālaṃkāra 97d), which is clearly juxtaposed to karunā.

59 Yid bzhin mdzod (fol. 33b1–2). Cf. the Ratnālokālaṃkāra (P, fol. 354a4; D, fol. 304a6; S, vol. 64, p. 838.4–6), where a similar convention is used: sbyor ba snying rje dang ldan pa dang | dngos gzhi pha rol tu phyin pa drug gis zin pa dang | rjes bsgo ba yongs su bsgo ba mi dmigs pa'i rgyas btab par....

60 Yid bzhin mdzod ‘grel (p. 773.1-4): 'dir thabs snying rje ni dge ba gang byed de'i dus na yod pa de dang | shes rab stong pa nyid mnam du zung du 'jug pas snga phyi med do | kha cig ni chos nyid bsgom dus sbyor ba'i snying rje dang | dngos gzhi'i stong [add. nyid] gzung [= zung] 'jug tu 'dod pa ni | phyoogs ma go bar zad de | 'das pa dngos med dang | da la ba dngos po zung du 'jug pa ni bzhad gad kyi gnas so | de yang sems bskyed thob la ma nyams pa'i blo 'rads ni snying rje | ngo bo gang du yang ni dmigs pa ni stong pa | de gnyis blo rdzas ngo bo gcig pa la ldog pa so bo so ba zung 'jug gam | dmigs med de nyid stong pa yin la | dmigs pa med pa'i snying rjer gyur pa gnyis ro gcig pas tro bo tha dad med pa'i zung 'jug ces 'dod pa yin no | 'di ni gnad gal po che'0]].
Tibetan scholars as ridiculous, who argue that a past entity could not possibly fuse with a present entity. In all fairness, this position seems to be merely calling for the combining of the practices associated with the two kinds of accumulations, namely, puṇyasamabhāra and jñānasamabhāra (corresponding to karunā and prajñā, respectively). Most importantly, no temporal simultaneity is presupposed here. The second position is that a karunā-driven spiritual practice is constantly accompanied by prajñā, which ensures that all factors involved are viewed as śunya or dream-like so that practitioners do not get carried away by their intellectual-emotional defilements (kleśā). The fusion in this case takes place in the post-meditative state, and a strict temporal simultaneity does not seem to be assumed; that is, prajñā and karunā may be actualised alternately or in quick succession but need not simultaneously. Such a position seems to be represented in Śāntideva's Śīksāsamuccaya. According to the third position, the fusion of prajñā and karunā takes place in the meditative state, karunā in this case not being any arbitrary kind of karunā but only the type that has no objective support. Perhaps here a strict temporal simultaneity can be presupposed. This is clearly the position of Abhayākara ga. Klong-chen-pa’s position in this regard seems to be similar to that of Abhayākara ga. There may, of course, be many more explanations of the fusion of śunya/prajñā and karunā/upāya.

3. Subclassifying Bodhicitta into Pranidhicitta and Prasthānacitta

One of several ways of classifying bodhicitta is to subdivide it into bodhiprānīdhicitta and bodhiprasthānacitta. In dealing with this topic, I shall (a) present the locus classicus for the subclassification of bodhicitta into pranidhi and prasthāna, and (b) discuss the possible historical process that may have led to the development of this classification, (c) consider why this classification can be found in some sources and not in others, and (d) analyse the distinction between the two types of bodhicitta and the various interpretations and controversies associated with it.

(a) The Locus Classicus of the Classification

The terms pranidhi and prasthāna employed in the non-Mahāyāna sources are non-technical and thus are of no immediate concern to us here. What primarily concerns us is the use of these terms in the context of the classification of bodhicitta in the sense of bodhiprānīdhicitta and bodhiprasthānacitta. Thus whenever I speak of pranidhi and prasthāna (or pranidhīcitta and prasthānacitta), I mean bodhiprānīdhicitta and bodhiprasthānacitta, respectively. The locus classicus for this classification is the Bodhicaryavatāra:

This bodhicitta, in short,
Should be known to be of two types:
The resolve to aspire to awakening
And [the resolve to actually] set out towards awakening.

61 Cf. SEYFORT RUEGG 1981: 82, where pranidhi and prasthāna have been described as the ‘Bodhisattva’s preliminary resolution’ and his ‘realisation’ (of the resolution), respectively, the latter ‘through the perfections on the Bodhisattva’s path proper.’ See also DAYAL 1932: 62.

62 For the terms pranidhi and prasthāna, see PW and MW, s.v. See also BHSD, s.vv. pranidhi and pranidhāna. For the corresponding Pāli terms, see PED, s.vv. panidhāna and panidhi.

63 Bodhicaryavatāra 1.15: 

| tadbodhicittam dvividham vijnātavyam samāsataḥ |
| bodhiprānīdhicittam ca bodhiprasthānacitam eva ca ||

An almost identical expression is found in the Śīksṭāsamuccaya: 64

Bodhicitta is of two kinds: the resolve to aspire to awakening and the resolve to set out towards awakening.

Such a classification of bodhicitta was perhaps inspired by the following statement of the Gaṇḍavyūhasūtra, also cited by Śāntideva: 65

O son of a noble family, sentient beings who aspire to the highest perfect awakening are rare in the world of sentient beings. Even rarer than they are those sentient beings who have set out towards the highest perfect awakening.

Although the subclassification of bodhicitta is not found in the context in which the idea here occurs, nor is the technical term bodhicitta used, the passage seems to presuppose the two stages of aspiration and setting out. This passage has been cited, perhaps following Śāntideva, by a number of later Indian authors. 66 The fact that Śāntideva used this classification does not mean that he did not know other classifications. Faced with the expression ‘in short’ (samāsataḥ), Prajñākaramatī explains that the given one is an abbreviated classification and that other fuller ones are possible as well. 67

It is quite conceivable that the popularity of Śāntideva’s works, which seemed to have served as sources for many Indian scholars who wrote or commented on bodhicitta, 68 promoted the wider acceptance and standardisation of these terms. I have not yet been able to locate any source that predates Śāntideva and which explicitly subclassifies bodhicitta into prāṇidhīcittā and prasthānacittā. However, although Śāntideva’s influence was great, he was perhaps not the only one who adopted this classification. Jñānagarbha—who with all probability also flourished in the first half of the eighth century and who was a pupil of Śrīgupta and a teacher of Śāntarakṣita 69—apparently used the same classification in his Yogabhāvanāmārga. 70

66 The passage from the Gaṇḍavyūhasūtra is often cited as the scriptural source for the subclassification of bodhicitta into prāṇidhi and prasthāna; for examples, see Śāntideva’s Śīksṭāsamuccaya, Prajñākaramatī’s Bodhicaryāvatārapaññikā (p. 12.1–2), Kamalaśīla’s First Bhāvanākrama (pp. 192.19–193.1), Atiśa’s Bodhimārgaprādipapāṇiṅkā (P, fol. 297a1–2; D, fol. 257b3–4; S, vol. 64, p. 1690.7–10; SHERBURNE 2000: 104–105), and Abhayākaraśūtra’s Munīmatāśālaṁkāra (P, fols. 204b8–205a2; D, fol. 162a3–3; S, vol. 63, p. 1278.3–8).

67 Bodhicaryāvatārapaññikā (p. 11.22–23): “Although other types [of classification] are possible, this one is stated by way of an epitome [of those comprising] two categories” (aparaprakārārasambhave ‘pi samkṣepataḥ idam dvividham ucyate |).

68 See, for example, the First Bhāvanākrama (p. 192.17–19); tac ca bodhicittam dvividham prāṇidhīcittam prasthānacittam ca |; Bodhicaryāvatārapaññikā (p. 11.23–24): bodhiprāṇidhīcittam ity ekam | bodhiprasthānam ity dvitiyam |; Bodhimārgaprādipapāṇiṅkā (P, fol. 297a2–5; D, fol. 257b4–6; S, vol. 64, p. 1690.10–18; SHERBURNE 2000: 104–105).

70 Yogabhāvanāmārga (P, fol. 5a7–8; D, fol. 4b6–7; S, vol. 64, p. 12.6–10): de’i phyir rang gi sems stong pa nyid kyi ngo bo nyid yin pa de bzhin du | chos thams cad kyang de lta bu yin na ji ltar de sngon du btang ba’i smon pa’i byang chub kyi sems don dam pa’i ngo bo nyid la spyod pa’i mthsan nyid shes rab dang mthunugs par ldan pa ni ‘jug pa’i sems zhes bya ste | de kho na nges pa la ‘jug pa’i thabs yin pa’i phyir ro |]. The exact meaning of the passage is, however, not quite clear.
(b) The Possible Historical Development of the Subclassification.

The subclassification of bodhicitta into pranidhicitta and prasthānacitta is obviously a result of systematisation. In other words, we cannot assume that such a subclassification existed from the very beginning. The question is: How did such a subclassification come into existence? The systematised classification gives the impression that there was originally one general concept, bodhicitta, which was later subdivided into pranidhicitta and prasthānacitta. Historically, however, this does not seem to be the case. One may say that bodhicitta originally covered the semantic range of only pranidhicitta, but later on also assumed and synthesised the stage of prasthānacitta. This historical process may become more comprehensible if we recall the role the idea of pranidhi played in the development of the bodhicitta concept.

On the basis of several Mahāyāna sources, it is clear that the relation between āśaya (or adhyāśaya) and prayoga is similar to the relation between pranidhicitta and prasthānacitta. That is to say, āśaya and pranidhi apply to the stage of mental resolve or aspiration, which is originally nothing other than bodhicitta itself, while prayoga and prasthāna refer to the stage of practical application, such as the practice of the six perfections (pāramitā). In other words, āśaya and pranidhi express the theoretical or mental resolve to become a buddha, and prayoga and prasthāna the actual practices essential for attaining the envisioned soteriological goal. Some exegetes may have felt the need to load a single convenient term, namely, bodhicitta, with the semantic weight of both the theoretical resolve and actual practices. Also, on a practical level, the difficulty of maintaining motivation during the actual practices may have given rise to the need to combine āśaya or pranidhi with prayoga or prasthāna under the unified concept of bodhicitta. This process can be seen as a process of crystallisation that made bodhicitta richer in meaning—and made it assume an ever-increasing role until it became the be-all and end-all of Mahāyāna spirituality. The potential multivalence of the compound bodhicitta would not have stood in the way of such a development. The subclassification of bodhicitta into pranidhicitta and prasthānacitta, moreover, must certainly be more archaic than that into conventional and absolute. And if the Gandavyūhasūtra is the scriptural authority for this classification, as tradition would have it, then it may be considered the oldest source.  

(c) The Pervasiveness of the Classification

One of the questions we might ask is: Does the subclassification of bodhicitta into pranidhicitta and prasthānacitta occur in all Mahāyāna sources that undertake to further particularise bodhicitta, and if not, why not? Just as the classification perhaps originated only in a certain textual milieu, so too it is prevalent only in certain groups of texts. (This statement, of course, is not meant to undermine the fact that attempts were made by later exegetes to gather and systematise the various classifications.) The Bodhisattvapitakasūtra, for example, does not explicitly mention the terms bodhipranidhicitta and bodhiprasthānacitta. This particular classification is not found in various other texts either, such as the Bodhisattvabhūmi and the Mahāyānasūtrālāṃkāra. Tendentially, texts that represent a more archaic or conservative idea of bodhicitta do not contain this particular classification, because bodhicitta in the conservative Mahāyāna texts primarily means the initial resolve to become a buddha and not the actual practice. The

72 However, Ulrich Pagel states that the Bodhisattvapitakasūtra 'by implication' recognises the division of bodhicitta into bodhipranidhicitta and bodhiprasthānacitta (Pagel 1995: 130).
The distinction between *pranidhicitta* and *prasthānacitta* was a topic of much debate among late Indian scholars and their Tibetan successors, Śāntideva, whom many later scholars followed, illustrated the difference with an analogy:  

> Just as the difference between  
> One who desires to travel and one who is travelling is understood,  
> So should the difference between the two [kinds of *bodhicitta*]  
> Be understood by the wise accordingly.

For Śāntideva, the theoretical resolve to strive for awakening is *pranidhi*, and the practical course of action is *prasthāna*. Explanations of the terms *pranidhicitta* and *prasthānacitta* are also given by Prajñākaramati. In any case, the terms provided much room for conflicting interpretations. The following passage by the eleventh-century Indian scholar Ratnākaraśānti offers a remarkable glimpse into the dissent surrounding the issue of *pranidhi* and *prasthāna* current in India during his time:  

> [1] *Bodhicitta* is of two kinds: one *pranidhicitta* and one *prasthānacitta*. Why is this so? Because [these are] said to be desire for the result and for the cause, [respectively]. How so? Desiring the sublime result is *pranidhicitta*, whereas striving for the cause of it is *prasthānacitta*.  
> [2] Some claim that *prasthānacitta* is absolute *bodhicitta*, directed towards emptiness (*śūnyatā*), whereas *pranidhicitta* is conventional *bodhicitta*, with compassion as [its] priority. [3] Some also claim that *prasthānacitta* is [bodhicitta] which consolidates wholesome [attitudes and actions], whereas *pranidhicitta* does not. [4] Some claim that *pranidhicitta* is pure altruistic inclination (*āśaya*), since it is an aspirational wish (*pranidhāna*), and that *prasthānacitta* is...
superior practical application (prayoga), since it is the putting into practice [of theoretical aspiration].

Ratnākaraśānti presents four different positions including his own. Although a tone of scepticism can be felt regarding the three other positions, he does not criticise them but places them on the same level with his own position. Ratnākaraśānti’s own position agrees with that of Atiśa, for whom pranidhi is a thought which takes the resultant aspects of the perfect awakening as its supporting object and focuses on them, whereas prasthāna is a thought which takes aspects of the path as its supporting object and focuses on them.  

The second position paraphrased by Ratnākaraśānti seems to be Buddhaśrījñāna’s, which is mentioned also by Dharmamitra in his Prasphutapadā.  

According to Ācārya Buddhaśrījñānapāda, all resolutions [to become a buddha] at the stage of an ordinary being (prthagjana) are generated in the form of bodhipranidhidicitta. Beginning with the stage (bhūmi) of ‘Utter Joy’ (pramuditā), however, [the resolution], which is [now] characterised by gnosis and is in exact concord with dharmadhātu, is explained as bodhiprasthānacitta.  

According to this interpretation, pranidhi is mundane and conventional, whereas prasthāna is supramundane and absolute.  

The third position presented by Ratnākaraśānti is apparently that of Dharmamitra. According to the latter’s Prasphutapadā, bodhipranihelicitta is generated through ritual, while bodhiprasthānacitta is generated through meditation.  

The [term] pranidhi means mere aspiration that has not been fully accepted [but nevertheless formalised] through the bodhicittotpāda ritual procedure after accumulating a mass of [beneficial resources (punya)]. The [term] prasthāna, on the other hand, means the conduct [leading to] attainment included [within the framework of the bodhisattva stages], beginning with the generation of the resolve [to become a buddha]—which has come about by the full acceptance [of the bodhisattva vow] after pleasing one’s spiritual teacher (kalyānmitra)—up to [the stage of] the path that is immediately followed [by the actual result] (ānantaryamārga).  

According to this interpretation, pranidhi is a mere aspiration that has not definitively assumed the form of a commitment, and so is not accompanied by practical deeds. By contrast, prasthāna is seen as involving practical application from the very first generation of resolve onwards.  

The initial resolve to become a buddha, which, according to some other positions, may be pranidhi, is here considered to be prasthāna. According to Śrījñānakūrī, the first three of

80 Prasphutpadā (P, fol. 44a8–b1; D, fol. 38b5–7; S, vol. 52, p. 794.2–5): smon pa zhes pa ni smon pa tsam ste [te DC] i thugs bsags pas sens [add. de PN] bskyed pa'i cho gas blang ba yang ma byas pa'o || 'jug pa zhes pa ni dge ba'i bshes gnyen mnyes par byas te yang dag par blangs pa las byung ba'i sens bskyed pa nas brtsams te | bar chad med pa'i lam gyi bar du giogs pa'i sgrub pa'i spyod pa'o ||.

81 Namely, the diamond-like concentration (vajropamasamādhi).

82 Pāramitāyānabhāvanā (P, fol. 79b4; D, fol. 73b1–2; S, vol. 64, p. 212.7–9): 'dup pa'i gnas skabs sog [stogs DC] dbyhe bas || smon pa'i sens ni rnam pa gsum || 'jug pa zhes ni bya ba'i sens || rnam pa bcu dgu dag tu 'dod ||.
twenty-two kinds of cittotpāda are pranidhicitta, whereas the remaining nineteen are prasthānacitta. Dharmamitra also mentions a position according to which the distinction between pranidhicitta and prasthānacitta is made on the basis of the reversibility or irreversibility of the state a bodhisattva has attained. For Tibetan scholars such as Tsong-kha-pa, most of these proponents have not understood the matter properly, having missed the intent of the Gaṇḍavyūhasūtra and of Sāntideva.

4. Subclassifying Bodhicitta into Conventional and Absolute

The idea of conventional and absolute truths in Buddhism, particularly in the Madhyamaka system—where all phenomena are expressed according to these two modes—is well known. What is perhaps less known is the tendency of Buddhist systematists to extend this twofold classification to very particular areas of thought. For example, even in relatively conservative Buddhist literature such as Vasubandhu’s Abhidharmakośabhāṣya, abhidharma itself is divided into pāramārtha (‘true’ or ‘pertaining to the absolute’) and sāṃkṣetika (‘designatory’ or ‘pertaining to convention or transactions’). In the Saṃskṛtāsamskṛtaviniscaya, each of the Three Jewels is also classified according to the pāramārtha-sāṃkṣetika divide. It comes as no surprise, then, that cittotpāda (or bodhicitta) has been similarly subclassified in both Indian and Tibetan traditions. The following sets of terms are used to describe the subclassification of bodhicitta into conventional and absolute: (a) samādānasāṃkṣetika and dharmatāpratilambhika, (b) sāṃkṣetikacittotpāda (or samādānasāṃkṣetika) and pāramārthikacittotpāda, (c) samyṛtibodhicitta and

83 See the Prasphutapadā (P, fol. 44b4–7; D, fol. 39a2–5; S, vol. 52, pp. 794.14–795.2), particularly the statement: ... phyir mi ldog pa’i sar gnas pa dang | de ma thob pa las smon pa dang ‘jug par [pa PN] bzhog ste |.

84 See the gSer phreng (p. 197.3–4): de ltar na cho gas blangs ma blangs dang | gzhan yang phyir mi ldog thob ma thob dang | ‘bras bu dang rgyu la dam bce pa la ’dod pa yod de de dag gis ni legs par ma rtogs te | sdog po bkod pa’i mdo dang de’i dgongs pa’i ’grel pa’i shānta de ba’i lugs las phyi rol tu gyur pa’i phyir ro |.

85 We find expressions such as pāramārthākapramāna (TSD, s.v. don dam pa); pāramārthikājñāna and samvyūtijñāna (TSD, s.vv. don sam pa’i ye shes kund rabs shes pa); paramārthakāya and sāṃvyūtikāya (TSD, s.v. don dam sku); paramārthāsramāna (TSD, s.v. don dam pa’i ’dge sbyong); and paramārthhayoga (TSD, s.v. don dam pa’i rnal ‘byor). See also Bodhisattvabhumi 1.17 (WOGHARA, p. 260.16–17; DUTT, p. 177.19–20): pāramārthikāsāṃkṣetijñānapūrvvangamāḥ pāramārthikāsāṃkṣetijñānapālaham ....

86 Abhidharmakośabhāṣya (p. 2.5): esa tāvat pāramārthiko ‘bhidharmah | sāṃkṣetikas tu ....

88 The classification, as we shall see, is attested in several Indian sources, and is not a Tibetan invention, as BRASSARD 2000: 58 seems to suggest.

89 For the terms samādānasāṃkṣetika and dharmatāpratilambhika, see TSD, s.vv. yang dag par blangs pa brda las byung ba, choi nyid kyi mneya pa, and choi nyid kyi ‘thob pa. The negation asāṃkṣetika seems to be used in opposition to dharmatāpratilambhikā in the Mahāyānasūtrālambkarābhāṣya (p. 9.19): asāṃkṣetikām dharmatāpratilambikām .... It is clear that dharmatāpratilambhika in general conveys a meaning opposite to what results from causes and conditions. See, for example, the Bodhisattvabhumiavyākhyā (P, fol. 266b5; D, fol. 23a1–2; S, vol. 75, p. 660.14–15): rigs ni choi nyid kyi thob pa’i yin gyl [gyis PN] | rgyu dang rkyen gyis mgon par ‘dus byas pa ni ma yin no |.
There may also be other terms used within this classification. I shall, for pragmatic reasons, therefore use 'conventional' and 'absolute' to refer to the first three pairs of terms. The last pair, however, seems to be applied only in the context of psycho-physiological bodhicitta, and the terms *sarrūrti and *vivṛtī should perhaps not be understood as conventional and absolute, as suggested by the Tibetan translation (i.e. kun rdzob and don dam), but rather as 'closure' (or 'concealing') and 'exposure' (or 'revealing'), respectively, which seem to make better sense in the context of sexual-yogic practices associated with a skilful manipulation of psycho-physiological bodhicitta. The classification of psycho-physiological bodhicitta into *vaivṛtīriṣṭipaka and *sarrūrtiṇipaka will, however, not be discussed here. Instead the following few paragraphs will be devoted to the subclassification of bodhicitta into absolute and conventional modes in general, and to a few related issues.

(a) Two Strands of the Conventional-Absolute Classification

As already shown, an examination of the conventional-absolute categories of classification seems to indicate that there once existed two strands of the bodhicitta concept: Strand A—represented by texts such as the Bodhisattvabhūmi, Mahāyānasūtraśāṃkāra, and Abhisamayālaṃkāra—which conspicuously employs terms such as pāramārthikacittotpāda and sāṃketikacittotpāda; and Strand B—represented by the Prajñāpāramitā and Madhyamaka literature—which rather employs terms such as pāramārthikabodhicitta and sāṃvṛtibodhicitta to designate the particular subcategories. These two strands, mentioned in the chapter on the two cittotpāda traditions, correspond, though perhaps not exactly, to what I have referred to as the Maitreya-Asaṅga and Mañjuśrī-Nāgarjuna traditions. Although they seem to have conceived the mode of classification differently from the very beginning, in some later texts the two strands may have converged, or the distinctions between them at least became less pronounced.

In general, then, Strand A principally, if not exclusively, used the term cittotpāda, while Strand B preferred the term bodhicitta: Strand A tends to expressions such as sāṃhatipratilambhika, sāṃdāna/sāṃketikacittotpāda and pāramārthikacittotpāda; Strand B favours sāṃvṛtibodhicitta and pāramārthikabodhicitta (or

---

90 The Mahāyānasūtraśāṃkāra itself employs none of the compounds used to designate absolute or conventional bodhicitta. The Mahāyānasūtraśāṃkārabhāṣya, however, uses pāramārthikacittotpāda and sāṃketikacittotpāda.

91 The term pāramārthikabodhicitta is attested, for example, in Vanaratna’s Rahasyadīpikā (p. 63.9–10)—in a longer compound—and in the Yogaratnāvalī (p. 111.11).

92 The terms sāṃvṛtibodhicitta and pāramārthabodhicitta occur in the titles of two works, namely, the Saṃvṛtibodhicittabhāvanā (P 5307, 5432; D 3911, 4519; S 3140, vol. 64) and the Paramārthabodhicittabhāvanā (P 5308, 5431; D 3912, 4518; S 3141, vol. 64) both of which are attributed to Aśvaghoṣa (SEYFORT RUEGG 1981: 120–121) and are extant only in Tibetan translation. The authenticity of these titles is, of course, doubtful. I have not yet been able to trace the compound paramārthabodhicitta. However, the compound Saṃvṛtibodhicitta is found in Gāyatrīśaṭī (2.12cd (p. 21.5): sāṃbhogikam kāyasukhasvabhāvanam tad bhanyate Saṃvṛtibodhicittam ||). See also TSD, s.v. kun rdzob byang chub kyi sems.

93 The compound vaivṛtisamvṛtirūpaka is used in the Hevajratantra as an attribute of bodhicitta. See Hevajratantra 2.4.29:

\[ \text{vaivṛtisamvṛtirūpaka} \]

See also TSD, s.v. kun rdzob don dam gzugs can; Shing rta rnam dag (p. 60.3).

94 MW, s.vv. vivṛtī and sāṃvṛtī.
paramārthabodhicitta). In due course, as the two strands converged, the terminology of Strand B became the more popular one.

(b) Textual Sources of the Conventional-Absolute Classification

In the following few paragraphs, I shall present some textual sources that reflect the above development, whenever possible chronologically. There are no formal criteria for sorting out the material into either of the two strands. Nonetheless, one can more or less form two distinct groups of textual sources on the basis of their ideas and terminologies. One notices, however, a growing tendency of assimilation of terminologies, especially in the context of explaining the various ideas.

I have not been able to trace any Mahāyāna sūtra that explicitly mentions the classification under discussion. The Samdhinirmocanasūtra is sometimes, but mistakenly, given as a scriptural source of this classification by both Tibetan and modern scholars. The Mahāparinirvāṇasūtra is also given by some traditional Tibetan scholars as a source; I have not been, however, able to locate or verify the relevant verse. Nonetheless, we do find some Mahāyāna sūtras, such as the Dharmasamgītisūtra, which describe bodhicitta clearly on two levels theoretically interpretable as conventional and absolute bodhicitta.

So far, then, the classification has been found only in the sāstra or commentarial literature. The Bodhisattvabhūmi, which is quite likely one of the earliest pieces of literature that represent Strand A, does not mention such a classification. It does, however, subclassify cittotpāda into two types, namely, one leading to the goal (nairvyānika) and the other not (anaiavyānika), but this classification should be equated neither with the pranidhi-prasthāna subclassification nor with the conventional-absolute one, for it is explicitly stated that the classification is of initial (prathama) cittotpāda. The fact that the Bodhisattvabhūmi does not subdivide cittotpāda into dharmatāpratilambhika and samādānasāṁsketika does not necessarily mean that this classification postdates the Bodhisattvabhūmi. It may have been

95 One could look into the Avatamsaka, but I have not been able to do so, given time constraints.

96 The alleged citation from the Samdhinirmocanasūtra is in fact from Kamalaśīla's Second Bhāvanākrama. The wrong attribution of the source of this quotation appears to be a result of confusion. The pertinent passage in the Second Bhāvanākrama is Kamalaśīla's own statement and not a citation from the Samdhinirmocanasūtra. However, immediately thereafter, he cites the Samdhinirmocanasūtra to show that absolute bodhicitta is the result of the meditation of calmness and higher insight. The occurrence of the title Samdhinirmocanasūtra in the vicinity must have led Sgam-po-pa (or some other secondary source upon whom he relied) astray. See also Guenther's translation of the Dwags po thar rgyan; Williams 1989: 203; Brassard 2000: 15.

97 See, for example, the Grub mtka' mdzod (p. 192.2): ... mya ngan las 'das la [= pa] las | «kun rdzob don dam dbye ba yis || byang chub sems de rnam gnis te || 'sen dha pa" yis sgra bzhin no ||| zhes so ||. A somewhat similar verse can be found in Manjushrīrī's Vajrayanamūlaśāstra (P, fol. 261a5–6; D, fol. 211a4–6; S, vol. 27, p. 787.5–7): de litar yang | «rang bzhin gshi mthun byang chub sems || sgra gcig gis ni dngos rnam brjod || kun rdzob la sogs dbye ba yis || 'senta pa yi ' [sen ta pa'i P] sgra bzhin no |||». For this term, see MW, s.v. sairnghava.

98 The passage on bodhicitta is cited in both the Śūtrasamuccaya (pp. 24.19–25.9) and the Madhyamakāvārttikābhāṣya (pp. 6.13–7.6). However, although the passage seems to be identical, the former quotes it under the title Chos yang dag par sdu pa'i mdo (Dharmasamgītisūtra), whereas the latter under the title 'Phags pa chos kun byrg ba'i mdo.

99 See n. 73.

100 Note, however, the expression samketasamvrti within a compound found in Bodhisattvabhūmi 1.4 (Wogihara, p. 37.8–9; Dutt, p. 25.5–6).
either overlooked or not discovered during the compilation of the Bodhisattvabhūmi, but at any rate it was included during the compilation of the Vinīcayasaṁgrahaṇi, or to be more precise, the Bodhisattvabhūmi vinīcayasaṁgrahaṇi.101 The latter lists and explains ten kinds of cittotpāda (to which we shall return). The ten are actually five pairs of cittotpādas, the first pair being dharmatāpratilambhika and samādānasamākṣetika.102 Guṇaprabha’s Bodhisattvabhūmivṛtti, be it noted, does not mention such a classification.

The next relatively early source that draws a distinction between absolute and conventional cittotpāda is the Mahāyānasūtrālāṃkāra. These are referred to there as the ‘one [obtained] through the suggestion of others’ (parākhyāna) and the ‘one which is supreme’ (parama),103 though the terms sāmkṣetika and pāramārtha are not employed. The Mahāyānasūtrālāṃkārābhāṣya ascribed to Vasubandhu (but probably not by Vasubandhu the Kośakāra)104 uses the terms samādānasamākṣetika and pāramārtha.105 In addition, a discussion of absolute and conventional cittotpāda or bodhicitta can be found in several tantric and non-tantric sources, such as Sthiramati’s *Mahāyānasūtrālāṃkārābhāṣya,106 Sāgarameha’s Bodhisattvabhūmi vinīcayasaṁgrahaṇi,107 Asvabhāva’s (Mahāyāna)sūtrālāṃkārātīka,108 Kamalāśīla’s Second Bhāvanākrama,109 Vimalamitra’s (fl. end of the eighth century)110 Rim gyis ’jug pa’i sgom don,110 Atiśa’s Ratnakarandoghoṭa,111 Anangavajrapāda’s Prajñopayaviniścayasyasiddhi,112 Ratnakarasānti’s Ratnālokālāṃkāra,113 Guṇavatti,114 and

101 After the explanation of each of the ten cittotpādas, the Vinīcayasaṁgrahaṇi (P, vol. zi, fol. 300b8; D, vol. zhi, fol. 285b7; S, vol. 74, p. 691.8–10) states: “Of the ten cittotpādas, how many are defiled ones and how many are not defiled ones? Treatises that carry out [this] and similar analyses have not appeared” (sems bskyed [sicyed PN] pa bcu po de dag las du ni nyon mongs pa can yin | du ni nyon mongs pa can ma yin pa dang | de lta bu la sogs pa’i rnam par gan la [pa DC] dbab pa’i gzhung ni mi snang ngo ||).

(c) The Relative Chronology of the Conventional-Absolute Classification

In the face of several uncertainties, establishing the relative chronology of the ideas and terminologies under discussion will prove quite difficult if not impossible. Nonetheless, I shall propose one conceivable relative chronology, keeping in mind the two strands of bodhicitta and the internal and external relationships between the pertinent ideas and categories.

In general, the conventional-absolute classification in Strand A seems to be more archaic and conservative than the corresponding one in Strand B. The Bodhisattvabhūmiśrota, representing Strand A, alludes to the classification by means of terms such as *samatānaśamketa and *dharmanāpratilambha. The corresponding classification in Strand B, as far as I can see, does not predate or even go back as far as the compilation of the Viniscayasamgrahani. Strand A is seen to be relatively down-to-earth, with hardly any touch of the transcendence characteristic of Strand B. Indeed the conventional-absolute classification in Strand A seems to be more archaic and conservative not only than the corresponding classification in Strand B, but also than the pranidhi-prasthāna dichotomy, which in my view is a characteristic of Strand B.

Furthermore, the actual concepts of conventional and absolute and the terminologies used to convey them in strands A and B do not seem to be of the same antiquity. The notion of bodhicitta that retrospectively came to be designated as conventional bodhicitta in both strands A and B is certainly older than that of absolute bodhicitta. However, the term ‘absolute bodhicitta’ seems to have been used earlier in both strands, and is thus older than its counterpart. This can be easily explained. As in the case of the pranidhi-prasthāna dichotomy—concerning which I have tried to show that the concept of and terminology for bodhipraṣṭhānacitta was a later extension of the existing concept of bodhicitta, which primarily meant pranidhi, thereby resulting in a new pair of categories—the concept of and terminology for absolute bodhicitta can be seen as an extension of the existing concept of bodhicitta, which retrospectively came to be called conventional bodhicitta, no doubt for the

’jigs [’jig PN] sogs bzhin du goms [sgoms N] pa las ||
yul dāng yul can gnys las grol ||
don dam byang chub sems yin no ||.
sake of symmetry. In other words, after the development of the later idea and term ‘absolute bodhicitta,’ it became necessary to rename the existing older idea ‘conventional bodhicitta.’

The relative chronology of the concepts of conventional and absolute bodhicitta can also be attempted from a different angle. In which strand is the concept of conventional bodhicitta older? I am inclined to believe that the concept of conventional bodhicitta in Strand A is not only older than the corresponding concept in Strand B, but may even be the original concept. (The use of the term conventional may be confusing, and should be understood as merely a label added retrospectively). In both strands the concept of conventional bodhicitta may ultimately be traceable back to the idea of pratiññā (or pratiññhāna), as the first step to becoming a buddha, which is perhaps the primordial meaning of bodhicitta. The next question is: In which strand is the concept of absolute bodhicitta older? Here I propose that the concept of absolute bodhicitta in Strand B is older than the corresponding idea in Strand A. My view is, of course, based on the assumption that the doctrine of emptiness (and perhaps also the attendant notion of the two truths), as given contour in texts such as the Prajñāpāramitā scriptures, contributed to the development of the notion of absolute bodhicitta.

(d) Two Different Perceptions of Conventional and Absolute Bodhicitta

How conventional and absolute forms of bodhicitta are perceived in the two strands depends on how the terms ‘conventional’ and ‘absolute’ truths are understood by them. There are, however, more than one two-truth models presupposed in Indian Mahāyāna Buddhism; and an assessment of conventional and absolute bodhicitta without considering them would result in a mix-up of categories. The separate ideas of ontological and gnoseological bodhicitta, discussed in chapter six, become relevant here. The question they give rise to is whether, in terms of the conventional-absolute classification, ontological and gnoseological bodhicitta (descriptions of which are found also in traditional sources) should be subsumed under conventional or under absolute bodhicitta? In other words, is the idea of ontological and gnoseological bodhicitta related to the idea of conventional and absolute bodhicitta, and if so, how?

Strand A makes a distinction between conventional and absolute bodhicitta primarily on the basis of the attainment or non-attainment of non-conceptual gnosis. Conventional bodhisattva is cultivated by means such as ritual rather than meditation, and is attributed to a bodhisattva who is still a prthagjana. Absolute bodhicitta, on the other hand, is born of meditation and is attributed to a bodhisattva who has attained the first stage (bhūmi) or beyond; it is identical with what has been referred to as gnoseological bodhicitta. For this strand, only gnosis in which true reality appears as it actually is counts as absolute bodhicitta. Apparently, true reality itself is not designated as bodhicitta. This way of understanding absolute bodhicitta appears to be very prevalent in Indian and Tibetan Buddhism. For example, Candrakīrti in his commentary on Āryadeva’s Catuḥśataka, in discussing about when a person can first be called a bodhisattva, speaks of the following two kinds of bodhicitta:118

In this [context], there are two kinds of bodhicitta.119 The first one is the [bodhicitta of] desire (abhilāga or abhiprāya).120 The second one is absolute [bodhicitta]. As to the [bodhicitta of]

118 Catuḥśatakajīkā (P, fol. 103a8–b2; D, fol. 94b3–5; S, vol. 60, pp. 1157.21–1159.5): ‘dir byang chub ’kyi sems’ [sems dpa’ PN] ni rnam pa gnyis te | gcig ni mngon par ’dod pa’o || gnyis pa ni don dam pa’o || de la mngon par ’dod pa [add. pa PN] ni bla na med pa yang dag par rdoogs pa’i byang chub ’dod pa nas bzung ste | so so’i skye bo’i gnas skabs na yang yod do || don dam pa ni rnam pa beur ‘gyur te | sa rab tu dga’ ba sens bskyed pa dang po nas [add. sa DC] chos kyi sprin sems bskyed pa beu pa’i bar ro ||.

119 Note that the reading in P and N is bodhisattva not bodhicitta.
desire, it is existent even in the state of an ordinary person, from the time [one] desires the highest perfect awakening. As to the absolute [bodhicitta], it is of ten kinds, beginning with the cittotpāda of the first stage (bhāmi) [of a bodhisattva, called] pramudītā, up to the cittotpāda of the tenth stage, [called] dharmameghā.

Kamalāśīla describes conventional and absolute bodhicitta in his Second Bhāvanākrama as follows:121

Bodhicitta is of two kinds: a conventional one and an absolute one. Of these, the conventional one is the generation of an initial resolve representing the desire for the highest perfect awakening, after making a commitment out of compassion to rescue all sentient beings, to the effect: "May [I] become a buddha in order to benefit sentient beings." ... Absolute bodhicitta is supramundane, free from all manifoldness, very luminously clear, a domain of the absolute, immaculate, unwavering [and] unflickering, like the flame of an oil lamp in the absence of wind.

Jayānanda in his Madhyamakāvatāratikā states:122

In this [context], bodhicitta is of two kinds: conventional (sāmketika) and absolute (pāramārthika). Of these, the conventional kind is the one that is characterised by praṇidhi and prasthāna [and is found at] the level of an ordinary person. The absolute kind is the one that is attained in virtue of [having realised] the primordial reality of phenomena (dharma hatırlatījaḥ). According to Ratnakaraśanti, bodhicitta is sāmketika as long as śūnyatā is not realised directly, and pāramārthika once it is.123

The position of Strand B is not quite clear, but it seems to be that the identifying trait of bodhicitta, regardless of whether it is that of a bodhisattva who is still an ordinary person or of a saint, is śūnyatākarunāgarbha. If śūnyatā in this compound is understood in the sense of true reality or freedom from manifoldness, the result would be identical with ontological bodhicitta. On the other hand, if what is referred to as śūnyatā is the insight (prajñā) or gnosis (jñāna) which cognises śūnyatā, it would be gnoseological bodhicitta. Karunā is apparently considered to be conventional bodhicitta. I have not been able to trace a detailed explanation of such a distinction in Indian sources.124 Nonetheless, according to Atiśa’s Ratnakaraṇdogdgātha, absolute bodhicitta is practised during the meditative state, and

conventional bodhicitta during the post-meditative state, and in this way the two types of bodhicitta, which is then characterised by śīnyatākarunāgarbha, can be stabilised.\textsuperscript{125} Following Atiśa, one could say that a bodhisattva (from the first bhūmi onwards) experiences ontological bodhicitta as a spiritual event by means of gnoseological bodhicitta in the meditative state, while the ethico-spiritual bodhicitta becomes manifest in the post-meditative state.

These two different perceptions of bodhicitta (attributed to strands A and B) have not been discussed in any of the Indian and Tibetan sources that I have consulted. The only exception is perhaps Klong-chen-pa, who seems to have come to a similar conclusion, without, of course, making a distinction between two distinct currents. He states:\textsuperscript{126}

Furthermore, [the distinction between] conventional and absolute cittotpāda is made on the basis of two [kinds of] cittotpāda pertaining to ordinary persons (prthagjana) and saints (ārya), [respectively]; or on the basis of two [kinds of objects, namely,] appropriating sentient beings as external [objects] and appropriating [the nature] of mind itself as an internal [object].

(e) Can Absolute Bodhicitta Be Generated Ritually? A Tibetan Controversy

As I have already mentioned in chapter five, one of the issues raised by Sa-pa in connection with bodhicittotpāda rites is whether absolute bodhicitta can be generated by means of a ritual. Ever since, three positions have prevailed in Tibetan Buddhism: one position which rejects the possibility of generating absolute bodhicitta through ritual, a second one that accepts it,\textsuperscript{127} and a third one that attempts to harmonise the two opposing standpoints. The group that rejects the possibility of generating absolute bodhicitta through ritual is identified by Kong-sprul as including Sa-pa (and naturally his followers) and the followers of mNga'-ris Pan-chen (meaning most rNyIng-maapas).\textsuperscript{128} One of the persons Kong-sprul names as accepting the generation of absolute bodhicitta through ritual is 'Bri-gung Jig-rten-gsum-mgon (1143–1217).\textsuperscript{129} Kong-sprul himself belongs to the third group, which seeks to harmonise the two opposing positions.

Let us now briefly examine the first of the three positions, represented by Sa-pa and mNga'-ris Pan-chen. Sa-pa made his case in his sDom gsum rab dbye and Thub pa dgongs gsal.\textsuperscript{130} In the sDom gsum rab dbye, Sa-pa categorically rejects the possibility of generating absolute bodhicitta through ritual. He argues that if it were to be generated through ritual, it would be conventional cittotpāda and not the absolute form. The Buddha did not teach any ritual for the generation of absolute cittotpāda, nor has any wise person performed such a rite.

\textsuperscript{125} Ratnakaranandodghāta (P, fol. 108b3–4; D, fol. 97b6–7; S, vol. 64, pp. 290.20–291.2): de ltar rnal 'byor pa des nang du mnyam par bzhag [gzhag D] pa na | don dam byang chub kyi sans bsogs la | de las langs pa na kun rdzob byang chub kyi sans bsogs [bsgoms P] pas stong pa snying rje chen po'i snying po can gyi byang chub kyi sans gnyis [gnyid N] po bsr lat bya'o ||.

\textsuperscript{126} Shing rta chen po (pp. 532.6–533.1): de'ang so so'i skye bo dang 'phags pa'i sans bskyed pa gnyis sam | phyi rol sans can la dmigs pa dang | nang sans nyid la dmigs pa gnyis kyi kun rdzob dang don dam pa'i sans bskyed ces bya ste ||.

\textsuperscript{127} Kong-sprul, Shes bya mdzod (p. 28.10): cho gas skye dang mi skye bzhed srol gnyis ||.

\textsuperscript{128} Shes bya mdzod (p. 366.23–27): sa skya pan chen gnyis | don dam sans bskyed sgom pa'i stobs las skye'i cho gas mi skye | gal te skye na brda byung du 'gyur bas mi 'thad | don dam sans bskyed bya'o zhes gsungs pas yod srid kyang dam bca' tsam yin gyi cho ga ma yin pa gro gsungs pas de dang | mnga' ris pan chen gti rjes 'brang rnam kyang sans bskyed 'di ni cho ga las mi skye bar bzhed pa ste srol gnyis su snang ngo ||.

\textsuperscript{129} See below, n. 136.

\textsuperscript{130} RHOTON 2002: 92–93, n. 6.
Even if someone were to perform such a rite, it would not meet the criteria of a ritual. Sa-paṅ thus describes such practices as mere shadows of the Buddha’s doctrine. The most a farmer can do is provide his field with water, manure, seeds, and so forth, but the sprout, stem, bud, and the rest must arise from the field, not from him. Accordingly, one is able to generate conventional *bodhicitta* by means of ritual, but not absolute *bodhicitta*, which must arise naturally as a result of meditation. Even if it is possible, one time in a hundred, to find references to statements such as: “The absolute *bodhicitta* should be generated,” such statements merely represent a pledge (*dam bca’*) and not a ritual.\(^{131}\)

mNga’-ris Paṅ-chen’s view on the issue is expressed in his *sDom gsum rnam nges*, although he provided no arguments. Sa-paṅ’s influence on his position is unmistakable. It may prima facie even seem that he followed Sa-paṅ verbatim. In fact, he makes it explicit in his colophon that he availed himself of the writings of several scholars and accomplished masters.\(^{132}\) Let us, however, take a closer look at the pertinent verse.\(^{133}\)

The attainment of absolute *bodhicitta* by acquiring [it] through ritual
[Accords with] the tantric method; although [something similar] may possibly be taught in *sūtras*,

It would involve a mere pledge, [so that absolute *bodhicitta*] could arise [only] by the power of meditation.

mNga’-ris Paṅ-chen seems to deviate from Sa-paṅ in one essential point. He does not reject the notion of generating absolute *bodhicitta* through ritual per se, but makes a distinction between the *sūtra* and *tantra* contexts. Absolute *bodhicitta* cannot be generated by means of ritual prescribed in the *sūtra* system, and if a *sūtra* happens to allude to such an idea, it is to be interpreted as a mere oath to set the stage for it to arise one day through meditative practices. It is, however, according to him, possible to generate absolute *bodhicitta* through a tantric ritual. mKhan-po Yon-tan-rgya-mtsho, commenting on these statements, identifies the *sūtra* that professes the ability to generate absolute *bodhicitta* through ritual as the *dPang skong phyag brgya pa*,\(^{134}\) and *tantras* or tantric texts that do so as including the Māyāfālatantra, Vairocanābhisambodhitantra, and Paṅcakrama.\(^{135}\)

Note that the title of this work is spelt in several ways. For more information, see MARTIN 2006, s.v.
Such a distinction is not made by Sa-pa-l, at least not in his discussion of the issue within the non-tantric context. In other words, for Sa-pa-l the calling up of absolute bodhicitta through ritual is simply impossible, whereas for mNga'-ris Pa-chen it is possible, but only by tantric methods. Whether Sa-pa-l would allow such a concession in the tantric context is another matter. Therefore, although mNga'-ris Pa-chen formally belongs to the first group, his subtle interpretation seems to have laid the foundation for the third approach, namely, that of harmonisation.

For the second position, which holds the generation of absolute bodhicitta through ritual to be possible, let us now turn to the arguments recorded by Kong-sprul: 136

As for absolute cittotpāda, the Lord of Doctrine 'Jig-rten-gsum-mgon and others have, based on authoritative tantra and sūtra scriptures, maintained that [it] arises by [relying on] ritual. If it (i.e. absolute bodhicitta), as taught in tantras, arises by [relying on] ritual, then [the absolute bodhicitta] taught in sūtras must also arise [by relying on ritual], just as [in the case of] the ritual of the prātimokṣa vows. 137 The generation of the resolve [to become a buddha] in an absolute [sense] occurs in the tantric system, and the terminological conventions relating to it are also explicated [there], for the 'generation of moon-diamond resolve' (*candravajracittotpāda) is known as the generation of the resolve [to become a buddha] in an absolute [sense].

Objection: [No, such practices] do not deserve the terminological convention relating to it (i.e. the generation of the absolute bodhicitta by relying on ritual), since [they] involve a [mere] semblance of the [actual] path (rnam pa lam byed), and therefore only a likeness (rjes mthun) of [absolute bodhicitta], nothing genuine, [has been caused to] arise.

Response: That would also be true in the case of prasthānacittotpāda and so forth. It was with such [arguments] in mind that [the ritual of generating absolute bodhicitta] was practised [by 'Jig-rten-gsum-mgon and others]. For example, it is maintained that a mere [initial] (i.e. almost implying false) prātimokṣa vow will become a genuine [prātimokṣa] vow once it is later on permeated by [a genuine sense] of renunciation. In the case of the bodhi[sattva] vows, too, it is maintained that initially a thought characterised by wholesomeness arises, but [it is only] when [a bodhisattva] actually enters the path of accumulation (sambhāramārga) that the entire mind and the mental factors will assume a votive nature and take on authentic forms of pranidhi[citta] and prasthāna[citta]. The case here (i.e. regarding absolute bodhicitta) is similar: the mental continuum—which appropriates non-conceptual gnosis (nirvikāla-paṭhāna) as a mental object by means of ritual—later on directly cognises it, as a result of the ripening of wholesome virtues (kusalamālā).

The rNying-ma scholar Lha-btsun Nam-mkha'-'jigs-med (1597–1650), disregarding mNga'-ris Pa-chen's position completely, simply prescribes the ritual taught in the dPang skong phyag rgya pa'i mdo for the generation of absolute bodhicitta, arguing that it had also been among the practices of Nāgārjuna, as one can see in the collection of Indian texts, important

135 Rig 'dzin 'jug ngogs (p. 129.7–9): "cho ga'i sgo nas blangs te thob pa'i tshul sgyu 'phrul dra ba dang | rnam snang mgon byang dang | rim pa lnga pa sogs las bshad pa ni gsang sngags kyi lugs yin te |"

136 Shes bya mchod (p. 366.13–23): "don dam sms bskyed de ndid chos rje 'jig rten gsum mgon la sogs pa rnam ni rgyud dang mdo 'i lung la brten te cho gas skye bar bzhed de | rgyud las bshad pa de cho gas skye na mdo las bshad pa de 'ang skye te so thar gyi sdom chog bzhin | sngags su don dam du sms bskyed pa yod la de'i tha snyad ma bshad pa 'ang yin (= min) te | zla ba rdo rje'i sms bskyed la don dam du sms bskyed pa yongs su grags pa'i phyir | de dag rnam pa lam byed kyi phyir rjes mthun tsam las dngos mi skye bas de'i tha snyad mi 'thob ce na | 'jug pa sms bskyed la'ang de dang mtshungs pa sogs kyi dgongs pas phyag len du mdead de | dper na | so thar sdom pa rkyang tsam phyis nges 'byung gis zin na sdom pa mstan mnyad par 'gyur bar bzhed pa dang | byang sdom yang thog mar sms dge ba'i ngo bo tsam skyes pa de tshogs lam dngos la zhugs pa na sms sms hyung ril gyis sdom pa'i ngo bor 'gro bas smon 'jug mshan mnyad par 'gyur bar bzhed pa dang | 'dir cho ga'i stobs las rnam par mi rtag pa'i ye shes blo yul du byas pa'i rgyun phyis dge rtsa smin pas mngon sum du rtag pa cha mtshungs pa'o' na]. The reading yin, which is also found in the xylograph edition, must be an error. A negation in my view is not only necessary here for semantic reasons, but for syntactic ones as well, owing to the preceding particle 'ang.

137 That is, the prātimokṣa vows is valid regardless of where the prātimokṣa ritual is taught (be it in a tantric or non-tantric scripture).
for the bKa'-gdams-pa tradition, called the Jo bo'i chos chung. This mild critique is probably directed against the view held by scholars such as Sa-pan and mNga'-ris Pan-chen. The case for the generation of absolute bodhicitta was also made by other masters, such as 'Brug-pa Padma-dkar-po and gSer-mdog Pan-chen Shākyā-mchog-ladan (1428–1507), both of whom allude to the Bodhicittavivarana. The difficulty is that only some fragments of the Sanskrit text have survived, while the Tibetan translation seems to have undergone numerous revisions, and the very sentence that concerns the generation of absolute bodhicitta contains some dubious corrections. Kong-sprul harmonises the two positions in the following manner.

These [two] are not contradictory, for the intended meaning is that for the first [position] a semblance [of absolute bodhicitta] can be generated through ritual, and for the second [position], a genuine [absolute bodhicitta] cannot be [so] generated. Thus it is not tenable for followers [of later generations] to decide once and for all that [it] cannot be generated through ritual, given that the logical reasoning and the [scriptural] proof shown for the arising of the gnosis of the fourth empowerment merely by means of words and for the generation of absolute bodhicitta through ritual are similar.

Recapitulating, we may speak of three different positions regarding the generation of absolute bodhicitta through ritual: (a) The first position, put forward by Sa-pan, categorically rejects the idea of generating absolute bodhicitta through ritual. Whether it is possible or permissible under certain circumstances is not made explicit. The position which is proposed by mNga'-ris Pan-chen and his followers is less categorical. The proponents of this theory concede that the ritual of generating absolute bodhicitta is possible by employing special tantric methods but not by employing the usual sūtra techniques. (b) According to the second position, proposed by 'Brig-gum 'Jig-rten-gsum-mgon and others including some rNying-ma-pas, absolute bodhicitta can be generated even by following ritual procedures prescribed in the sūtra system. (c) Kong-sprul harmonises these two positions by stating that according to the first one the generation of a semblance of absolute bodhicitta is still possible, and according to the second the generation of genuine absolute bodhicitta is not possible.

5. Leading to the Goal and Not Leading to the Goal

Two twofold subclassifications of cittotpāda are found in the Cittotpādapatāla of the Bodhisattvabhumi, namely, leading to the goal (nairyānika) and not leading to the goal (anairyānika) alongside a stable (dṛḍha) form and an unstable (adṛḍha) form. These classifications are considered synonymous by Sāgaramegha. He may be right, but I shall nevertheless discuss them separately here. The Cittotpādapatāla of the Bodhisattvabhumi first discusses the characteristics of cittotpāda, and only then the subdivisions (prabheda) of it:

138 sDom gsum bstan snying (p. 87.2–5): gnyis pa don dam pa'i sems bskyed len pa ni spang skong phyag rgya'i mdo las gsungs shing 'phags pa klu sgrub kyi phyag len du sgrig pa jo bo'i chos chung brgya rtsa na yang bzhugs pa las | thog mar sdig bshags de nas bsdod nams la rjes su yi rang ba dang lus 'bul sgong du song nas | dngos gzhi skyabs 'gro dang sems bskyed | rjes bsdod nams bsngo ba rnams yang dang pa'i sgo nas bya ba ste | phal cher gys ma rtogs pa'i khya'ad chos so ||

140 Shes bya mdzod (p. 366.26–30): de dag kyang 'gal ba ma yan te snga ma'i rjes mthun tshom co chos kyang bskyed nus pa dang | phyi mas mthun nyal pa bskyed mi nus pa la dgongs pa'o || des na rjes 'brang dag mtha' gcig tu cho gas mi skye bar kha tshon gcod pa ni rigs pa ma yan te | dbang bzhis pa'i ye shes tshig tsham gyis skye ba dang | don dam sems bskyed cho gas skye bar bshad pa gnyis rig (= rigs) pa dang sgrub byed mthun gns pa'i phyir ro ||

141 Bodhisattvabhumi 1.2. (§2.1.0.). This classification is mentioned briefly in DAYAL 1932: 62.
Moreover, this initial generation of the resolve to become a Buddha is, in short, of two types: leading to the goal and not leading to the goal. Of these two, the one leading to the goal is cittotpāda that, once having come about, maintains its course until completion and does not relapse. By contrast, the type not leading to the goal is cittotpāda that, once having come about, does not maintain its course until completion and in the end relapses.

As I have already mentioned, the twofold classifications occurring in the Cittotpāda pātala of the Bodhisattvabhūmi do not correspond to either the pranidhi-prasthāna or conventional-absolute classifications. The basis of classification is explicitly said to be the initial (prathama) cittotpāda. The fact that the expression ‘in short’ (samāsena) is used here may indicate that the Bodhisattvabhūmi also knew of other (perhaps more elaborate) classifications.

6. A Stable One and an Unstable One

When summarising the causes of and conditions for the arising of the resolve to become a buddha, the Cittotpāda pātala of the Bodhisattvabhūmi indirectly mentions an additional twofold subclassification of cittotpāda, namely, a stable (drṛha) and an unstable (adṛṛha) form. It states:142

Amongst them, on the basis of the four conditions [and] the four (pre)requisites relating to a bodhisattva collectively [or] separately, if the resolve [to become a buddha] arises by relying on the two strengths, [namely], personal strength (adhyātma-bala) and the strength of the [pre]requisites (hetu-bala) collectively, then it (i.e. cittotpāda) arises [in a] stable (drṛha), solid (sāra), and unwavering (nīscala) [form].143 However, if the resolve [to become a buddha] has come forth by relying on the strength of others and the strength of exertion [in the present life], it should be known as having arisen with an unstable [nature] (adṛṛha).

This twofold classification is also found in the Mahāyānasūtrālāmākāra, where it is considered to be a subdivision of what can be called conventional cittotpāda.144 The Mahāyānasūtrālāmākārabhāṣya explains:145

Furthermore, it should be known that the arising [of the] unstable [resolve to become a buddha] is on account of [having relied on] the strength of a [spiritual] friend. The arising [of the resolve to become a buddha] with a stable [nature] is on account of [having relied on] the strength of causes and so forth.

142 Bodhisattvabhūmi 1.2 (§3.1.0.).

143 These terms—drṛha, sāra, and nīscala—have been explained in the following manner by Sāgaramegha in his Bodhisattvabhūmi-tivakhyā (P, fol. 31b1–5; D, fol. 27b2–4; S, vol. 75, p. 671.11–19): “... [it will] be stable ... because [it cannot] be shaken by [the influence of] a bad companion, solid because there is no regress on account of the dwindling of compassion, [and] unwavering because there is no fear and wavering on account of suffering. Another way [of explaining this] is: Because there is no regress on account of the suffering of samsāra, [it is] stable, because there is no regress on account of injury inflicted by sentient beings, [it is] solid, [and] because there is no regress on account of undergoing hardships, [it is] unwavering (...bṛtan [bstan PN] par 'gyur te ... mi ñge ba'i groggs pos mi g.yo ba'i phyir ro || snying por gyur pa ni snying te dman par gyur pas ldag pa med pa'i phyir ro || mi g.yo bar gyur pa ni sdu bsngal gyis 'jigs shing g.yo ba med pa'i phyir ro || rnam grangs gzhun yang [om. PN] 'khor ba'i sdu bsngal gyis mi ldag pas na bṛtan pa'o || 'sams can gnod pa byed pas ldag par mi 'gyur bas na snying por gyur pa'o || dka' ba spyod pa'i sdu bsngal gyis mi ldag pas na mi g.yo bar 'gyur ro ||). Cf. the Bodhisattvabhūmi-vritti (P, fol. 185b5ff.; D, fol. 148a2ff.; S, vol. 75, pp. 405.14ff.).

144 See Mahāyānasūtrālāmākāra 4.7cd.

145 Mahāyānasūtrālāmākārabhāṣya (p. 15.5–6): sa punar mitrabalād adṛṛhodayo veditavyah | hetvādibalād drṛhodayaḥ |.
Sāgaramāgha not only equates stable and unstable cittotpāda with the nairānyika and anaïrānyika form, respectively, but also provides two more pairs of synonyms, namely, definite (ātyantika) and temporary (anātyantika) forms and irreversible and reversible ones.  

7. Twofold Classifications of Cittotpāda in the Viṇiścayasaṃgrahāṇī

As I have briefly mentioned earlier, the Bodhisattvabhūmivinīścaya of the Viṇiścayasaṃgrahāṇī lists ten types of cittotpāda:147

It is clear that the ten types of cittotpāda are grouped into five distinct pairs. For this reason, they will be discussed here as twofold categories.

(a) Samādānasāṃketika and Dharmatāpratilambhika

Let us examine how the first pair of cittotpāda, samādānasāṃketika and dharmatāpratilambhika, is explained in the Viṇiścayasaṃgrahāṇī itself:148

The samādānasāṃketika is [the cittotpāda] of all those bodhisattvas who have not yet entered [the path of those] bound for perfection (samyaktvaniyata). The dharmatāpratilambhika is [the cittotpāda] of all those bodhisattvas who have entered [the path of those] bound for perfection and of those śrāvakas who have changed [their course] towards the [supreme] awakening.

Some Buddhist sources mention three categories (raśī) of (human) beings, namely, those bent on falsity (mithyātvaniyata), those bound for perfection (samyaktvaniyata), and the undetermined (aniyata).149 Although it is not quite clear whether and, if so, how exactly the three types of bodhisattvas described as the bearers of the two types of cittotpāda are related to the three groups of sentient beings, it looks as though the following three types of bodhisattvas are presupposed by the Viṇiścayasaṃgrahāṇī, if I may use the terminology of the Tibetan exegetes: (1) a bodhisattva whose spiritual disposition is fixed (rigs nges byang chub sens dpa’), but who is still an ordinary person (prthagjana), (2) a bodhisattva whose spiritual disposition is fixed, and who has already become a saint (ārya), and (3) a bodhisattva who has a lesser path behind him (dman lam snang gi byang chub sens dpa’), that is, a bodhisattva who was formerly a śrāvaka saint. Both the first and second types of bodhisattva can be placed in the samyaktvaniyata category, and the third type in the aniyata category, but

---

146 Bodhisattvabhūmivākyākhyā (P, fol. 24a3; D, fol. 20b2–3; S, vol. 75, p. 654.16–18): gtan du ba dang | gtan du ba ma yin pa dang | brtan pa dang | mi brtan pa dang | phyir mi ldog pa dang | phyir ldog pa zhes bya ba ni de’i rnam grangs so ।

148 Viṇiścayasaṃgrahāṇī (P, vol. zi, fol. 300a8–b1; D, vol. zhi, fol. 285a7–b1; S, vol. 74, p. 690.6–10): de la yang dag par blang ba brda las byung ba ni byang chub sens dpa’i [dpa’ N] yang dag pa nyid du skyon med pa la yang [om. DC] rnamz kyi’o [k yi DC] ।

149 See BHSD, s.v. raśī, where these three groups are explained in detail with several references.
no bodhisattva would be said to belong to the mithyātviṇīyaṁta category. Moreover, samādānaśāmāketikacittotpāda can be coupled with the first kind of bodhisattva, and dharmatāpratītiṣṭhikacittotpāda with the second and third kinds. We cannot know for certain if the position of the twofold category of samādānaśāmāketika and dharmatāpratītiṣṭhika in the list has any historical or doctrinal significance. However, it is relatively clear that this pair has prevailed over the other four in later exegeses. It should be noted that this pair also occurs in the Mahāyānasūtraśālāṁkāra.

(b) The One That Is Uncertain and the One That Is Certain

The Viṇīcayasyamgrahāṇi goes on to explain the second pair of cittotpādas:\(^{150}\)

The one that is uncertain is [the cittotpāda] of those who do not possess the spiritual disposition of [a bodhisattva] and of those who are likely to relapse from [their] cittotpāda. Cittotpāda that is certain should be understood as its opposite (etadviparyayena).\(^{151}\)

Two kinds of persons whose cittotpāda is uncertain are defined here. First, there is the person who lacks the spiritual disposition of a bodhisattva and yet makes the resolution to become a buddha. Such a person will not be able to adhere to the resolve and become a buddha, for the spiritual disposition he or she possesses is not compatible with that of a bodhisattva. Second, there is the person who does possess the spiritual disposition of a bodhisattva and resolves to become a buddha, but for whatever reason gives up the idea. This does not, of course, rule out the possibility that such a person can renew the resolution after numerous lifetimes, oblivious of all previous attempts and the abandonment of bodhicitta. It is also conceivable that the intended persons here are those with an undetermined spiritual disposition (anīyatagotraka), including those who give up bodhicitta and rush to enter nirvāṇa (in a conservative sense of the word). The question from which point on cittotpāda becomes inevitably certain will be discussed briefly in chapter eleven.

(c) The One That Is Impure and the One That Is Pure

The Viṇīcayasyamgrahāṇi explains the third pair of cittotpādas in the following manner:\(^{152}\)

The one that is impure is the generation of the resolve [to become a buddha] on the part of some without having considered [the matter] clearly (nges par ma bṛtags) [and] without having considered [it] completely (yongs su ma bṛtags), but rashly (sāhasa),\(^{153}\) (1) either because they follow others, or (2) for fear of kings, for fear of robbers, for fear of demons (grāha),\(^{154}\) or for

---

\(^{150}\) Viṇīcayasyamgrahāṇi (P, vol. zi, fol. 300b1–2; D, vol. zhi, fol. 285b1–2; S, vol. 74, p. 690.10–12): ma nges pa ni de ’i ‘rigs can [om. DC] ma yin pa nams dang | de ’i rigs can sems bsksyed [skyed PN] pa las phyir ldog pa’i chos can nams kyi gyang yin pa’o || sems bsksyed [skyed PN] pa nges pa ni de las bzlog pa las rig par bya’o ||

\(^{151}\) Skt. etadviparyayena is according to YOKOYAMA & HIROSAWA 1997: 551.

\(^{153}\) The Tibetan translation clearly takes nges par ma bṛtags, yongs su ma bṛtags, and gzu lums su adverbially, that is, as the manner in which such a resolution is made and not as motives for making it. The Chinese translation, however, I have been informed, gives these as the second motive for making an impure resolution.
fear of rivers,155 or [3] for the sake of livelihood, for the sake of profit and veneration (lābhasatkāra), or on account of vain mouthings (lapanā) or hypocrisy (kuhanā).156 Such and similar generation of resolve [to become a buddha] should be understood to be completely impure. The one that is pure, on the other hand, should be understood as the opposite of it. The motives for generating impure resolve may all be divided into three groups (as numbered in the translated passage), namely, the influence of others, fear of various kinds, and worldly concerns or wrong ways of making a living. The context seems to suggest that the category of impure cittotpāda, which is actually mere pseudo-cittotpāda, applies only to the cittotpāda of bodhisattvas who are beginners or people who are no bodhisattvas at all.

(d) The One That Is Weak and the One That Is Strong

The fourth of the cittotpāda pairs is explained thus in the Viniscayasamgrahani:157

The one that is weak is as follows: [It concerns, for example,] bodhisattvas who, after generating resolve [to become a buddha], are overpowered by overt outbursts (paryavasthāna)158 of desire (rāga), aversion (dveṣa), and disorientation (moha), and who, having fallen from correct practices, engage in wrong practices. The one that is strong should be understood as the opposite of this.

Cittotpāda seems to be dichotomised here on the basis of bodhisattvas who are still ordinary beings and those who have become saints, the dividing line usually being the path of seeing (darśanamārga). Weak cittotpāda seems to refer to relative beginners or very inexperienced bodhisattvas who, although endowed with compassion, are still under the strong influence of passion and other intellectual-emotional defilements.

(e) The One That Has Yielded the Ultimate Result and the One That Has Not Yet

The Viniscayasamgrahani explains the fifth pair of cittotpādas as follows:159

---

154 HIRAKAWA 1973, s.v. grāha (chu srin ’dzin khri’); MW, s.v. grāha: “a rapacious animal living in fresh or sea water, any large fish or marine animal.”

155 For the various kinds of fear or danger (bhaya), see TSD, s.v. ’jigs pa, where five kinds of bhaya (as found in the Bodhisattvabhumi) are listed. See also Dharmasamgraha, no. 61.

156 For an explanation of the five wrong ways of making a living (mithyājīva), see Ratnāvali 5.13–15: kuhana lābhasatkārahato indriyasamvarāh | lapanā lābhasatkāratoś cāturprasāriyā || naimittitakavam tatprāptyai paradravyapraśamsanam | naispesvaktavam lābhārtham samakṣam parapamsanam || lābhena lipsā lābhānām pūrvalabhapraśamsanam | śīṅguh prakopitasyānyais tat tad yad anuśīṣṭanam ||

See BHSD, s.v. mithyājīva, where sources are given. See also the eight worldly concerns (lokadharma) given in TSD, s.v. ’jig rten gyi chos, according to the Bodhisattvabhumi and Mahāvyutpatti; and in the same connection, Dharmasamgraha, no. 61; Suhrlekha, verse no. 29.

158 That is, as opposed to latent tendencies (amūsaya) to intellectual-emotional defilements (kleśa).

159 Viniscayasamgrahani (P, vol. zi, fol. 300b6–8; D, vol. zhi, fol. 285b5–7; S, vol. 74, p. 691.3–8): de la ‘bras bu yongs su ma grub pa ni mos pas spyod pa’i sa nas bzang ste | sa bcu pa’i bar gyi o || de la ‘bras bu yongs su grub pa la [ni PN] de bzshin gshags pa’i sa la ste | bcom idan ’das kyis nga ni dka’ ba spyod pa de las thar cing |
The Resolve to Become a Buddha

The one that has not [yet] yielded the [ultimate] result is [the hallmark] of [those bodhisattvas on the stages] beginning from the stage of believing confidence (adhimukticaryābhūmi) [all the way] up to the tenth stage. The one that has yielded the [ultimate] result is [the hallmark] of one at the stage of a tathāgata, for the Bhagavan declares: "I am free from the undergoing of hardships. [I] have also [fulfilled] the proper aspirations [and] attained the excellent awakening." Here we gain a clear sense of how the two different types of cīttopāda range throughout all the stages of a bodhisattva including the final stage of a buddha. Adhimukticaryābhūmi traditionally comprises both the path of accumulation (sambhāramārga) and the path of preparation (pratyogamārga). This fifth category, which is apparently a late one, is relevant to the issue whether there is cīttopāda at the stage of a buddha—an issue that is quite often addressed by Tibetan exegetes.160 The Vinīścyasaṃgrahāṇī in any case seems to take for granted that a buddha possesses cīttopāda. It would, of course, all depend on what one means by a buddha’s cīttopāda or bodhicitta.

8. Undistinguished and Distinguished Cīttopāda

The Abhidharmsaṃucchayabhāṣya explains two further types of cīttopāda, namely, undistinguished (aviśiṣṭa) and distinguished (viśiṣṭa), apparently interpreting them against the background of pranidhiṣṭa and prasrthāṇacītta, without actually employing these terms:161

There are two ways of generating the resolve [to become a buddha]: one undistinguished and one distinguished. The undistinguished one [involves repeating the aspirational wish] "Oh, may I be perfectly awakened in the state of the highest perfect awakening." The distinguished one [involves repeating the aspirational wish that runs] from "May [I] perfect the perfection of giving (dānāpāramitā)" up to [the wish to perfect] the perfection of insight (prajñāpāramitā). It should be known that the distinguished generation of the resolve [to become a buddha] includes the [six or ten] perfections, for [it] is their cause.

This passage, in my view, exemplifies how one form of classification may be interpreted according to another form of classification.

9. The One Characterised by Karuṇā and the One Characterised by Prajñā

In his *(Mahāyāna)sūtrālāmkāravyākhyā, Sthiramati subcategorises bodhicitta into two forms, and explains them as follows:162

Bodhicitta is of two kinds: one characterised by karuṇā and one characterised by prajñā. Of these [two], the one characterised by karuṇā is a state of mind resting in the thought: "May all sentient beings [attain] nirvāṇa!" It has [the tendency to accumulate] beneficial resources (purṣya) as its nature. The one characterised by prajñā is a state of mind resting in the thought:

bdag nyid kyi yang dag pa'i smon lam dang | byang chub dam pa [par N] yang thob pa yin no zhes ji skad gsungs pa lta bu'o | ]

160 See, for example, the Shing rta chen po (pp. 537.4–538.2); Yid byzin mdzod 'grel (vol. 2, p. 822.2–4); Grub mtha' mdzod (pp. 193.6–194.2). Cf. dBu ma rgyan 'grel (pp. 347.5–348.5); mDo sde rgyan 'grel (p. 61.2–5).

161 Abhidharmasamuccayabhāṣya (p. 110.3–7): dvividhā hi cīttopādaḥ | aviśiṣṭa viśiṣṭa ca | tatraviśiṣṭo 'ho vatātham anuttarām samyaksaṃbhodhim abhisambhūdeyaḥ | viśiṣṭa evam dānāpāramitām pariśārayeyam yāvat prajñāpāramitām iti | tad anena viśiṣṭena cīttopādaṇaḥ pāramitānām samgraha veditavyaḥ, tāsāṃ kāraṇabhāvāt | ]

162 *(Mahāyāna)sūtrālāmkāravyākhyā (P, vol. mi, fol. 59a7–b1; D, vol. mi, fol. 53b4–6; S, vol. 71, pp. 1029.21–
1030.5): byang chub kyi sems ni rnam pa gnys ye | snying rje'i mtshan nyid dang | shes rab kyi mtshan nyid do || de la snying rje'i mtshan nyid ni [om, PN] sems can thams cad mya ngan las 'da'o [zla mPN] snyam [snyim P] du sems pa ste | de ni bsod nams kyi rang bzhin no || shes rab kyi mtshan nyid ni chos zla mPN snyam | de ni ye shes kyi rang bzhin no ||.
"Because all phenomena are empty (śūnya), there is no sentient being who [attains] nirvāṇa." It has [the tendency to accumulate] gnosis (jñāna) as its nature.

What is worth noting here is that the bipolar components of bodhicitta, namely, compassion (karuṇā) and discerning insight (prajñā), are employed to classify it into two types and are clearly associated with the two kinds of accumulations (saṃbhrāra). These two kinds of bodhicitta to a certain extent also resemble the subclassification into conventional and absolute bodhicitta.

10. Ongoing and Non-Ongoing Cittotpāda

Another subclassification of cittotpāda is proposed by Sthiramati in the Kāśyapaparivartaṭīkā, namely, ongoing (byung ba) and non-ongoing (mi byung ba).163 It should be noted that the classification is only of the initial form of cittotpāda and not of cittotpāda in general. Although the terms used (at least on the basis of the Tibetan translation) are not identical with those used in the Bodhisattvabhumi in its subclassification of bodhicitta into one leading to the goal (nairṛtyānika) and one not leading to the goal (anairṛtyānika), the explanation suggests that this classification has been inspired by it. Ongoing cittotpāda is explained as continuing without interruption after once arising, which is reminiscent of the explanation given in the Bodhisattvabhumi. No explanation of non-ongoing cittotpāda is provided.164 There may, of course, be several other ways of classifying bodhicitta or cittotpāda according to a twofold scheme of which I am not aware.

11. A Threefold Classification: King-like, Boatman-like, and Herdsman-like

There is also at least one threefold subclassification of bodhisattvas or cittotpāda, namely, king-like (rgyal po lta bu), boatman-like (mnyan pa lta bu), and herdsman-like (rdzi bo lta bu). Although some sources treat these as categories strictly of bodhisattvas, we shall treat them here as ones of cittotpāda as well, since such a classification of bodhisattva is made exclusively according to the difference in magnanimity of a bodhisattva’s resolve. Traditional Tibetan and modern scholars have often alluded to this classification, but most of them provide no Indian sources. Makransky takes up the issue in the context of the postponement of nirvāṇa, where he refers to the fact that in Tibet the bodhisattva Mañjuśrī is given as an example of herdsman-like bodhicitta, and assumes this to be a native Tibetan notion probably drawn from the Mañjuśrībuddhakṣetragunavvāhasūtra.165 His suggestion is based on the fact that this sūtra contains a remnant of an earlier ‘postponement’ model. The three types of cittotpāda, however, cannot be traced in this sūtra. Nor have I been able to identify any Indian or Tibetan scholar prior to Klong-chen-pa who mentions and discusses these three types of cittotpāda. Klong-chen-pa named the Ratnakūtasūtra as his source, but I have not been able to it. Nevertheless, what I have been able to do is to find some precursors of this classification in other Indian sources.

163 Kāśyapaparivartaṭīkā (P, fol. 255b–5; D, fol. 208a; S, vol. 67, p. 556.8–10): dang po byung chub kyi sems bskyed pa de yang mdor [’dar PN] bsdu na | byung ba dang | mi ’byung ba dang | ’byung ba ni gang skyes nas rgyun mi ’chad par rjes su ’jug pa yin pa ’o||.

164 It is not clear whether the author did not comment on it because it is clear from the context, or whether the line containing the explanation of it was lost in the course of textual transmission.

(a) Some Indian Precursors of the Classification

In the *Ganḍavyūhasūtra*, bodhicitta is indeed compared to a pālaka (‘protector’), but there is a certain ambiguity whether the comparison is to a king or herdsman (or rather their attitudes), for pālaka (or pāla) can mean both. The point of the comparison expressed in the sūtra seems to suggest that pālaka is meant as a king, but the Tibetan translators rendered pālaka as rdzi (bo), a herdsman. In any case, such comparisons were obviously meant to show the king’s sense of responsibility towards his subject or the herdsman’s towards his herd; and not necessarily the placing of one’s well-being over others’ or vice versa, which is the crux of the threefold subclassification of cittotpāda (or cittotpādika).

Two out of the three types of cittotpāda (or cittotpādika) seem to be discussed by Ratnākaraśānti in his *Ratnālokaśālākāra* in the context of establishing the ultimate result of a bodhisattva. Nevertheless, the exact meaning of the passage is not clear to me. He states:

The result can be sorted into two kinds. [First,] one who has generated king-like resolve is said to be distinguished on account of conduct (caryā) and aspirational wish (pranidhāna). As to conduct, [it is of] the two [kinds] mentioned before. The aspirational wish is as follows:

- May the objectives of the aspirants
- Become manifest in reliance on me—
- In whatever manner
- [Required] for them to be fulfilled.

[A bodhisattva] acts for the benefit [of sentient beings] by first (?) becoming awakened and so forth as a result of aspirational wish. [In regard to the second,] the herdsman-like [cittotpādika], who forever abides at the Stage of Youth (kumārabhūmi) (i.e. the eighth bhūmi), [the aspirational wish] is as follows:

- So long as there is any sentient being
- Somewhere not [yet] released,
- May [I] abide [in the eighth bhūmi] for its sake,
- Despite [the prospect of] attaining the highest state of awakening.

Although the boatman-like bodhisattva is not mentioned here, the passage does clearly refer to the king-like and herdsman-like bodhisattva, and specifies that the latter is a bodhisattva who decides not to go beyond the eighth bhūmi. Interestingly, a commentary on the *Lankāvatāraśūtra* by a certain Jñānavarja entitled *Tathāgataherdayālākāra* also alludes to three kinds of bodhisattvas, the third type of which, called the icchantika, seems to be

---

166 See the *Ganḍavyūhasūtra* (pp. 494.1–496.11; also cited in TSD, s.v. rdzi lta bu): bodhicittam hi kulaputra ... pālakahūtam sarvalokānupālanatayaḥ.

167 See, for example, MW, s.vv. pāla and pālaka.

168 *Ratnālokaśālākāra* (P, fol. 351a8–b3; D, fols. 301b6–302a1; S, vol. 64, p. 832.4–12): ‘bras bu rnam par dbye ba ni rnam pa gnys te | rgyal po lta bu sems bskyed pa ni spyod pa’i smon lam gyis khyad par du gyur pa zhes smos te | spyod pa ni sngar bstan pa gnys so || smon lam gyis khyad par du gyur pa ni | ‘ci lta ci ltar gdul bya yi [yin DC] || don nams yongs su rdzogs ‘gyur ba || de lta de lta’i snang ba’ang || bsad la brten te [de PN] ‘byung gyur cig ||’ ces dang po smon pa’i stobs kyi ‘tsang rgya ba la sogs pas don byed pa’o || phyugs rdzi lta bu ni rtag tu ghzhan nu’i sa la gnas pa ni | ‘ci srid sems can ’ga’ zhih kyang || gang du ma grol de srid du || de phyir bla na med pa yi [yis DC] || byang chub thob kyang gnas gyur cig || ces sems smon pas na kun tu [du D] bzang po’i spyod pa’i smon lam mo [me D] ||; see also ibid. 169 This and the next citation have not been identified.

170 See the *Daśabhūmikasūtra* (p. 71.11–14; also cited in TSD, s.v. ghzhan nu’i sa): iyam bhū jinaputra bodhisattvasya aṣṭāmī jñānabhūmīṁ acalēṣy ucyate ‘samhārayatvāt ... kumārabhūmīṁ ity ucyate anavadyatvāt.

171 Described in the colophon as a rgya’i mkhan po (‘Chinese preceptor (upādhyāya)’).
Chapter Eight: Traditional Classifications of Bodhicitta

identical with the herdsman-like bodhisattva. The notion of a bodhisattva giving priority to the Buddhahood of others can be found in the Dharmasamgitiśūtra cited by Sāntideva.

(b) Assessments by Some Tibetan Scholars

These categories must have been quite important for Klong-chen-pa, for he included them in both the basic verse text of his Sems nyid ngal gso and the autocommentary in prose. The actual context, however, is a discussion about the three kinds of bodhisattvas, and not about cittotpāda. Let us first look at how Klong-chen-pa explains these three types of bodhisattvas with their respective kinds of cittotpāda:

The [first kind] is called a bodhisattva whose cittotpāda is characterised by great desire, that is, one who [wishes to] liberate sentient beings after first becoming a buddha himself. For example, it is like a king who wishes to place his subjects in [a state of] well-being after obtaining the throne. It is said to be a type of cittotpāda like that of the Noble Maitreya in several sūtras. Desiring liberation for oneself and [other] sentient beings together is called cittotpāda characterised by excellent gnosia. It is like boatmen desiring that [their] boat passengers and they themselves reach the shore of the river together. The desire to become free [only] after first liberating [other] sentient beings is called cittotpāda without comparison. The herdsmen of goats, sheep, and cows—upon seeing a narrow, dreadful area such as a footpath along a precipice or something [similar]—place them (i.e. the cattle) ahead of themselves and proceed [only] after ensuring that not even one is left behind. [The last two] are like the cittotpāda of Mañjuśrī and that of Śākyamuni, respectively. Of these [three types of bodhisattvas with three types of cittotpāda], those of dull faculty (i.e. of the first type) will become awakened in the

---

172 Tathāgatahrdayālāmkāra (P, fol. 325b3–4; D, fol. 279a5–6; S, vol. 70, p. 676.9–12): byang chub sems dpa’ rnam pa gsum || zhes pa ni byang chub dman pa snang don du btag nas dus ring mo zhig nas sangs ’rgyas par || [rgya bar PN] ’gyur ba dang || dbang po rnon po de ’dra ba snang du ma song bar myur du tshogs rdzogs par byas nas || ’tshang [sangs PN] ’rgya ba dang || ’dod chen pa dang gsum du ’gyur ba’o ||.

175 Shing rta chen po (p. 637.1–6): de’ang byang chub sems dpa’ ’dod chen pa’i [p=’i] sems bskyed ces bya ste || rang nyid thog mar sangs rgyas nas phyis ’gro ba sgrol ba ni || dper na rgyal pos rgyal srid thob nas rgyal ’bangs bde ba la ’god par ’dod pa ste || phags pa byams pa lta bu ’i sems bskyed du mdo du ma las bshad do || rang dang ’gro ba mnyam du grol bar ’dod pa ni ye shes dam pa ’i sems bsksed ces bya ste || mnyen [= mnyan] pa dag gru’i ’grub [= ’grul] po dang rang nyid mnyam du chu bo ’i pha rol tu phyin par ’dod pa’o || thog mar sems can bsgral nas ggod rang nyid grol bar ’dod pa dpe med pa ’i sems bsksed ces bya ste || ra lug dang ba lang gi rdzi bo dag gis ’phrang la sogs pa dog cing nyam nga ba ’i gnas mthong ngam || gshen du ’ang rang gi mdun du de dag bcug nas || gcig kyang phyi la ma lus par byas te ’gro ba ni ’jam dpal dang shākya thub pa lta bu ’i sems bsksed yin no || de dag kyang dbang po rtit po rnam s kyis grangs med sum cu rtsa gsum dang || ’bring pos bdun dang || rnon pos gsum gyis bla na med pa’i byang chub tu ’tshang rgya ba ste ||.
highest [state of] awakening in thirty-three countless [aeons], those of mediocre [faculty] (i.e. of the second type) in seven countless [aeons], and those of sharp [faculty] (i.e. of the third type) in three countless [aeons].

In order to authenticate his statement, Klong-chen-pa cites the following passage from the Ratnakīṭasūtra:†

† Ratnakīṭasūtra, as cited in the Shing rta chen po (pp. 637.6–638.3): de la 'dod chen po 'i sems bskyed pas ni grangs med pa sum cu rtsa gsum gyis 'khor ba las thar ba yin no || ye shes dam pa'i sems bskyed pas ni grangs med bdun gyis thsar [= mthar] phyin pa yin no || dpe med pa'i sems bskyed pas ni grangs med pa gsum gyis mngon par rdzogs par byang chub pa yin no || de ci'i phyir zhe na || sems stobs chung ngu dang || 'bring dang | chen po gyur pa'i phyir te | 'di dag dper bya na || 'khor los sgyur ba'i rgyal po dang | gtu'i kha lo pa dang | skyong byed lla bu'o.

Of these, one who has generated the resolve [to become a buddha] characterised by great desire will be freed from samsāra in thirty-three countless [aeons]. One who has generated the resolve [to become a buddha] characterised by excellent gnosis will accomplish [his goal] in seven countless [aeons]. One who has generated the resolve [to become a buddha] without comparison will become perfectly awakened in three countless [aeons]. Why is it so? [It is] on account of [their] small, medium, and great mental capacity, [respectively]. These, if illustrated with analogies, are [respectively] like a universal ruler (cakravartin), a steerer (sārathi) of a boat, and a herdsman (pālaka).

The actual context in which these three kinds of cittotpāda are treated in the sūtra seems to be the duration of time taken by the three different kinds of bodhisattvas to become a buddha. Of greater interest to us here is the three different degrees of what we may call the ‘magnanimity’ of a bodhisattva. However, the context makes it clear that the kind of cittotpāda is what really makes one a particular kind of bodhisattva. Klong-chen-pa provides one case for each of these kinds of bodhisattvās. According to him, Śākyamuni Buddha was a herdsman-like bodhisattva, Mañjuśrī is a boatman-like bodhisattva, and Maitreya is a king-like bodhisattva. Whether this configuration was Klong-chen-pa’s own or whether it was based on an early Indian or Tibetan source is unclear. In any case, such a concept seems to have other doctrinal implications. It would mean that the outcome does not necessarily correspond to the resolution made by a bodhisattva. In order words, Śākyamuni, who according to Klong-chen-pa wished to become a buddha last, was in reality one of the first to become one.

It is obvious that this concept of cittotpāda merely reflects the forcefulness of attitude and has no bearing on the actual course of events relating to a bodhisattva. The trouble arose once it began to be overinterpreted, as Tsong-kha-pa’s discussion of the issue demonstrates:

The desire to become a buddha oneself [only] after placing all sentient beings in the state of Buddha[hood] is the herdsman-like [type of cittotpāda]. The desire that oneself and all others become buddhas together is the boatman-like [type of cittotpāda]. The desire that others be released [only] after one has become a buddha oneself is the king-like [cittotpāda]. Thus it has

† Such an idea begs the question as to whether spiritual practices such as aspirational wishes (pranidhāna) and those involving the exchange of happiness and sufferings actually affect persons other than the practitioner.

†† gSer phreng (pp. 203.6–204.5): sems can thams cad sans rgyas la bkod nas rang nyid sans rgya bar 'dod pa phyuigs rdi lla bu dang | bdag gzhan thams cad dus mnyam du sangs rgya bar 'dod pa mnyan pa lla bu dang | rang nyid sans sngas nas gzhan gro bar 'dod pa rgyal po lla bu'i sems bskyed dang gsum yod ces 'chad do || don 'di la bcom ldan pa ni | snga ma gnyis ltar na de dag gis mi srid pa dam bcas pa dang blo log ces su 'gyur te | sems can thams cad rang gi sangar dang dus mnyam du sangs rgya ba mi srid pa'i phyir ro || sems con thams cad sans rgyas na rang nyid sans rgya ba la dgos pa med de | skra bregs nas tshes grangs rtog pa bzhin no || des na rgyal po lla bu'i sems bskyed 'di nyid gzhung las bshad pas 'di kho na'o zhes gsung yang byang chub sems dpa'i thugs sbyong ba la mi srid pa du ma yod pa dang | smon lam 'debs pa yang mi 'grub pa'i smon lam du ma snang ba'i phyir dgag pa de dag mi rigs so || des na rgyal po lla bu 'di gzhung lugs rnam sams mang bar gsungs kyang byang sems kyi thugs sbyong tshul bsam gis mi khyab pas srıl do ||.
been explained. On this point, bCom-ladan-pa states: 179 “In the first two cases, [it would illogically follow that] they (i.e. the bodhisattvas) had vowed [to do] the impossible and that [theirs] is [thus] an erroneous perception, since it is not possible for all sentient beings to become buddhas before or together with oneself. If all sentient beings become buddhas [ahead of oneself], there is no point [any more] in oneself becoming a buddha, just as [there is no point in] examining the date once one has cut one’s hair. Therefore, since it is the king-like cittotpāda that is taught in the scriptural treatises, it is the only [authentic] cittotpāda.” 181 Nonetheless, these critiques are unwarranted since many [kinds of] resolve (thugs) on the part of bodhisattvas are impossible on the practical level, and also in regard to the making of aspirations, many unachievable aspirations can be seen. Thus, although [it is true that] the king-like [cittotpāda] is what has been mainly taught in the scriptural traditions, [the other two] are also possible since the methods the bodhisattvas 182 use to train their minds are inconceivably [manifold]. Tsong-kha-pa does not indicate any Indian source. Nevertheless, he documents an interesting piece of criticism and his own attempt to resolve the doctrinal problems regarding these three kinds of cittotpāda. 183 There are also some other interesting reflections made by later Tibetan scholars, which cannot be discussed here in detail. 184

12. A Fourfold Classification

The Mahāyānasūtrālāmkāra subclassifies cittotpāda into four types: 185

The cittotpāda on the stages [of a bodhisattva]

---

179 Tsong-kha-pa probably means bCom-ladan Rīg-pa’i-ral-gri (b. thirteenth century), a bKa’-gdam-pa master from sNar-thang Monastery.

180 According to Tibetan (and perhaps also Indian or Chinese) astrology, certain days of the week or of the month of the lunar calendar are unfavourable for cutting one’s hair.

181 A somewhat different critique is presented by Bod-sprul mDo-sngags-bstan-pa’i-nyi-ma (1895/1900–1959) in his I Ta grub shan ‘byed rtsa ‘grel (pp. 104.4–105.10), without any author or text being named. The passage containing the critique is introduced with the expression mkhas dbang la la dag. He then goes on to defend all three types of cittotpāda as genuine.

182 Note that the term byang sems here is an abbreviation of byang chub sens dpa’ (bodhisattva) and not of byang chub kyi sens (bodhicitta). It seems to be a widely accepted abbreviation in prose, particularly in later Tibetan literature, such as Tsong-kha-pa’s writings. In translated literature, too, the word bodhisattva has been occasionally rendered not as byang chub sens dpa’ but as byang chub sens, obviously metri causa. See, for example, Rātanagunasāṃcaya 1.11a and 1.24a; Bodhicaryāvatāra 2.25.

183 The explanation of the three kinds of cittotpāda given here by Tsong-kha-pa need not necessarily be the ‘official’ position of the dGe-lugs school on the issue. It is said that Tsong-kha-pa’s gSer phreng was composed before he reached his intellectual maturity and that some of the positions presented there were modified over the years.

184 mKhan-po Ngag-dbang-dpal-bzang (or Ngag-dga’) (1879–1941) has stated that the three types of cittotpāda differ with regard not to the first aspect of cittotpāda, that is, fixing on sentient beings with compassion (snying rje’i sens can la dmigs pa), but to the second, that is, aiming with discriminating insight at perfect awakening (shes rab khyis rdzogs byang la dmigs pa). He explains that a bodhisattva drawn towards the herdman-like cittotpāda does not really care whether he himself becomes a buddha or not. In other words, the herdman-like cittotpāda is conceived as a total denial of thought for one’s own benefit (rang don yid byed), such thought being described by him as a demon (’gong po) that must be subdued (btul) by bodhicitta. See the Zhal lung zin bris (fol. 108a3–b3).

185 Mahāyānasūtrālāmkāra 4.2:

Cittotpāda ‘dhimokṣo ‘sau śuddhādhīśayiko ‘parah |
Vaipākyo bhūmisu matas tathāvaranavartinah ||.
The Resolve to Become a Buddha

Is commonly taken to be [of four kinds]: one [characterised by] confidence, [and] another [by] pure altruistic inclination; one [characterised by] ripening [and] likewise one [by] abandonment of obstructions.

The Mahāyānasūtraśālamkāraḥṣaṣṭya comments:

The cittotpāda of a bodhisattva is of four kinds: [1] The one characterised by confidence is found at the stage [where the spiritual practice is carried out by exerting] confidence. [2] The one characterised by pure altruistic inclination is found at the first seven stages. [3] The one characterised by ripening is found at the eighth and later (i.e. the eighth to the tenth) stages. [4] The one characterised by lack of obstructions is found at the stage of a buddha.

According to this commentary, the four kinds of bodhicitta explicated in the Mahāyānasūtraśālamkāra are distributed among the different stages of a bodhisattva and the stage of a buddha in the manner shown in the following chart:

Sthiramati cites the Gayāśīrṣasūtra, apparently to authenticate the Mahāyānasūtraśālamkāra’s fourfold classification of bodhicitta. However, the four kinds of cittotpāda cited therein are not specified by name, merely by ordinal number (‘the first cittotpāda’ and so forth). The Mahāyānasūtraśālamkāra’s fourfold classification of cittotpāda seems to be the only one of its kind, and it has often been alluded to by later Indian scholars, such as Abhayākaragupta. The pertinent verse from the Mahāyānasūtraśālamkāra has also been cited in tantric commentaries including Vanaratna’s Rahasyadīpikā, a commentary on Kṣpācārya’s Vasantatilakā. Another fourfold mode of classification of cittotpāda can be found in the

---

189 Rahasyadīpikā (p. 3.15–16).
13. Subclassifying Bodhicitta into Ten Types

The ten bhūmis, as presented in Candrakīrti’s Madhyamakāvatāra and in its commentaries, are also referred to as ten kinds of cittotpāda.\(^{191}\) Another tenfold classification is found in the Kun ' dus rig pa'i mdo, which is one of the primary rNying-ma tantras belonging to the Anuyoga class. The ten types mentioned in it are bodhicitta characterised by: (1) movement (g.yo ba), (2) aspiration (smon pa), (3) soaring (ldang ba), (4) preparation (sbyor ba), (5) setting out (jug pa), (6) efficiency (dge ba), (7) not changing (mi 'gyur ba), (8) cognition (rig pa), (9) abiding (gnas pa), and (10) perfection (rdzogs pa).\(^{192}\) I have not been able to trace this tenfold classification in sources outside the rNying-ma tantric literature. Four of these categories, namely, movement (g.yo ba), aspiration (smon pa), soaring (ldang ba), and setting out (jug pa), are also found in other rNying-ma tantric sources (such as the *Guhyagarbhatantra). Noteworthy, too, is the fact that the more archaic categories of pranidhicitta and prasthānicitta are included in both of these ten- and fourfold classifications. I have not been able to find definitions of these ten categories. The ambiguity of some of the terms seems to be intended, suggesting that they apply to psycho-physiological bodhicitta.

14. Twenty-Two Kinds of Cittotpāda

It is well known that cittotpāda is subdivided in some sources into twenty-two kinds. A comprehensive treatment of this classification is not possible here, simply owing to the mass of material. What will be attempted is to look at the loci classici of the scheme that underlies this classification and at some aspects of its conception and development.

(a) Sources of the Twenty-Two Kinds of Cittotpāda

The loci classici setting forth the twenty-twofold classification of cittotpāda are Mahāyānasūtraīālamkāra 4.15–20 and Abhisamayālaṃkāra 1.19–20. It may, however, be assumed that the key terms of the twenty-two types of cittotpāda were compiled from earlier

\[^{190}\] Bodhisattvabhūmi 2.4 (WOGIHARA, p. 326.3–11; DUTT, p. 223.9–13): punar etat suvinīścitam bodhisattvapraṇidhiḥānam cittotpāda ity ucyate | sa punar eṣa cittotpādo bodhisattvavyaṃ samāsataḥ caturbhir ākārair ṛgitiḥ veditavyah | ādita eva tāvat kīrṣṭānāṃ bodhisattvānām tāc cittam utpadyate | kim c'ālambyotpādyate | kīrtam ca kiṃ laksāṇaṃ ken' ātmanā utpadyate | utpanne ca tasmāḥ citte ko 'muṣaṁso bhavai | ity ebhi ś caturbhir ākārair sacittotpādo veditavyah |.

\[^{191}\] Madhyamakāvatārañjikā (P, fol. 20b5–7; D, fol. 17a7–b1; S, vol. 61, p. 40.17–19): byang chub kyi sens kyi dbye ba rnam pa bcu shes pa ni sa rab tu dga' ba la sogs pa sa bcu'i dbyes bas byang chub kyi sens [add. pa P] rnam pa bcu bstan par 'dod pas so |.

\[^{192}\] Kun ' dus rig pa'i mdo (P, fol. 23a6–7; D, fol. 23b6–7): byang chub sens ni gang zhe na || 'di yi grangs byang rnam pa bcu ||
[1] g.yo ba byang chub sens nyid dang ||
[2] de bzhin smon pa byang chub sens ||
[3] ldang ba byang chub chen po'i sens ||
[4] de bzhin sbyor ba byang chub sens ||
Mahāyāna sources. In fact, the *Abhisamayālaṃkāra* explicitly states that *cittotpāda* is presented in it, both in short and in detail, in accordance with the sūtras. Haribhadra identifies the *Pañcaviṃśatisāhasrikā* as the source of this classification. Likewise, Abhayākaragupta states in his *Munimatālaṃkāra* that the twenty-twelved classification has been taught in the *Śatasāhasrikā* and the *Pañcaviṃśatisāhasrikā*. I have so far, however, been unable to explore these huge works.

(b) A Historical Sketch

It is conceivable that the twenty-two kinds of *cittotpāda* as we know them today were systematised for the first time in texts that belong to Strand A, such as the *Mahāyānasūtrālaṃkāra* and the *Abhisamayālaṃkāra*. If the *Mahāyānasūtrālaṃkāra* is older than the *Abhisamayālaṃkāra*, it is also conceivable that the classification in the latter was based on the former, and perhaps also on its own source if it had one. It is interesting that the *Bodhisattvavabhūmi*, despite its undeniable similarity of structure and content with the *Mahāyānasūtrālaṃkāra*, does not contain the twenty-two kinds of *cittotpāda*. This would suggest that this classification had not yet been conceived or was not yet known during the final redaction of the *Bodhisattvavabhūmi*. Also, the fact that such a scheme cannot be found in very old Prajñāpāramitā texts, such as the *Āśāsāhasrikā* and *Ratnagunasamcaya*, indicates that the same applies to them. Although it is possible that the classification was formalised in texts belonging to Strand A, it is likely that the list of twenty-two similes had originally been a collection of picturesque illustrations of *bodhicitta* found in various texts belonging to Strand B, such as the *Gaṇḍavyūhasūtra*.

Since its conception, the scheme of twenty-two kinds of *cittotpāda* seems to have undergone at least two phases of development at the hand of commentators or interpreters. During the first phase, the twenty-two were commented upon and interpreted in the light of various factors pertaining to the *bodhisattva* paths and results. In other words, attempts were made to relate each of the twenty-two kinds of *cittotpāda* with a certain factor. It is doubtful whether such an interpretation was actually intended by the *Mahāyānasūtrālaṃkāra* and *Abhisamayālaṃkāra* themselves. The similes do not disclose a clear hierarchal sequence, nor have I found any explanation as to why the number of similes, or kinds of *cittotpāda*, was fixed at twenty-two. At any rate, the *Mahāyānasūtrālaṃkārabhāṣya* seems to be one of the first commentaries to undertake the task of establishing a connection between the twenty-two kinds of *cittotpāda* and the various factors pertaining to the practices of a *bodhisattva*. Such

---

193 *Abhisamayālaṃkāra* 1.18cd: *sāmasavyāsaṇāḥ sa ca yathāsūtram sa cocyate* ||.

194 *Abhisamayālaṃkāralokā* (p. 35.5–7).

195 *Munimatālaṃkāra* (P, fols. 223b8–224a1; D, fol. 173b6; S, vol. 63, p. 1310.13–14): *sams byskyed pa de'ang [de yang D] dbye na nyi' shu rtsa gnyis su'i bcom ldan 'das ma stong phrag nyl shu lnga pa dang 'bum par yang gsungs so ||,* gloss in PN: *'dun ldan chos skus dang ldan pa'i bar;* b gloss in PN: *slob dpon chos kyi bshes gnyes kyi ti ka' [= gnyen gyi ti kā] ru || 'dir sems bsyked pa kha cig ni sems bsyked pa dngos gtsor ston pa ste 'dun pa la sogs pa'o || kha cig ni sems bsyked pa 'phel bar byed pa'i grogs la der gdags te sbyin pa la sogs pa'o || kha cig na re || sems bsyked pa'i 'bras bu la der btags te 'gro ba gciig pa'i lam la sogs pa'o || zhes gsungs so ||.

196 Tibetan scholars often allude to the 230 similes employed in the *Gaṇḍavyūhasūtra* (pp. 494.1–496.14) to describe *bodhicitta*. See the *Dwags po ihar rgyan* (p. 180. 13–14); Rīg *'dzin jug ngogs* (p. 137.7–9). See also the *Buddhāvatamsaka* (T, vol. cha, fols. 240b3–244b2; D, vol. a, fols. 309b1–312a3), where *bodhicitta* is described in a series of 120 similes.

197 *Mahāyānasūtrālaṃkārabhāṣya* (pp. 16.17–17.8).
an interpretation was influenced by the concept of the inexhaustibles (aksayā) found in the Aṣṭasāhasrika Prātimokṣa, as stated explicitly by the commentary itself.²⁷⁵
This cittotpāda characterised by twenty-two similes, it should be known, accord with the eighty inexhaustibles that occur in the Āryaṣaṃśayaṃvadāsūtra.²⁷⁶ It is important to note that the commentary does not state that this scheme of twenty-two can be found in the Āryaṣaṃśayaṃvadāsūtra. The Mahāyānaśūraṃkārabhaṣya does not correlate the twenty-two kinds of cittotpāda with the various stages of the bodhisattva path explicitly, although a hierarchical sequence seems to be presupposed. Sthiramati does not propose any similar scheme either, but he does take some clear steps in that direction. For instance, he situates the first type of cittotpāda between the beginner's stage and the end phase of prayogamārga, that is, within sambhārāmārga and prayogamārga (or collectively adhimukticāryābhūti).²⁰⁰

The second phase of development is marked by the actual allocation of the twenty-two kinds of cittotpāda to all stages of a bodhisattva and to the resultant stage, and by a wide variety of positions pertaining to it, as is evident in Haribhadra's Abhisamayālaṃkāra-vivrti.²⁰¹ A comparison of the Mahāyānaśūraṃkārabhaṣya and Abhisamayālaṃkāra-vivrti reveals that they not only differ in the way the factors associated with the twenty-two kinds of cittotpāda are assigned to the stages, but also in the factors themselves. The attempt to combine the so-called eighty inexhaustibles, the subject-matter of the Āryaṣaṃśayaṃvadāsūtra, with the twenty-two kinds of cittotpāda may be seen as the culmination of the classification of bodhicitta—an attempt perhaps first made by Vasubandhu, the author of the Mahāyānaśūraṃkārabhaṣya, and later continued in Tibet.²⁰²

15. Concluding Remarks

Hopefully I have been able to demonstrate in this chapter that the idea of bodhicitta, which probably began as the initial resolve to become a buddha, became ever more comprehensive in scope, until the entire doctrine of Mahāyāna contained in the eighty inexhaustibles was expressed in terms of bodhicitta. It is part and parcel of the theory, the practice and path, and finally the goal, of a bodhisattva, and is hence the sine qua non of Mahāyāna, or the bodhisattva doctrine.

²⁷⁵ Mahāyānaśūraṃkārabhaṣya (p. 17.8–9): eṣā ca dāvāṃsatyupamās cittotpāda āryaśaṃśayamatisūtre 'ksaga[= 'ksaya][āṃsūreṇāmaṅgatavyah]. See also *Asvabhāva's Mahāyānaśūraṃkāraṣṭi (P, fol. 63a3–7; D, fol. 56a1–4; S, vol. 71, p. 140.10–21).

²⁷⁶ Note that according to the Tibetan translation of the Mahāyānaśūraṃkārabhaṣya (P, fol. 150a8; D, fol. 141b6; S, vol. 70, p. 1163.6), the title of the sūtra referred to here should read Āryaśaṃśayamatinirdesāsūtra ("Phags pa blo gros mi zad pas bstan pa'i mdo").

²⁰² See KAWAMURA 1981 where Mi-pham's treatment of the eighty 'inexhaustibles' of the Aṣṭasāhasrika Prātimokṣa is discussed. Kawamura goes into Mi-pham's distribution of the eighty inexhaustibles among the four levels of cittotpāda, but not among the twenty-two types of cittotpāda.
Chapter Nine

Causes and Conditions pertaining to Bodhicitta

If, as also taught in the Śūraṅgama[samādhi]sūtra, even bodhicitta that is generated with recourse to deception is a cause of Buddhahood, then how much more [bodhicitta that is generated] by committing a few wholesome deeds!

– Śāntideva, Śikṣāsamuccaya¹

1. Introductory Remarks

We all know that most Buddhist tenets including those of karma, the four noble truths (āryasatya), and dependent origination (pratītyasamutpāda) are thought of in one way or another as being in accordance with the principle of cause and effect. According to this principle, a given conditioned phenomenon ‘x’ is a result of multiple and complex factors. Mono-causality, or the self-sufficiency of a single cause, is basically not accepted in Buddhism.² Bodhicitta, particularly in its ethico-spiritual sense, is, of course, a conditioned entity, and its arising presupposes a host of necessary causes and conditions. The multiplicity and complexity of these factors imply that bodhicitta is not something that can be generated easily and quickly but rather demands much time, patience, and skill. In this chapter, I shall attempt to determine how the causes and conditions pertaining to bodhicitta are conceived in various Mahāyāna sūtras and śāstras.

2. Causes and Conditions pertaining to Bodhicitta in the Sūtra Sources

Mahāyāna sūtras are, generally speaking, not the right place to look for a systematic presentation of the causes and conditions relating to bodhicitta. Nonetheless, I should like to

² For example, see Bodhicaryāvatāra 9.13: naikasya sarvasāmarthyaṃ pratāyasya āsti kṣatricīt. For an English translation, see CROSBY & SKILTON 1995: 116.
present a few passages from some Mahāyāna sūtras in which the matter is dealt with. The *Daśadharmasakāsūtra* mentions four possible causes (kāraṇa) of bodhicitta, as follows: 3
O son of a noble family, the bodhisatvav who abides in [his] spiritual disposition [and] who has not [yet] generated bodhicitta, having been encouraged, moved, and caused to take [it] upon [himself] by either a tathāgata or a śrāvaka of a tathāgata, generates bodhicitta, [that is, the, resolve to strive] for the highest, perfect awakening. This is the first cause of the generation of bodhicitta. 4 Having heard praise of either perfect awakening or bodhicitta being sung, [he] generates the resolve [to strive] for the highest, perfect awakening. This is the second cause. Having seen sentient beings with no guide, [no protection], and no place of refuge, [and] having placed [himself] in a compassion[ate frame of mind] ... (vāvat) he generates the resolve [to strive] for the highest, perfect awakening. This is the third cause of the generation of bodhicitta. Having seen the fulfillment of all types of excellence of a tathāgata, [and] having generated delight, he generates the resolve [to strive] for the highest, perfect awakening. This is the fourth cause. 5

The four possible causes of bodhicitta mentioned in the *Daśadharmasakāsūtra* may be thus summarised as follows: (1) an initiative on the part of a tathāgata or a śrāvaka, (2) hearing the advantages of bodhi and bodhicitta, (3) compassion towards needy and defenceless sentient beings, and (4) delight upon seeing the perfection of a tathāgata. The Tathāgatajñānamudrāsāmādhisūtra states that a bodhisattva generates resolve to become a buddha in seven ways. These seven ways are actually seven different causes or occasions, which may be summarised as: 6 (1) an initiative on the part of a buddha, (2) the thought of protecting the doctrine from disappearing, (3) great compassion (mahākāruna), (4) an initiative on the part of a bodhisattva, (5) an occasion of paying respect and making offering, (6) witnessing bodhicitta being generated, and (7) hearing about the qualities of a buddha.

---

3 Daśadharmasakāsūtra, as cited in the Śīkṣāsāmuccaya (BENDALL, p. 8.8–15; VAIYDA, p. 8.13–18): iha kulaputra bodhisatvav gotrasthaḥ [*tvagota* VAIYDA] sann anupāditabodhicittato tathāgatena vā tathāgataśrāvakena vā saṃcayo yamaḥ saṃvedyamānaḥ saṃvedyamānaṃ ‘nuttarāyāṃ saṃyaksambodhau bodhicittam ‘utpādayati | idam’ [*yatidam BENDALL] prathamaṃ kāraṇam bodhicittotpādaya | saṃbodhī vā bodhicittasya vā varṇam [avao VAIYDA] bhāṣyānamānaṃ śrūtvā anuttarāyāṃ saṃyaksambodhau cītām ‘utpādayati | idam’ [*yatidam BENDALL] avītyāṃ kāraṇam | sa’sattvaṃ anāthāḥn arānāṃ āsaraṇāḥ’ [sattva’...nasa] BENDALL advīpān drṣṭvā kārṇyavacittam upasthāpya śrūtvā anuttarāyāṃ saṃyaksambodhau cītām ‘utpādayati | idam’ [*yatidam BENDALL] triyāṃ kāraṇam bodhicittotpādaya | sa tathāgatasvarākārapūrṇānāṃ drṣṭvā pritīm upaṣṭyā anuttarāyāṃ saṃyaksambodhau cītām ‘utpādayati | idam’ [*yatidam BENDALL] catūrtham kāraṇam.... See the Tibetan translation of the Śīkṣāsāmuccaya (P, fol. 8a3–8; D, fol. 7a1–5; S, vol. 64, pp. 1018.15–1019.7). The passage is also cited by Prajñākaramati in his commentary on Bodhicaryāvatāra 3.22–23, but the original Sanskrit text of the commentary containing the passage is lost (Bodhicaryāvatāraptijkā, p. 42.29, n. 2). See also Śrīkumāra’s Bodhisattvacaryāvatārasaṃskāra (P, fol. 6a1–6; D, fols. 4b4–5a1; S, vol. 62, pp. 10.14–11.5).

4 Cf. the Tibetan translation (P, fol. 8a5; D, fol. 7a2; S, vol. 64. p. 1018.19–20), which reads ‘di ni byang chub kyi sams la mos pa’i rgyu dang po o, as if the Sanskrit read *idam prathamaṃ kāraṇam bodhicittādīhmokṣāya or something similar.

5 Cf. the translation in BENDALL & ROUSE 1922: 8–9.

Chapter Nine: Causes and Conditions pertaining to Bodhicitta

The Bodhāvatamsakāsūtra for its part mentions ten kinds of conditions or factors pertaining to the generation of bodhicitta:7

O son of the Victorious One, these ten are conditions under which bodhisattvas generate bodhicitta. What are the ten? They are: [1] the condition leading to the ripening and taming of the realm of sentient beings is a condition conducive to bodhicitta, [2] the condition leading to the removal of the mass of sufferings (duḥkhasaṅkha) of all sentient beings is a condition conducive to bodhicitta, [3] the condition leading to all sentient beings’ acquiring a provision of happiness is a condition conducive to bodhicitta, [4] the condition leading to the elimination of the ignorance of all sentient beings is a condition conducive to bodhicitta, [5] the condition leading to all sentient beings’ attaining a buddha’s gnosis is a condition conducive to bodhicitta, [6] the condition leading to paying respect and rendering service to all buddhas is a condition conducive to bodhicitta, [7] the condition leading to pleasing all tathāgatas is a condition conducive to bodhicitta, [8] the condition leading to the complete revelation of all buddhas’ physical bodies with their thirty-two major marks and eighty minor marks is a condition conducive to bodhicitta, [9] the condition leading to access to the gnosiss of all buddhas is a condition conducive to bodhicitta, and [10] the condition leading to the complete revelation of all forms of strength (bala) and fearlessness of a buddha is a condition conducive to bodhicitta.

Lastly, I refer to a verse from the Ratnolkaṭāhāraṇī which is often cited by Tibetan scholars as scriptural authority in the context of the cause of absolute bodhicitta:8

Putting clear faith in the Victorious Ones and the doctrines of the Victorious Ones, [He] puts clear faith in the conduct of a buddha’s sons.

Given [his] clear faith in the unsurpassable awakening (bodhi),

The resolve (citta) of the Great Persons arises [in him].

3. Causes and Conditions pertaining to Bodhicitta in the Bodhisattvabhūmi

The Bodhisattvabhūmi associates cittotpāda with four conditions (pratyaya), four (pre)requisites (hetu), and four strengths (bala).9 It may be recalled here that cittotpāda in the Bodhisattvabhūmi primarily means the generation of the initial resolve (prathamacicittpāda), and hence that the causes and conditions discussed there are to be understood purely as causes and conditions governing the initial stage, which can be subsumed under what is later called

---

8. Ratnolkaṭāhāraṇī, as cited in the Śikṣāsamuccaya (BENDALL, p. 2.16–17; VAIDYA, p. 4.22–23): śraddhayāmāna jinān jinadharman śraddhayate cari buddhasātānam | bodhi anuttara śraddhayāmāna jayati citta mahāpuruṣanām ||

9. A critical edition of the Sanskrit and Tibetan texts of Bodhisattvabhūmi 1.2 is found in the Appendix. All references to passages from the Sanskrit and Tibetan texts of Bodhisattvabhūmi 1.2 are found in the following discussion refer to the edition found there.
What are the four motives? [1] There is a son of a noble family, or a daughter of a noble family, who sees or hears from a trustworthy person about the inconceivable and amazing, extraordinary manifestation and power of a tathāgata or of a bodhisattva. Having seen or heard about these things, he falls to thinking thus: "Oh, of great power is this [state of] awakening, since such an extraordinary manifestation or such an ability on the part of those abiding and engaging in it is seen and heard!" He, on account of just such seeing or hearing about the power, is strongly inclined towards the great awakening and generates the resolve [to strive] for the great awakening. This is the first motive occasioning the arising of the resolve [to become a buddha]. [2] He neither sees nor hears about the power at all. Rather, he listens to the Sublime Doctrine, which tells of the highest, perfect awakening being preached, namely, in the Bodhisattvapitaka. And then, after listening to it, he conceives faith. After conceiving faith and becoming strongly inclined towards the gnosia of the tathāgata from having listened to the Sublime Doctrine, he generates the resolve [to become a buddha] in order to attain the gnosia of a tathāgata. This is the second motive occasioning the arising of the resolve [to become a buddha]. [3] He does not hear the Sublime Doctrine at all. Rather, he sees that the disappearance of the Sublime Doctrine of the bodhisattva is at hand and is imminent. And again, after seeing the precarious state of the bodhisattvasaddharma, he falls to thinking thus: "Alas, the endurance of the Sublime Doctrine of the bodhisattva serves to dispel the suffering of an infinite number of sentient beings. Suppose I generate the resolve [to become a buddha] so that the Sublime Doctrine of the bodhisattva [can] endure for a long time, in order to eradicate the suffering of these same sentient beings." He, on account of the sheer wish to uphold the Sublime Doctrine, is strongly inclined towards the gnosia of the tathāgata and generates the resolve [to become a buddha that is needed] for attaining the gnosia of a tathāgata. This is the third motive occasioning the arising of the resolve [to become a buddha]. [4] He does not see the impending disappearance of the Sublime Doctrine at all. Rather, in the final age, during the final time, he sees the basis of sentient beings' personal existence—those who are inferior and of the last age—as being defiled by the following ten defilements: [they are] [i] full of confusion, [ii] full of shamelessness and lack of embarrassment, [iii] full of jealousy and envy, [iv] full of suffering, [v] full of baseness, [vi] full of defilements, [vii] full of bad conduct, [viii] full of carelessness, [ix] full of laziness, and [x] full of faithlessness. And again, having seen that, he falls to thinking thus: "Alas, this long, grave time of degeneration has dawned. During this time, which is defiled in this way, the generation of the resolve [to strive] even for the lesser awakening of the śrīvakas and the pratyekabuddhas is in itself not at all easy to come across, and how much less so the highest, perfect awakening! Suppose I myself generate the resolve [to become a buddha]; [then] hopefully others too, following my lead, may generate [bodhicitta]." He, being bent on [attaining] the great awakening in spite of the difficulty in generating the resolve [to become a buddha] in the final time, generates the resolve [to strive] for the great awakening. This is the fourth motive occasioning the arising of the resolve [to become a buddha].

The four pratayayas may be summarised as follows: (1) being awestruck by the power of buddhas or bodhisattvas, (2) being inspired by the sublime teachings (of the Mahāyāna), and thus inclined towards the gnosia of the tathāgata, (3) having a sense of responsibility for preserving the Sublime Doctrine, and (4) reflecting upon the rarity of the generation of bodhicitta in the time of degeneration. Hence one may say that while the first two conditions pertain to the power and knowledge of a buddha, the last two mediate concern for the fast disappearance of the Buddhist doctrine (which was meant to make up for the loss of the historical Buddha). The latter are particularly noteworthy because, as I have already tried to show, from a historical point of view it may have been just such a concern that motivated people to introduce the theory of bodhicitta as a measure to guarantee the continued existence...
of the Three Jewels. The *Bodhisattvabhūmi* then goes on to explain the four (pre)requisites (hetu).

What are the four (pre)requisites? [1] Excellence of the spiritual basis is the first (pre)requisite for the arising of the resolve [to become a buddha] within a bodhisattva. [2] Being under the care of buddhas, bodhisattvas, and spiritual friends is the second (pre)requisite for the arising of the resolve [to become a buddha] within a bodhisattva. [3] Compassion towards living beings is the third (pre)requisite for the arising of the resolve [to become a buddha] within a bodhisattva. [4] Being unafraid of even the long-lasting, manifold, intense, [and] unceasing suffering [characteristic] of saṃsāra, and of the suffering of the practice of hardships, is the fourth (pre)requisite for the arising of the resolve [to become a buddha] within a bodhisattva.

The first (pre)requisite, the excellency of spiritual disposition (gotrasampat), is not earned by hard work but rather said to be inherent. The text does not comment much on this point, since it has been dealt with in a separate chapter (paṭala) of the *Bodhisattvabhūmi*. The second (pre)requisite, the excellency of the spiritual friend (mitrasampat), is explained by subclassifying it into four types:

The excellence of the spiritual friend of a bodhisattva should be known to be of four types: [i] The spiritual friend of a bodhisattva proves right from the beginning not to be stupid [or] dull by nature, [but] learned and wise, and [one who has] not fallen into bad views. This is the first excellence of a spiritual friend. [ii] Moreover, [the spiritual friend] neither causes him [to display] carelessness nor provides him an occasion for doing so. This is the second excellence of a spiritual friend. [iii] Further, [the spiritual friend] neither causes him [to engage] in bad conduct nor provides him an occasion for doing so. This is the third excellence of a spiritual friend. [iv] And [lastly, the spiritual friend] does not persuade him to display inferior qualities of faith, devotion, right undertaking, perseverance, [and] efficient strategy by dissuading [him] from [displaying] superior qualities of faith, devotion, right undertaking, perseverance, [and] efficient strategy—for instance, [persuading him to follow] the Śrāvakayāna or the Pratyekabuddhayāna by dissuading [him] from [following] the Mahāyāna; or [to strive after] contemplation-born [insight] by dissuading [him] from [striving after] meditation-born [insight]; [to strive after] learning-born [insight] by dissuading [him] from [striving after] contemplation-born [insight]; [to engage] in doing [physical] service [in the monastery or temple] by dissuading [him] from [striving after] learning-born [insight]; [to engage] in the [meritorious activity] of generosity by dissuading [him] from [engaging in the merit] accruing from ethical-moral discipline. Thus [he] does not persuade [sentient beings to engage] in one or the other inferior virtuous [activities] by dissuading [them] from [engaging in] one or the other superior virtuous [activities]. This is the fourth excellence of a spiritual friend.

As to the third (pre)requisite, that is, compassion, the text mentions four reasons why a bodhisattva is full of compassion:

A bodhisattva proves to be full of compassion towards sentient beings for four reasons: [i] There do [indeed] exist world spheres, among the endless unbounded [systems of] world spheres in the ten directions, in which no suffering is perceived. However, this bodhisattva has taken birth in a [world] sphere containing suffering, [that is,] where suffering is perceived, [and] not in [a place where there is] no suffering. [ii] [The bodhisattva] sees that another [sentient being] is affected,
tormented, [and] overwhelmed by a certain [kind of] suffering. [iii] And [that] he himself becomes affected, tormented, and overwhelmed by a certain [kind of] suffering. [iv] Moreover, [the bodhisattva] sees another or himself or both being affected, tormented, [and] overwhelmed by long-lasting, manifold, intense, and unceasing suffering. Owing to these four [objective] supports [or] bases, compassion—[first] mild, [then] moderate, [and later] intense—originates-and-continues in this bodhisattva on account of his spiritual disposition, [that is,] because he is benevolent by nature, [and this even] without repeated practice [in his lifetime].

Regarding the fourth (pre)requisite, the Bodhisattvabhumi explains why a bodhisattva is not deterred by the long, intense, and varying difficulties faced by him in samsāra:16

Having set compassion towards the sentient beings as [his] priority, a bodhisattva, on account of the [following] four reasons, neither dreads nor is afraid of even the long-lasting, manifold, intense, and unceasing sufferings [characteristic] of samsāra, much less of lesser ones: [i] He is by nature daring, steadfast, and vigorous. This is the first reason. [ii] He is learned, having a disposition towards proper reflection and possessing a capacity for critical analysis. This is the second reason. [iii] He is endowed with an intense inclination towards the highest, perfect awakening. This is the third reason. [iv] He is endowed with intense compassion towards sentient beings. This is the fourth reason.

The four hetus are thus: (1) having an ideal spiritual disposition, (2) having virtuous spiritual friends, (3) being compassionate, and (4) not being deterred by the suffering endemic to samsāra. Furthermore, the Bodhisattvabhumi speaks of four strengths (bala) that give rise to cittotpāda:17

What are the four strengths? [i] Personal strength (adhyātmabala), [ii] the strength of others (parabala), [iii] the strength of the (pre)requisites (hetubala) [attained during past lives], and [iv] the strength of exertion (prayogabala) [in the present life].

The four are explained thus:18

[i] Among these, the passion for the highest, perfect awakening that has arisen in virtue of one’s power is called the personal strength of a bodhisattva [conducive] to the arising of the resolve [to become a buddha]. [ii] On the other hand, the passion for the highest, perfect awakening [that] has been aroused by the power of someone else is, consequentially, called a bodhisattva’s strength of others [conducive] to the arising of the resolve [to become a buddha]. [iii] The previous habitual pursuit of the Mahāyāna-related wholesome factors of a bodhisattva, [having the effect] that the resolve [to become a buddha] arises swiftly in this [present life] as a result of merely seeing buddhas and bodhisattvas or of merely hearing praise [of them]—and how much more so of seeing [their] power or hearing the sublime teachings [taught by them]! [This] is called the strength of (pre)requisites of a bodhisattva [conducive] to the arising of the resolve [to become a buddha]. [iv] The long-term habitual pursuit of wholesome factors in the present life, such as relying on noble persons and listening to [and] reflecting upon sublime teachings, is called the strength of the exertion of a bodhisattva [conducive] to the arising of the resolve [to become a buddha].

The four balas may be summarised as follows: (1) personal strength, (2) the strength of others, (3) the strength of the (pre)requisites, and (4) the strength of exertion. Although Sthiramati does not name the Bodhisattvabhumi as his source, his summary of the four conditions (pratyaya), four prerequisites (hetu), and four strengths (bala) of cittotpāda in the Kāśyapaparivartatiṣṭkā is evidently based on the pertinent passage of the Bodhisattvabhumi.19

16 Bodhisattvabhumi 1.2. (§3.1.2).
17 Bodhisattvabhumi 1.2. (§3.1.3).
18 Bodhisattvabhumi 1.2. (§3.1.3).
19 Kāśyapaparivartatiṣṭkā (P, fols. 255b6–256b1; D, fols. 208b1–209a1; S, vol. 67, pp. 556.13–557.17).
4. Causes and Conditions pertaining to Bodhicitta in the Mahāyānasūtra-laṃkāra

The Mahāyānasūtra-laṃkāra not only reformulated the four conditions (pratayah), four prerequisites (hetu), and four strengths (bala) found in the Bodhisattvabhūmi—turning, for example, the four into five strengths (the fifth, however, is not designated specifically as a ‘strength’)—but also introduced the concept of ‘absolute’ cittotpāda and explored its causes, neither of which topics is found in the Bodhisattvabhūmi. Sāgaramegha’s attempt to relate the four pratayah and the four hetus with the four balas of the Bodhisattvabhūmi may have been influenced by this new scheme in the Mahāyānasūtra-laṃkāra.²⁰ It must be made clear, however, that the actual context in which these five strengths occur in the Mahāyānasūtra-laṃkāra is the five kinds of conventional cittotpāda given rise to by various extrinsic causes and not the causes and conditions pertaining to cittotpāda as such. The five strengths that conduce to conventional cittotpāda, as specified there, are:²¹ (a) the strength of friends (mitrabala), (b) the strength of causes (hetubala), (c) the strength of basic [wholesome virtues] (mālabala), (d) the strength of learning or study (srutabala), and (e) the strength of repeated practice of wholesome virtues (subhābhyāsa) or repeated learning (srutābhyāsa).²²

There are some textual problems with the basic text. Nonetheless, the five strengths (bala) listed in it are clarified by the Mahāyānasūtra-laṃkārayaḥ as attributed to one Vasubandhu and by Sthiramati’s *(Mahāyāna)sūtra-laṃkārayākyāḥ. Sthiramati’s subcommentary naturally provides more details, for it not only comments on the verses but occasionally also on prose portions of the Mahāyānasūtra-laṃkārayākyāḥ. *Asvabhāva’s Mahāyānasūtra-laṃkāūraṭikā, on the other hand, does not contribute anything helpful in the present case. The explanation of the five strengths can be summarised thus: (a) Bodhicitta may be generated on the initiative of one’s spiritual friends (kalayānmitra), preceptors (upādhyāya), or masters (ācārya).²³ (b) It may be generated by a cause (hetu) that lies within oneself, that is, one’s inherent spiritual disposition (gotra).²⁴ (c) Bodhicitta may arise as a result of the waxing of the spiritual disposition (rigs rgyas pa) following the accumulation of basic wholesome virtues (kuśalamūla) in the past.²⁵ (d) Bodhicitta may arise in this life as a

²⁰ Bodhisattvabhūmiṃvyākyāḥ (P, fol. 24b1–2; D, fol. 20b7–21a1; S, vol. 75, p. 655.15–16): “The first two hetus are two balas, and also the first two pratayah are two balas” (dang po'i rgyu gnyis nyid stobs gnyis yin zhing | dang po'i [po PN] rkyen gnyis kyang stobs gnyis yin no ||).

²¹ Mahāyānasūtra-laṃkāra 4.7ab.

²² The alternative reading *srutābhāya is according to Sthiramati’s *(Mahāyāna)sūtra-laṃkārayākyāḥ (P, vol. mi, fol. 60b4–7; D, vol. mi, fol. 54b6–55a1; S, vol. 71, pp. 1032.15–1033.1), where the expression thos pa goms pa'i stobs occurs twice.

²⁵ Mahāyānasūtra-laṃkārayaḥ (p. 15.3): kuśalamūlaḥ vātātāpurūṣitaḥ | according to the Tibetan translation (P, fol. 148a6; D, fol. 140a1; S, vol. 70, p. 1158.16), which reads: dge ba'i rtsa ba'i stobs las te | de'i rigs rgyas pa'i sgo nas:... kuśalamūlabalād vā tadgotrapūṣitaḥ. See also the *(Mahāyāna)sūtra-laṃkārayākyāḥ (P, vol. mi,
result of having studied, contemplated, and meditated on the bodhisattva theories and practices during previous lives.\(^\text{26}\) (e) It may also arise as a result of habitual study and contemplation during this lifetime.\(^\text{27}\) Bodhicitta generated on the initiative of one’s friends or teachers is said to be unstable and prone to relapse. (The relapse of bodhicitta, however, will be discussed elsewhere.)

We shall now move on to the causes of absolute cittotpäda presented in the Mahâyânasûrâlammâkâra and its commentaries. In this case, too, it must be noted that these causes are brought up only parenthetically within the context of absolute cittotpäda. We have already seen that, according to the Mahâyânasûrâlammâkâra and its commentaries, bodhicitta is considered absolute or supreme if it fulfills three criteria. One of the criteria is its gnoseological quality, namely, its being a non-conceptual form of gnosis (nirvikalpañâna). The other two criteria are connected with the causes that give rise to such a gnosis: absolute bodhicitta arises as a result of one’s having duly approached (sûpâsâta) the Fully Awakened Ones (saññubuddha) and of having duly gathered (susambhûta) the accumulations of gnosis and beneficial resources (jñânapunyasambhûra). The causes of absolute bodhicitta mentioned in Mahâyânasûrâlammâkâra 4.8 must be compared with the verse cited and discussed above. The two causes mentioned there are explained in the Mahâyânasûrâlammâkârabhâsÿya as pertaining to instructions (upadeśa) and practice (pratipatti).\(^\text{28}\) Sthiramati designates the two as ‘supreme instruction’ (lung dam pa) and ‘supreme cause’ (rgyu dam pa), respectively. Non-conceptual gnosis itself is called the ‘supreme nature’ (rang bzhin dam pa). Sthiramati also makes it clear that the causes of absolute bodhicitta discussed here are attended to by a bodhisattva while still on the adhimukticaryâbhumî for one countless aeon. The attainment of the darśanamârga or first bhûmi is thus identical with the attainment of absolute bodhicitta.\(^\text{29}\)

5. Causes and Conditions pertaining to Bodhicitta as Discussed Elsewhere

The Gunâparyantastotratikâ attributed to Dignâga cites a verse which alludes to four causes of bodhicitta. It states:\(^\text{30}\)

---
\(^{26}\) Mahâyânasûrâlammâkârabhâsÿya (p. 15.3–4): śrutabāñâd vâ tatra tatra dharmaparyâye bhâsyamâne bhâhûmam bodhicittotpâdât; *(Mahâyâna)sûrâlammâkârayâkhyâ (P, vol. mi, fol. 60b2–4; D, vol. mi, fol. 54b4–6; S, vol. 71, p. 1032.6–9): tshe rabs snga ma la theg pa chen po ’i chos [om. PN] don zab cing rgya che ba rtogs par ’gyur ba dang | byang chub tu sems bsksyed par ’gyur ba ’i âge ba ’i rtsa ba dang | bsod nams kyi tsogs bsags pas rigs brtas [rits PN] par ’gyur nas byang chub tu sems bsksyed [om. PN] na ri tsa ba’i stobs sems [om. PN] bsksyed pa zhes bya’o’ [om.]

\(^{27}\) Mahâyânasûrâlammâkârabhâsÿya (p. 15.4–5): subhâbhyaśad vâ drṣṭa īva dharme satatārāvandgrahāndhārāndibhiḥ; *(Mahâyâna)sûrâlammâkârayâkhyâ (P, vol. mi, fol. 60b4–5; D, vol. mi, fol. 54b6; S, vol. 71, fol. 54b15–18): tshe ’di la âge ba ’i bshes gnyen mang po las chos thos pa yang lan grangs mang du mnyan [mnyen PN] te chos dang don shes [shas PN] kyis mthong nas sens bsksyed pa ni thos pa [pas PN] goms pa’i stobs kyis sens bsksyed pa zhes bya’o’ [om.]

\(^{28}\) Mahâyânasûrâlammâkârabhâsÿya (p. 15.21): prathamena slokenopadeśapratiṣṭhānadhigamavīśeṣaiḥ pāramārthikavaram cītottapādasya darśāyati [om.]

Chapter Nine: Causes and Conditions pertaining to Bodhicitta

Bodhicitta arises-and-continues
On account of these four causes and conditions:
Spiritual disposition (gotra), a spiritual friend (kalyāṇamitra),
Compassion (karunā), and not being deterred by suffering.

Ratnākarasāntī, too, discusses the causes of bodhicitta and presents for his part five causes and one condition.31

What are the causes of cīttotpāda? What are the conditions? ... The causes are of five kinds: [1] Seeing the suffering of sentient beings [by] repeated practice of the four immeasurables (apramāṇam), [2] knowing the nature [of one's objective, i.e. the Three Jewels] from having taken refuge (saranagamama) [in them],32 [3] purifying the mental continuum by gathering the [two] accumulations (sambhāra), [4] the mind becoming serene upon encountering the supports [of the Buddha’s body, speech, and mind, such as statues, scriptures, and stūpas?], and [5] repeatedly practising compassion (karunā). As for the conditions, they are [one]: being under the influence of a good spiritual friend (kalyāṇamitra).

Furthermore, the Akṣayamatirīdeśaśāstra lists forty-five ways in which bodhicitta is said to arise. These, however, cannot be discussed here.33

6. Compassion as the Root Cause of Bodhicitta

The relation between karunā and bodhicitta is somewhat complex. Sometimes one gets the impression that karunā, alongside prajñā, is seen as the basic constituent of bodhicitta. At other times, karunā, prajñā, and bodhicitta are spoken of as co-factors in the emergence of a bodhisattva.34 Some sources also speak of karunā as an outcome of insight into true reality or of awakening itself. Nevertheless, karunā is often seen not only as a cause of bodhicitta but as its root cause, and it is this relation between karunā and bodhicitta that I shall look at here. Although we have seen in the preceding paragraphs that compassion does not always occur as a cause or condition pertaining to bodhicitta, both the Bodhisattvabhūmi and the Mahāyānasūtrasūtra, which present the most detailed discussions of such causes and conditions, do restate the role of karunā in this regard and explicitly name it as a cause of bodhicitta.

According to the Bodhisattvabhūmi, the generation of the resolve to become a buddha is the natural outcome (niṣyanda) of compassion:35

Furthermore, a bodhisattva who is compassionate (kāruṇika) towards afflicted sentient beings [and who harbours] the intention of completely rescuing [them], generates the resolve [to become a buddha]. Therefore, the generation of the resolve [to become a buddha] is the natural outcome of compassion (karunāniṣyanda).

30 Gunāparyantastotratikā (P, fols. 234b8–235a1; D, fol. 201a2–3; S, vol. 1, p. 590.15–17): byang chub kyi smon lam de’i rgyu [add. yang PN] bzhis ste | origs dang dge bshes snying rje dang | sdbus bsngal rnams khyis mi ldog pa || rgyu bzhis rkyen ni ’di dag gis || byang chub sems ni rab tu ’jug || ces gsungs pa dag ste |.

32 Cf. the Ramālokaḷaṁkāra (P, fol. 282b1; D, fol. 240b6; S, vol. 64, p. 678.7–8): “Taking refuge in the Buddha, Dharma, and Samgha with the desire to obtain them...” (sangs rgyas dang chos dang dge ‘dun la de nnyid thob par ’dod pas skyabs su ’gro...).

33 For details, see the Akṣayamatirīdeśaśāstra (T, fols. 19a3–20b6; D, fols. 90a2–91b5).

34 Madhyamakāvatāra 1.1. See also SEYFORT RUEGG 2004: 7.

35 Bodhisattvabhūmi 1.2 (§1.2.3).
Guanaprabha, too, makes it clear that citotpāda is the result of compassion. And again, Sāgaramaṇgha, while accepting both insight (praṇāṇa) and compassion (karunā) as the principal causes of awakening (bodhi), states that it is compassion which causes bodhicitta:

The two, [namely,] insight and compassion, are the principal causes of awakening. Of these [two], does the resolve [to strive] for awakening arise from insight or does it arise from compassion? [It is] for this reason [that the Bodhisattvāvibhūmi] says: “[being compassionate] towards tormented sentient beings” (dukkhīṭeṣu ca sattviṣu) and so on. If bodhicitta were to arise from insight, [this] would be the principal [cause of] attaining awakening. However, bodhicitta does not arise on account of it (i.e. insight). Whence bodhicitta arises from compassion, and hence it should be known that citotpāda is the natural outcome of compassion.

A bodhisattva, having first generated the resolve to protect sentient beings resolutely and unwaveringly, afterwards seeks ways of efficiently protecting sentient beings, and seeing no [means] other than Buddhahood, generates the resolve [to strive] for the highest, perfect awakening. Hence, it is compassion that protects tormented sentient beings. Thus should the meaning of this [passage] be understood. The mother whose son has fallen into a well should be taken here as an example [of being compassionate].

The Mahāyānasūtraālāmkāra states that the root of all four kinds of citotpāda outlined in it is compassion. The Mahāyānasūtraālāmkārabhāṣya makes this point even more explicitly:

[Question:] What is the root of the four kinds of citotpāda of the bodhisattvas?

Answer: Great compassion (mahākarunā) is the root.

Sthiramati more or less states the same thing except that he provides a reason why bodhicitta should be rooted in compassion:

[Mahāyānasūtraālāmkāra 4.3a has been formulated] as an answer to the question “What is the root of the four kinds of bodhicitta?” For it is maintained [there] that the root of the four kinds of bodhicitta is compassion, that is, an impulse reflecting the will (cetanā) to eliminate the pain [or suffering] of sentient beings out of compassion. The latter endures in virtue of taking in all sentient beings. If compassion were not at the root [of bodhicitta], bodhicitta would not be

40 *(Mahāyāna)sūtraālāmkāravyākhyā (P, vol. mi, fol. 58b1–3; D, vol. mi, fol. 53a1–3; S, vol. 71, p. 1028.5–11): byang chub kyi smses rnam pa bzhī'i rtsa ba gang zhe na zhes dris [dres P] pa dang | 'de'i lan du byang chub kyi smses rnam pa bzhī'i rtsa ba ni snying rje yin par 'dod pā'i phyir ro zhes snying rjes smsen can gyi sādrg bsgnal bsal bar bya'o snyam du smses pa ste | 'de smsen can thams cads bsdus nas gnas so || gal te snying rje rtsa bar 'gyur pa med na ni smsen can rnyams kyi don du byang chub kyi smses rnyams kyang [khyi PN] mi skyed kyi nyan thos bzhin du mya ngan las 'das par 'jug par 'gyur te | de bas na rtsa ba ni snying rje'o ||.

41 Or “If bodhicitta were not rooted in compassion.”
generated for the sake of sentient beings, and [the bodhisattvas] would enter into nirvāṇa [in a traditional sense], like śrāvakas. Therefore, the root [of bodhicitta] is compassion.

*Asvabhāva adds that great compassion ‘embraces’ (khyud) all sentient beings, and without it as a root, a bodhisattva would never generate the resolve to strive for the highest awakening but, like the śrāvakas, enter into nirvāṇa without considering the needs of sentient beings.42

The Saṃvrtibodhicittabhāvanā attributed to one Aśvaghoṣa presents what appears to be practical guidance for the generation of bodhicitta. It states that the ‘sprout’ of bodhicitta arises from the ‘seed’ of compassion, and goes on to exhort that one should first of all dwell in a secluded place, where one can detach oneself from meaningless and deceptive worldly concerns.43 Mind, it notes, is itself a place of seclusion since it is primordially unborn. Beginners, however, should first of all abide in a secluded place without, and only afterwards seek the place of seclusion within. This place of seclusion is described as the ‘seed’ (bijā) that is the very ‘seat of awakening’ (bodhimandā), perhaps meaning ‘spiritual disposition’ (gotra) or even the tathāgatagarbha itself.44 (We should perhaps distinguish this ‘seed’ from the ‘seed of compassion’ also mentioned in this context.) Thus, having sought and secured the outer and inner ‘seats of awakening,’ one engages in the contemplative practices of the so-called ‘four immeasurables’ (apramāṇa). The well-prepared field of equanimity (upekkṣa) is watered or moistened with the water of benevolence (maitrī), and a practitioner endowed with a sense of joyousness (muditā) plants the seed of compassion (karuṇā). Room for insightful view having thus been provided, the sprout of bodhicitta is brought forth by efficient strategies (upāya).45

Several other authors have referred to compassion as the root of bodhicitta. The Bodhicittavivarāṇa states:46

42 Mahāyānasūrālāmārkarājikā (P, fol. 60b6–7; D, fol. 53b5–6; S, vol. 71, p. 135.10–15): snying rje chen po ni sems bskyed pa'i rtsa ba'o zhes bya ba ni | de ni 'gro ba 'khyud de 'dag pa yin no || gal te snying rje chen po rtsa ba yin par ma gyur na | byang chub snying rje chen po rtsa ba yin par ma gyur na bskad nas par bsdad ||

43 Saṃvrtibodhicittabhāvanā (P, fol. 15b7–8; D, fol. 14a2; S, vol. 64, p. 39.5–7):
de yang thog mar 'di ita ste ||
don med rnam par bslu ba yin [= yi?]]
'jig rten chos la ma chags par ||
nags tshal la sogs dben par bsdad ||

44 Saṃvrtibodhicittabhāvanā (P, fols. 15b8–16a1; D, fol. 14a2–3; S, vol. 64, p. 39.7–11):
sems nyid gdod nas ma skyes pa ||
rang 'byung [byung PN] dgon pa yin mod kyi ||
las dang po pa'i sems can gyis ||
phyi rol dgon pa thog mar bsten [bston D] ||
der [de'i PN] 'og sems nyid dgon pa btsal ||
byang chub snying po'i sa bon la ||
brten nas don chen 'di itar sgrub [bsgrub PN]].

45 Saṃvrtibodhicittabhāvanā (P, fol. 16a1–2; D, fol. 14a3–4; S, vol. 64, p. 39.11–14):
de yang thog mar tshad med blo ||
btang snyoms sa gzhi legs bdal la ||
byams pa'i chu bos rnam bcsus la ||
rab tu dga' ba'i rnal 'byor pas ||
snying rje'i sa bon legs par gdab ||
ita ba'i nam mkha' go phyé [phya D] la ||
byang snying rje'i sa bon legs par gdab ||

46 Bodhicittavivarāṇa 85:
snying rjes brtan pa'i rtsa ba can ||
The Sons of the Victorious Ones strive for awakening (bodhi),
Which has the benefit of others as [its] single objective,
And which comes forth from the sprout of bodhicitta,
Which [in turn] has steadfast compassion as [its] root. 47

Furthermore, Ācārya Śūra is quoted as having stated the following: 48
All good qualities depend on bodhicitta;
Excellent bodhicitta arises from compassion.

Candrakīrti also emphasised the role of compassion, 49 as did later Indian scholars such as Kamalaśīla 50 and Atiśa. The latter states: 51

It is because the sentiment of compassion (karunācitta) arises out of the sentiment of benevolence (maitrīcitta), and bodhicitta arises out of the sentiment of compassion that I have stated here: "Having been preceded by the sentiment of benevolence...." 52

Likewise, his Samādhisambhāra states: 53

Strengthen the resolve [to strive] for perfect awakening (sambodhicitta),
Once it has arisen by the power of initial compassion.

According to Ratnakaraśāṇī, compassion not only causes bodhicitta to arise but also to subsist and attain completion. 54 The importance of great compassion as the root or seed of bodhicitta is also echoed in Vajrayāna Buddhism. For example, in the Vairocanābhisambodhitantra, the bodhisattva Vajrapāṇī, having extolled the qualities of omniscient gnosis (sarvajñānāna), asks the Buddha what its cause (hetu) is and what its root (mūla) and completion are. Thereupon the Buddha answers: 55

47 Note that my translation of the verse slightly differs from the English translation provided in Lindtner 1997: 61.

49 Catuhśatakājīkā (P, fol. 61a2–3; D, fol. 56b4–5; S, vol. 60, p. 1068.9–10): bla na med pa yang dag par rdzogs pa’i byang chub kyi sens snying rje’i chen po’i rgyu can |.

51 Bodhimārgaprādipapāṇijīkā (P, fol. 287a1–2; D, fol. 249a2–3; S, vol. 64, p. 1669.16–18): byams pa’i sens las snying rje’i sens byang la snying rje’i sens las byang chub kyi sens’ byung bas na bdag [dag P] gis ‘dir | byams pa’i sens ni sngon ’gro bas | zhes smras so |. For the text and a translation, see Sherburne 2000: 70–71.

53 Samādhisambhāra 1 (P, fol. 169a2–3; D, fol. 134b6; S, vol. 27, p. 542.4): dang po’i [po PN] snying rje’i stobs las byung | rdzogs pa’i byang chub sens brtan bya |.

54 Ratnālokālaṃkāra (P, fol. 285a8; D, fol. 243a7–b1; S, vol. 64, p. 684.16–17): ... snying rje brtan [bstan PN] pas byang chub kyi sens brtan par ’gyur te skye ba na [dang PN] gnas pa dang mθar thug pa’i rgyu yin pa’i phyir |.
This omniscient gnosis has bodhicitta as [its] cause, compassion as [its] root, and efficient strategy as [its] completion.

Similarly, Rong-zom-pa states: 56

The generation of the resolve [to strive] for omniscient gnosis in order to liberate all sentient beings from the ocean of saṃsāra is the main part of the commitment (saṃvara). Without attaining this omniscient gnosis one cannot act for the benefit of sentient beings. Hence, if one attains it, [its] cause will have been bodhicitta. [Its] root is great compassion. [Its] completion is [dependent on] efficient strategies. One cannot do without any of these three.

Although compassion is not directly viewed here as the root of bodhicitta but rather of omniscient gnosis, it can be still argued that compassion is indirectly considered to be the root of bodhicitta, which is the cause of omniscient gnosis. Candrakīrti employed logical reasoning and authoritative scriptures to demonstrate that śrāvakas and pratyekabuddhas arise from tathāgatas, tathāgatas from bodhisattvas, and bodhisattvas from compassion, non-dual insight, and bodhicitta; and that non-dual insight and bodhicitta are rooted in compassion. 57

Finally, it needs to be pointed out that mahākarunā is not just conceived of as the root cause of bodhicitta, but occasionally, as in the Dharmasamāgītisūtra, also described as the single most important dharma to be practised by a bodhisattva. 58

7. Concluding Remarks

In this chapter, I have attempted to present a systematic and exhaustive treatment of the causes and conditions pertaining to ethico-spiritual bodhicitta as found in relatively early sources, such as the Bodhisattvabhūmi and the Mahāyānasūtrālaṃkāra, and some later treatises. It may be said that even though the causes and conditions pertaining to bodhicitta are multiple, they can be subsumed under what one may call ‘inner cause’ and ‘external conditions’—the ‘inner cause’ being the spiritual disposition (gotra) and the ‘external conditions’ being good spiritual friends or teachers (kalyāṇamitrā). Furthermore, of all causes and conditions pertaining to bodhicitta, compassion stands out as the ‘seed or the root of bodhicitta, and indirectly even of Buddhahood itself. This is an important point in Mahāyāna Buddhism because, doctrinally, it is compassion that makes the appearance and activities of a buddha possible.

Chapter Ten

The Mahāyāna Observances and the Maintenance of Bodhicitta

In sum, apart from striving [to observe] the discipline Of guarding [one's] mind on all fronts, Why strive [to maintain] other disciplines!

— Rong-zom Chos-kyi-bzang-po (11th century), mDo rgyas

1. Introductory Remarks

In this chapter I should like to present the fundamentals of the tantric and non-tantric Mahāyāna ethical-moral codes and offences, with particular reference to how they are linked with the maintenance of bodhicitta. Given the heterogeneity of the materials and systems, there is no uniform scheme of primary and secondary precepts and offences. Each system, and sometimes even each treatise, seems to have its own scheme. For example, the total number of cardinal (or mortal) transgressions (mūlāpatti) provided by the Saṁvarasaṁgraha (probably falsely attributed to Atiśa) is eighty, namely, four common cardinal transgressions, twelve according to the Paramitāyana, thirteen according to the Kriyā tantric system, fourteen according to the Caryā tantric system, fourteen according to the Yoga tantric system, fourteen according to the mahāyoga tantric system, and an additional five and four cardinal transgressions which are not specified. And as for the secondary transgressions, they are too

---

1 mDo rgyas (A, fol. 149a6–b1; B, p. 244.19–20):

mdor na rnam pa thams cad du

sems bsurung sdom brtson ma gtogs pa

sdom pa gzhon brtson ci zhi ggos

This is obviously influenced by Bodhicaryavatāra 5.18cd: cittarakṣāvratam mukvā bahubhiḥ kim mama vrataih. One wonders if the Tibetan translation does not yield here a better sense than the English translation in Crosby & Skilton 1995: 35.

2 For Tsong-kha-pa’s discourse on tantric ethical-moral discipline (gsang sngags kyi tshul khrims), see Sparham 2005.

3 Note that the total number of mūlāpattis specified in the text is seventy (see the following footnote).
numerous to be counted.\textsuperscript{4} I shall focus here on the primary precepts and offences, particularly on those that are somehow connected with the maintenance of bodhicitta. I shall begin with what seems to be the most conservative Mahāyāna tradition and conclude with the Atiyoga or rDzogs-chen system. In most cases, I shall avail myself of the writings of Rong-zom-pa, particularly his mDo rgyas, which is, to my knowledge, the most comprehensive and sophisticated treatise that deals exclusively with both tantric and non-tantric Mahāyāna observances. It is evident that the mDo rgyas in turn was inspired by the Samvarasamgraha.

Perhaps it is worthwhile first to consider some of the relevant terms. Rong-zom-pa employs and explains nine closely related terms which are said to occur in the kriyātantras and yogatantras. These are:\textsuperscript{5} (1) vows (saṃvara: sdom pa),\textsuperscript{6} (2) pledges (saṃaya: dam tshig), (3) ethical-moral discipline (śīla: tshul khrims), (4) austerities (tapas: dka’ thub), (5) austere practices (duścara: dka’ spyod), (6) ascetic precepts (vrata: brtul zhugs),\textsuperscript{7} (7) monastic codes (vinaya: ’dul ba), (8) course of conduct (caryā: spyod pa),\textsuperscript{8} and (9) mode of dealings or interactions (gocara: spyod yul).\textsuperscript{9} In addition, he also frequently employs terms such as precepts (siksā: bsla’pa) or code of precepts (siksāpada: bsla’pa'i gzhug), transgressions (āpatti: ltung ba),\textsuperscript{10} cardinal transgressions (mūlāpatti: rtsa ba'i ltung ba), and serious offences (pārājika: phas pham pa), the last of these entailing expulsion from the Order.

2. The Model of the Four Cardinal Transgressions (mūlāpatti)

In chapter six I presented an outline of the various bodhisattva-related precepts and transgressions in a purely non-tantric context. What I should like to recall here is the four mūlāpattis found in both bodhicittotpāda traditions, though not in an identical form. The scheme of four mūlāpattis can be found also in Vajrayāna sources such as the Vairocanaābhisaṃbodhiṭhantra. Following Rong-zom-pa,\textsuperscript{11} it may be assumed that the scheme of four mūlāpattis found in tantric and non-tantric Mahāyāna systems was modelled on the historically and doctrinally conservative Vinaya scheme of the four pārājika offences, offences entailing expulsion from the Order.\textsuperscript{12} Although the term pārājika or pārājayika is

\textsuperscript{4} Samvarasamgraha (P, fol. 255a3–6; D, fol. 45a3–5; S, vol. 41, p. 693.7–14): de la rkang grangs ni thun mong gi rtsa ba'i ltung ba bzhi dang pha rol tu phyin pa'i rtsa ba'i ltung ba bceu gnyis dang kr ya'i rgyud kyi rtsa ba'i ltung ba bceu gsum dang | spyod pa'i rgyud kyi rtsa ba'i ltung ba bceu bzhi dang | rnal 'byor gyi rgyud kyi rtsa ba'i ltung ba bceu bzhi dang | rnal 'byor chen po'i rgyud kyi rtsa ba'i ltung ba bceu bzhi dang | yang lnga dang yang bzhi dang | rtsa ba'i ltung ba bdu mn cu [bceu PN] tham pa'o || de la yan lag gi dam ishig rnam ni 'di rnam so zhes bgrang bar mi nus te | mdo sde dang mgon pa dang ’dul ba dang rgyud sde rnam su bsl a bar bya'o ||.

\textsuperscript{5} mDo rgyas (A, fols. 150a1–152a5; B, pp. 245.9–248.2). See also the Samvarasamgraha (P, fol. 255a3; D, fol. 45a3; S, vol. 41, p. 693.5–7): de la ming gi rnam grangs ni dam ishig dang sdom pa dang brtul zhugs dang spyod yul dang dka' spyad dang spyod pa dang shi la la sogs pa'o ||.

\textsuperscript{9} BHSD, s.v. gocara.

\textsuperscript{10} CPD, BHSD, s.v. āpatti.

\textsuperscript{11} mDo rgyas (A, fol. 159a6–b1; B, p. 256.11–13): ... ‘dir ni so sor thar pa la gsungs pa'i phas pham pa bzhi dang | byang chub sems pa'i [= dpa'i] pham pa bzhi tshul bsun nas bshad pa yin te.... Cf. the Shes bya mdzod (p. 358.28–29): ... byang sa'i don bsdus sdom pa nyi shu par gsungs pa nyan thos kyi pham pa dang 'dra ba'i rtsa ba'i ltung ba bzhi ste |.

\textsuperscript{12} See the Shes bya mdzod (p. 358.28–29): ...}
used occasionally also in tantric and non-tantric Mahāyāna contexts, the preferred term seems to be mūlāpati. The term pārājika must have been originally employed in the bodhisattva context only as a point of comparison. For example, according to Ratnagainasamcayā 31.5, a bodhisattva who generated the resolve to become an arhat (i.e. a śrāvaka saint) or a pratyekabuddha would commit an offence far more serious than a pārājika offence. Also the Bodhisattvabhūmi and its commentaries seem to refer to the four cardinal transgressions of the bodhisattva vow as pārājika-like offences and not as pārājikas.

A question we may ask is: Why has the list of four cardinal transgressions been changed in the tantric and non-tantric Mahāyāna systems, whereas the scheme itself has been retained? Jinaputra, in his Śīlaparivartaṭīkā, asserts that the four cardinal transgressions of both the prātimokṣa and bodhisattva vows can be committed only when one or the other of the three fundamental intellectual-emotional defilements (klesa)—namely, desire (rāga), hatred (dveṣa), and disorientation (moha)—are present. That is to say, without these intellectual-emotional defilements, the concept of the four cardinal transgressions in both Mahāyāna and non-Mahāyāna systems would be rendered meaningless. It may be worthwhile here to pause over Jinaputra’s comparison of the four cardinal transgressions of the Mahāyāna and non-Mahāyāna systems:16

[1] Just as a śrāvaka renders himself unfortunate (i.e. commits a pārājika offence) by abusing himself and others through [the gratification of his] sexual desire, so would a bodhisattva commit the pārājika [offence] if [he] were to abuse himself and others through [his] craving for [material] gain and reputation. [2] A śrāvaka would commit a pārājika [offence] if [he] were to steal property of other [people] out of craving. A bodhisattva, on the other hand, would commit a pārājika [offence] if, out of greed for material wealth, [he] were not to give to desperate persons who ask for [material help], even though [he] is in possession of wealth; or if [he] were not to share [his knowledge of] the doctrine (dharma) [with them]. [3] A śrāvaka would commit a pārājika [offence] if [he] were to kill a human being. A bodhisattva, on the other hand, would

12 Edgerton notes that the four pārājikas (= pārājikas) are described in the Bodhisattvabhūmi “but bear no resemblance to the four pārājika[s] of monks, being evidently a recent invention patterned on that ancient category” (BHSD, s.v. pārājikayika).

13 See, for example, the Śīkṣāsaṃuccaya (BENDALL, p. 66.16; VAIDYA, p. 41.2): rainatrayasvaḥaraṇād āpat pārājikāt mātā | and the Bodhisattvabhūmi 1.10 (DUTT, p. 108.11–12): evāḥ ca śīlasamvaravasthitasya bodhisattvasya catvāraḥ pārājikayvakhiṇāyatdharmā bhavanti | (cf. WOGIHARA, p. 158.2–3). For the terms pārājika and pārājikayika, see BHSD, s.v.v. For the occurrence of the term pārājika (phas pham pa) in the Vajraśikharatantra, see the citation in n. 90. Rong-zom-pa considers the four pārājikas relating to the bodhisattva vow to be uncommon or special (thun mon ma yin pa). See the Theg chen tshul 'jug (A, fol. 76a6–b2; B, p. 499.19–23). Cf., however, the dKon mchog 'grel (A, fol. 159a1; B, p. 218.3), where the four mūlāpattis are described as 'pārājika-like' (phas pham pa dang 'dra ba).

14 In the tantric context, Rong-zom-pa tends to use the expression 'great' as an attribute of the mūlāpattis, for example, in his Theg chen tshul 'jug (A, fol. 76b6–77a1; B, p. 500.7–10). This is perhaps intended to set the tantric mahāpattis apart from those used in the non-tantric context.

15 Śīlaparivartaṭīkā (P, fol. 256b8–257a5; D, fol. 204a4–7; S, vol. 75, p. 558.10–20).

commit a pārājika [offence] if [he] were to generate malicious thought (āghāta) against all sentient beings, inflict injury with his hands, with clods of soil, or the like, and continue the act of injury relentlessly despite courteous pleas [to consider] the negative consequences of injury and [despite] an acknowledgement of fault. [4] A śrāvaka would commit a pārājika [offence] if [he] were to proclaim the non-existent qualities of [spiritual] attainments. A bodhisattva, on the other hand, would commit a pārājika [offence] if [he] were not to teach [despite his] actual [ability to do so], disparage the Sublime Doctrine (saddharma), and teach [what is] not the Sublime Doctrine. It is clear that desire (raga) is involved in the first two cardinal transgressions, hatred (dveṣa) in the third, and disorientation (moha) in the fourth.

The motive mentioned in the Vairocanāḥhisambodhītantra, as explained by Rongzom-pa, was to induce (gzud) the śrāvakas to enter into the Vajrayāna system by offering a scheme that they already knew. Such a justification may sound polemical, and hence one not to be taken seriously. Nonetheless, greater reflection suggests that the reason for not retaining the old list of four pārājika offences (i.e. killing, stealing, lying, and engaging in sexual misconduct) in the tantric and non-tantric Mahāyāna ethical-moral context is that these basic offences can, under exceptional circumstances, be committed in the course of applying efficient strategies (upāya) and insight (prajñā), and thus be condoned, thereby creating room for equivocality. In other words, the unequivocalness of the four pārājika offences, taken for granted in the non-Mahāyāna system, no longer holds in Mahāyāna. For example, if a bhikṣu living according to the non-Mahāyāna system commits one of the four pārājika offences, he would automatically lose his bhikṣu status, but if a bodhisattva commits one of these same four deeds under the Mahāyāna system, the consequence is no longer straightforward. The possibility that a bodhisattva could commit one of the four deeds and yet retain his bodhisattva status renders the old scheme inapplicable. We thus understand why the four mūlāpattis of the bodhisattva or the tantric yogin had to be reassigned to include only offences that can never be condoned—such as abandoning the saddharma and bodhicitta or nourishing thoughts of greediness and cruelty.

As we have already seen in chapter six, Candragomin’s Saṃvaravimsaṅkha is often cited as a scriptural authority on the four cardinal transgressions of the Maitreya-Asanga tradition. The Saṃvaravimsaṅkha is said to be based in turn on the Bodhisattvabhumī,18 which is representative of what is perhaps the most conservative Mahāyāna tradition. The four cardinal transgressions outlined in the Saṃvaravimsaṅkha are:19 (1) praising oneself and disparaging others out of attachment to gain or respect, (2) not administering dharma and wealth to the deprived and defenceless out of greediness, (3) assaulting others out of rage despite their acknowledging their faults, and (4) abandoning the Mahāyāna doctrine and propagating a pseudo-saddharma. When it comes to a scriptural authority on the four cardinal transgressions of a bodhisattva according to the Mañjuśrī-Nāgārjuna tradition, the Śīkṣāsamuccaya is often cited, which is said to be based in turn on the Upāyakauśalyasūtra.20

---

17 See the mDo rgyas (A, fols. 159b5–160b5; B, pp. 256.23–258.3), where the pertinent passages from the Vairocanāḥhisambodhītantra are cited and discussed. See also the Caryāmālapakaprādīpa (p. 78.16–17):

upāyarahitam jñānam śīkṣā cāpi hi deśitā |
śrāvakānāṃ mahāvīra avatāraya teṣu vai ||,

*a varia lectio: avadhāraya.* For the verse cited in the Tattvāsvādhi (ascribed to Śāntaraksita), see MORIGUCHI 1993: 184.

18 Bodhisattvabhūmi 1.10 (WOGIHARA, pp. 158.2–160.9; DUTT, pp. 108.11–109.20; Shes bya mdo (p. 358.28); SOBISCH 2002: 51, 91.

19 See chapter six, n. 113.

20 For example, see the Shes bya mdo (p. 356.8–12).
The four cardinal transgressions given in the Śikṣāsamuccaya are: 21 (1) abandoning bodhicitta, (2) not giving, out of greediness and covetousness, (3) beating others in wrath or out of intolerance, and (4) giving false teachings under the influence of defilements or as a result of following others. Although the abandonment of bodhicitta is not mentioned in the Sātīvaravīśaka as one of the four mūlāpattis, Rong-zom-pa states that abstaining from the mūlāpattis mentioned in it is a means of securing bodhicitta, whereas committing them contributes to the abandonment of bodhicitta. In particular, the four mūlāpattis mentioned in the Sātīvaravīśaka are equated by Rong-zom-pa with those listed in the Śikṣāsamuccaya, namely, with abandoning bodhicitta, being greedy, being cruel, and abandoning the saddharmā, respectively. He also links these four respectively with the acts of desire, stealing, killing, and lying, which correlate with the four pārājikas of the Vinaya tradition. 22

Rong-zom-pa, without indicating his source, also discusses the four mūlāpattis according to the Vajrayāna: 23 (1) blatantly disparaging one’s tantric teacher (vajrācārya), (2) abandoning bodhicitta for good, (3) refuting doctrines that teach equality (i.e. of saṃsāra and nirvāṇa), and (4) scorning fellow tantric practitioners. These four mūlāpattis, however, are neither identical with the four taught in the Vairocanābhisambodhitantra 24 nor do they correspond with the four basic pledges (samaya) taught in Jñānakāra’s Mantrāvatāra. 25

3. Pledges and the Maintenance of Bodhicitta in the Kriyātantras

We shall first consider the pledges (samaya) relating to bodhicitta in the so-called kriyātantras. One may argue about which tantras belong to this category, 26 but for practical reasons I shall follow here Rong-zom-pa’s system of tantric classification, 27 which considers,

21 Śikṣāsamuccaya (BENDALL, p. 67.15–18; VAIDYA, p. 41.20–23):
bodhicittaparityāгdā yācakāгāpradāнātah ||
tīвrāmāгsaryālobhihāм krodhād vā sattvāgādānāt ||
prasāдāгамānō yatnena satṭvesa na titikṣate ||
klesāг parāйnirvrttya vā sādhhāмbāгsāvārnanāί ||.
For an English translation of these verses, see BENDALL & ROUSE 1922: 71.

22 See the mDo rgyas (A, fol. 159a1–6; B, pp. 255.22–256.11).

24 Cf. n. 36.

25 Mantrāvatāra (P, fol. 221a6–7; D, fol. 196a2–3; S, vol. 41, p. 533.8–11):
de la gzhi yi dam tshig ni ||
rnam pa bhīr ni shes bya ste ||
yang dag lta dang ldan pa dang ||
dkon mchog gsum po mi spong dang ||
byang chub sems dang ldan pa dang ||
dbang bkser yang dag mi spong ba’o ||.
Cf. the verses cited in the Shes bya mdzod (pp. 372.33–373.2).

26 For a general discussion of the classifications of Buddhist tantras, see ENGLISH 2002: 2–6.
among other tantras, the Vairocanañābhisambodhitāntrā,28 Guhyatāntra,29 Susiddhikaratantra, and Subāhupariprcchātāntra to be kriyātantras.30 He remarks, however, that some earlier teachers (pūrva-cārya) considered the Vairocanañābhisambodhitāntrā also to be a caryātāntra or an ubhayatāntra.31

(a) The Vairocanañābhisambodhitāntrā

Let us, then, first turn to how the pledges relating to and the maintenance of bodhicitta are conceived in the Vairocanañābhisambodhitāntrā. According to Rong-zom-pa, the Vairocanañābhisambodhitāntrā prescribes the following ethical-moral discipline for the lay bodhisattva: the bodhisattva should abide by the precepts pertaining to ten wholesome (kusāla) attitudes or actions characterised by efficient strategies (upāya) and discriminating insight (prajñā), observe the code of precepts (śiksāpada) comprising five basic ethical-moral disciplines, gather sentient beings into the dharma by means of four gathering techniques (samgrahavastu), and make sure that the four mālāpattis are not committed, even at the cost of one’s life.32 The five śiksāpadas are:33 (1) avoiding killing, (2) avoiding stealing, (3)

28 mDo rgyas (A, fol. 152b3–4; B, p. 249.16–19); ... thabs dang shes rab zab mo’i tshul nye bar bstan pa | las dang bya ba la rnam par smad pa | byang chub kyi sems gtsos bo gyur pa | bya ba bye brag gi rgyud du grags pa | rnam par snang mdo zmad mgon par byang chub pa’i rgyud las |; ibid. (A, fol. 227b1–2; B, p. 336.6–10): bya ba’i rgyud du’ang ... rnam par snang mdo zmad mgon par byang chub pa’i rgyud lla bu ni bya ba bye brag gi rgyud de zab mo’i tshul sion pa’o zhes grags so |. If the Vairocanañābhisambodhitāntrā is a kriyātāntra, one may wonder why it is described by Rong-zom-pa as one that ‘disparages activities and actions’ (las dang bya ba la rnam par smad pa). Addressing this doubt, Rong-zom-pa adds (ibid., A, fol. 227b2–3; B, p. 336.9–10): “Because of this, some early teachers have considered [it] a caryātāntra or an ubhayatāntra” (de nyid kyi dbang las sngo gi slob dpon kha cig gis spyod pa’i rgyud dang gnyi ga’i rgyud du’ang bsad do |)

29 The Guhyatāntra is cited by Rong-zom-pa as a kriyātāntra in the mDo rgyas (A, fol. 154b5–6; B, p. 251.1–4): spyiv bya ba’i rgyud rnam su bsgrub cing nyams su blang bar bya ba’i rtsa ba’i dam tshig ni bcu gsum du grags te | de yang ’di itar beom idan ’das kris rigs gsum gis dkyil ’khor gyi bye brag tu gyur pa | dkyil ’khor sum stong lla bygra snyed gsungs pa thams cad kyi spyi’i cho ga bstan pa gsgs ba’i rgyud las |.

30 Rong-zom-pa regarded the Subāhupariprcchātāntra as a kriyātāntra. See the mDo rgyas (A, fol. 227b1–2; B, p. 336.6–9): bya ba’i rgyud du’ang ’phags pa dpung bzang gis zhus pa lla bu ni spyi’i tshul | ... ston pa’o zhes grags so |; cf. ibid. (A, fol. 156b1; B, p. 252.23–24): de yang rgyud thams cad kyi spyi’i bsgrub pa’i cho ga rgyas par bstan pa dpung bzang gis zhus pa las |; ibid. (A, fol. 185a2–3; B, p. 286.18–19): ’di itar rgyud thams cad kyi spyi’i sgrub pa’i cho ga rgyas par ston pa dpung bzang gis zhus pa las |. According to the Nyang ral chos ‘byung (pp. 308.20–309.5), both the Subahupariprcchātāntra and the Susiddhikaratantra are counted among the six general tantras (spyi’i rgyud drug) of the Kriyā class. For an English translation of the Susiddhikaratantra from the Chinese translation (Taishō, vol. 18, no. 893) by Subhākarasimha (637–735), see GIEBEL 2001: 109–325.

31 See ENGLISh 2002: 3, where the Vairocanañābhisambodhitāntrā is said to be the root text of the caryātantras. It was Buddhaguhya who most prominently took the Vairocanañābhisambodhitāntrā to be an ubhayatāntra (HODGE 2003: 23, 43). Perhaps for Rong-zom-pa the Vairocanañābhisambodhitāntrā is indeed a kriyātāntra, but by no means is it an ordinary kriyātāntra; rather, an exclusive one (bye brag gi rgyud) in emphasising bodhicitta and the profundity (zab mo’i tshul) of the tantric doctrine.

32 Vairocanañābhisambodhitāntrā (T, fol. 208b3–209a4; D, fol. 220b2–7). The pertinent passage from this tantra has been paraphrased in the mDo rgyas (A, fol. 153b4–6; B, p. 249.18–23) as follows: mam par snang mdo zmad mgon par byang chub pa’i rgyud las | ’di itar gsang sngags kyi sgor zhugs pa’i byang chub sems dpa’ khyim pa rnamz kyi thabs dang shes rab kyi yongs su sin pa’i dge ba bcu’i las kyi lam yang dag par blangs te | bslab pa’i gzihi ina gzung nas bsdu ba’i angos po bschis sem can rnamz sdu ching lung ba’i rtsa ba bszi srog gi phyir yang yongs su mi gtang ba bar gsungs te.... See also ibid. (A, fol. 159b4–160b5; B, pp. 256.22–258.3).
avoiding illicit sexual conduct, (4) avoiding telling lies, and (5) avoiding false views. What is perhaps remarkable is that these šikṣāpadas are for the most part identical with those laid down for the lay Buddhist followers, except that the last one, ‘avoiding alcoholic drinks,’ has been replaced by ‘avoiding false views.’ This is, however, not the case with all tantras. As we shall see, ‘avoiding alcoholic drinks’ is included in the šikṣāpadas taught in other kriyātantras, such as the Susiddhikaratantra and the Subāhuparpachchātantra, along with some yogatantras, such as the Vajrāśikharatantra and Durgatipariśodhanatantra.

The mulāpatti, which are reminiscent of the four mulāpatti that we know from the non-tantric Mahāyāna system, are: (1) abandoning the saddharma, (2) abandoning bodhicitta, (3) greediness (mātsarya), and (4) cruelty (vyāpāda). My primary interest, however, is not the šikṣāpadas and mulāpatti as such but rather their relationship to the maintenance or abandonment of bodhicitta, which is explained by Rong-zom-pa as follows.

[Question:] How is bodhicitta adopted-and-maintained by means of these vows (saṃvara)?

[Answer:] The [first] four šikṣāpadas, namely, avoiding killing and so forth, involve the ethical-moral discipline of [observing] vows (saṃvaraśīla), [and thus are] the foundation of bodhicitta. A false view (mithyādṛśti) is a hindrance to the arising of bodhicitta, since if one is present, it leaves no room for the arising of bodhicitta. If one has abandoned it and has a correct view (saṃyagdṛṣṭi), bodhicitta has room to arise. Thus given that this code of five [precepts] is the foundation for the arising of bodhicitta, the šikṣāpadas are these five specific ones.

In treating the relation of the four mulāpatti to the abandonment of bodhicitta, Rong-zom-pa first refers to the passage in the Vairocanābhisambodhītantra (which we have already seen), where bodhicitta is identified as the cause of the gnosis of the Omniscient One (or of omniscience), great compassion as its root, and efficient strategy as the cause of its completion, and then states.

---

33 Vairocanābhisambodhītantra (T, fols. 208b6–209a1; D, fol. 220b4–6): de la srog good pa dang | ma byin par len pa dang | ’dod pas log par g.yem pa dang | brdzun du smra ba dang | log par lta ba rab tu sangs pa yin te | byang chub sms dpa’ khyim pas bslab pa’i gshi de inga bzung nas | bslab pa ji skad bstan pa rams la slob cing dad pas | sngon gyi de bzhin gshegs pa rams kyi rjes su bslab par bya’o |]. This passage is also cited in the mDo rgyas (A, fol. 160a5–b1; B, p. 257.13–17). See also ibid. (A, fol. 153b6; B, pp. 249.23–250.1): de la bslab pa’i gshi inga ni | srog good pa spong ba dang | ma byin par len pa spong ba dang | ’dod pas log par g.yem pa spong ba dang | rdzun du smra ba spong ba dang | log par lta ba spong ba’o |; Rwa ba brgyad (A, fol. 275a3–4; B, p. 393:11–16).

34 See NYANATILOKA 1989, s.v. sikkhāpada; BHSD, s.v. šikṣāpada.

35 See the respective šikṣāpadas outlined in the Susiddhikaratantra, Subāhuparpachchātantra, Vajrāśikharatantra, and Durgatipariśodhanatantra, and also Rong-zom-pa’s remark in nn. 62 & 63.

36 Vairocanābhisambodhītantra (T, fols. 209a3–4; D, fol. 220b6–7): ltung ba’i rtsa ba bzhin ni srog gi phyir [add. yang T] yongs su nyams par mi bya’o | bzhin gang zhe na | ’di lta ste | dam pa’ichos spong ba dang | byang chub kyi sms giong ba dang | ser sna byed pa dang | sms can la gnod pa [par T] byed pa’o |. This is cited in the mDo rgyas (A, fol. 160b2–3; B, p. 257.19–22). See also HODGE 2003: 512; WAYMAN 1992: 139.

37 mDo rgyas (A, fol. 154a1–4; B, p. 250.2–9): sdom pa ’di dag gis byang chub kyi sms ji ltar ’dzin par ’gyur zhe na | srog good pa spong ba la sogs pa bslab pa’i gshi bzhin ni | sdom pa’i tsul khrims kyi bdag nyid byang chub kyi sms kyi gzhir gyur pa’o | log par lta ba ni byang chub kyi sms skye bya’i gregs su gyur pa ste | ggang de yod na byang chub kyi sms skye ba’i go skabs mi ’byed do | de sponds shing yang dang pa’i lta ba dang ldan na | byang chub kyi sms skye ba’i go skabs ’byed par ’gyur bas | de bas na gshi de inga ni byang chub kyi sms skye ba’i gzhir gyur pa’i phyir bslab pa’i gshi ni ’di inga kho na yin no |.

38 mDo rgyas (A, fol. 154b1–3; B, p. 250.15–20): ’di byang chub kyi sms sponds pas ni thams cad mkhyen pa’i ye shes de’i rgyu sponds pa’gyur ro | de bzhin du ser sna byed pa dang gnod sms kyi ni de’i lta ri bying rje chen po sponds par ’gyur ro | dam pa’ichos spong bas ni | de’i mthar thug pa thabs la mkhas pa sponds par ’gyur te | de lta na thams cad mkhyen pa’i ye shes de thams cad du sponds par ’gyur ba’i phyir | ’di rnam snyi lnug ba’i rtsa ba chen po gsums pa yin no |.
The abandonment of bodhicitta (i.e. the second mūlapatti) would cause the abandonment of the cause of the gnosis of omniscience (or of the Omniscient One). Similarly, greediness (matsarya) and thoughts of cruelty (vyāpāda) (i.e. the third and fourth mūlapattis, respectively) will cause the abandonment of great compassion, which is its root (i.e. the root of the gnosis of omniscience, and the abandonment of the Sublime Doctrine (i.e. the first mūlapatti) would cause the abandonment of [the means of] bringing it to completion—[namely,] the efficient strategy. In such cases, the gnosis of omniscience will be wholly abandoned, and hence these are taught as being the great mūlapattis.

(b) The Guhyatantra

The Samvarasamgraha states that there are thirteen cardinal transgressions (mūlapatti) according to the kriyātantras. It is probably referring to the Guhyatantra, which proposes thirteen basic pledges (rtsa ba'i dam tshig), as follows:

1. placing firm confidence (sraddha) in the Three Jewels, bodhisattvas, tantric knowledge (vidyā), and tantric formulas (mantra),
2. putting constant trust in the 'great seal' (mahamudrā),
3. showing confidence in those who have taken pledges, in friends, and in teachers,
4. harbouring no aversion towards any deity,
5. making occasional offerings to the deities,

39 Samvarasamgraha (P, fol. 255a4; D, fol. 45a4; S, vol. 41, p. 693.8–9): ... kr ya'i rgyud kyi rtsa ba'i litung ba bcu gsun....

40 Guhyatantra (T, fols. 311b4–312a2; D, fols. 163b7–164a4):

de nas bla mas [ma T] slob ma rnams ||

See the mDo rgyas (A, fols. 154b6–155a6; B, p. 251.5–17), where these verses are cited. See ibid. (A, fol. 154b5–6; B, p. 251.1–5), where, as an introduction to the citation, Rong-zom-pa states: spyin bya ba'i rgyud rnams su bsgrub cing nyams su blang bar bya ba'i rtsa ba'i dam tshig ni bcu gsun du grags te | de yang 'di litar bcom ldan 'das kyi rings gsun gyal kyil khor gyal bya brag tu gyur pa | kyil khor sum stong lnga brgya snyed gsungs pa thams cad kyi spyi'i cho ga bstan pa gsang ba'i rgyud las spyi'i rtsa ba'i dam tshig gsungs te |. Cf. Buddhaghuya's Tantrārāhāvatāra (P, fol. 12a3–7; D, fol. 10a4–b1; S, vol. 27, p. 1005.2–14).
treatises of non-Buddhist teachers, (7) showing hospitality to unexpected guests, (8) cultivating unflagging benevolence towards sentient beings, (9) making an earnest effort to generate beneficial resources (puṇya)—effort, that is, on the part of those who take delight in the vehicle (perhaps Mahāyāna), (10) being industrious in tantric conduct by diligently reciting mantras, (11) keeping all the pledges taught in the tantras, (12) not bestowing mantras and mudrās on those who have taken no pledges, and (13) protecting tantras and being oneself proficient in them. Rong-zom-pa then demonstrates how each of these thirteen basic pledges, in one way or another, concerns the maintenance of bodhicitta. He does not, however, strictly follow the sequence of thirteen pledges as they occur in the verses, but rather deals with related pledges together.41

These thirteen basic pledges include [those relating to] the four miḻappatis explained above, and [also] encompass bodhicitta [in one way or another]. How so? The placing of firm confidence in the Three Jewels is the cause of [generating] bodhicitta.42 Constantly putting trust (adhimukti) in the mahāmudrā maintains the defining characteristics of bodhicitta. Placing firm confidence in deities of vidyā and mantra forms a foundation for the characteristics of bodhicitta. Showing respect to tantric masters [concerns the maintenance of bodhicitta, for they are] the providers of bodhicitta. Showing respect to those bound by pledges and to the friends of those bound by pledges [is justified, for they] are friends who are conducive to bodhicitta. Being industrious in tantric conduct by diligently reciting mantras can accelerate the attainment of bodhicitta. Not bestowing mantras and mudrās upon those not bound by pledges can prevent the destruction of bodhicitta. Not showing reverence to treatises of non-Buddhist teachers is to avoid what is not the cause of [generating] bodhicitta. harbouring no aversion to any deity is to eliminate factors that hinder bodhicitta. Making an earnest effort to generate beneficial resources (puṇya) is an accessory factor conducive to bodhicitta. Cultivating unflagging benevolence towards sentient beings is to abandon thoughts of cruelty (vyāpāda), and making occasional offerings (pūja) to one’s deity, tutelary deity,43 and guru, and offerings and donations (dāna) to non-Buddhists (bāhīyaka) and visitors who are non-partisan (udāśīna), will eliminate greediness (mātsarya). These will also remove factors opposed to bodhicitta and stabilise the root of great compassion (mahākarunā). Protecting tantric scriptures and being oneself proficient in them is to uphold the

41 MDo rgyas (A, fols. 155a6–156a5; B, pp. 251.17–252.18): rtsa ba'i dam tshig bcu gsum po 'di dag gis kyang gong du bstan pa'i tšung ba'i rtsa ba bzhis yang bs dus pa yin la | byang chub kyi sems yongs su bzang bar yang guyr ba [pa] nyid yin no || ji la zhe na | dkon mchog gsum la dad pa brtan par bya ba ni | byang chub kyi sems kyi rgyu mts dragon nor || rtag tu phyag rgya chen po la lhag par mos par bya ba ni | byang chub kyi sems kyi mtsshan nyid bzang ba yin no || rig sngags dang gsang sngags kyi lha la dad pa brtan par bya ba ni | de bzhin du byang chub kyi sems kyi mtshan gzh 'o || bla ma la gus par bya ba ni | byang chub kyi sems sbyin par byed pa'o || dam tshig can dang dam tshig can gkyi 'dza [= mda]' bo rnam la gus par bya ba ni | byang chub kyi sems dang mthun pa'i gregs so || bzas brjod la 'bad päs gsang sngags kyi spyoed pa la brtson par bya ba ni | byang chub kyi sems myur du sgrub pa'o || dam tshig med pa la rnam la sngags dang phyag rgya mi sbyin pa ni | byang chub kyi sems chud mi gsan pa'o || sogn pa gzhon gyi gzhung mi mchod pa ni | byang chub kyi sems kyi rgyu mtsshan ma yin pa spang ba'o || lha thams cd la sdang mi bya ba ni | byang chub kyi sems kyi ggs bsal ba'o || bsod nams kyi tshogs la nan tan bskyed pa ni | byang chub kyi sems dang mthun pa'i yan lag go || srog chags rnam la byams pa's sems nye bar bzhag pa ni | gnod sems spong bar dang | rang gi lha dang | lhag pa'i lha dang | bla ma la dus mtsms kyi mchod pa bya ba dang | phyi roi pa dang thi mal pa'i glo bur 'ba dag' [bdag B] la mchod pa dang | sbyin pa byed pa ni | ser sna byed pa spong bar 'gyur te || 'di dag kyang byang chub kyi sems kyi mthun pa bsal nas rtsa ba snying rje chen po brtan par byed pa'o || gsang sngags kyi rgyud rnam s kyi glegs bam brsung zhir | de yang bdag gis rgoos par bya ba ni dam pa'i chos yongs su bzang ba te | byang chub kyi sems kyi thabs la mchos pa yong 'dzin par byed pa ste | de bas na rtsa ba'i dam tshig bcu gsum po 'di kyang dam tshig thams cad bsdus par shes par bya ste | gang dag 'dir ma gsungs pa rnam kyang | gsang sngags rgyud las bstan pa yi || | dam tshig rnam s kyang bs rung bar bya || zhes gsungs pa 'dir 'dus te | de bas na 'di dag ni thams cad kyi thun mug du bsrung bar bya ba yin la | gzhon las gsungs pa'i dam tshig rgyas pa rnam s kyang bsrung bar gsungs pa yin no ||

43 It is not clear what the difference between ‘one’s deity’ (rang gi lha) and ‘special deity’ (lha pa’i lha) is.
Sublime Doctrine and to uphold efficient strategy regarding bodhicitta. Thus one should know that all pledges are included in these thirteen basic pledges, and ones not taught here are included in them as well, as stated:

One should also keep

The pledges taught in the [other] tantras of the Mantra[yâna].

Therefore these [thirteen pledges] are to be observed in common by all, and the detailed pledges taught elsewhere as well. So it is said.

In sum, what Rong-zom-pa is attempting to do here is to demonstrate how the thirteen basic pledges taught in the Guhyatantra, a kriyâtantra according to him, are bound up with the maintenance of bodhicitta. He is, however, aware that there are also other sets of basic pledges and siksâpadas taught elsewhere, but he asserts that in essence they can all be subsumed under the basic pledges presented here.44

(c) The Susiddhikaratantra

The Susiddhikaratantra presents the abandonment of various kinds of ‘baseness’ (dausthulya) of body, speech, and mind,45 together with the four mâlâpattis in great detail. We shall here concentrate on its understanding of the mâlâpattis and on how they figure in in other Buddhist spiritual practices, particularly that of bodhicitta. The following precepts are mentioned in the Susiddhikaratantra:46

1. take refuge three times daily, (2) confess negative deeds three times
daily, (3) generate bodhicitta three times daily, (4) make aspirational wish (pranidhāna) three times daily on the strength of having studied the tantras and being knowledgeable about ritual procedures, (5) constantly make an earnest effort to practise giving (dāṇa), (6) be free from greediness (mātsarya),47 (7) be constantly endowed with compassion (karunā), (8) be constantly endowed with patience or receptivity (kṣānti), (9) be constantly endowed with benevolence (maitrī), (10) be constantly endowed with vigilance (vīrya), (11) constantly practise the six kinds of recollection (anusmṛtī) with great supleness (desa) of mind, (12) listen to the various teachings (dharma), (13) analyse them with devotion (adhimukti), (14) recite detailed tantric ritual procedures (vidhi),48 (15) make offerings of tantric formulas (mantra) and tantric gestures (mudrā), (16) draw mandalas in accordance with the stipulated procedures,49 (17) initiate the ‘four retinues’50 who have a correct view (samyagdrṣṭi) and firm bodhicitta, (18) expound tantras to those who abide by their pledges, and (19) propagate tantric scriptural transmissions.

The total number of precepts is not specified in the Susiddhikaratantra verses cited by Rong-zom-pa. The figure nineteen is according to Rong-zom-pa, who arranged the precepts into six groups with varying numbers of precepts (4 + 3 + 2 + 1 + 1 + 8).51 A group which contains more than one precept is considered by him to contain ‘limbs’ or ‘ancillaries’ (yan lag). The enumeration of these precepts is, however, not certain. For example, Rong-zom-pa seems to ignore the precept between numbers 4 and 5.52 Let us take a closer look at how Rong-zom-pa attempts to interpret these precepts as they pertain to the maintenance of bodhicitta:53

The mūlāpatti that involves the abandonment of bodhicitta cannot possibly occur to one who maintains bodhicitta by means of the four limbs, namely, taking refuge three times [daily], confessing negative deeds, generating bodhicitta, and making aspirational wish. The mūlāpatti that involves [succumbing to] greediness cannot possibly occur to one who is endowed with the three limbs, namely, constantly making an earnest effort to give, being free from greediness, and being endowed with compassion. The mūlāpatti that involves [harbouring] thoughts of cruelty (vyāpāda) cannot possibly occur to one who is endowed with two limbs, namely, constant possession of patience or receptivity (kṣānti) and of benevolence (maitrī).

For an English translation of the Chinese translation, see GIEBEL 2001: 150. Cf. the citation in the mDo rgyas (A, fol. 157a3–b2; B, pp. 253.18–254.5); ibid. (A, fol. 178a3–b2; B, pp. 278.23–279.9). Cf. the Kraṇayamāritantaraṇapāñjakā (P, fol. 199a6–b6; D, fol. 166a5–b4; S, vol. 23, p. 1139.4–21).

47 The Tibetan word employed for mātsarya is 'jungs pa, which is recorded in the Tshig mdzod chen mo (s.v.) as an archaic word with the meaning of serva.

48 In the quoted text of the Susiddhikaratantra (see n. 46), nos. 14 and 15 are counted as one, for good syntactic reasons, but Rong-zom-pa (see n. 54) counts them separately.

49 For Rong-zom-pa’s interpretation of this precept, see precept no. 7 in n. 54.

50 That is, (1) bhikṣus, (2) bhikṣunīs, (3) upāsakas, and (4) upāsikās (Tshig mdzod chen mo, s.v. ‘khor rnam bzhi).

51 According to some, however, the Susiddhikaratantra teaches thirty pledges. See the Shes bya mdzod (p. 373.6–14).

52 See the precept marked with [?] in n. 46. The verse seems to mean: “Whatever ritual procedure [a practitioner engages in] should be carried out as practicability dictates and to the best of [his or her] ability.”

53 mDo rgyas (A, fol. 157b2–5; B, p. 254.5–12): de la dus gsum du skyabs su ‘gro ba dang [deng A] | sdig pa bshags pa dang | byang chub kyi sems bskyed pa dang | smon lam gday pa ste | ‘di litar yan lag bzhi’i sgo nas byang chub kyi sems ’dzin pa la ni | lung ba’i rtsa ba byang chub kyi sems spong ba ‘byung ba’i gnas med do || rtag tu gsong ba la brson pa dang | ‘jungs pa dang bral ba dang | snying rier ldan pa ste | yan lag gsum dang ldan pa la ni lung ba’i rtsa ba ser sna ‘byung ba’i gnas med do || rtag tu bzod pa dang byams par ldan pa ste yan lag gnyis dang ldan pa la ni | lung ba’i rtsa ba gnod sems ‘byung ba’i gnas med do ||

For an English translation of the Chinese translation, see GIEBEL 2001: 150. Cf. the citation in the mDo rgyas (A, fol. 157a3–b2; B, pp. 253.18–254.5); ibid. (A, fol. 178a3–b2; B, pp. 278.23–279.9). Cf. the Kraṇayamāritantaraṇapāñjakā (P, fol. 199a6–b6; D, fol. 166a5–b4; S, vol. 23, p. 1139.4–21).

47 The Tibetan word employed for mātsarya is 'jungs pa, which is recorded in the Tshig mdzod chen mo (s.v.) as an archaic word with the meaning of serva.

48 In the quoted text of the Susiddhikaratantra (see n. 46), nos. 14 and 15 are counted as one, for good syntactic reasons, but Rong-zom-pa (see n. 54) counts them separately.

49 For Rong-zom-pa's interpretation of this precept, see precept no. 7 in n. 54.

50 That is, (1) bhikṣus, (2) bhikṣunīs, (3) upāsakas, and (4) upāsikās (Tshig mdzod chen mo, s.v. 'khor rnam bzhi).

51 According to some, however, the Susiddhikaratantra teaches thirty pledges. See the Shes bya mdzod (p. 373.6–14).

52 See the precept marked with [?] in n. 46. The verse seems to mean: “Whatever ritual procedure [a practitioner engages in] should be carried out as practicability dictates and to the best of [his or her] ability.”

53 mDo rgyas (A, fol. 157b2–5; B, p. 254.5–12): de la dus gsum du skyabs su ‘gro ba dang [deng A] | sdig pa bshags pa dang | byang chub kyi sems bskyed pa dang | smon lam gday pa ste | ‘di litar yan lag bzhi’i sgo nas byang chub kyi sems ’dzin pa la ni | lung ba’i rtsa ba byang chub kyi sems spong ba ‘byung ba’i gnas med do || rtag tu gsong ba la brson pa dang | ‘jungs pa dang bral ba dang | snying rier ldan pa ste | yan lag gsum dang ldan pa la ni lung ba’i rtsa ba ser sna ‘byung ba’i gnas med do || rtag tu bzod pa dang byams par ldan pa ste yan lag gnyis dang ldan pa la ni | lung ba’i rtsa ba gnod sems ‘byung ba’i gnas med do ||
So much for these three mūlāpatti. Concerning the mūlāpatti that involves the abandonment of the saddharma, the following explanation is given:\textsuperscript{54}

The mūlāpatti that involves the abandonment of the saddharma cannot possibly occur to one who upholds (or maintains) the saddharma by virtue of possessing the eight limbs, as follows: [1] listening to the various teachings (dharma), [2] analysing [them] with devotion (adhimukti), [3] reading detailed tantric ritual procedures (vidhi), [4] making offerings (pūja), that is, making two offerings, [one] external and [one] internal, consisting [each of] tantric formulas (mantra) and tantric gestures (mudrā), [5] bestowing empowerments (abhiseka) and pledges upon disciples in a mandala in accordance with (lit. without contravening) the ritual procedures (vidhi), [6] initiating the four kinds of followers—bhikṣus and so forth—who are firm in [their] bodhicitta.\textsuperscript{55} [7] expounding tantras of [one's] pledges,\textsuperscript{56} and [8] propagating tantric scriptural transmissions.

To summarise, four of these precepts (nos. 1–4) are supposed to prevent one from committing the mūlāpatti of abandoning bodhicitta; three precepts (nos. 5–7), from committing the mūlāpatti of succumbing to greediness; two precepts (nos. 8–9), from committing the mūlāpatti of harbouring thoughts of cruelty (vyāpāda); and eight precepts (nos. 12–19), from committing the mūlāpatti of abandoning the Sublime Doctrine (saddharma). In addition, precept no. 10, the constant possession of diligence, is said to be compatible with all other precepts,\textsuperscript{57} and precept no. 11, consisting of the practice of the six kinds of mindfulness (anusmṛti), to be an antidote for all four mūlāpatti.\textsuperscript{58} The Susiddhikaratrantra passage quoted by Rong-zom-pa mentions, to be sure, six anusmṛtis but does not list them. The six anusmṛtis as recorded, for example, in the Mahāvyutpatti,\textsuperscript{59} are buddhānusmṛti, dharmaṇusmṛti, samghānusmṛti, śīlānusmṛti, tyāgānusmṛti, and devatānusmṛti. Instead of śīlānusmṛti, Rong-zom-pa has anāpānānusmṛti (‘mindfulness of breathing’).\textsuperscript{60} He states: \textsuperscript{61}

Also, amongst the six kinds of anusmṛtis, the anusmṛtis pertaining to the Three Jewels (i.e. buddhānusmṛti, dharmaṇusmṛti, and samghānusmṛti) are what causes bodhicitta to arise and the efficacy of strategies (upāyakauśalya) to be maintained. Two, namely, tyāgānusmṛti

\textsuperscript{55} Note that the pertinent verse in the Susiddhikaratrantra has also the ascertainment of the correct view (samyagdrṣṭi), which is omitted by Rong-zom-pa.

\textsuperscript{56} Or, perhaps: “expounding tantras of the Mantra[yāna] to those disciples who abide by the ‘seal’ (mudrā) of pledges.”

\textsuperscript{57} mDo rgyas (A, fol. 157b5; B, p. 254.12): brtson 'grus ni kun gyi grols so ||.

\textsuperscript{58} See n. 61.

\textsuperscript{59} Mahāvyutpatti, nos. 1148–1154; BHSD, s.v. anusmṛti.

\textsuperscript{60} See BHSD, s.vv. anusmṛti and anāpāna.

\textsuperscript{61} mDo rgyas (A, fol. 157b5–158a2; B, p. 254.12–18): rjes su dran pa drug kyang dkon mchog gsum rjes su dran pa gsum ni | byang chub kyi sens 'byung ba 'i rgyu dang thabs la mkhas pa 'di zin pa 'i rgyo'o || gton ba rjes su dran pa dang | lha rjes su dran pa gnyis ni | rgyu dang 'bras bu gnyis kyi sgo nas ser sna dang gnod sms kyi gnyen po' o || dbugs [dbug B] phyi nang du rgyu ba rjes su dran pa ni rnam par ma zhi ba 'i gnyen po ste | de dag kyang bsam pa des pas bsogom pas ni khengs pa dang dregs rgyags kyi gnyen por 'gyur te | de bas na rjes su dran pa drug po 'di nyid kyi kyang lhung ba 'i rtsa ba bszi' gnyen por 'gyur ro ||.
(‘mindfulness of giving’) and devatānusmṛti (‘mindfulness of deities’), are, in terms of cause and result, antidotes for greediness (mātsarya) and cruelty (vyāpāda), [respectively]. The ānāpānānusmṛti is an antidote for restlessness (or unruleliness). The practice of these with a gentle attitude (sauratya) will be an antidote for haughtiness (unnati) and arrogance (māda). Therefore, the six anusmṛtis, too, can [serve as] antidotes for the four mūlāpattis.

Rong-zom-pa concludes his discussion of the precepts presented in the Susiddhikaratana with the following remarks.\(^62\)

In some treatises there is also the statement that there are five [śikṣāpadas], namely, the four śikṣāpadas pertaining to [the abandonment of] the four mūlāpattis, and the abandonment of meat and alcohol as the fifth. Of the latter, the abandonment of meat is [associated with] the maintenance of great compassion. Cruelty (vyāpāda) and greediness (mātsarya) will recede from one who possesses it (i.e. great compassion). Therefore, all the vows (samvara) taught in Mahāyāna are supplementary elements in the maintenance of bodhicitta.

(d) The Subhūparipṛcchātantra

Finally, let us look at how the śikṣāpadas, the pledges, and the maintenance of bodhicitta are dealt with in another kriyātantra, namely, the Subhūparipṛcchātantra. The Subhūparipṛcchātantra devises an ethical-spiritual code of nine precepts:\(^63\) (1) avoiding greediness (mātsarya), (2) avoiding conceit (*dārpa), (3) avoiding arrogance (*mada), (4) avoiding causing harm (*apakāra), (5) avoiding alcoholic consumption,\(^65\) (6) avoiding harsh words (pārṣuṣya), (7) avoiding vain words (pralāpa), (8) avoiding slanderous words (paiṣuṇya), and (9) avoiding false views (mīthyaḍrśti). The first four śikṣāpadas involve not committing the four mūlāpattis, which are, however, not identical with what we have seen thus far.\(^66\) Obviously, the śikṣāpadas associated with the mind or with attitude are here considered to be more important. The correct view (samyagādṛśti) is given a prominent status, the abandonment of false views (mīthyaḍrśti) being considered the root of the śikṣāpadas. The tantra compares a mind overcome by false views to a burnt seed, which is incapable of giving rise to any wholesome virtue.\(^67\)

---

\(^62\) mDo rgyas (A, fol. 158a4–6; B, p. 255.1–5): gzhung lâ las ni bslab pa’i gzhis rtsa ba bzhis dang sha chang spangs ba ste lngar gsungs pa yang yod na | de la sha spang ba ni snying tje chen po ‘dzin pa yin la | gang de yod na gnod sems dang ser sna yang ldog par ‘gyur te | de bas na theg pa chen por gsungs pa’i sdom pa thams cad kyang bychub kyi sems gsungs ba’i yan lag yin no ||.

See also the citation in ibid. (A, fol. 185a4–6; B, pp. 286.22–287.2). Cf. the Subhūparipṛcchātantra (T, fol. 390a6–b1; D, fol. 118b2–4).

\(^64\) TSD, s.v. rgyags pa.

\(^65\) Note that the xylographic edition of the text (A) reads chang dad byed pa, which must mean something like ‘craving for alcohol’ (see Jäschke, s.v. dad pa: secondary form of ‘dod pa’), whereas the modern edition (B) reads chang dang byed pa, which makes no sense.

\(^66\) mDo rgyas (A, fol. 156b5; B, p. 253.9–10): lung ba’i rtsa ba’ang | ser sna dang | dregs pa dang | rgyags pa dang | gnod par byed pa spang bar gsungs te |.

\(^67\) Subhūparipṛcchātantra (T, fol. 390b1–3; D, fol. 118b4–5): dper na sa dang chu dang dus idan yang || sa bon tshig pa myu gu mi skye ltar || de bzhin mi shes log ltaas bcom pa yi ||
The *Subähupariprcchātantra* also deals with the characteristic Mahāyāna ethical-moral discipline including the generation of bodhicitta out of faith (śraddhā). According to it, just as a king endowed with the 'seven limbs' can conquer the world without difficulty, so too can a tantric practitioner (*māntrin*) endowed with the seven limbs specified below conquer evil deeds (pāpa). The seven limbs pertaining to the maintenance of bodhicitta are, according to the *Subähupariprcchātantra*, the following: (1) ethical-moral discipline (*śīla*), (2) diligence (*vīrya*), (3) endurance or receptivity (*ksānti*), (4) faith (*śraddhā*), (5) bodhicitta, (6) mantra, and (7) absence of laziness (kauśīḍya). Rong-zom-pa briefly explains the seven as follows:

1. The ethical-moral discipline consisting in vows (saṃvaraśīla) is the basis and the root of bodhicitta. 2. Diligence (*vīrya*) is the impetus behind it. 3. Endurance (*ksānti*) is the acceptance of bodhicitta. 4. Faith (*śraddhā*) is its cause. 5. Mantras are a quick [means of] attaining [it]. 6. Learning [is characterised by] the absence of laziness (kauśīḍya). [These six and bodhicitta (i.e. no. 5)] embody the nature of the seven limbs of awakening (bodhyanga). 7. The nature of bodhicitta itself is here [seen to be] the power (bala) of pranidhīcitta. If one possesses it, one is able to keep all vows (saṃvara), and there are no broken and [seemingly] irreparable prātimokṣa vows that cannot be restored if renewed by the power of this [bodhicitta]. Rong-zom-pa also states that in both Kriyā and Yoga tantric systems the application of one's body, speech, and mind to the yogic practices pertaining to deities in reliance upon bodhicitta constitutes the principal part of all pledges (samaya).

---

*sems la* [las T] dge ba'i chos rnams mi skye 'o ||
de phyir log par lta ba rnam spangs la ||
yang dag lta ba la ni rten [bsten T] par gyis ||.

See the citation in the mDo rgyas (A, fol. 158a6–b3; B, p. 255.5–12), where the text corresponds with the reading in D. The verses are also cited in *ibid.* (A, fol. 197a3–4; B, p. 300.15–19).

71 mDo rgyas (A, fol. 158b3–5; B, p. 255.12–18): *de la sdom pa'i tshul khriims ni byang chub kyi sems kyi gzhi dang rtsa ba'o || brtson 'grus ni bsksu ba'o || bzod pa ni 'dzin pa'o || dad pa ni rgyu'o || gsang snags ni myur du bsgrub pa'o || thos pa ni le lo med pa ste byang chub yan lag bdun gyi rang bzhin no || byang chub kyi sems kyi rang gi ngo bo ni | 'dir smon pa'i sems stobs te || 'di yod na sdom pa kun kyang 'dzin par nus shing | so so thar pa'i sdom pa zhig cing gsor mi rung bar gyur pa rnams kyang 'di'i stobs la brten nas blangs na mi 'thob pa med do zhes so ||.

72 mDo rgyas (A, fol. 201a5–6; B, p. 305.13–17): mdor na byang chub kyi sems la brten nas rang gi lus ngag yid gsum lha'i rnal 'byor du bya ba 'di ni dam tshig thams cad kyi dngos gzhir gyur pa bya'i rgyud dang rnal 'byor
We shall now examine the pledges and the maintenance of bodhicitta as presented in the yogatantras (rnal 'byor gyi rgyud). As noted by Kong-sprul, there are too many pledges and transgressions (äpatti) in the yogatantras to be summarised along consistent lines.\(^{73}\) I use the term yogatantra here in a narrow sense of the word to refer to only what is occasionally called ‘outer yoga’ (rnal 'byor phyi pa),\(^{74}\) which excludes all ‘inner tantras’ (nang rgyud) or mahäyogatantras (rnal 'byor chen po'i rgyud), which in turn should be differentiated from tantras belonging to the Mahåyåha class, to which we shall return later. For Rong-zom-pa, tantras such as the Durgatiparisodhanatantra, Vajraähikaratantra,\(^{75}\) Śrīparamäidyatantra,\(^{76}\) and Tatvasamgrahasūtra\(^{77}\) are yogatantras.

(a) The Durgatiparisodhanatantra

Again we may begin by considering the various schemes of sīkṣāpadas and pledges. The Durgatiparisodhanatantra mentions the following seven sīkṣāpadas: \(^{78}\) (1) not killing, (2) not stealing, (3) not telling lies, (4) not committing sexual misconduct, (5) not consuming alcohol, (6) not eating meat or the like,\(^{79}\) and (7) never injuring sentient beings.\(^{80}\) As for the basic

\[\text{g}y\text{i r}y\text{g}u\text{d g}n\text{yis g}a\text{r} \left(= \text{kar}' \text{thun m}o\text{n}g \text{du g}r\text{ags p}a \text{[b}a \text{B]} \text{yin te} \right] \text{m}a\text{n ng}a\text{g d}a\text{n}g \text{l}a\text{n}g \text{d}a\text{n}g \text{r}i\text{g} \left(= \text{r}i\text{gs} \right) \text{p}a\text{ s}a\text{r} \text{p}a'\text{o} \text{z}h\text{e}s \text{l}u\text{n}g \text{n}\text{yid} \text{l}a\text{s g}u\text{s}u\text{n}g \text{p}a'\text{o} \left| \right.}
\]

\(^{73}\) Shes bya mdzod (p. 377.20–21): spyi rnal 'byor rgyud las dam tshig dang ltung ba'i rnam grangs bshad pa ni shin tu mang bas mtha' gcig tu bsdu mi nus so \].

\(^{74}\) For references, see n. 27.

\(^{75}\) The Vajraśekharatantra (or Vajraśekharatantra) is designated by Rong-zom-pa as a yogatantra (rnal 'byor gyi rgyud) and as an ‘outer tantra’ (phyi'i rgyud). See the mDo rgyas (A, fols. 152b6–153a1; B, p. 248.18–21): tshul 'di ni bya ba'i rgyud 'ba' zhig tu ma zad [thad B] kyi | rnal 'byor gyi rgyud du yang de bzhin du gshungs te | rnal 'byor gyi rgyud thams cad kyi äonggs pa dang cho ga ston pa phyi'i rgyud rdo rje rtsé mo las ...); ibid. (A, fol. 227b3; B, p. 336.10–11): rnal 'byor gyi rgyud du'ang rdo rje rtsé mo lta bu ni spyi'i tshul bstan pa |. See also the Nyang ral chos 'byung (p. 309.19), where it is treated as one of the four outer yogatantras. Cf. the title Vajraśekhara in HODGE 2003: 11, 12. For an English translation of the Vajraśekharatantra from the Chinese translation (Taishö, vol. 18, no. 865) by Amoghavajra (705–774), see GIEBEL 2001: 1–107.

\(^{76}\) The Śrīparamādyatantra is also considered to be a yogatantra in the Nyang ral chos 'byung (p. 309.19). For some details on the Tibetan translation of this tantra, see DE JONG 1979: 635.

\(^{77}\) Note that while the Tatvasamgrahasūtra is, according to some, a yogatantra, according to others it is a mahāyogatantra. See the mDo rgyas (A, fol. 227b3; B, p. 336.10–12): rnal 'byor gyi rgyud du'ang ... ta twa sang gra ha lta bu ni zab mo'i tshul bstan pa'o zhes grags so || de nyid kys' [= kyi'] dbang gis ta twa sang gra ha ni rnal 'byor chen po'i rgyud yin no zhes kyang zer ro ||. It is also classified as a yogatantra in the Nyang ral chos 'byung (p. 309.18).

\(^{78}\) The Durgatiparisodhanatantra, as cited in the mDo rgyas (A, fol. 209a4–5; B, p. 314.19–22):
\[
\text{khyod kys srog chags bsad mi bya} || \\
\text{ma byin par yang blang mi bya} || \\
\text{rdzun dang 'dod pa spyod pa rnam} || \\
\text{dngos grub 'dod pas bya ba min} || \\
\text{chang ni biung bar mi bya zhing} || \\
\text{sha la sosgs pa bs'a' mi bya} || \\
\text{sans can gnod par sbyor ba ni} || \\
\text{nam [nams B] yang bya ba ma yin no} ||.
\]

Cf. the Durgatiparisodhanatantra (Tib. A, p. 316.27–31).

\(^{79}\) The phrase ‘or the like’ here is probably intended to include fish.
pledges (rtsa ba'i dam tshig), Rong-zom-pa states that, in most cases (phal cher), there are seven basic pledges according to the Durgatiparisodhanatantra. If I understand him correctly, these seven are:

1. not abandoning the Three Jewels,
2. not abandoning bodhicitta,
3. not abandoning hrdayas, mantras, and mudrās,
4. not abandoning devatās,
5. not abandoning one’s guru (or vajrācārya),
6. not insulting one’s Vajra brothers (vajrabhrat),
7. not revealing tantric secrets.

It is to be noted, however, that these seven are, in Rong-zom-pa’s own words, not found ‘in one cluster’ (tshoms gcig tu) in the Durgatiparisodhanatantra and are, in fact, not specified as seven. The first five are found together in one passage, the fifth is mentioned again together with the sixth in another passage, and the seventh is mentioned separately in yet another passage. Theoretically, one could enumerate the non-abandonment of the Three Jewels as three, the non-abandonment of mantras and mudrās as three, and so forth. But, as far as I can see, Rong-zom-pa counted the basic pledges as I have indicated above. That the non-abandonment of mantras and mudrās could be treated as one was, in any case, known to Rong-zom-pa from the Guhyagarbhatantra, where the non-abandonment of the two is listed as one of five basic pledges.

He also justifies why these seven pledges, although scattered in different places in the Durgatiparisodhanatantra, can still be considered basic pledges. That only five (and not all seven) basic pledges are taught in one cluster can, according to him, be explained by the fact that the yogatantras do not emphasise group practice in a mandala (thsogs kyi dkyil 'kor gyi sgrub pa), there being hence no need to stress the sixth and seventh basic pledges, which are connected with fellow tantric practitioners and with the disclosure of secret tantric activities.83

80 Durgatiparisodhanatantra (p. 216.22–23):
prāṇinaś ca na saṃghāyā adattama naiva cāhare
mrṣā naiva ca bhāṣāta nācare tatparastriyam ||

See also ibid. (Tib. A, p. 351.24–25) and the citation in the mDo rgyas (A, fol. 209b2–3; B, p. 315.5–6):
srog chags rnam ni bsad mi bya ||
ma byin par yang mi blang zhing ||
rdzun du smra ba bya ba min ||
pha rol bud med spyad mi bya ||

81 mDo rgyas (A, fol. 209b3–210a2; B, p. 315.7–19): rtsa ba'i dam tshig ni phal cher bdun du grags te 'di ltar dpal ngan song sbyong ba las | rtsa ba'i dkyil 'kor cher por dam bsgrags pa'i skabs su gsungs pa | 'di ltar dkyil 'kor cher por dam bsgrags pa'i skabs su gsungs pa | 'di ltar dkyil 'kor cher por dam bsgrags pa'i skabs su gsungs pa | 'di ltar dkyil 'kor cher por dam bsgrags pa'i skabs su gsungs pa ||

82 This term rdo rje ma seems to be connected rather than to female tantric deities (cf. TSD, s.v. rdo rje ma).

83 mDo rgyas (A, fol. 210a2–6; B, pp. 315.19–316.3): gang dag 'di skad du 'di dag tshogs gcig tu gril nas ma gsungs pas rtsa bar 'gyur bar nges pa med do zhes bsam par mi bya ste | 'di ltar tse dpag med kyi dkyil 'kor du dbang bsgr ba rgyas par gsungs pa | rtsa ba'i dkyil 'kor la sogz su gzhann du sbyar du mi rungs ba med pa bzhin no || 'di dag tshogs gcig tu ma gsungs pa'i dgongs pa 'di yin par dgongs te [ste B] rnal 'byor gyi sgrub 'di dag tu tshogs kyi dkyil 'kor gyi sgrub pa gtsor ma bstan pas | 'de'i phyir rdo rje mched kyim dam tshig dang
Thus only the first five out of the seven are regarded as principal basic pledges. These recur in the *Durgatipariśodhanatantra* in slightly different wording.\(^8^4\) Rong-zom-pa has made it clear that the Yoga tantric system follows the scheme of fourteen *mūlāpattis*.\(^8^5\) Nevertheless, it seems that these fourteen *mūlāpattis* are not found in the *Durgatipariśodhanatantra*.

(b) The *Vajraśīkharatantra*

We shall now examine what the next *yogatantra*, namely, the *Vajraśīkharatantra*, has to say about the *sikṣāpadas*, basic pledges, and *mūlāpattis*. The *sikṣāpadas* taught in the *Vajraśīkharatantra*,\(^8^6\) according to Rong-zom-pa, involve adopting ten courses of wholesome

\(^8^4\) *Durgatipariśodhanatantra*, as cited in the *mDo rgyas* (A, fol. 210a6–b2; B, p. 316.4–8):

\[\text{gsang ba'i spyod pa mi bstan cing mi smra ba'i dam tshig la yang | yang dang yang nan tan bskyped mi dgos te gtsor nan tan bskyped na ni rnam pa lnga yin par dgongs te | de'i phyir rtsa ba'i dkyil 'khor du'ang tshoms gcig tu lnga po gtsor bstan la |.}\]

\(^8^5\) See n. 94.

\(^8^6\) *Vajraśīkharatantra*, as cited in the *mDo rgyas* (A, fol. 209a5–b1; B, pp. 314.22–315.2):

\[\text{khyod kyis srog chags bsad mi bya |}
\text{ma byin par yang blang mi bya |}
\text{rdzun pa'i tshig nyid smra mi bya |}
\text{nyes pa kun gyi rtsa ba yin [\^= yi] |}
\text{myos byed btung ba rnam [rnam B] par spang |}
\text{bya ba ma yin spang ba nyid |}
\text{rnal 'byor pa la bsnyen bkur bya |}
\text{lus kyi las ni rnam gsum dang |}
\text{ngag gi yang ni rnam pa bzhi |}
\text{yid kyi rnam pa gsum dag ni |}
\text{rtag tu spang zhih bsrung bar bya |.}\]

Cf. *Vajraśīkharatantra* (D, fol. 156b4–6):

\[\text{khyod kyis srog chags gsad mi bya |}
\text{ma byin pa yang blang mi bya |}
\text{'dod pas log par g.yem mi bya |}
\text{brdzun du yang ni smra mi bya |}

attitude or action (daśakuśalakarmapathasamādāna) in general,\(^87\) and of avoiding the four mūlāpañcatīs (such as homicide) and lesser failings (such as consumption of intoxicating drinks) in particular.\(^88\) The details of the śiksāpadas taught in the two yogatantras, the Vajraśikharatantra and the Durgatiparīśodhanatantra, however, differ slightly. For example, while the consumption of alcoholic drinks is mentioned in both, the consumption of meat is mentioned only in the Durgatiparīśodhanatantra. We have seen above that Rong-zom-pa put together seven basic pledges of the Durgatiparīśodhanatantra, of which five are principal ones. These five main pledges are also mentioned in the Vajraśikharatantra, as follows:\(^89\) (1) adopting the Three Jewels, (2) adopting a ‘chief’ (gtso bo), (3) not abandoning bodhicitta, (4) not abandoning devatās, and (5) not abandoning mantras and mudrās. Minor differences are noticeable in the sequence and the terminology employed. It is, however, possible that the sequence varies due to the Tibetan translation. Presumably, the term ‘chief’ should be understood to be referring to the tantric master or guru.

The Vajraśikharatantra, unlike the Durgatiparīśodhanatantra, proposes a scheme of fourteen mūlāpañcatīs, or, when positively formulated, fourteen basic precepts.\(^90\) Rong-zom-pa

---

\(^{87}\) For the term daśakuśalakarmapathasamādāna, see BHSD, s.v. karmapatha.

\(^{88}\) mDo rgyas (A, fol. 209a1–2; B, p. 314.14–16): ‘dir yang bslab pa’i gshi ni dge ba bcu’i las kyi lam yang dag par blang ba dang | khyad par du’ang srog gcod pa la soa s pa rtsa ba bzhi yan lag dang bcas par spang bar gsungs te |.

\end{verbatim}
conveniently enumerates the fourteen basic precepts by sorting them out according to the so-called ‘five families’ (pañcakula).\(^9^1\) (1) four limbs for the Tathāgata family, namely, holding fast to three kinds of śīla, which are counted as three, and holding fast to the Three Jewels, counted as one, (2) two limbs for the Vajra family, namely, holding fast to bodhicitta and adhering to a vajrācārya, (3) four limbs for the Ratna family, namely, making gifts of material things (āmiṣa), benevolence (maṭri), security or protection (abhaya), and doctrine (dharma),\(^9^2\) (4) two limbs for the Padma family, namely, holding fast to the saddharma of three outer and three inner vehicles,\(^9^3\) and (5) two limbs for the Karma family, namely, paying homage to noble beings (e.g. a bodhisattva of the first bhūmi and higher) and acting for the benefit of sentient beings.

Rong-zom-pa notes that the generation of bodhicitta is common to all fourteen limbs. According to him, the Kriyā tantric system mainly follows the pattern of four basic mūlāpattis, whereas the Yoga tantric system follows the model of fourteen mūlāpattis. He adds that the four mūlāpattis found in the non-tantric and conservative Mahāyāna and in the Kriyā system of the Vajrayāna can be accommodated within the fourteen mūlāpattis of the Yoga system.\(^9^4\) This is done by employing the positive term ‘pledge’ (samaya) and not the three kinds of dāna are commonly known (DAYAL 1932: 173; TSD, s.v. gsang pa) and the perfect sense phyi nang gsang ba’i theg pa makes to a Tibetan scholar (phyi nang gsang gsum being a quite common expression), can explain this rather inevitable mistake. That Rong-zom-pa himself read dang can be deduced from the fact that, based on this verse, he counted one outer vehicle and three secret vehicles. See the passage dealing with four vehicles in chapter five.

\(^9^1\) mDo rgyas (A, fol. 211b2–5; B, p. 317.13–20): ‘dir yan lag bcu bzhi bgrang ba ni byang chub kyi sems bskyed pa spiyir byang ste | de bzhi gshegs pa’i rigs la tsul khrims rnam pa gsum gzang ba dang | dkon mchog gsum bzung ba ste yan lag bzhi rdo rje’i rigs la byang chub kyi sems gzang ba dang rdo rje slob dpon gzang ba ste yan lag gnyis | rin po che’i rigs la sbyin pa rnam [rnam B] pa bzhi gzang ba ste yan lag bzhi | pad ma’i rigs la phyi’i theg pa gsum gzang ba dang | gsang ba’i theg pa gsum gzang ba ste yan lag gnyis | las kyi rigs la ’phags pa mchod pa dang sems can gyi don bya ba ste yan lag gnyis te | de ltar bcu bzhi ni phas pham pa zhes bya ba ste rtsa ba’i ltung ba bcu bzhi zhes gnam so |.

\(^9^2\) Three kinds of zang zing gi sbyin pa, namely, making gifts of material things (āmiṣa), security or protection (abhaya), and doctrine (dharma). The conferring of benevolence (maṭri) is, hence, somewhat unusual.

\(^9^3\) For the three outer vehicles (phyi’i theg pa gsum) and three secret vehicles (gsang ba’i theg pa gsum), see Rong-zom-pa’s explanation of the four-vehicle model in chapter five.

\(^9^4\) mDo rgyas (A, fol. 210b5–6; B, p. 316.15–18): gzhan yang bya ba’i rgyud las ni rtsa ba’i ltung ba bzhi gtsor gzlag la | rnal ’byor gyi rgyud du ni rtsa ba’i ltung ba bcu bzhi zhes bstan te | des ni snga ma’i rtsa ba’i ltung ba bzhi’ang ’dus la de bas lhag pa’ang rtsa ba’i ltung bar bstan to |.
negative term ‘transgression’ (āpatti). That is to say, the non-abandonment of the Sublime Doctrine (saddharma) is included in the pledge pertaining to the Padma family, the non-abandonment of bodhicitta is included in the pledge pertaining to the Vajra family, not nourishing greediness (mātsarya) is included in the pledge pertaining to the Ratna family, not inflicting injury to sentient beings is included in the pledge pertaining to the Tathāgata family, and all activities associated with the precepts (samvara) are included in the pledge pertaining to the Karma family.95

Let us now consider the relevance of the maintenance of bodhicitta within the framework of these fourteen basic precepts. Rong-zom-pa states:96

As for how bodhicitta can be maintained on the basis of these explanations of the śikṣāpadas, basic [precepts], and mūlāpattis, this should be known as explained above in the context of the Kriyā tantric [system]. Here, too, in the context of the [fourteen] basic precepts, [it is] therefore [explained as follows:] Holding fast to the three silas is the foundation of bodhicitta. Likewise, holding fast to the Three Jewels is the cause of bodhicitta. Holding fast to bodhicitta is its actual essence. The vajrācārya is the conferrer of bodhicitta. The four kinds of giving (dāna) are the antidotes for the factors opposing it (i.e. bodhicitta). Upholding the saddharma is to hold fast to the efficient strategies [necessary for salvific activities]. Paying homage to the noble ones and acting for the benefit of sentient beings is to accomplish the activities natural to it. In this way, [refraining from committing] all these fourteen mūlāpattis (i.e. keeping the fourteen basic precepts) is seen to be ancillary to the maintenance of bodhicitta.

(c) The Śrīpamādyatantra

The Śrīpamādyatantra, also belonging to the Yoga class, mentions seven pledges, all of which, according to Rong-zom-pa, serve to maintain bodhicitta.97 Interestingly, forty-two original Sanskrit verses of the Śrīpamādyatantra containing the seven pledges have been a subject of several publications among specialists in Old Javanese literature, beginning from as early as 1910. These Sanskrit verses became known to the specialists when the Old Javanese was translated and commented. Several scholars—principally J. Kats, J. S. Speyer, K. Wulff, H. von Glasenapp, Unrai Wogihara, Sakai Shirō, and J. W. de Jong—have contributed in different ways to the study of these verses.98 Rong-zom-pa cites nine and a half verses (roughly corresponding to the verses numbered 28–36 in de Jong’s edition).99 According to

95 mDo rgyas (A, fol. 211a6–b2; B, p. 317.9–13): de ltar na gong gi rtsa ba'i ltung ba bzhi'ang | 'dus te | dam pa'i chos mi spang ba ni pad ma'i rigs | byang chub kyi sems mi giang ba ni rdo rje'i rigs | ser sna mi bya ba ni rin po che'i rigs | sems can la gnod pa mi bya ba ni de bzhi gshegs pa'i rigs | sdom pa thams cad kyi las ni las kyi rigs so ।

96 mDo rgyas (A, fols. 211b5–212a3; B, pp. 317.20–318.6): de ltar bslab pa'i gzi dang rtsa ba dang rtsa ba'i ltung ba bshad pa de dag gis kyang byang chub kyi sems yongs su 'dzin pa ji ltar 'gyur ba ni | gong du bya ba'i rgyud kyi skabs su ji ltar bstan pa bzhi nu 'dir yang shes par bya'o || de bas na rtsa ba'i skabs 'dir ['dar A] yang | tshul khrims gsum gzung ba ni byang chub kyi sems kyi gzi'o || de bzhi du dkon mchog gsum gzung ba ni de'i rgyu msham no || byang chub kyi [kyis B] sems gzung ba ni rang gi ngo bo'o || rdo rje slob dpon ni de sbyin par byed pa'o || sbyin pa rnam pa bzhi ni | de'i mi mthun pa'i phyogs kyi gnen po'o || dam pa'i chos yongs su bzun ba ni de'i thabs la mkhas pa 'dzin par byed pa'o || 'phags pa mchod pa dang sems can gyi don bya ba ni | de'i 'phrin las yongs su sgrub pa ste | de ltar na rtsa ba'i ltung ba bzs cu bzhi po 'di dag gis kyang byang chub kyi sems yongs su gzung ba'i yan lag tu gyur pa'o ।

97 mDo rgyas (A, fol. 212a3–4; B, p. 318.6–8): gzhun yang dpal mchog dang po las | lha thun mong gi sdom pa'i dbang du gsums pa | rtsa ba'i ltung bar gyur pa | byang chub kyi sems yongs su gzung ba'i yan lag tu gyur pa | dam thig bdun gsums te ।

98 For an account of these scholars’ study of the Sanskrit verses of the Śrīpamādyatantra, see DE JONG 1979: 619–622.
him, the Śrīparamādyatantra in general teaches how to abide by the directives (ājñā) of the buddhas. In particular, it has laid down seven pledges, which can be grouped into ‘six kinds of things that should not be done’ (bya ba ma yin pa rnam pa drug), and ‘three which should always be done’ (tag tu bya ba gsun), the latter being counted as one,\(^{100}\) (1) not abandoning bodhicitta,\(^{101}\) (2) not abandoning the mudrā of bodhicitta,\(^{102}\) (3) not abandoning the saddhā,\(^{103}\) which is the efficient strategy necessary for salvific activities motivated by bodhicitta, (4) not revealing ‘great methods’ out of ignorance or confusion, so that bodhicitta is not destroyed in the mental continuum of others,\(^{104}\) (5) not tormenting oneself (embodying as one does bodhicitta and a future buddha) with austerities (tapas),\(^{105}\) so that bodhicitta is not destroyed in one’s mental continuum, (6) not disparaging the acārya,\(^{106}\) the giver of

99 For the Sanskrit and Tibetan texts of the Śrīparamādyatantra dealing with the seven pledges, see DE JONG 1979: 627–629 (verse nos. 28–36). The verses found there, however, do not correspond exactly with those cited in the mDo rgyas (A, fol. 212a4–b5; B, p. 318.9–24). For instance, verse 32ab in DE JONG 1979: 628 has no parallel in the mDo rgyas.

100 mDo rgyas (A, fol. 212b5–213a3; B, pp. 318.24–319.8): de byang chub kyi sems mi gtang ba dang | rig tu dam tshig bsrum bar gsungs pa ni spyir bstan pa ste | bye brag tu gsungs pa ni | (1) byang chub kyi sems mi gtang ba dang | (2) de’i phyag rgya mi spang ba dang | (3) de’i thabs la mkhas pa ’dzin pa dam pa’i chos mi spang ba dang | (4) de gzhon gyi rgyud la chud mi gzan pa’i mtshan nyid mi shes pa dang | rmongs pas thul chen mi bstan pa dang | (5) de bdag gi rgyud la chud mi gzan pa’i mtshan nyid | byang chub kyi sems kyi rang bzhin | rang gi lha’i bdag nyid du gnas par bya ba spangs te | dka’ thub kyi sdon gsum par bya ba dang | (6) de sbyin pa byed pa rdo rje slob dpon la brnyas par mi bya ba ste | de litar bya ba ma yin pa rnam pa drug spang ba dang | (7) tag tu bya ba gsun bstan pa ste de litar rnam pa bdun du gtags so ]

101 Śrīparamādyatantra (according to the edition in DE JONG 1979: 627–628, verse no. 29): bodhicittat tavāvāyāyaḥ yad vajram iti mudrayā | yasyotpādaikāmatreyāḥ buddha eva na samśayaḥ ]

The Tibetan translation:

gang zhig skyed pa tsam gyis ni ||
sangs rgyas nyid du dogs med pa’i ||
byang chub sems ni gtang mi bya ||
phyag rgya rdo rje gang yin pa ||

The Tibetan text cited by Rong-zom-pa (mDo rgyas, A, fol. 212a5–6; B, p. 318.10–11) varies slightly:

byang chub sems ni gtang mi bya ||
phyag rgya rdo rje gang yin pa’o ||
gang ni bkshed pa tsam gyis su ||
sangs rgyas nyid du dogs pa med ||

a According to de Jong, Wulff changes tavā to tvaya without indicating the MS reading, but his emendation is unnecessary. b De Jong notes that the Tibetan does not translate eka and that one perhaps should read yasootpādanamātreṇa.

102 Probably by mudrā Rong-zom-pa means the sceptre (vajra) and bell (ghanā). See the Śrīparamādyatantra (DE JONG 1979: 628, verse no. 32ab): vajraṃ ghanāṇ ca mudrāṇ ca na samyajya kadācana ]. Tibetan translation:

rdo rje dril bu phyag rgyas [= rgya] rnam ||
nam yang yongs su spang mi bya [||

This pāda, however, is missing from the group of verses cited in the mDo rgyas.

103 Śrīparamādyatantra (DE JONG 1979: 628, verse no. 30ab): saddhārmo na pratikṣeyah na tāyāṣ ca kadācana ]. Tibetan translation:

dam pa’i chos ni mi smod cing ||
nam yang btag bar mi bya’o [||

104 Cf. ibid., verse no. 30cd.

105 See ibid., verse no. 31.

106 See ibid., verse nos. 32cd–34.
bodhicitta, and (7) doing the ‘three things which should always be done.’ The ‘three things which should always be done’ are: 

1. always keeping the pledges, 
2. always paying homage to the tathāgatas, and 
3. always making offering to one’s guru.

It is also stated that meditating on Vajrasattva, who is characterised by bodhicitta, is supposed to automatically entail the observance of all pledges.

(d) The Tattvasaṃgrahasūtra

The Tattvasaṃgrahasūtra, yet another yogatantra, is said to emphasise the practice of bodhicitta and, in addition, to propose a set of five pledges. The five pledges, corresponding to the five kinds of deities (lha rnam pa lnga) associated with the four families (rigs bzhi), are: (1) the pledge pertaining to the tathāgatas, (2) the pledge pertaining to the Tathāgata family, (3) the pledge pertaining to the Vajra family, (4) the pledge pertaining to the Padma family, and (5) the pledge pertaining to the Ratna family.

The essence of the five pledges may be summarised as follows: (1) uniting with desire (rāga), explained as uniting with the practice of bodhicitta, is the pledge pertaining to the tathāgatas; (2) not becoming tired of desire, explained as the consolidation of bodhicitta, is the pledge pertaining to the Tathāgata family; (3) threatening malevolent people and those engaged in harming others and being benevolent to sentient beings constitute the pledge pertaining to the Vajra family; (4) not being attached to any activity, in virtue of knowing

---

107 Śrīparamādyatantra (DE JONG 1979: 629, verse no. 35):  

nityayā svasamayaḥ sādhyo nityayā pūyas tathāgataḥ ||

nityāṇ ca gurudevayām sarvabuddhāsamo hy asau ||.

Tibetan translation:

rtag tu rang gi dam tshig bsrong ||

rtag tu de bzhin gshegs pa mchod ||

rtag tu bla ma la yang dbul ['bul P] ||

'di ni s_ngs rgyas kun dang 'dra ||.

Cf. the verses cited in the mDo rgyas (A, fol. 212b3-4; B, p. 318.20-22):

rtag tu bdag gis dam tshig bsrong ||

rtag tu de bzhin gshegs pa mchod ||

rtag tu bla ma la yang dbul ||

'di ni s_ngs rgyas kun dang 'dra ||.

De Jong notes the reading in Speyer (pūyas tathāgataḥ) and adds that the Tibetan translation has no plural particle but that this is often omitted. b De Jong notes the reading in Speyer (guruvaidheyyam) and adds that the Tibetan has gurave deyam, which is undoubtedly the correct reading.

108 mDo rgyas (A, fol. 213a3-4; B, p. 319.9-13): gzhan yang mdor bsdu na byang chub sems kyi rang bzin bcom ldan 'das rdo rje sems dpa 'ba' zhiog bsogs pas kyang dam tshig thams cd 'dus par gsungs ste rgyud de nyid (i.e. Śrīparamādyatantra) las 'di litar | 'obcom ldan 'das apal rdo rje sems dpa' srid pa rnam par dag pa'i thabs kyi mchog rtag pa thams cd kyi gsang ba chen po dam tshig tu bsgom par bya'o ||| zhes gsungs so |.

109 mDo rgyas (A, fol. 213a4-6; B, p. 319.13-18): dpal ta twa sang gra ha las ni | bsrong ba'i dam tshig mang du ma gsungs te | der yang byang chub kyi sems sgrub pa gtsos bor bstan nas lha khyad par gyi dam tshig gi dbang du byas te dam tshig rnam pa lnga zhiog gsungs so || gang gi phyir rgyud der ni lha rnam pa lnga gsungs pa'i phyir te | 'di litar de bzhin gshegs pa rnam dang | de dag gi rigs dang | rdo rje dang | pad ma dang | rin po che las byung ba'i rigs te | de litar rnam pa lngar gsungs te |; cf. the Tantrārthāvatāra (P, fol. 13a5-7; D, fol. 11a6-7; S, vol. 27, p. 1007.14-19).

110 Rong-zom-pa explains why the Karma family is not mentioned separately in the Tattvasaṃgrahasūtra (mDo rgyas, A, fol. 213a6-b1; B, p. 319.18-20): “It is well known that in that tantra, in consideration of the trainees, the Karma family is not taught separately, since agent and action are not thought of as being different” (rgyud der ni 'dul ba'i dbang gis las kyi rigs gud du ma bstan te | byed pa po dang las tha mi dad par dgongs pa'i phyir ro zhes gsungs so ||). His expression ‘it is known’ evidently means ‘as known in the Tantrārthāvatāra’ (P, fol. 13b5-7; D, fols. 11b6-12a1; S, vol. 27, pp. 1008.18-1009.3).
the pure nature of all phenomena, and being attached to the activities that benefit sentient beings constitute the pledge pertaining to the Padma family; and (5) practising generosity is the pledge pertaining to the Ratna family. Rong-zom-pa explicitly refers to Buddhaghuya’s Tantrārthāvatāra only while explaining the first of these five pledges, but it is evident that the remaining explanations are also virtually verbatim extracts from that work.\(^{111}\)

5. Pledges and the Maintenance of **Bodhicitta** in the Mahāyoga System

Rong-zom-pa considered, either explicitly or implicitly, *tantras* such as the Guhyendutilakatantra,\(^{112}\) Guhyasamājatantra, Buddhāsrayogatantra, and Vairocanamāmājāla as belonging to the mahāyoga class.\(^{113}\) Much confusion can be avoided if the terms ‘mahāyoga’ and ‘Mahāyoga’ are distinguished from the very outset, particularly when dealing with both ‘old’ and ‘new’ *tantras*. The word ‘mahāyoga’ is used as a generic term to designate all that is known as the inner or higher yogas (*niruttarayoga*). In the rNying-ma tradition, however, there are also the so-called ‘three classes of inner yogas’ (*nang rgyud sde gsum*), namely, Mahāyoga, Anuyoga, and Atiyoga, all of which are considered *mahāyogas*. For Rong-zom-pa, Mahāyoga, Anuyoga, and Atiyoga are distinguished on the basis of the mental capacity of the yogins (rnal ’byor pa rnams kyi blo rtsal) to assume bodhicittavajra, which is the bodhicitta par excellence (samtanbhadraṃ bodhicittam).\(^{114}\)

On account of the difference in the mental capacity of yogins to realise the equality of phenomena in order to acquire bodhicittavajra, [which is the bodhicitta] par excellence, the [greater] yoga ([mahā]yoga) is divided into three, namely, Mahāyoga, Anuyoga, and Atiyoga. These are also known as the yogas of Generation (*bskyed pa*), Perfection (*rdzogs pa*), and Great Perfection (*rdzogs pa chen po*); all, it should be known, are merely particularisations of the greater yoga (*mahāyoga*).

In later rNying-ma sources, we can find subclassifications of the three classes into nine classes, beginning with the Mahāyoga of the Mahāyoga (*maḥā ’i maḥā*), the Mahāyoga of the Anuyoga (*maḥā ’i a nu*), and the like, and ending with the Atiyoga of the Atiyoga (*a ti ’i a ti*).\(^{115}\) When this classification was introduced for the first time is yet to be determined. In any

---

111. Cf. the mDo rgyas (A, fol. 213b4–215a2; B, pp. 320.2–321.17) and the Tantrārthāvatāra (P, fol. 14a2–16a3; D, fol. 12b4–14a4; S, vol. 27, pp. 1010.14–1014.2).

112. In the introductory passage on mahāyoga pledges, the mDo rgyas (A, fol. 222b1–2; B, p. 330.3–5) states: *la la las ni sku gsung thugs kyi phyag rgya bsgom pa la sog pa sgrub pa ’i dam tshig gi phyogs nas bstan to*]. An annotation correctly identifies ‘some [tantras]’ (*la la*) as the Guhyendutilakatantra. Later on the Guhyendutilakatantra is explicitly mentioned by name. See ibid. (A, fol. 236b5–6; B, p. 347.6–7): *sgrub pa ’i dam tshig ni | dpal sla gsang thig le las | byang chub snying por bgrod pa ’i yan lag drug gsungs te*].

113. mDo rgyas (A, fol. 227b4–6; B, p. 336.13–17): *de bzhin du rnal ’byor chen po ’i tshul du’ang dpal rnam par smad zed sgyu ’phrul drwa ba dang | dpal sangs rgyas mnyam sbyor lla bu ni thabs dang shes rab spyi ’i tshul bstan pa | dpal gsang ba ’das pa lla bu ni thabs dang shes rab zab mo ’i tshul bstan pa o zhes grags so | de nyid kyi dbang gis sgyu ’phrul drwa ba dang sangs rgyas mnyam sbyor ni rnal ’byor chen po ’i rgyud ma yin no zhes kyang ser ro*].

114. mDo rgyas (A, fol. 252a5–b1; B, p. 365.3–8): *kun tu bzang po rdo rje byang chub kyi sems ’dzin par byed pa la | chos mnyam pa nyid du rogs pa ’i rnal ’byor pa rnams kyi blo rtsal gyi khyad par las | rnal ’byor rnam pa gsum du phyed ste | rnal ’byor chen po dang | rjes su mthun pa ’i rnal ’byor dang | shin tu rnal ’byor ro | de nyid la bskyed pa ’i rdzogs pa dang | rdsogs pa chen po ’i rnal ’byor zhes kyang grags te | de dag thams cad kyang rnal ’byor chen po nyid kyi bye brag tsam du shes par bya o’].

115. Interestingly, the three bodies (*kūya*) of the Buddha have been subclassified in a similar way, that is, into the Dharmakīya of Dharmakīya (*chos sku’i chos sku*) and so forth. Perhaps such a subclassification was inspired by
The Resolve to Become a Buddha

case, what should be made clear is that the tantric system we are concerned with here is the general mahāyoga class and not the more specific Mahāyoga.

Before Rong-zom-pa goes on to discuss the actual pledges within these tantras, he makes some general introductory remarks about the different types of pledges taught in them. These introductory remarks are clearly meant to serve as a kind of outline for his presentation of the pledges according to the mahāyoga class, which clearly fall into the following five categories: (1) pledges pertaining to refrainment (srung ba'i / bsrung bar bya'i dam tshig), (2) pledges pertaining to practices (sgrub pa'i / bsgrub par bya ba'i dam tshig), (3) pledges pertaining to indulgence (spyod pa'i / spyad par bya ba'i dam tshig), (4) primary and ancillary pledges (rtsa ba dang yan lag gi dam tshig), and (5) general, specific, and additional pledges (spyi dang khyad par lhag pa'i dam tshig). The contents and the scriptural or personal authority of the five categories of pledges may be presented as follows:

<table>
<thead>
<tr>
<th>1.</th>
<th>Pledges Pertaining to Refrainment (srung ba'i dam tshig)</th>
<th>Scriptural or Personal Authority</th>
</tr>
</thead>
<tbody>
<tr>
<td>(i)</td>
<td>precepts (ṣiksāpada)</td>
<td>Buddhhasamāyogatantra, Māyājālatantra, etc.¹¹²</td>
</tr>
<tr>
<td>(ii)</td>
<td>cardinal transgressions (mūlāpatti) &amp; gross (but venial) transgressions (sthūlāpatti)</td>
<td>Krisnamārītantra, Guhyasamājābhisekavidi, etc.¹¹¹</td>
</tr>
</tbody>
</table>

the common practice of subdividing mild (mrdu), middling (madhya), and excessive (adhimātra) into the mild of mild (mrdu mrdu), etc.

¹¹⁶ mDo rgyas (A, fol. 222a6–b1; B, p. 330.1–3): de yang rgyud la la las ni srog mi bced pa dang | sems can la gnod pa mi bya ba la sogs pa bslab pa'i gshi dang | lting ba'i rtsa ba la bu bsrung bar bya ba'i phyogs nas bstan to || That the bsrung bar bya'i dam tshig are understood in the sense of 'pledges pertaining to refrainment' is evident from a passage in the mDo rgyas (A, fol. 228a2; B, p. 336.22–23): ... rtsa ba'i lting ba la bu bya ba ma yin pa las ldog pa'i mishan nyid bsrung bar bya ba'i dam tshig gi phyogs nas bstan pa'ang | Such 'pledges pertaining to refrainment' can be found, for example, in the Buddhhasamāyogatantra.

¹¹⁷ See above, n. 112.

¹¹⁸ mDo rgyas (A, fol. 222b3–4; B, p. 330.7–10): la la las ni | rtsa ba dang yan lag tu physe nas sgrub cing bsrung ba'i dam tshig dang | mi spang ba dang | dang du blang ba dang | spyad par bya ba dang | shes par bya ba dang | grub par bya ba rnams kyi phyogs nas bstan to || The annotation mentions here the *Guhyagarbhatantra. The locus classicus for the expression seems to be the Kun 'dus rig pa'i mdo (P, fol. 62a8; D, fol. 63b3) belonging to the Anuyoga class. The pertinent lines are cited also in the mDo rgyas (A, fols. 247b6–248a4; B, p. 360.4–11).

¹¹⁹ mDo rgyas (A, fol. 222b4; B, p. 330.10–11): la la las ni | spyi dang khyad par dang lhag pa'i dam tshig gi sgo nas rgya che bar bstan te || The location mentions here the *Guhyagarbhatantra.

¹²⁰ It should be noted that the ṣiksāpadas found in the Māyājālatantra have been designated as 'pledges pertaining to the adamantine body' (sku rdo rje'i dam tshig), 'pledges pertaining to adamantine speech' (ngag rdo rje'i dam tshig) and 'pledges pertaining to adamantine mind' (sems rdo rje'i dam tshig). See the mDo rgyas (A, fols. 228b5–229a6; B, pp. 337.21–338.12).

¹²¹ mDo rgyas (A, fols. 229a6–236b5; B, pp. 338.12–347.6).

---

<sup>122</sup> *mdo rgyas* (A, fols. 236b5–237a6; B, p. 347.6–22).

<sup>123</sup> Both the Guhyendutilakatantra and the *Mahāyānābhisamaya* are said to teach, in a similar way, the attainment of the 'seals of body, speech and mind' discussed in the *mdo rgyas* (A, fol. 237a6–b5; B, pp. 347.22–348.8). The *Mahāyānābhisamaya* mentioned by Rong-zom-pa seems to be identical with the Tattvasamgrahasūtra, but I have not been able to locate the verses cited by him.

<sup>124</sup> *mdo rgyas* (A, fols. 237b5–238b2; B, pp. 348.9–349.6).

<sup>125</sup> For the fifteen pledges according to the *Guhyagarbhatantra*, see the *mdo rgyas* (A, fols. 238b2–240a4; B, pp. 349.6–351.3). Note that the *Guhyagarbhatantra* is often cited under the title Vajrasatvatvamāyājāla.

<sup>126</sup> For the twenty-eight pledges, see the *mdo rgyas* (A, fols. 240a4–247b5; B, pp. 351.2–360.1). Rong-zom-pa, however, does not specify any text but merely states (ibid., A, fol. 240a4–5; B, p. 351.3–5): slob dpon padma 'byung gnas kyi zhal snga nas dam tshig nyal shu rtsa brgyad kyi dbyer ba mdzad pa dag dang mthun par tshoms gcig tu dril te bstan par bya'o |.

<sup>127</sup> This seems to be Rong-zom-pa's own attempt to condense the preceding twenty-five or twenty-eight pledges into four main pledges (*mdo rgyas*, A, fol. 247b5–6; B, p. 360.1–4). For details, see n. 23.
In particular, each tantric system, whether Yoga, Mahāyoga, Anuyoga or Atiyoga, is said to have its own ten specific pledges (khyad par gyi dam tshig) or pledges [corresponding to] the aptitudinal niveau (rtsal 'phang gi dam tshig). They may be presented as follows: 133

| 5. | General, Specific, and Additional Pledges  
(sp'yi dang khyad par lhag pa'i dam tshig) | Scriptural or Personal Authority |
|----|------------------------------------------|---------------------------------|
| (i) | general pledges (sp'yi'i dam tshig):  
23 pledges pertaining to austerities (brtul zhugs kyi dam tshig) +  
28 pledges pertaining to indulgence (spyad pa'i dam tshig) + pledges binding at all times (rgyun gyi dam tshig) | *Vajravyūhatantra* 130 |
| (ii) | additional pledges (lhag pa'i dam tshig) | |
| (iii) | 25 specific pledges (khyad par gyi dam tshig) 131 or 10 pledges [corresponding to] the aptitudinal niveau (rtsal 'phang gi dam tshig) 132 | |

---

128 The general, specific, and additional pledges (sp'yi dang khyad par lhag pa'i dam tshig) are explained in great detail in the mDo rgyas (A, fol. 247b6–257b4; B, pp. 361.17–371.11).

129 Cf. the Theg pa'i bye brag (A, fol. 174b4–5; B, p. 43.1–4; without the gloss): nyams nga ba med pas brtul zhugs kyi dam tshig ngyi shu rtsa gsun yang rdzogs pa yin no ||.

130 The rDo rje bkod pa'i rgyud (*Vajravyūhatantra*) referred to here by Rong-zom-pa is clearly the dGongs pa 'dus pa'i mdo of the Anuyoga class.

131 The total number twenty-five is according to the Theg pa'i bye brag, which states (A, fol. 174b4; B, pp. 43.24–43.1): gnyis su mi 'byed pas khyad par gyi dam tshig ngyi shu rtsa lnga yang rdzogs pa yin no ||. We do not know whether Rong-zom-pa explicitly equated the so-called 'pledges [corresponding to] aptitudinal level' (rtsal 'phang gi dam tshig) with the 'specific pledges' (khyad par gyi dam tshig), given that the introductory text dealing with these pledges is missing in the mDo rgyas (see n. 138), but we do know from the given context that he at least virtually equated them. This means that the pledges taught in these three tantric classes bear distinctive or specific features that reflect differences in the mental calibre of the yogins (rnal 'byor mdo 'khyad par). See, for example, the mDo rgyas (A, fol. 252a3–4; B, pp. 364.24–365.1). Cf. the use of the term rtsal 'phang in the dGongs pa 'dus pa'i mdo (P, fol. 233b1–2; D, fol. 245b3):  
  
  rtsal [btsal P] 'phang mtho dman rnal 'byor pas ||  
  mtho dman go 'phang sa bgrod bya ||.

132 Cf. the Theg pa'i bye brag (A, fol. 174b6–175a1; B, p. 43.5–7): lam thams cad dbang du 'dus pas rtsal 'phags kyi dam tshig bcu yang rdzogs pa yin no ||.

133 Pledges explicitly associated with bodhicitta are marked with 'x.'

134 The maintenance of *bodhicitta* in connection with the pledges pertaining to refrainment in the context of the Yoga system is mentioned in the *mDo rgyas* (A, fol. 250b6; B, p. 363.14).

135 The connection between the pledges pertaining to refrainment and *bodhicitta* in the context of Anuyoga is made in the *mDo rgyas* as follows (A, fol. 254b4; B, p. 368.1–2): *gnyis su med pa'i rig pa byang chub kyi sems nyid bsrong ba'i dam tshig tu 'dod do* |  |

136 The connection between the pledges pertaining to view and *bodhicitta* in the context of Anuyoga is made in the *mDo rgyas* (A, fol. 253a2; B, p. 366.2–3) in connection with the pledges pertaining to the view in the Mahāyoga system.

137 The connection between the pledges pertaining to view and *bodhicitta* in the context of Anuyoga is made in the *mDo rgyas* as follows (A, fol. 255a1; B, p. 368.7–8): *snod bcud 'du byed dang bcas pa yan yum gnyis su med pa'i byang chub kyi sems su blisho* |  |

138 Regrettably, the passage dealing with the first five pledges of the Kriyā class, i.e., from *bsrong ba'i dam tshig* to *ye shes kyi dam tshig* (probably one folio), is missing in the *mDo rgyas*. The last few lines of the passage dealing with *ye shes kyi dam tshig* have, however, survived. See *ibid.* (A, fol. 250a3–5; B, p. 362.19–21). Several folios seem to be missing also at the end of the *mDo rgyas* (just before the concluding verses), for an anonymous annotation states (*ibid.*, B, p. 387.23): "[I] am convinced that much is missing from here onwards. [The missing text] should be inserted if a better copy arrives" (*di nas mang po zhis chad song nges bsam dpe khangs dang lon na 'dzud dgos*). This annotation is not found in the xylograph edition (cf. A, fol. 271b5–6).

139 The connection between *bodhicitta* and the pledges pertaining to accumulations in the context of Atiyoga is made in the *mDo rgyas* as follows (A, fol. 257a1; B, p. 370.15–16): *byang chub kyi sems yid bzhin gyi nor bu rin po che yin pas* | [add. | B] *tshogs rang bzhin gyis rdzogs so* |  |

140 The connection between *bodhicitta* and the pledges pertaining to the stage of a *buddha* are made by Rong-zom-pa in his *mDo rgyas* as follows (A, fol. 250b1; B, p. 363.2–3): *'dir byang chub kyi sems rnam par dag pa sangs rgyas kyi sar lta ste* | *grub pa'i sang rgyas kyi sa ni ma yin no* | *'og ma rnam la yang de bzhin du shyar ro* |  |

141 The connection between *bodhicitta* and the pledges pertaining to the stage of a *buddha* in the context of the Yoga system is made by Rong-zom-pa in his *mDo rgyas* as follows (A, fol. 251b3–4; B, p. 364.9–11): *rang bzhin rnam par dag pa dang* | *kun tu bsang po byang chub sens kyi byin gyi brlabs* | *brlab B* *kyis* | *g.yo ba dang mi g.yo ba'i dangos po thams cad la khyab ste* | *chos thams cad rang bzhin gyi dkyil 'khor ro zhes grags so* |  |

142 The connection between *bodhicitta* and the pledges pertaining to the stage of a *buddha* in the context of the Mahāyoga is found in the *mDo rgyas* (A, fol. 253b1–6; B, pp. 366.13–367.2).
Rong-zom-pa is well aware of the dangerous implications of the ‘pledges of indulgence.’ He states that the common yogins (rnal 'byor pa spyi) should observe all pledges appropriately (‘tsham par) by imbuing them with efficient strategies. If I understand him correctly, he argues that if a person who engages in ordinary conduct (tha mal pa'i spyod pa) and who has not obtained the strength of great praśnā, samādhi, and karunā is not blemished as a result of reckless attitudes and actions such as passion (rāga) and killing, this would imply that even wicked (ma rabs) sentient beings have already been released from samsāra, and hence there would be no need for the buddhas to show the path of salvation. But this is obviously not the case. On the other hand, he argues, if such daring practices or conduct (spyod pa rlabs po che) encompassed by the pledges pertaining to indulgence were meant only for those who possess the strength of great praśnā, samādhi, and karunā, or if they were to be interpreted as being of provisional meaning (neyārtha), it makes no sense for the tantras to address the risks of false tantric practices (gsang sngags log par spyod pa) and their consequences, and the risks of the so-called ‘nine doors of transgression’ (ltung ba'i sgo dgu). According to him, even a person who has not obtained the strength of great praśnā, samādhi, and karunā can in principle engage in daring tantric practices out of mere faith (mos pa tsam), by relying on the great instructions of the Three Jewels, and without being tarnished with karmic obscurations (las kyi sgrīb pa). Thus, for Rong-zom-pa, daring tantric practices are meant to be neither practised recklessly by anybody nor indiscriminately prohibited. This point, in my view, is representative of the rNyin-ma stance on the issue of tantric practices of the so-called ‘union’ (sbyor ba) and ‘liberation’ (sgrol ba) in general. Rong-zom-pa also goes into the extremely problematic question of pledges involving such things as killing and stealing, as dealt with, for example, in the Guhyasamājatantra.

Why is it that tantric practices such as killing are proclaimed as pledges in the Guhyasamājatantra and other tantras in the first place? Rong-zom-pa’s detailed answer to this question contains some of the most stimulating reflections upon what we might call ‘tantric ethical philosophy,’ which he places within a wider Buddhist context.

144 Note, however, that while the Guhyasamājatantra itself mentions the pledges of killing, stealing, and the like, the Guhyasamājatantra ritual texts of empowerment, such as the one composed by Ācārya Nas-gling-pa, do not mention such daring practices or conduct (spyod pa rlabs po che), only fourteen mūlamāttis and eight gross (but venial) transgressions (sthūlāppattis). The explanatory tantra (bshad pa‘i rgyud) of the Guhyasamājatantra considers pledges relating to killing and stealing as words (denoting) intention (dgongs pa‘i tshig), that is, as containing a provisional sense (neyārtha), which is not to be taken literally. In Rong-zom-pa’s opinion, such pledges are not mentioned in the explanatory tantra and in the empowerment rites of the Guhyasamājatantra out of consideration for general yogins and ordinary individuals. Similarly, he refers to a certain gsang ba‘i dmigs pa bstan pa, which teaches that profound views (la ba zab mo) and daring conduct are to be kept secret, and hence are not meant for common practice. See the mDo rgyas (A, fol. 223a5–b5; B, p. 331.4–17).

145 mDo rgyas (A, fols. 223b5–228a1; B, pp. 331.17–336.21).
(a) The *Buddhasamāyogatantra*

We shall now discuss the actual pledges of the *mahāyoga* tantric system. The *sīksāpadas* and *mūlāpattis* found in the *Buddhasamāyogatantra* are presented in the form of ethical-moral don’ts. The four don’ts mentioned there are: 146

1. do not kill,
2. do not abandon the Three Jewels,
3. do not abandon *bodhicitta*, and
4. do not abandon the [tantric] teacher (*ācārya*) of one’s fortune.

Of the four, Rong-zom-pa considers the first to be a *sīksāpada*, and the remaining three to be the major root +bodhisattva* pledges (*rtsa ba'i dam tshig*). 147

In his commentary to the *Buddhasamāyogatantra*, these four are explained in the following manner: 148

These four vows consisting in pledges are the gist of the general and specific basic vows of the Secret Vehicle. Furthermore, those who abide in the Secret Vehicle should observe the *prātimokṣa* vows and the *bodhisattva* vows in general, and their own [tantric] vows should be observed specifically. And in the context of the *prātimokṣa* vows, the *mūlāpattis* are the four *pārājikas*. Amongst them, killing is an extremely severe [offence]. Therefore, it is the quintessence of the *sīksāpadas* common to [all Buddhist] vehicles. This being the case, it (i.e. abandonment of killing) is taught [here in the *Buddhasamāyogatantra*]. Two [precepts, namely], non-abandonment of the Three Jewels and non-desertion of *bodhicitta*, are the quintessence of what has been taught as the *mūlāpattis* common to all Mahāyāna systems. For this reason, they are taught [here in the *Buddhasamāyogatantra*]. Among what has been taught as the *mūlāpattis* of specific pledges of the Mantra[yana or tantric systems], the non-abandonment of the [tantric] teacher (*ācārya*) of one’s fortune is the quintessence. Therefore, [the four precepts] are taught as the quintessence of the roots of the general and the specific pledges.

To recapitulate, Rong-zom-pa sees the abandonment of killing as the quintessence of Buddhist ethical-spiritual morality, the non-abandonment of the Three Jewels and of *bodhicitta* as the quintessence of Mahāyāna ethical-spiritual morality, and the non-abandonment of one’s tantric master as the quintessence of tantric ethical-spiritual morality.

(b) The *Krṣṇayamārtantra* and *Guhyasamājābhisekavidhi*

There seem to be several sources for the fourteen *mūḷāpattis* (or, if expressed positively, fourteen basic precepts), among which are the *Krṣṇayamārtantra*, the *Guhyasamajamandalavidhi*, the *Guhyasamājābhisekavidhi* by Ācārya Nas-gling-pa (*Yavadvīpa*), the *Vajrayānamulāpatti* and *Vajrayānamulāpattisamgraha* (both ascribed to one Aśvaghoṣa), and the *Kriyāsamgraha*. The fourteen *mūḷāpattis* are: (1) disparaging one’s tantric master (ācārya), (2) violating the directives (ājñā) of the Well-Gone Ones (sugata), (3) venting anger on ‘Vajra brothers’ (vajrabhrātī), (4) abandoning great benevolence (mahāmaitri), (5) abandoning bodhicitta, (6) disparaging the Dharma (of the three vehicles), (7) disclosing secret teachings to immature individuals, (8) disparaging the five skandhas, which are of the nature of a tathāgata, (9) having doubt about the purity of phenomena, (10) being affectionate to the hostile or wicked (duṣṭa), (11) holding phenomena to fall under the two extremes, (12) offending the faithful, (13) not consuming pledge-related substances when one obtains them, and (14) disparaging women, who are the embodiment of discriminating insight (prajñā). Rong-zom-pa compares these fourteen *mūḷāpattis* with the fourteen occurring in the *Kālacakratantra*. He notes that the *Kālacakratantra* has as the second *mūḷāpatti* ‘ignoring the instructions of the guru’ instead of ‘ignoring the instructions of the sugata.’ Moreover, the sixth *mūḷāpatti* in the *Kālacakratantra* is ‘not disparaging extraordinary individuals’ instead of ‘not disparaging the three vehicles.’ Rong-zom-pa also remarks that he observed slight differences in the fourteen *mūḷāpattis* as found in various other sources, but does not regard these differences as contradictions, for these *mūḷāpattis* are,

according to him, not taught as 'specific' or 'additional' pledges, but rather as 'general' pledges.\(^{154}\)

Rong-zom-pa explains that these fourteen mūlāpattis are also applicable to the Kriyā and Yoga systems and, to a great extent, even to the general Mahāyāna. Thus the fourteen mūlāpattis are discussed in the mDo rgyas on two occasions: once when they are treated as 'those that may be common [to other systems]' (thun mong du 'gyur du rung ba), and once, in the mahāyoga context, as uncommon (thun mong ma yin pa), that is, not applicable to other systems. In discussing the fourteen common mūlāpattis, Rong-zom-pa alludes to the various types of bodhicittavajra, and explains some of them with the aid of citations from the sūtras and tantras. What is of particular interest, though, is his treatment of the fourteen uncommon mūlāpattis, for it is in this connection that the maintenance of bodhicittavajra is discussed in detail.\(^{155}\)

Let us first of all look at how Rong-zom-pa describes the link between the maintenance of bodhicittavajra and the first of the fourteen mūlāpattis, namely, disparaging one's tantric master (ācārya).\(^{156}\)

In this context of presenting [the fourteen mūlāpattis] in the form of special vows, all of them should be treated as ancillary to the maintenance of bodhicittavajra.\(^{157}\) As for not disparaging one's vajrācārya, this [should be viewed] the way it is taught in [scriptures] such as the Śrīgūhyasamājā[tantra] and the Māyājāla[tantra].\(^{158}\) The way it is taught [first in the

\(^{154}\) mDo rgyas (A, fol. 230b1-4; B, pp. 339.17-340.1): dpal dus kyi 'khor lo las ni «dpal ldan ri bong 'dzin pa yi || bla ma'i thugs ni 'khrug pa dang || de yi bka' 'da' de las gzhan ||» zhes gsungs te | gnyis pa bde bar gshegs pa'i bka' las 'da' bar ma bshad de | bla ma'i thugs drugs pa ni dang po | bla ma'i bka' las 'das pa ni gnyis par bshad do || gzhan yang | «drug pa grub pa dog la smod || || B)» ces pas gang zag khyad par can la mi smad par gsungs te | dam pa'i chos la smad par ma gsungs so || de bzhin du ngo bo cung zad mi 'dra ba bshad pa dog snang ste | 'on kyang spyir brsung ba'i dam thig tu gsungs kyi khyad par gyi dam tshig dang lang haq pa'i dam tshig lta bur gsungs pa ni mi yin pa | gang la yang nyes skyon ma mthong ngo ||. The Sanskrit text and the canonical version of the Tibetan translation read: sāsthī siddhāntanīḍa | drug pa grub pa'i mtha' la smod pa. Rong-zom-pa's understanding of the sixth mūlāpatti of the Kālacakra tantra was obviously based on a different reading, probably something like *sāsthī siddhanīḍa*. For the explanations of the fourteen mūlāpattis according to the system of the Kālacakra tantra, see the *Vimalaprabhā* ad. 2.102–103 (vol. 2, pp. 97.1–98.10).

\(^{155}\) mDo rgyas (A, fol. 230b4–233b1; B, pp. 340.1–343.9).

\(^{156}\) mDo rgyas (A, fol. 233b1–234a3; B, pp. 343.9–344.2): 'on kyang thun mong ma yin pa'i sdom par bstan pa'i skabs 'dir ni thams cad kyang rdo rje byang chub kyi sems 'dzin pa'i yan lag tu sbyar te | 'di ltar rdo rje slob dpon brnyas par mi bya ba yang | ji ltar dpal gsang ba 'dus pa dang sgyu 'phrul drwa ba lta bu las | «sku gsung thugs rdo rje gsang bas bsdu pas mgon par dbang bsdkur ba'i slob dpon la de bzhin gzhegs pa thams cad kyang chub sems dpam' thams cad kyis rdo rje byang chub kyi sems bzhin du blsa bar bya'o || de ci 'phyir zhe na | slob dpon de ni byang chub kyi sems dang mi gnyis shing rnam pa gnyis su dbyar med don shes gsungs pa dang | yang de nyid las | 'phyogs bu'i dangs rgyas thams cad kyi rdo rje bsdod nams kyi phung po bas kyang slob dpon gyi ba spu'i bu ga 'phags so || ci'l 'phyir zhe na | rigs kyi byu byang chub kyi sems ni | sanga rgyas kyi ye shes kyi snying par gyur pa'o || skye ba'i gnas su gyur pa nas thams cad mkyi phun pa'i ye shes kyi 'byung gnas yin pa'i bar du'o ||'shes gsungs pa lta bya ste | rdo rje byang chub kyi sems sbyin par byed cing byin gnyis rlob par byed pa de ni | rdo rje byang chub kyi sems snyid ni bya ba yin la | de la ni mgon par rdzogs par sangs rgyas pa nrams kyi [= kyiis] dus gsum du byon nas mchod pa byed par gsungs na brnyas par bya ba'i gnas lta ga la yin te | 'de la brnyas par gyur na rdo rje byang chub kyi sems snyid gtan sphyogs par 'gyur ro || de bas na 'di ni rdo rje byang chub kyi sems 'dzin pa'i mishan nyid du thun mong ma yin par bshad pa ste 'og ma kun la yang de bzhin du sbyar ro |. Note that Rong-zom-pa fluctuates between positive and negative formulations, i.e., between the mūlāpattis and their respective vows—for example, between 'disparaging one's vajrācārya,' which is a cardinal transgression (mūlāpatti), and not disparaging one's vajrācārya, which is the corresponding basic vow (rtsa ba'i sdom pa) or basic pledge (rtsa ba'i dam tshig).
Guhyasamājatantra]: “The ācārya who has been empowered for or initiated into the [mandala] of the [deity] Guhyasamāja, comprising the adamantine body, speech and mind, should be regarded by all tathāgatas and all bodhisattvas in the same way [they perceive] bodhicittavajra. Why is this so? It is because the ācārya and bodhicitta are not dual and not separable into two.”\textsuperscript{159} And as stated [in the Māyājñalatana]: “A pore of the ācārya’s body hair surpasses the adamantine mass of beneficial resources of all buddhas of the ten directions. Why is this so? O son of a noble family, [it is because] bodhicitta is the quintessence of a buddha’s gnosis, [its] place of origin, and so forth, up to being the source of a buddha’s gnosis of omniscience.”\textsuperscript{160} One who bestows and empowers bodhicittavajra should thus be considered bodhicittavajra itself. And if [the vajrācārya] is said to be visited and honoured by the perfectly awakened ones in the three times, how can [he] be an object of disparagement (or ridicule)! And indeed, disparaging him would cause one to lose one’s bodhicittavajra once and for all. Therefore, this [first mūlapatti] is explained in the form of a special [vow] whose characteristic feature is the maintenance of bodhicittavajra. This should similarly be applied to all [the rest of the mūlapattis that] follow.

The argument given in the passage cited by Rong-zom-pa as to why one should not disparage one’s vajrācārya is not exactly identical with his own argument. The citations virtually represent the vajrācārya as the embodiment of bodhicittavajra; to disparage him would be to disparage bodhicittavajra, and so amount to abandoning it. Rong-zom-pa simply asserts that the vajrācārya is the bestower of bodhicittavajra, though the consequences of disparaging him are, to be sure, the same.

In regard to the second of the fourteen mūlapattis, namely, violating the directives (ājñā) of the sugatas, and its relation to the maintenance of bodhicittavajra, Rong-zom-pa states: \textsuperscript{161}

The second [of the fourteen mūlapattis, namely,] violating the directives (ājñā) [of the sugatas]: The directives may be those of the sugatas or those explained by [one’s] guru. If the directives of a great teacher—a vajradhāra, [who is] the lord of pledges—are violated, bodhicittavajra would be undermined since it would have been empowered [in the form of directives].

Similarly, while commenting on the third mūlapatti, namely, nourishing ill will against Vajra brothers, he states that one would undermine bodhicittavajra as a result of this bias and malevolence shown to them.\textsuperscript{162}

\textsuperscript{158} The passages of the Guhyasamājatantra and the Māyājñalatana quoted by Rong-zom-pa deviate from those transmitted in the bKa'-gyur. Compare the citations in n. 156 with those in nn. 159 & 160. Perhaps Rong-zom-pa used the not yet revised translations of the Guhyasamājatantra and Māyājñalatana.

\textsuperscript{159} Cf. the Guhyasamājatantra (p. 104:15–19): apha khalu maityreya bodhisattvo mahāsattvān sarvataihāgaṭān pranipatyavām āha | sarvataihāgataīkāyāvākṣītaś cātyaś sarvyasamājābhīṣjiko bhagavān vajrācāryaḥ sarvataihāgataś sarvabodhisattvāś ca kathāṇa drāṣṭāvāḥ | sarvataihāgataḥ prāhuḥ | bodhicittavajra śravaṇa kulaśrāvatāhāgataś sarvabodhisattvāś ca drāṣṭāvāḥ | tat kasmād dhetoḥ | bodhicittavajra cācāryāś cādvyam etad advaiṭākhyāram |.\n

Chapter Ten: The Mahāyāna Observances and the Maintenance of Bodhicitta

The third [basic pledge pertaining to the third mūlāpatti, namely,] not nourishing ill will against Vajra brothers: [Persons 'x' and 'y'] are Vajra brothers because [they] cannot be differentiated, [and this] in a three-fold sense: [They] are bound by one and the same object, namely, reality (dharmanā); by one and the same vow (samvara), namely, the [maintenance of] bodhicittavajra; and because [they have] the same aspirational wish (pranidhāna)—and thus [are bound by] one and the same deity, ācārya, view, and conduct. One who is biased and malevolent to this [Vajra brother] undermines bodhicittavajra.\textsuperscript{163}

Elsewhere, nourishing ill will towards Vajra brothers is described by Rong-zom-pa as not speaking of their good qualities but rather of their faults, out of ill will.\textsuperscript{164}

Likewise, Rong-zom-pa explains how abandoning great benevolence (mahāmaitri) would cause the abandonment of bodhicittavajra, as follows:\textsuperscript{165}

The fourth [mūlāpatti], the abandonment of great benevolence: It is true that benevolence that has sentient beings as its object, and likewise benevolence that has phenomena as its object and [benevolence that has] no object, are all common [types of] benevolence. But the special benevolence here [in this system] is as taught: "Enjoy the comfort of being one in nature, since you yourself and others [desire or are characterised by] the same awakening (bodhi)." Just as those who [possess] the view of self do not have to make an effort to benefit themselves, so too those who uphold bodhicittavajra do not have to make an effort to benefit [other] sentient beings. If one were to have no concern (dayā) for others, one would have abandoned bodhicittavajra.

The abandonment of bodhicitta itself occurs here as the fifth mūlāpatti, concerning which Rong-zom-pa states:\textsuperscript{166}

As for the fifth [mūlāpatti, namely,] the abandonment of bodhicitta, [it is] as follows: The non-abandonment of vigour (bald) in generating the resolve [to strive] for the highest awakening in order to attain salvation (mokṣa) [for] oneself and to cause [other] sentient beings [to attain] salvation is common [to all Mahāyāna vows]. However, it (i.e. bodhicitta in the common system) is considered to be of a different nature at three [different stages], namely, the [bodhi]citta [during the unexeplored phase] of spiritual disposition (gotra), the [bodhi]citta during the phase of causal [process], and the [bodhicitta in its] resultant form are respectively comparable to seed, seedling, and fruit. However, bodhicitta par excellence (samantabhādram bodhicittam) is not considered to be of a different nature at the three [stages]—the phases of

\textsuperscript{163} Syntactically, the passage seems to admit of more than one way of being translated.

\textsuperscript{164} \textit{mDo rgyas} (A, fol. 232a3; B, p. 341.17–18): spin la ngan sens kyi yon tan mi brjod cing skyon brjod pa dang [.

spiritual disposition, causal [process], and result—just as, for instance, there is no distinction in the nature of gold as known in the elementary form [of it] which exists in ore, [the one in which it has] turned somewhat golden upon coming into contact with fire, and [the one in which it has become] completely free from all stains. However, a distinction is still made as to whether it is free from stains or not. As for bodhicittavajra, [it is] comparable to the following: If a container for spit or urine (chod zangs)\(^{167}\) is made into a bowl or basin (ghzhong pa) [used for less filthy purposes], and then turned into a [sacred] statue (e.g. of a buddha), there is no distinction between being free and not being free from stains. Yet one would say that as far as the perception of the shape and quality is concerned, these appear to be different. Therefore, here [in this system] one who upholds bodhicittavajra should not abandon any kind of bodhicitta.

The abandonment of bodhicittavajra is not mentioned explicitly in his explanation of the sixth mülāpatti, namely, the disparagement of the three vehicles. He merely states:\(^{168}\)

The non-disparagement of the three vehicles: One who abides in [the view of] the dharma of equality is said not to deride even the dharma of the sentient beings in hell, let alone refute or abandon the dharma of the śrāvakas. One should view all [dharman] as equal in that they all alike have been taught by the Buddha as benefiting sentient beings according to the [different] calibre of recipients.

Concerning the seventh mülāpatti, the disclosure of secret teachings to immature individuals, he states:\(^{169}\)

As for not disclosing secret teachings to unworthy [individuals], it is as taught in the following: [Only] if one carries out activities for the benefit of sentient beings by means of the lower vehicles, until a mind that cognises such [a tantric view] arises [in them], will the sentient beings to be tamed not be ruined. Thus Vajrayāṇa is to be kept extremely secret, and hence it is taught as being a Secret Vehicle.

What is noteworthy is that the issue of secrecy does not really concern the misuse of tantric teachings per se, but rather the harm that sentient beings might incur as a result of misunderstanding and misusing these teachings. The abandonment of bodhicitta is not spoken of here, but Rong-zom-pa had explained elsewhere that not disclosing secret mantras and mudrās to those without pledges is meant to prevent the misuse of bodhicitta.\(^{170}\) Similarly, one can understand why not disclosing secret teachings to unworthy individuals would also prevent misuse.

The non-abandonment of bodhicitta is again not explicitly mentioned in connection with the eighth mülāpatti, disparaging the five skandhas, which are of the nature of the tathāgata. Rong-zom-pa states:\(^{171}\)

[The eighth basic pledge], not abusing [one’s] personal constituents (skandhas), which are of the nature of the Victorious Ones (jina): The skandhas are primordially awakened. Having been

\(^{167}\) The Tshig mdzod chen mo (s.v.) records chod zangs as an archaic word and provides three meanings: (1) container for spit (mchil snod), (2) container for urine (gein snod), and (3) basin for washing hands and feet (rkang lag ’khru snod). See also ibid. (s.v. bzed zhal).

\(^{168}\) mDo rgyas (A, fol. 235a3–4; B, p. 345.6–10): theg pa gsum la mi smad pa ni | mnyam pa nyid kyi chos la gnas pas sms can dmyal ba ’i chos kyang mi bkol bar gsungs na | nyan thos kyi chos la sun dbuyung zhing spang ba lta ci smos te | sangs rgyas kyiis snod kyi rim pa dang sbyar nas sms can gyi don du ’gyur bar gsungs par ’dra bas thams cad mnyam par bta’o || zhes gsungs pa lta bu’o ||.

\(^{169}\) mDo rgyas (A, fol. 235a4–6; B, p. 345.10–13): skal pa med pa la gsang ba mi bstan pa ni | yang ’di lta bur rtogs pa ’i blo ma skyes kyi bar du theg pa ’og ma nas ’gro ba’i don byas na gdul bya chud mi za bas rab tu gsang ba ’i phyir gsang ba ’i theg pa zhes bka’ stsal to zhes gsungs pa lta bu’o ||.

\(^{170}\) mDo rgyas (A, fol. 155b3–4; B, p. 252.2–3).

cognised [and accordingly] meditated upon as such, they are always to be cherished as objects of enjoyment, which are not separate from oneself, and thus [one’s] body is under no circumstances to be abused and maltreated. This idea, Rong-zom-pa states, is found in sūtras of definitive meaning (nātārtha), such as the Gaṇḍavyūhasūtra, as well as in tantras.172

Doubting the purity of phenomena—the ninth mūlāpatti—is expressly said to cause the abandonment of bodhicittavajra:173

[The ninth basic pledge], not having doubts about the purity of phenomena: If having doubts about karma and karmic consequences hinders [the attainment of] higher destinations [in samsāra] and freedom [from samsāra] (mokṣa), then it is, of course, clear that having doubts about the pure nature of phenomena will cause the abandonment of bodhicittavajra.

The tenth mūlāpatti, being affectionate to hostile persons (duṣta), is one of the fourteen mūlāpattis where bodhicittavajra is not referred to explicitly. But Rong-zom-pa’s statement that not paying homage to non-Buddhist teachers is one means of avoiding all those things that are not causes of bodhicitta,174 may be applicable here, as he states:175

[The tenth mūlāpatti], expressed as ‘being benevolent to hostile persons and being free from desire’: ‘Being benevolent to hostile persons’ [means being affectionate to] enemies of the [Buddhist] doctrine (dharma), such as non-Buddhists who are opposed to the pledges. By being benevolent to them, one becomes a māra (i.e. an opponent of the sattvā) oneself. And ‘being free from desire’ [means] arriving at the state of nirvāṇa, and thus being tired of [one’s] skandhas and not being interested in constantly working for the benefit of sentient beings. [Attitudes or actions] such as these, which are not compatible with the great objective [of a bodhisattva], are not permissible even [according to the ethical principles of] general Mahāyāna. [They] are very reproachable in the system of the mahāyoga in particular, and [they] undermine the activities of a buddha.176

What is involved here are emotions of hostility and attachment, and the difficulties ensuing from a total denial of such emotions, from the perspective of mahāyoga ethical-spiritual principles. The benevolence directed to those opposed to the Buddhist doctrine is also called ‘illusory (or deceptive) benevolence’ (sgyu ma’i byams pa).177

172 mDo rgyas (A, fol. 232a6–b2; B, p. 342.1–7).
173 mDo rgyas (A, fol. 235b1–2; B, p. 345.15–18): dag pa’ichos la the tshom mi bya ba ni | gang las dang las kyi ’bras bu la sogs pa la the tshom za ba’ang [ba dang B] bde’gro dang thar pa’i bar du gcod pa yin ’no ||’ [= na ]] ngo bo nyid kys dag pa’ichos la the tshom du gyur na | rdo rje byang chub kyi sems spong ba lta ci smos |
Cf. the syntax of the sentence in n. 171.
174 See n. 41 for Rong-zom-pa’s explanation (mDo rgyas, A, fol. 155b4–5; B, p. 252.3–4) of the ninth basic pledge according to the Guhyatāntara.
175 mDo rgyas (A, fol. 235b2–5; B, pp. 345.18–346.1): «dag la byams dang chags bral dang zhes bya ba la | sdang la byams pa ni dam tshig la sdang ba’i phyi [phyir B] rol pa la sogs chos dgrar gyur pa ste | de la byams par byed pa ni bdag nyid bsdud du gyur pa yin la | chags pa dang bral ba ni mya ngan las ’das pa la gzhon bas | phung po la skyo bar byed cing riag tu sems can gyi don bya ba la spro bar ma gyur pa ste | ’di lta bu dag gis don chen po dang mi mthun pa ni theg pa chen po sphyir yang ma gnung ba yin na | khvad par du rnal ’byor chen po’i gzhung las shin tu smad pa ste sangs rgyas kyi mdzad pa las nyams par byed pa’o ||»

The idea that such deeds undermine the activities of a buddha may be based on the notion that a Vajrayāna practitioner does not act like a bodhisattva but rather like a buddha.

177 mDo rgyas (A, fol. 232a5; B, p. 341.22): kha cig nas sgyu ma’i byams par bshad ....
Holding phenomena to be defined by (either of) the two extremes (i.e. of eternalism and annihilationism), which is the eleventh mūlāpatti, is again regarded by Rong-zom-pa as being incompatible with the maintenance of bodhicittavajra, for he states: 178

[The eleventh basic pledge, namely,] not viewing phenomena in terms of the two extremes; [This pledge] is common to all Buddhist vehicles. Nonetheless, [in this system, viewing phenomena in terms of the two extremes] would in particular contradict the pledge pertaining to great equality and would consequently cause the abandonment of bodhicittavajra.

Concerning the twelfth mūlāpatti, offending the faithful, Rong-zom-pa first defines as faithful those who have consolidated their bodhicitta, and then argues that offending them would lead to the abandonment of bodhicittavajra: 179

[The twelfth mūlāpatti, namely,] offending the faithful: The faithful are those whose thought of bodhicitta is firm. By offending them, one would show hostility towards bodhicitta and jealous bias [against it]. Thus [such attitudes and actions] would be incompatible with bodhicittavajra. According to Rong-zom-pa, this mūlāpatti is shared by general Mahāyāna as well as by the Kriyā and the Yoga systems. 180

The thirteenth basic pledge, namely, consuming pledge-related substances when obtained, is considered by him as a means of consolidating bodhicittavajra: 181

[The thirteenth mūlāpatti, namely,] not accepting pledge-related substances when one obtains [them]: As stated above, substances pertaining to attainments (siddhi), substances pertaining to offerings (puja), and substances pertaining to ascetic practices (vrata) [involving tantric] deities and to empowerments (abhiṣeka) are [substances] common to the general tantric systems. What is special here [in this system] is the reliance on substances pertaining to practices carried out [while maintaining a view] of the equality [of phenomena], with a mind that is free from concepts [of revulsion and the like]. This will consolidate bodhicittavajra.

It is known that the consumption of substances that are normally held in revulsion is mentioned in the mahāyogatantras. What is perhaps less known is, as Rong-zom-pa has showed, that this practice can also be found in the relatively conservative kriyātantras. 182 In the same context, he identifies the four kinds of so-called pledge-related substances (dam tshig gi rdzas) as: (1) substances pertaining to attainments (dngos sgrub kyi rdzas), (2) substances used for empowerments (dbang bskur ba'i rdzas), (3) substances used for offering (mchod pa'i rdzas), and (4) substances for consumption (bza' ba'i rdzas). Some of the substances named by him are meat (sha), blood (khrag), alcohol (chang), and extremely repulsive substances such as human corpses (mi'i ro), said to be used for the ‘zombie attainment’ (ro langs kyi sgrub pa). The rationale behind such practices seems to be that they allow one to test one’s view concerning the equality of samsāra and nirvāṇa.

182 mDo rgyas (A, fol. 232b1–233a3; B, p. 342.7–22).
Regarding the fourteenth and last mūlāpatti, namely, disparagement of women, Rong-zom-pa states that not disparaging women is a means of consolidating bodhicittavajra. In the context of explaining the uncommon fourteen mūlāpattis, he states:

[The fourteenth basic pledge, namely,] not disparaging women, who are the embodiment of discriminating insight: It is true, as [already] explained above, that not disparaging [female] deities of knowledge (vidyā), symbolic representations (mudrā) [of those deities], semblances [of those deities] as represented in [physical] forms, or [any animate or inanimate objects] generically similar [to deities] is common to all tantric [systems]. However, the special explanation given here is as follows: In order to confer the status of a teacher, a great vajradhāra, [on someone,] one must rely upon his domain of activity, that is, the mahāmudrā, which is characterised by the prajñāpāramitā. Thus relying on a ‘female of insight’ (shes rab ma) by empowering her as [one’s] karmamudrā (i.e. as one’s female partner in the tantric praxis of union) is extraordinary [tantric] conduct. Hence it can be maintained that [all women] are generically females of insight, and [they] should therefore not be disparaged. This [is a way] to consolidate bodhicittavajra.

It must be admitted that Rong-zom-pa’s explanations as to why women should not be disparaged, given here as well as in the context of the common fourteen mūlāpattis, are not easy to understand. The gist of his argument, however, seems to be that, according to the tantras, deities abide in the form of tantric formulas (mantra) and knowledge (vidyā), and one is not supposed to disparage either deities or the ‘forms’ (rnam pa) of deities. Women should not be disparaged because they generically resemble such deities and their forms. Rong-zom-pa understands ‘forms’ in the sense of ‘semblances’ (‘dra ba) and seems to subclassify the ‘forms’ of deities (lha’i rnam pa) as follows:

<table>
<thead>
<tr>
<th>semblances (‘dra ba)</th>
<th>generic semblances (rigs ‘dra ba):</th>
</tr>
</thead>
<tbody>
<tr>
<td>pictorial representations (gzugs su byas pa)</td>
<td>animate or inanimate</td>
</tr>
<tr>
<td>ones empowered through meditative visualisation (dmigs pas byin gyis brlabs pa)</td>
<td>ones represented in the form of symbols (phyag rgya'i dbyibs su byas pa)</td>
</tr>
<tr>
<td>ones generically similar to the (actual) deity (lha dang rigs ‘dra ba)</td>
<td>ones generically similar to a symbolical representation of the deity (lha’i phyag rgya dang rigs ‘dra ba)</td>
</tr>
</tbody>
</table>

According to Rong-zom-pa, (a) a symbolic representation of a woman that has been empowered through meditative visualisation (dmigs pas byin gyis brlabs pa’i phyag rgya), that is, an ‘imaginary woman,’ (b) the pictorial representation of a woman (de’i gzugs su byas pa), and (c) a real woman (bud med dngos) are all generic semblances (rigs ‘dra ba) of the female tantric deities of knowledge (rig sngags kyi lha). Hence from the generic point of view (rigs kyi sgo nas), no woman should be disparaged. Rong-zom-pa adds that not disparaging

---

183 According to some sources, ‘disparagement of women’ seems to include all forms of physical, verbal, and mental abuse. See, for example, the Abhisamayamanijñā (p. 30.5–6): yoṣito na taditavyāḥ, na krodhavyāḥ, na căvamantavyāḥ. For the Tibetan translation, see ibid. (p. 93.31–32).

184 mDo rgyas (A, fol. 236a3–b1; B, p. 346.11–19): shes rab rang bzihin bud med mi smad pa ni ‘di la gong du bstan pa bzihin du phyag rgya dang [rig sngags kyi lha dang] de’i rimpar gyur pa gzugs su byas pa dang | rigs ‘dra ba dang mi smad pa ni gsang sngags spyi’i thun mong yin mod kyi ‘di thun mong ma yin par bstan pa ni | ston pa rdo rje ‘chang chen po i go ’phang du byin gyis brlabs pa la | de’i spyod yul shes rab kyi pha rol tu phyin pa’i bdag ngyid phyag rgya chen por bstan [= bsten] pa’i phyur | las kyi phyag rgya shes rab mar byin gyis brlabs te bsten par bya ba ‘di ni thun mong ma yin pa’i phyod pa ste | de bas na rigs kyi sgo nas shes rab mar ’dod pas smad par mi bya ste rdo rje byang chub kyi sems brtan par byed pa’o ||.

186 mDo rgyas (A, fol. 233a3–b1; B, pp. 342.22–343.8): bud med mi smad pa yang gsang sngags kyi rgyud las lha rnam s ni gsang sngags dang gsang sngags kyi gzugs su bzhugs par bshad la | lha dang lha’i rimpar pa’ang mi smad par gsungs so || de la rnam pa zhes bya ba ni ‘dra ba’i don te ‘di ltar gzugs su byas pa dang | gzhan yang
women, however, does not mean that one should regard them as objects of desire.\textsuperscript{187} It should be noted here that, besides the fourteen miLitpattis, the texts also speak of eight gross (but venial) transgressions (sthiLitpatti), which are of lesser gravity. These, though, will not be discussed here.\textsuperscript{188}

(c) The Guhyendutilakatantra

The pledges in the Guhyendutilakatantra are said to be taught as ‘pledges pertaining to practice’ (sgrub pa’i dam tshig), which are described as ‘six limbs for journeying to the seat of awakening’ (byang chub kyi snying por bgrod pa’i yan lag drug).\textsuperscript{189} It is, however, not easy to understand the verses of the tantra, and hence, I resort to Rong-zom-pa’s commentary. According to him, the six limbs are:\textsuperscript{190} (1) realising vast and profound doctrines which have not arisen in the past, (2) releasing through various means sentient beings that are tormented by pain and passion, (3) indulging in objects of supreme desire (e.g. bodhicitta) in accordance with one’s devotion, (4) enjoying bliss without being attached to objects of desire to the extreme, (5) observing the pledges, and (6) being endowed with resolve. He contends that the first two are meant to free one’s views from the two extremes, the third to prevent sentient beings being undone or ruined, the fourth to free one’s conduct from the two extremes, and the fifth to prevent the abandonment of the precepts. The sixth is said to be the power that generates bodhicitta.

\textsuperscript{187} mDo rgyas (A, fol. 233b1; B, p. 343.8): chags pa’i gzhis spangs ba ni ma gtogs so ||

\textsuperscript{188} For Nas-gling-pa’s verse text on the eight sthiLitpattis, see the mDo rgyas (A, fol. 229b6–230a4; B, p. 339.4–10). For Rong-zom-pa’s own presentation of them, see ibid. (A, fol. 236b1–5; B, pp. 346.20–347.6).

\textsuperscript{189} Guhyendutilakatantra, as cited in the mDo rgyas (A, fol. 236b6–237a2; B, p. 347.8–13):

‘das pa’i dus na ma byung ba ||

nde bas longs pa’yid dang ldan ||
byang chub snying por bgrod pa ni ||
dam bcas rnam dang sems kyi so ||.

(d) The *Guhyagarbhatantra

As noted by Rong-zom-pa, the *Guhyagarbhatantra proposes five primary and ten secondary pledges.\(^191\) The five primary pledges are:\(^192\) (1) not abandoning the unsurpassable, (2) respecting one’s tantric master, (3) not interrupting mantras and mudrās, (4) being kind to those who have entered the correct path, and (5) not disclosing ‘secrets.’ The ten secondary pledges are the non-abandonment of five kleṣas and the intake of five ‘nectars.’\(^193\) The non-abandonment of bodhicitta is not explicitly mentioned in the *Guhyagarbhatantra itself, but the expression ‘unsurpassable’ is interpreted in Vilāsavajra’s Dam tshig gsal bkra as referring to the two kinds of bodhicitta, namely, conventional and absolute.\(^194\) Rong-zom-pa, however, seems to understand ‘unsurpassable’ as qualifying the Three Jewels, whose nature, to be sure, is held to be bodhicitta.\(^195\) Each of the five primary pledges are multiplied by thirty-two, resulting in one hundred sixty, and each of the ten secondary pledges are multiplied by twenty, resulting in two hundred, which yields a total of three-hundred sixty pledges. There are, however, numerous other categories of pledges, which cannot be discussed here.\(^196\)

(e) Padmasambhava’s Categories of Pledges

Rong-zom-pa states that Ācārya Padmasambhava devised twenty-eight pledges, namely, three basic and twenty-five secondary pledges, a scheme also found in some mahāyoga-atantras.\(^197\) The three basic pledges are:\(^198\) (1) the pledge pertaining to body (sku’i dam tshig), (2) the pledge pertaining to speech (gsung gi dam tshig), (3) and the pledge pertaining to mind (thugs kyi dam tshig).

The twenty-five secondary pledges are: (1) five pledges pertaining to non-abandonment, (2) five pledges pertaining to adoption, (3) five pledges pertaining to engagement, (4) five pledges pertaining to cognition, and (5) five pledges pertaining to practice. The five pledges pertaining to non-abandonment involve the non-abandonment of the five kleṣas. The five pledges pertaining to adoption involve ingesting the five nectars. The

five pledges pertaining to engagement involve the practices of ‘union’ (sbyor ba), ‘liberation’ (sgrol ba), stealing, lying, and rude speech. The five pledges pertaining to cognition entail cognising the five skandhas as having the nature of the five tāthāgatas. And the five pledges pertaining to practice involve putting the preceding five pledges pertaining to cognition into practice and perfecting them.\textsuperscript{195}

6. All Mahāyāna Precepts Relating to the Maintenance of Bodhicitta

The tantric and non-tantric Mahāyāna vows or pledges are seemingly limitless in number. Some rNying-ma sources speak of one hundred milliard (sa ya ’bum) pledges.\textsuperscript{200} Nonetheless, according to Rong-zom-pa, all pledges, which embrace also non-tantric and non-Mahāyāna precepts, are said to be included in the maintenance of bodhicitta. He states:\textsuperscript{201}

The vows (samvara)—pledges (samaya) involving engaging in and avoiding things that are [respectively] wholesome and unwholesome, [and thus respectively] permissible and impermissible, and that arise in connection with the [Three] Jewels, individuals, the range of conduct, and the attributes of these, [such pledges being] taught in the kriyā and yogatantras by the Victorious Ones with the aid of various terms—are as follows: pledges (samaya), vows (samvara), ethical-moral discipline (śīla), austerities (tapas), ascetic discipline (vrata), monastic rules (vinaya), [codes of] conduct (caryā), range of conduct (gocara), and so forth. All [of these] vows, which are taught with the aid of various terms, should be known in short as being subsumed under [the categories of] general, specific, and additional pledges, depending on the treatises, deities, and individuals. To be even shorter, they involve maintaining bodhicitta. [This] is summarised here as follows:

Whatever existing vows—pledges

\textsuperscript{195} Note that Rong-zom-pa discusses these twenty-eight pledges also in his gNang bkag yi ge (pp. 409.1–412.13). For the expression dam tshig nyi shu rtsa inga, see n. 131.

\textsuperscript{200} See, for example, the sDom gsum rnam nges (p. 31.5–6):

\begin{quote}
m dor na rang lus rdo rje gsum shes na ||
snags kyi dam tshig sa ya ’bum sde ’dus ||.
\end{quote}

See also the Rig ’din ’jug ngogs (p. 205.6–11); Nyang ralchos ’byung (p. 337.8). Cf. the Dam tshig gsal bkra (P, fol. 574a8–b1; S, vol. 43, p. 1191.2–4), also cited in the Phyogs bcu ’i mun sel (p. 619.5–6).

Taught in the great system of the Mantrayāna
With the aid of various terms—
Are, [depending on] the treatises, deities, and individuals,
Considered as general, specific,
And additional pledges
With respect to engaging in and avoiding [things]
After learning what is permissible and impermissible, [namely,]
The wholesome and unwholesome [things]
That arise in view of and in connection with
The Three Jewels, individuals,
The range of conduct, and the attributes of these.
[They], if summarised further,
Involve maintaining bodhicitta.

7. Concluding Remarks

This chapter has dealt with the maintenance of bodhicitta both in the wider context of the Mahāyāna and in the more restricted one of Vajrayāna ethical-moral codes. As we have seen, the maintenance of bodhicitta is considered to be the quintessence of all vows, both non-tantric and tantric—which are compared to the life force (srog gi dbang po), the breakdown of which would cause the failure of all other forces—202—and as such is of profound existential significance.

202 dKon mchog 'grel (A, fol. 178b1–3; B, p. 215.1–5): bslab pa thams cad kyi gzhi ni dam tshig yin te | dper na skyes bu'i srog gi dbang po 'gags na dbang po thams cad 'gag par 'gyur ba bzhin | rnal 'byor dam pa rnams kyi [ = kyi] dam tshig gi bslab pa med par 'gyur na dbang po la sogs pa'i bslab pa thams cad kyang don med par 'gyur bas | de'i phyir de skad bya'o ||; ibid. Chapter Eleven

The Relapse and Restoration of Bodhicitta

May the excellent precious bodhicitta arise
[In whom] it has not [yet] arisen!
May [it] grow evermore, without dwindling,
[In whom] it has [already] arisen!

— Anonymous

1. Introductory Remarks

Just as the maintenance of bodhicitta has been considered the crux of all tantric and non-tantric Mahāyāna vows, so too is the abandonment of bodhicitta (bodhicittaparītyāga) considered one of the severest transgressions. Retaining bodhicitta is approached as a daunting task full of hurdles. Multiple forces are conceived of as acting against the success of this endeavour. Ironically, the desire for nirvāṇa (in a conservative Buddhist sense) seems to be one of the most tempting motives for giving up bodhicitta. A bodhisattva thus always runs the risk of undermining or losing his bodhicitta. At the same time, it is commonly thought that

---

1 Cited by dPal-sprul in his Kun bzang bla ma'i zhal lung (fol. 171a3–4):
   byang chub sems mchog rin po che ||
   ma skyes pa rnams skye gyur cig ||
   skyes pa nyams pa med par yang ||
   gong nas gong du 'phel bar shog ||.

I have not been able to determine the authorship of this verse. mKhan-po Kun-dpal (sPyod 'jug tshig 'grel, p. 172.6) writes that the verse is 'composed as a synopsis in the Indian treatise' (rgya gzhung du sdom du bkod pa), or perhaps 'a synopsis of the Indian treatise [Bodhicaryāvatāra]' (in which case one should read rgya gzhung du sdom du bkod pa). mKhan-po Ngag-dga' in his Zhal lung zin bris (fol. 94b1–2) attributes this verse to Śāntideva. This is, however, obviously an error, if an understandable one. The Tibetan commentators of Śāntideva’s Bodhicaryāvatāra have often used this verse as an outline for commenting it. See, for example, Thub-bstan Chos-kyi-grags-pa’s sPyod ‘grel bum bzang (p. 20.15–16).

2 Bodhicaryāvatāra 4.7c; CROSBY & SKILTON 1995: 25; Śīkṣāsamuccaya (BENDALL, p. 67.15; VAIDYA, p. 41.20).

3 For references, see nn. 66 and 67.
one can, if one wants, always make amends if this occurs. Given the crucial role bodhicitta plays in tantric and non-tantric vows, we can well understand why there is no real substitute for the generation of bodhicitta in the process of restoring broken vows.

A few points that are not always made clear in primary sources require some comments here. Firstly, the abandonment or non-abandonment of bodhicitta is expressed in numerous ways: not forgetting bodhicitta (bodhicittāsampramōṣa), not becoming separated from bodhicitta (bodhicittavirāhita), not destroying or losing bodhicitta (bodhicittavipraṇāśa), and so forth. We shall see that in the Samayasamgraha and the mDo rgyas, the term 'impairment' (vipraṇāśa: nyams pa) has been used in a broad sense for both reparable and irreparable damage. Secondly, although it is not always clear whether it is bodhicitta itself or the bodhisattva vow that is spoken of as being impaired or nullified, we can perhaps take for granted that it is both of them together. Thirdly, we may ask what kind of bodhicitta is prone to damage or loss. Primarily, it is the bodhicitta of a bodhisattva who has not yet attained the path of seeing (darśanamārga). Fourthly, it is said that even in the case of complete loss, one can always regenerate bodhicitta or renew the bodhisattva vow. In the case of damage, one can always restore it.

2. Impairment to or Loss of Bodhicitta

The acquisition of bodhicitta bears no soteriological fruits unless it is maintained and nourished continually. It is described as never to be let go of or slackened (vimocyam) and is to be held firmly. The abandonment of bodhicitta is indeed condemned, whereas the stabilisation or maintenance of bodhicitta is highly praised as one of the rarest of things. Some of the earliest Mahāyāna scriptures already talk about the maintenance of bodhicitta in various contexts. The Bhadrapālasūtra states:

In order to benefit the world, [a bodhisattva], having generated compassion (karunā),
Teaches the precious [dharma], the best [of all dharmas].
Although [he] abandons all conditioned [phenomena] (samskṛta),

byang chub sems ni yongs su gtong mi byed ||.
[He] never gives up [his] bodhicitta.\(^{11}\) The Drumakinnararājaparipṛcchāsūtra mentions four qualities which can prevent a bodhisattva from becoming tired of samsāra. One of them is not giving up bodhicitta even during extremely trying situations.\(^{12}\)

O Drumakinnarāja, it should furthermore be known that a bodhisattva does not grow weary of samsāra if [he is] endowed with four attributes. What are the four? They are: [1] Not giving up bodhicitta even in extremely trying cases, [2] not desiring [to attain] the [spiritual] level of a śrāvakā or a pratyekebuddha, [3] protecting the Sublime Doctrine (saddharma) even [if it means] giving up life and limb, and [4] travelling a thousand yojanas in order to induce others to properly assume [the bodhisattva's career of] awakening (bodhi). O Drumakinnarāja, it should be known that a bodhisattva does not grow weary of samsāra if [he is] endowed with these four attributes.

Again in the Drumakinnarājaparipṛcchāsūtra, the musical instruments which the Buddha manifested through his magical power sound with the following questions:\(^{13}\)

How does one generate
The resolve [to strive] for the highest awakening, and
[How would] one not forget the resolve for as long as
One is not on the seat of awakening (bodhimanda) (i.e. the spot under the Bodhi tree)?

Thereupon the bodhisattvas (who are allegorically called Rūpa) answer:\(^{14}\)

[Bodhicitta is generated] by ‘all that constitutes altruistic inclination’ (*adhyāśayasampad)\(^{15}\)
For the sake of all sentient beings.
One who is endowed with great compassion
Will not forget bodhicitta.

Not forgetting bodhicitta is a topic also addressed in the Bodhisattvapitakasūtra, where it is counted as one of the four powers that increase the accumulation of gnosis.

\(^{11}\) Cf. Harrison 1990: 151. ‘Conditioned’ (samskṛta) and ‘non-conditioned’ (asamskṛta) have often been equated with samsāra and nirvāṇa, respectively. See, for example, Ratnakarasānti’s Ratnālokālaṃkāra (P, fol. 377b7; D, fol. 324b4; S, vol. 64, pp. 888.5–6): ‘dus byas ni kun rdzob ste [te P] ’khor ba’o || ’dus ma byas pa ni don dam pa stey mnas las ’das pa’o ||’. From an Abhidharma point of view, however, there are certain conditioned phenomena which are associated with nirvāṇa. What the last two pādas of the verse seek to convey is that although bodhisattvas have given up the factors responsible for ordinary existence in samsāra, and hence have already secured their own salvation, for the sake of others they do not give up bodhicitta. Bodhicitta thus strikes a balance between samsāra and nirvāṇa, making the so-called ‘non-stalemated nirvāṇa’ (apratि�ṣṭhitannirvāṇa) possible.

\(^{12}\) Drumakinnarājaparipṛcchāsūtra (pp. 259.8–261.2): mi ‘am ci i bdag po gzhon yang byang chub sems dpa’ chos bzhi dang ldan na | yongs su mi skyo bar rig par bya’o || bzhi gang ze na | ’di lla ste | rab tu nyen kyang byang chub kyi sems mi gtong ba dang | nyan thos dang rang sangs rgyas kyi sa mi ’od pa dang | lus dang srog kyang ’dor zhing dam pa’i chos sring ba dang | dpag tshad stong du ’gro zhing gzhon dang byang chub yang dang par ’dzin du ’jug pa ste | mi ’am ci’i bdag po byang chub sems dpa’ chos bzhi po ’di dag dang ldan na | yongs su mi skyo bar rig par bya’o ||. See also ibid. (pp. 4.7, 45.7, 77.11, 126.2, 134.11, 152.7–10, 153.2–5, 161.15–16, 284.4).

The Resolve to Become a Buddha

(jñānasambhāra). 16 One who studies and expounds the Bodhisattvaprajñākasūtra is said to be never separated from bodhicitta. 17 According to the Ugraparipṛcchāsūtra, a bodhisattva who is a householder can be said to have taken refuge in the Buddha if he is endowed with four qualities, one of which is the non-abandonment of bodhicitta. 18

Besides, O householder, a bodhisattva who is a householder has taken refuge in the Buddha if he is endowed with four qualities. What are the four? [They are:] not abandoning bodhicitta, not breaking [one's] commitment, not giving up great compassion (mahākaruṇā), and not aspiring to other ways (or vehicles). O householder, a bodhisattva who is a householder has taken refuge in the Buddha if he is endowed with these four qualities.

Bodhibhadra, in his Samādhisambhāra, cites the Gāndavyūhasūtra according to which even endeavours that are rooted in basic wholesome virtues (kusālamūla) but still cause the loss of bodhicitta are the work of Māra. 19 The Sāgaranāgarāparipṛcchāsūtra as quoted in the Sūtrasamuccaya states that a bodhisattva is endowed with faith (sraddhā) if he has the power not to renounce bodhicitta. 20 The safeguarding of bodhicitta is also a theme in the Samdhinirmocanasūtra, where it is counted as one of the six śikṣāpadas of a bodhisattva. 21 In the Rāṣtrapālaparipṛcchāsūtra, the state of being separated from bodhicitta is listed as one of the several disadvantages of being in the company of a bad friend (pāpamitra). 22 The act of stabilising bodhicitta is also said to be mentioned in the Śrīmālādevīśūtra. 23 As I have already mentioned, the term bodhicitta seldom occurs in the Bodhisattvabhūmi, and hence we cannot expect the latter to explicitly allude to the maintenance of bodhicitta or stabilisation of bodhicitta and so forth in an exhortative sense. Nevertheless, in mentioning four advantages

19 Samādhisambhāra 2 (P, fol. 97b5–6; D, fol. 89a2–3; S, vol. 64, p. 256.11–12): ji skad du 'phags pa sdong po bkod pa las | byang chub kyi sms nyams par byed pa'i dge ba'ri rtsa ba risom pa thams cad ni bdud kyi las so zhes gsungs la ].

20 Sūtrasamuccaya (p. 14.3–10): klu'i rgyal po rgya mthos zhus pa las kyang | [klu'i bdag po byang chub sms dpa' chos lnga dang Idan pa dag ni dad pa can yin te | lnga gang zhe na | mos pa'i stobs dang | las kyi rnam par smin pa la 'jug pa'i stobs dang | byang chub kyi sms mi 'dor ba'i stobs dang | yi dam la bstan pa'i stobs dang | mi dge ba'i chos thams cad spangs te | nyes par byas pa thams cad bdod pa'i stobs dang Idan pa'o zhes gsungs so ||.

21 Samdhinirmocanasūtra (pp. 131.29–132.6): bcom Idan 'das bslab pa'zi gshi drug po de dag la byang chub sms dpa' ji ltar bslab par byg gi lags | spyan ras gzigs dbang phyug rnam pa lngas te | pha rol tu phyin pa dang Idan pa'i dam pa'i chos bstan pa | byang chub sms dpa'i sde snod la thog ma kho nar shin tu mos pa dang | de'i 'og tu chos sbyad pa bcu po dag gis thos pa dang | bsams pa dang | bsgoms pa las byang ba'i shes rabs bsgurb pa dang | byang chub kyi sms rjes su bsrong ba dang | dge ba'i bshes gnyen la bsten pa dang | rgyun mi 'chad par dge ba'i phyogs la sbyor bas bslab par bya'o ||.

22 Rāṣtrapālaparipṛcchāsūtra (p. 58.10).

23 See the dKon mchog 'gre (A, fol. 190a5–6; B, p. 227.2–4): dpal gyi phreng [phreng A] ba'i mdo las | byang chub sms bstan theg chen zhus la byams ||; Phyogs bcu'i mun sel (p. 609.2). Whether the line can indeed be found in the Śrīmālādevīśūtra needs to be confirmed. I have been not able to trace it in the translation of the sūtra in WAYMAN & WAYMAN 1974.
of being dedicated to the cultivation of the four immeasurables (apramāṇa), it does allude to the firmness of the solemn wish (āśaya) to strive for the highest awakening.24

3. Causes of the Partial or Total Breach of Vows

In general, four causes of (or ‘gates’ to) the overstepping or breaching of vows are mentioned in the Vinaya context:25 (a) lack of knowledge (mi shes pa), (b) carelessness (pramāda), (c) abundance of intellectual-emotional defilements (nyon mongs mang ba), and (d) faithlessness (aśraddhya). These can be applied in particular to the bodhisattva and mantra vows. The Viniścayasamgrahaṇi refers to four causes of the breach of the bodhisattva vows, which may be summarised as:26 (a) generating a resolve contrary to the one initially assumed (?), (b) formally giving up the vow in the presence of a person who is capable of understanding, (c) committing one or more of the four pārājika-like offences, and (d) committing one or more of the four pārājika-like offences coupled with excessive (adhimātra) fetters (paryavasthāna).

The Dākinīsamvaratantra increases the above four causes to make six causes relating to the breach of tantric vows:27 (a) lack of knowledge, (b) carelessness, (c) possessing (many) intellectual-emotional defilements, (d) faithlessness, (e) forgetfulness (muṣītasmytī), and (f) lacking mindfulness (or clarity of mind). The Kun ‘dus rig pa’i mdo mentions ‘nine doors of transgression (or fall)’ (ltung ba’i sgo dgu), an expression also employed by Rong-zom-pa, but one that does not seem to mean what it appears to, referring rather to nine transgressions that cause one to suffer nine undesirable destinations.28 The Dam tshig gsal bkra lists twenty causes of samaya impairment,29 but the reading is very uncertain, and prone to more than one interpretation.

24 Bodhisattvabhāmi 1.16 (WOGIHARA, p. 249.4–6; DUTT, p. 170.13–14): anuttarāyāṃ samyakṣaṃbodhīv āśayadṛḍhatvāya bhavati; see also MAITHIMURTHI 1999: 316, 327.

25 Vastusamgrahāṇi (P, fols. 2b8–3a1; D, fol. 2b3; S, vol. 75, p. 5.2–3):
   de yi rgyu yang rnam bshis ste ||
   mi shes pa dang bag med dang ||
   nyon mongs mang dang ma gus pa’o ||

For an explanation of each of the four causes, see ibid. (P, fol. 9a5–b6; D, fols. 7b5–8a4; S, vol. 75, pp. 17.16–18.16). See also the mTsho tīk (p. 230.9–11).

One discussion of the four causes of the loss of the prātimokṣa vows may be found in the Shes bya mdsod (p. 344.6–25).

27 Dākinīsamvaratantra (T, fol. 35a4–5; D, fol. 243b4):
   dang por nyams pa’i rgyu nyid kyang ||
   mi shes pa dang bag med dang ||
   nyon mongs mang dang ma gus dang ||
   brjed ngas dran pa mi gsal ba ||
   ‘di drug dam tshig ma pa’r rgyu ||

29 See the Dam tshig gsal bkra (P, fol. 578a1–3; S, vol. 43, pp. 1197.20–1198.6):
4. Causes of Impairment to or Loss of Bodhicitta

There may be many other lists of the causes of bodhicitta being impaired or lost. In the following paragraphs I shall present those of which I am aware. In the Pujyasamuccayasamādhīsūtra, the Buddha tells the bodhisattva Nārāyaṇa that there are four sets of four qualities that can cause one to forget bodhicitta. The first set of four is stated to be as follows:30

O Nārāyaṇa, a bodhisattva will forget [his] bodhicitta if [he is] possessed of four qualities. What are the four? They are: [1] great haughtiness (atimāna), [2] lack of respect for the Doctrine (dharma), [3] disrespectfulness or contemptuousness (adhiṣeṣa) for [one’s] spiritual companion (kalyāṇamitra),31 and [4] mendacity (mithyāvāc). O Nārāyaṇa, if a bodhisattva is possessed of these four qualities, [he] will forget [his] bodhicitta.

The sūtra does not explain why or how these qualities would cause one to forget one’s bodhicitta. The second set of qualities are then listed:32

O Nārāyaṇa, a bodhisattva will forget [his] bodhicitta if [he is] possessed of four qualities. What are the four? They are: [1] acquainting himself with practitioners (yogācārin) who are the followers of the Śrāvakayāna and Pratyekabuddhayāna,33 [2] [acquainting himself with] those who are [intellectually and emotionally] disposed (adhimukta) to Hinayāna, [3] being hostile to bodhisattvas and disparaging [them], and [4] being a teacher who is unforthcoming with the Doctrine.34 O Nārāyaṇa, if a bodhisattva is possessed of these four qualities, [he] will forget [his] bodhicitta.

31 Note that T adds here ‘not paying homage [to them]’ (gsol ba mi ’debs pa).

33 The compound srāvakapratyekabuddhayānīka is attested. See, for example, KEIRA & UEDA 1998, s.v.

34 According to the Tshig mdzod chen mo (s.v.), mkhyud pa means to ‘keep secret’ (gsang ba) or ‘conceal’ (shed pa) so that dpe mkhyud means ‘keeping an instruction secret and not teaching it, out of a sense of parsimony’ (man ngag shes kyang ser snas gsang ste mi ston pa), and in particular, slob dpon gyi dpe mkhyud.
In this set of four, it is evident why the first three qualities can cause degradation of bodhicitta. As for the third set of four, the sūtra states: 35

O Nārāyaṇa, a bodhisattva would further forget [his] bodhicitta if [he is] possessed of four qualities. What are the four? They are: [1] being deceitful, [2] associating with (lit. ‘relying upon’) sentient beings for perfidious purposes, [3] being double-tongued to [one’s] spiritual companions, and [4] being greatly attached to material gain and a good reputation. O Nārāyaṇa, if a bodhisattva is possessed of these four qualities, [he] will forget [his] bodhicitta.

The fourth set of four qualities is as follows: 36

O Nārāyaṇa, a bodhisattva will forget [his] bodhicitta if [he is] possessed of four qualities. What are the four? They are: [1] not recognising the deeds of Māra, [2] being obscured by karmic obscurations, [3] having weak altruistic inclinations (adhyāśaya), and [4] lack of discriminating insight (prajñā) and [efficiency in applying] strategic means (upāya). O Nārāyaṇa, if a bodhisattva is possessed of these four qualities, [he] will forget [his] bodhicitta.

The Punyasaṃuccayasaṃādhisūtra then goes on to narrate the story of how Sudhana, out of pride, neglected bodhicitta during the time of the Buddha Krakucchanda, and was thus dispossessed of five things, namely, seeing buddhas, hearing the Doctrine, discussing with great bodhisattvas matters of the Doctrine, dedicatory transfer (parinīmanā) of basic wholesome virtues (kuśalamāla), and the stabilisation of bodhicitta. And yet, in virtue of his previous bodhicitta, he was not reborn in hell. 37

In the chapter on the two bodhicittotpāda traditions, we have seen that manifesting the so-called ‘four black practices’ (nag po ‘chos bzhī) or not manifesting the ‘four white practices’ (dkar po ‘chos bzhī) has been considered to be the four cardinal transgressions (mūlāppatti) according to the Maitreya-Asanga tradition. According to the Ratnakūṭasūtra, as cited in the Śikṣāsamuccaya, these four negative practices cause one to forget one’s bodhicitta: 38

Forgetting bodhicitta is also detrimental, and its causes have been taught in the Ratnakūṭaśūtra: “O Kāśyapa, the bodhicitta of a bodhisattva will go astray (or be forgotten) if [he is] possessed of four qualities. Which four? The following: 40 [1] betraying of [one’s] preceptor, master, and [others] worthy of respect (or offerings), [2] causing regrets (or misgivings) in others who are without regrets (or misgivings), [3] uttering depreciation, slurs, disapprobation, or malicious verse against sentient beings who are properly established in the

37 Punyasaṃuccayasaṃādhisūtra (T, fols. 130b1–131b1; D, fols. 101b4–102a6).

39 Note that muhyati has been translated into Tibetan as brjed par ‘gyur (‘will be forgotten’) and bodhicittasampramoṣa as ‘forgetting bodhicitta.’ Cf. n. 4.

40 The Tibetan translation has ‘di ila ste (tadyāthā), which is not reflected in either Sanskrit edition.
Mahāyāna, and [4] approaching others with deceitfulness and dishonesty rather than with altruistic inclinations.\(^{41}\)

Ratnakarasanti, in his *Ratnalokālaṃkāra*, has summarised these four causes of forgetting *bodhicitta* as follows:\(^{42}\) (1) deceiving one's teachers and those worthy of offerings, (2) inappropriately causing regrets in others,\(^{43}\) (3) speaking ill of other bodhisattvas out of malevolence, and (4) treating sentient beings with deception and dishonesty. The four positive practices meant to keep *bodhicitta* thriving are given as follows:\(^{44}\)

The fact that the corresponding antidote is given as 'placing others in the [state] of perfect awakening' is translated as 'standing among the buddhas within all bodhisattvas and proclaims their praise in the four directions. And [4] [he] causes all those sentient beings whom he brings to maturation to generate [the resolve to strive for] the highest perfect awakening without the desire [to place them in] the 'Vehicle of Limited Scope' (i.e. Hinayāna). These, O Kāśyapa, are the four.\(^{45}\) These four antidotes are summarised by Ratnakarasanti as follows:\(^{47}\) (1) not telling lies deliberately, not even in jest, (2) establishing others in the state of perfect awakening, (3) regarding other bodhisattvas as if they were the Buddha himself, and (4) harbouring pure altruistic inclinations towards others.

In the *Pūrṇaparipṛcchāsūtra*, Pūrṇa asks the Buddha what kind of unwholesome deeds he must have committed that caused the deterioration of his *bodhicitta* for one aeon. The Buddha tells him that he had in the past relied upon bad companions and that he did not

---

\(^{41}\) For the Tibetan translation of this passage, see the *Śikṣāsamuccaya* (P, fol. 42b2–5; D, fol. 34b6–35a1; S, vol. 64, pp. 1085.14–1086.1). Cf. the English translation in BENDALL & ROUSE 1971: 53. See also the Rig *'dein 'jug ngogs* (p. 138.1–6), where the pertinent passage is cited. Cf. SOBISCH 2002: 54, nn. 168–169.

\(^{42}\) *Ratnalokālaṃkāra* (P, fol. 277b3–5; D, fol. 236b5–6; S, vol. 64, pp. 667.20–668.3): *de la byang chub kyi sems brjed pa ni rgyu rnam pa zhi ste* | *bla ma dang shyn gnas la* [om. PN] *log par slu* [bslu PN] *ba dang* | *gzhon gnas ma yin pa la* *'gyod pa bysked pa dang* | *byang chub sems dpa' la the sdang bas ngan du brjod pa dang* | *sgan can la g.yo dang* [om. \(^{47}\) *Ratnalokālaṃkāra* (P, fol. 277b5–6; D, fol. 236b6–7; S, vol. 64, p. 668.3–6): *de'i gnyen po ni rnam pa zhi ste* | *shes bzhin bzhad gad kyi phyir yang brdson mi brjod pa dang* | *gzhon dag rdzogs pa'i byang chub la 'god pa dang* | *byang chub sems dpa' la ston pa ltar sems pa* [dpa' N] *dang* | *gzhon la bsam pa rnam par dog pa'o* |.
widely propagate the Sublime Doctrine (saddharma). The Buddha then goes on to explain four qualities that cause a bodhisattva's bodhicitta to deteriorate, relegating him to the status of a śrāvaka. The first such factor is explained thus:

Because a bodhisattva has relied upon a bad, unwholesome companion, he utterly abandons all the basic wholesome virtues, and afterwards [his companion] proclaims thus: "Why do you have to generate the resolve [to strive] for unsurpassable awakening? The extent of samsāra is extremely great. You would experience infinite pain (or suffering) while going through the five destinations [of samsāra]. In other words, encountering a suitable opportunity is extremely rare. Encountering the appearance of a buddha is also extremely rare. Obtaining an intense pristine faith is also extremely rare. Even if you happen to encounter a buddha who has appeared [in the world], going forth from a home to homelessness is exceedingly difficult. Do not waste the opportunity you have now. You have not obtained a prophecy from the tathāgatas that you will become awakened unto the unsurpassable, correct perfect awakening, nor will you attain nirvāṇa, since [your] basic wholesome virtues have not taken firm shape. And you would wander around in the five destinations (gati)." The person, on hearing what has been said, would become mentally depressed and turn back from the path of awakening, and in his torpor lose confidence [in it].

The second quality causing a bodhisattva's bodhicitta to deteriorate is explained thus:

---

48 Pūrṇaparipṛchchāsūtra (T, fol. 345a1–4; D, fol. 185a5–6): bcom ldan 'das la tshe dang ldan pa gang pos gsol pa | bcom ldan 'das bdag gis sngon mi dge ba'i las ci zhih bygis na bskal pa gcig gi bar du bla na med pa yang dag par rdzogs pa'i byang chub tu sems bksey pa las slar ldog [log D] cing nyams par gyur lags | bcom ldan 'das kyi bka' stsal pa | gang po khyod kyi mi dge ba i grogs po la bren [bsten D] pa'i phyir dang | gzhan yang khyod kyi dam pa'ichos rgya cher ma spel ba'i phyir khyod bla na med pa yang dag par rdzogs pa'i byang chub las slar ldog cing nyams par gyur pa yin no \].

---
Moreover, O Pūrṇa, if a bodhisattva does not happen to hear those sūtras that are consistent with [the conduct of] a bodhisattva, namely, the Bodhisattvasūtra, Bodhicittotpādasūtra, Bodhisattvakhriyāsambrahāsūtra, and *Śūtapaśrāvativāisasūtra, [he] will not conduct himself as instructed, because [he] will not have heard them. Because [he] does not properly train himself as instructed, he will not know clearly what kind of dharma a bodhisattva should rely upon; what kind of dharma should be abandoned; what kind of dharma is worth adopting; what kind of dharma is not worth adopting; what kind of dharma the bodhisattva’s dharma is; and what kind of dharma the śrāvakas’ dharma is. Failing to understand and differentiate in this way, [he] will not rely upon [those] dharmas that are worth relying upon and rely upon [those] dharmas that are not worth relying upon. Because he does not rely upon [those] dharmas that are worth relying upon and relies upon [those] dharmas that are not worth relying upon, [he will suffer] a complete setback and relapse from the bodhicitta of the buddhas, and will become disheartened and apathetic, and thus completely renounce on the aspirations [he had] before. O Pūrṇa, a bodhisattva who is endowed with this second quality will relapse from [the path] of the highest awakening and become a śrāvakayānikā.

The third quality causing a bodhisattva to allow his bodhicitta to deteriorate and fall back to the status of a śrāvaka is explained thus.\[52\]

Furthermore, O Pūrṇa, suppose that a bodhisattva holds to all phenomena to be existent and firmly clings to a self (ātman), practises false views, and [even] descends into extreme views. [And] suppose that [having become incorrigible as a result of being submerged in false [views and] misdeeds, he opposes profound sūtras [whose content is] in harmony with absolute reality—without the slightest sign of trust despite listening to [them]—and having failed to realise [their purport] clearly, commits blameworthy [deeds] that cause the destruction of the right dharma. Given such causes and conditions, he would be born in an unfavourable place, and thus would not encounter the buddhas [and] would not hear the Sublime Doctrine (saddharma); would not encounter the instructions of the buddhas; and would not find [spiritually] favourable companions (i.e. good teachers and friends). Not [being able to] encounter buddhas, he would not hear the right dharma. Not hearing the right dharma, [he] would not encounter instructions taught by the buddhas. Not encountering instructions taught by the buddhas, [he] would not find [spiritually] favourable companions. Not finding [spiritually] favourable companions, [he] would be cut off from favourable places and be born in an unfavourable place. Being born in an unfavourable place, [he] would be separated from [spiritually] favourable companions and encounter [spiritually] unfavourable companions. Following [spiritually] unfavourable companions, [he] would forget and lose the resolve [he had] before. Forgetting and losing the...
resolve [he had] before, he would also abandon bodhicitta; would also abandon the Bodhisattvayana; would consequently relapse [from it]; would lose for good the resolve [to strive for] awakening; would become engaged exclusively in the deeds of samsāra; and would not be engaged in practising Mahāyāna. O Pūrṇa, a bodhisattva who happens to be endowed with this third quality would relapse from [the path] of the highest awakening and would become a śrāvakayānika.

The fourth quality causing a bodhisattva's bodhicitta to deteriorate is explained thus:53 Furthermore, O Pūrṇa, suppose that a bodhisattva who has heard such sūtras does not properly teach others out of an altruistic inclination (adhyāsaya); in his torpor takes delight in visiting [and teaching] only one [kind of person]; has no will to teach others, being unforthcoming with the Doctrine; and does not gather masses of other [people] by [teaching] the Doctrine. Given these unwholesome causes and conditions, [he] would seriously damage [his] discriminating insight (prajñā) and awareness (smṛti). A person who, having damaged [his] discriminating insight and awareness, does not read and recite sūtra scriptures together with other [persons] and does not conduct himself in harmony with others on the basis of the Doctrine would lose his bodhicitta immediately after the exchange of [his present] body (i.e. after his death), and would also forget the bodhisattva's altruistic inclination (āśaya). O Pūrṇa, a bodhisattva who happens to be endowed with these four qualities will relapse from the resolve to strive for the highest awakening and will become a śrāvakayānika.

The four qualities that cause the relapse of bodhicitta have been summarised once again in verse.54 The sūtra also explains four qualities that can prevent the deterioration of bodhicitta:55

---

54 Pūrṇaparipṛcchāsūtra (T, fols. 347b1–348a1; D, fols. 186b6–187a3):

O Pūrṇa, a bodhisattva who is endowed with four qualities will not revert from [his] bodhicitta, in keeping with his dedicatory aspiration (parināmāṇā), nor will his basic wholesome virtues (kuśalamūla) deteriorate, [again] in keeping with his dedicatory aspiration. What are the four? [They are:] if bodhisattvas adhere to the immaculate ethical-moral discipline (śīla) and bring [their] altruistic zeal (āsaya) to fruition; [if they are] endowed with awareness (smṛti) and properly abide in discriminating insight (prajñā); [if they] make efforts in a diligent [state of] mind and are free from laziness; [and if they possess] the excellence of vast learning and enhanced discriminating insight. O Pūrṇa, if a bodhisattva is endowed with these four qualities, [he] will not revert from [his] bodhicitta, in keeping with his dedicatory aspiration (parināmāṇā), nor will his basic wholesome virtues (kuśalamūla) deteriorate either, [again] in keeping with his dedicatory aspiration.

The Brahmacāreṣaṣacintiparipṛchāṣūtra mentions four qualities that prevent a bodhisattva laying waste to his bodhicitta:

O Brahma, bodhisattva-mahāsattvas will not lay waste to [their] bodhicitta if [they] are endowed with four qualities. What are the four? [They are:] [1] 'focusing their' attention on recollecting the Buddha' (buddhānusmṛti), [2] [making sure that the practices of] all the basic wholesome virtues (kuśalamūla) are headed by [the practice of] bodhicitta, [3] relying upon [spiritually] favourable companions (kalyāṇamitra), and [4] properly reasoning (or appreciating) Mahāyāna. These are the four.

The Bodhisattvabhūmi mentions four causes (kāraṇa) of the relapse (vyāvṛtti) of cittotpāda:

There are four causes of the relapse of the resolve [to strive for awakening] within a bodhisattva. What [are] the four? [1] Not being endowed with the spiritual disposition (gotrasampanna) [of a bodhisattva], [2] being in the grip [or influence] of a bad companion (pāpamitraparipṛchā), [3] being apathetic (mandakarunā) towards sentient beings, and [4] being afraid (bhīru) of the long-term, manifold, excruciating, and unceasing suffering of saṃsāra—extremely frightened [of it], terrified and stricken with terror. These four causes of the relapse of the resolve [to strive for awakening] should be known in detail as being in opposition to the four [pre]requisites for the arising of the resolve [to strive for awakening, which should be understood] analogously to what [was explained] before.

57 Bodhisattvabhūmi 1.2 (§3.2.0).
Chapter Eleven: The Relapse and Restoration of Bodhicitta

The *Bodhisattvabhumi* in general presupposes the existence of some sentient beings without any kind of spiritual disposition (gotra). Here, however, it is the lack of the spiritual disposition of a bodhisattva that is referred to, if not explicitly, as being one of the causes of the relapse of cittotpāda—and not the lack of gotra as such. The fact that the gotra of a bodhisattva is in question here has been made explicit elsewhere in the *Bodhisattvabhumi*. The relapse of cittotpāda caused by the absence of a spiritual disposition is viewed by Sāgaramegha almost in a fatalistic fashion. He states that relapses brought on by three other causes are not permanent relapses, whereas the lack of an excellent spiritual disposition would cause permanent relapse. It should be, however, stated here that the agotra theory appears fatalistic only from a soteriological point of view, not from a worldly perspective. The *Bodhisattvabhumi* makes it clear that the welfare of an agotra is included among the ‘ripening’ agenda of a bodhisattva. That is to say, even a person without the requisite spiritual disposition can be ripened in order to attain a good existence. Sāgaramegha explains the expression ‘a bad companion’ as follows:

A bad companion is [one] who causes [a bodhisattva or a potential bodhisattva] to give up [his] inclination towards the Greater Vehicle and makes [him] aspire to other vehicles; or else [he] is [one who] instigates [an aspirant] to give up [his] practice on the path of liberation [from samsāra], provoking [him] to give up the endeavour. Under such [circumstances] (i.e. under the influence of a bad companion), his resolve [to become a buddha] will relapse.

As to the third cause of the relapse of cittotpāda, Sāgaramegha explains that the very existence of Bodhisattvahood is dependent on compassion towards sentient beings, and thus by losing this compassion, a bodhisattva automatically forfeits his status as a bodhisattva:

Because of his apathy, [a bodhisattva] is no longer regardful of sentient beings. In such a case, given that [he] is no longer regardful of sentient beings, [his bodhi]citta, [which in the first place

---

58 *Bodhisattvabhumi* 2.4 (WOGIHARA, p. 319.1–3; DUTT, p. 218.15–17): “And that procedure for abiding in the spiritual disposition which has been explained in the chapter on spiritual disposition (i.e. *Bodhisattvabhumi* 1.1) should be known in detail [accordingly]; to be that of the bodhisattva’s abiding in [his] spiritual disposition. This is called the bodhisattva’s abiding in [his] spiritual disposition” (yus ca vidhī gotraitasya gotrapātāle nirdīśat | sa gotraviharino bodhisattvasya vistareṇa vedītavyah | ity ayam ucayate bodhisattvasya gotrāvihārāḥ).

59 Bodhisattvabhumi vyākyāya (P, fol. 31b7–D; D, fol. 27b7–28a1; S, vol. 75, p. 672.12–13): *rgyu* *gsun* po ‘di dag gis ldog pa nI gtan ldog pa ma yin no || *rgigs phun* sum *tshogs* pa ma yin pa nI gtan ldog par 'gyur ro ||.

60 See, for example, Bodhisattvabhumi 1.6 (WOGIHARA, p. 78.23–25; DUTT, p. 55.16): “Even a person without no spiritual disposition has to be ripened in order that [he] may go to a good existence” (agotraśto ‘pi pudgalāḥ sugatigamanāya paripāca-vātavyo bhavati). See also ibid. 1.6. (WOGIHARA, p. 85.4–6; DUTT, p. 60.5–6): “The ripening towards a good existence on the part of persons with no spiritual disposition is liable to relapse again and again, and has to be done repeatedly” (tatrāgotrasthānām pudgalānām sugatigamanāya paripākāḥ punaḥ punaḥ* "pratyāvartayo bhavati ‘punah punaḥ” karanāh).* [“nahpuṃ WOGIHARA”]

61 Bodhisattvabhumi vyākyāya (P, fol. 31b5–6; D, fol. 27b5–6; S, vol. 75, p. 672.2–6): *de la mi dge ba’i bshes gnyen* *ni* *theg* *pa* *chen* *po* *la* *mos* *pa* *’dor* *du* *’jug* *cing* *theg* *pa* *gzhan* *la* *smon* *pa* *byed* *du* *’dzud* *pa’am* || *thar* *pa’i* *lam* *la* *sbyor* *bar* *byed* *pa* *’dor* *bar* *byed* *cing* *brison* *pa* *’dor* *bar* *sbyor* *ba* *ste* || *de* *ltar* *na* *de* *’i* *ems* *ldog* *par* ‘gyur ro ||.

62 The Ugradatapariprretchedāṭra, as quoted in the Śīksāsamuccaya (BENDALL, pp. 198.1ff.; VAIDYA, pp. 109.31ff.), states that a bodhisattva who abides in a solitary place should ponder upon reasons (i.e. the reasons for the fears he has). One of the many fears referred to is his fear of a bad companion (pāpamitrabhayaḥ). Cf. the Mahāvyutpatti, no. 2508, where pāpamitrata is counted as one of the six conditions leading to the diminishing of wealth.

63 Bodhisattvabhumi vyākyāya (P, fol. 31b6–7; D, fol. 27b6–7; S, vol. 75, p. 672.6–8): *snying rje chung bas* *sems* *can* ‘la’ *llos* [btlos P] *pa* *med* *par* ‘gyur ro || *de* *ltar* *na* *sems* *can* *gyi* *don* *gto* *bor* *byas* *nas* *byang* *chub* *la* *dmigs* *pa* *yin* *na* || *sems* *can* *rnams* ‘la’ *llos* [btlos P] *pa* *med* *pas* *byang* *chub* *las* *sems* *ldog* *par* ‘gyur ro ||.
The Resolve to Become a Buddha

is an aspiration aimed at awakening, with the benefit of the sentient beings as its priority, will relapse.

On this third cause Sāgaramēgha comments:64

When he sees the threat posed by the four kinds of suffering (duḥkha) associated with conditioned phenomena, a sense of extreme agony will arise. Thus [he] will desire to quickly pass into parinirvāṇa, and [his] cittotpāda will relapse.

In addition, Sāgaramēgha rightly points out that the opposites of the four causes of the arising of cittotpāda are the causes of the relapse of cittotpāda:65

The opposites of the causes of the arising of the resolve [to strive for awakening] should be known to be the causes of the relapses [of the resolve to strive for awakening]. And [this] should also be known on the basis of the positive (lit. ‘white’) components and the negative (lit. ‘black’) components, and on the basis of the complete presence or incomplete presence [of the necessary causes]. The positive components and the complete presence of [causes] are the causes of the arising-and-continuing [of cittotpāda], [whereas] the negative and incomplete presence [of causes] are the causes of [its] relapse.

5. The Abandonment of Bodhicitta as the Severest Transgression

The abandonment or loss of bodhicitta is considered to be the worst of all transgressions. For example, the Ratnagunāsāmcayā states that a bodhisattvavāda would impair his ethical-moral discipline (śīla) should he resolve to become a pratyekabuddha or an arhat (i.e. a śrāvaka saint), and would thereby commit an offence more serious than one of the pārājikas.66 Sāntideva, too, considers the abandonment of bodhicitta to be the most serious offence that a bodhisattva can commit.67 Vibhūtīcandra’s commentary on the Bodhicaryāvatāra states that the abandonment of bodhicitta is an (outwardly) small but nevertheless serious offence.68

Why the abandonment or impairment of bodhicitta should be considered such a serious transgression will become comprehensible if we look at the ‘extent of impairment’ (nyams pa ’i tshad) discussed in the tantric context. The following five types of impairment to a tantric pledge are mentioned in the Samayasāmcaya and the mDo rgyas, both of which were perhaps based on the Kun ‘dus rig pa ’i mdo:69 (1) massive impairment (kun tu nyams pa

---

64 Bodhisattvabhūmīvyākhya (P, fols. 31b8–32a1; D, fol. 27b7; S, vol. 75, p. 672.9–11): ‘du byed kyi s’dug bsgal gyi rigs bzhi/i ’jigs pa mthong nas drag cing dang ba/i yid la byed pa skye bar ’gyur ro/’ des na myur du yongs su mya ngan las ’da bar gyur bar ’dod cing/’ sens bskyed pa de ldog par ’gyur ro/].

65 Bodhisattvabhūmīvyākhya (P, fol. 32a1–3; D, fol. 28a1–2; S, vol. 75, p. 672.13–17): sens skye ba/i ’rgyu las b’slog pa las ldog pa/i ’rgyu rig par bya ste/’ dkar po/i ’phyogs dang/’ nag po/i ’phyogs kyi ’dbye ba dang/’ tshang [tsha P] ba dang/’ ma tshang ba/i ’dbye bas kyang rig par bya/o/’ dkar po/i ’phyogs dang tshang ba ni ’jug po/i ’rgyu yin no/’ nag po/i ’phyogs dang/’ ma [om. P] tshang ba ni ldog pa/i [om. PN] ’rgyu yin no/.

67 Bodhicaryāvatāra 4.8: bodhisattvasya tenaiṣam sarvapattar garīvasī/ yasmād āpādyamāno ‘sa sarvasatvārthānāṃkṛti/.

For an English translation, see Crosby & Skilton 1995: 25. See also Dayal 1932: 64.

68 Viśeṣadyotani (P, fol. 25b2–3; D, fol. 215a6; S, vol. 62, p. 563.16–18): des ’di la ltung ba chung [add. ba PN] yang shin tu lci bar ’gyur te/’ gang gi phiyur ’di gcig pu la ltung ba byung na sens can thams cad kyi don mi ’grub pa/o/]

69 Kun ’dus rig pa/i mdo (P, fols. 56b8–57a1; D, fol. 58a3): kun du nyams pa chen po dang/’ rtsa ba nyams dang yan lag nyams/’ de bzhin zlas nyams zhar nyams lnga/.
Chapter Eleven: The Relapse and Restoration of Bodhicitta

The occurrence of multiple fundamental [transgressions] after abandoning bodhicitta is called 'massive impairment' (kun tu nyams pa chen po). If bodhicitta has not been lost, but nevertheless a single or multiple fundamental [pledges] that have been explained (to one) are breached, [this] is called 'fundamental impairment' (rtsa ba nyams pa). The occurrence of other lapses without the fundamental [pledge] being breached is called 'secondary impairment' (yen lag nyams pa). Although one is unwaveringly intent on abiding by [one's pledge], one associates with bad teachers and bad friends, and so automatically loses [one's] attentiveness and attentive preoccupation with wholesome or neutral activities, despite the unwavering intention to abide by [one's pledge], are called 'incidental impairment' (zhar la nyams pa).

In sum, the abandonment of bodhicitta is said to cause not only total or massive impairment to one's mantra vow but also—as made explicit, for example, in the Mantrarāvṛtti—to undermine the foundation of all Mahāyāna pledges.

---

70 Samayasamgraha (P, fol. 255b8–256a1; D, fol. 45b6–7; S, vol. 41, p. 695.2–3): de la nyams pa [om. PN] che chung gi tshad ni kun du nyams pa chen po dang rtsa ba nyams pa dang | yan lag nyams pa dang zlas [zlos pa P; zlas pa N] nyams pa dang zhar la nyams pa'o ||; mDo rgyas (A, fol. 268b4; B, p. 384.7–9): kun tu nyams pa chen po dang | rtsa ba nyams pa dang | yan lag nyams pa dang | zlas nyams pa dang | zhar gyis nyams pa dang Inga' o ||.

---

The fact that the abandonment or loss of bodhicitta is perceived as a serious breach of the bodhisattva's ethical-moral discipline does not mean that someone who has not cultivated bodhicitta at all automatically has to bear the consequences of not doing so. One could say that a person who has not made any promise has no promise to keep or break. Thus, for example, a śrāvaka who has not taken the bodhisattva vow has neither any incentive to maintain bodhicitta nor disincentives to acquiring it. The main argument for considering the abandonment of bodhicitta as a serious offence of the bodhisattva's ethical-moral discipline is that, by abandoning or impairing his bodhicitta, he turns his back on all sentient beings, and so revokes the commitment that he had made. The idea that his personal integrity is at stake is often played up to encourage a bodhisattva to keep his bodhicitta alive, for even by worldly standards a person who cannot keep a commitment is considered unreliable.  

6. The Types of Setbacks

The fact that bodhicitta is prone to relapse does not mean that all bodhisattvas at some point invariably suffer setbacks. The ones they do suffer may be of different kinds. The bodhicitta of some bodhisattvas is said to never suffer any relapse from the beginning to the end of their career, whereas in other cases the relapse may be irreversible. According to the Bodhisattvabhūmi, there are two types of relapse (vyāvṛtti) of cittotpāda:75

Moreover, relapse (vyāvṛtti) of the generation of the resolve to become a buddha is also of two types: a definitive one (ātyantiki) and a temporary one (anātyantiki). Of these two, the definitive one [implies] that the resolve [to become a buddha], having relapsed once, does not arise towards awakening again. The temporary one [implies] that the resolve [to become a buddha], having relapsed,76 arises towards awakening again and again.

In a similar tone, Sthiramati states in the Kāśyapaparivartaṭīkā:77

Its relapse is of two kinds: irreversible and reversible. Of the [two], the irreversible one is one in which bodhicitta does not arise any more once [it] has relapsed. The reversible one is one in which it arises again even after relapsing.

The intellectual-emotional receptivity to the fact that phenomena have no origination (anutpattikadharmakṣāntī)78 shown by bodhisattvas seems to be relevant to the nature of the

---

72 Mantrāvatāravṛtti (P, fol. 231a7; D, fol. 206a4–5; S, vol. 41, p. 559.17–19): gang gi tshe des byang chub kyi sems btang na | de ’t tshe theg pa chen po ’i dam tshig thams cad risa ba nas nyams par brjod par bya’o ||.

73 For example, see the Trisamvaraprabhāmāla (P, fol. 268a1–2; D, fol. 56b1; S, vol. 41, p. 725.9–10):

byang sems nyams na ‘gro ba kun ||
bslus pas gnod pa shin tu mang ||
rgyal dang de sras thams cad dang ||
‘gro ba kun gyis shin tu khrul ||.
See also Bodhicaryāvatāra 4.4–6. For an English translation, see CROSBY & SKILTON 1995: 25.

74 For the four reasons for the relapse of cittotpāda, see the Bodhisattvabhūmi 1.2 (§3.2.0). See also Sāgaramegha’s Bodhisattvabhūmivyākhyā (P, fol. 24a4–5; D, fol. 20b3–4; S, vol. 75, pp. 654.19–655.2).

75 Bodhisattvabhūmi 1.2 (§2.2.0). This is noted also in DAYAL 1932: 62.

76 Cf. the Tibetan translation which has ‘although having relapsed.’

77 Kāśyapaparivartaṭīkā (P, fol. 255b5–6; D, fol. 208a7–b1; S, vol. 67, p. 556.10–12): de ’t ldog pa yang rnam pa gnyis te | rgyun chad pa pa [om. PN] dang rgyun mi ‘chad pa’o || de la rgyun chad pa ni gang lan cig log nas yang mi skye ba’o || rgyun mi ‘chad pa ni gang log kyang yang skye’o ||.

78 For this difficult expression, see the BHSD (s.vv. kṣānti and anutpattikadharmakṣānti), where Edgerton has translated it as ‘intellectual receptivity to truth that states of existence have no origination’ and ‘receptivity to the fact that states-of-being have no origination.’ My impression is that the term kṣānti has connotations not only of
relapse of bodhicitta. There are said to be three kinds of anutpattikadharmaṃśanti, as Mi­pham explains:79

In general, the attainment of three kinds of ksànti, namely, mild (mṛdū), middling (madhya), and great (adhimātra), occurs when one is intellectually and emotionally receptive to the fact that phenomena have no origination (anutpattikadharma). [1] Mild ksànti is the ksànti attained on the path of preparation (prayogamārga) when one is receptive to unborn reality by virtue of [an inference based on] the ‘universal object.’ [2] The middling kind of ksànti is the one [attained] on the path of seeing (darśanamārga), [or] the first bhūmi, [and] is accompanied by a direct realisation of the non-origination of phenomena, and [3] great anutpattikadharmaṃśanti is attained by [the bodhisattva] on the eighth bhūmi by bringing non-conceptual gnosis to complete maturation and by not deviating in any way from the true reality of the primordial non-origination of all phenomena, in either a meditative or post-meditative state. [Those] bodhisattvas who have irreversibly attained ksànti are prophetically destined [to become] buddhas. 81 The eighth bhūmi is designated in particular as the ‘stage of prophecy.’ But there are also cases where, for certain purposes, it has been prophesied that one who abides in the spiritual disposition (gotra) [of a bodhisattva but has not yet generated the resolve to become a buddha] or has just generated his resolve [will become] a buddha. The term anutpattikadharmaṃśanti is explained primarily as intellectual-emotional receptivity to the fact that all phenomena are primordially without origination, for there is no phenomenon separate from the sphere of reality (dharmadhātu).
The three kinds of *anutpattikadharmaṃśanti* can be positioned among the stages of a bodhisattva as follows:

Mi-pham has stated that the textual source for these three kinds of *anutpattikadharmaṃśanti* is the *Samādhirājasūtra*.82

The question is: if even a bodhisattva of the first bhūmi is said to be ‘irreversible,’ how is it that in some Prajñāpāramitā sūtras even a bodhisattva on the eighth bhūmi is said to still run the risk of passing into nirvāṇa prematurely? Does this mean that bodhicitta can relapse even at that stage? For scholars such as Mi-pham, who were well aware of the three kinds of *anutpattikadharmaṃśanti* and the corresponding grades of irreversibility, the statement that a bodhisattva of the eighth bhūmi runs the risk of passing into nirvāṇa prematurely would appear irreconcilable with most Mahāyāna scriptures. Mi-pham himself thus held that the risk of highly advanced bodhisattvas such as those on the eighth bhūmi to relapse into the so-called ‘one-sided cessation’ (zhi ba phyogs gcig pa) was purely hypothetical.83 Mi-pham’s attempt to resolve this contradiction, however, is a doctrinal rather than a historiographical one.

The contradiction, which Mi-pham has attempted to resolve, seems to be a result of mixing two strands of doctrine, each with different historical backgrounds (specifically in regard to the notion of nirvāṇa) and can be explained accordingly. (1) The Mahāyāna sūtra which expresses the potential ‘reversibility’ of the bodhisattva of the eighth bhūmi presupposes a very old concept of nirvāṇa, in which no distinction is made between the nirupadhiśesanirvāṇa (‘nirvāṇa without residue’) of a śrāvakā saint, a pratyekabuddha, and a buddha. According to this presupposition, passing into nirvāṇa would not be seen as a kind of regression into a lower status, for it involves the same kind of nirvāṇa into which the Buddha himself passed. The only disadvantage of a bodhisattva prematurely entering into such a nirupadhiśesanirvāṇa is that he, like the Buddha, can no longer be active and effective thereafter. In short, this tradition presupposes an identical nirvāṇa for a śrāvakā saint, a pratyekabuddha, and a buddha (with the saint becoming ineffective after his death), and

82 *dBu ma rgyan 'grel* (p. 77.2–3): gzhung ‘di ‘dra ba thos shing thos don bsams la | bsam zing bsam pas nges pa rnyed pa’i don la goms par byas na zab mo’i lam la bzod pa rim gvis skye bar ‘gyur te | zla ba sgron me’i mdo las bzod pa gsum gvi skabs su ji skad bshad pa la sogs pa bzhin no ||.

83 For Mi-pham’s detailed discussion of this matter, see his *mDo sdud ‘grel pa* (pp. 139.3–142.5).
presumably either does not know of or recognise the three kinds of \textit{anupattikadharma\textasciitilde i\textit{inti}}. (2) For the tradition that professes the ‘irreversibility’ of the \textit{bodhisattva} of the eighth \textit{bhumi}, Buddhahood is strongly contrasted with the ‘sterile’ \textit{nir\textasciitilde{v}a\textasciitilde{na}} of a \textit{\textasciitilde{s}\textasciitilde{r}\textasciitilde{v}aka} saint or of a \textit{pratyekabuddha}. Given such a presupposition, it is understandable why falling into the ‘sterile’ \textit{nir\textasciitilde{v}a\textasciitilde{na}} would be a regression from the \textit{bodhisattva} path, but in reality this is not possible, because a \textit{bodhisattva} of the eighth \textit{bhumi} is destined to become a \textit{buddha} and remain active and effective by abiding in what one might call the ‘fertile’ \textit{nir\textasciitilde{v}a\textasciitilde{na}} of a \textit{buddha} or a \textit{bodhisattva}. Thus the question as to whether a \textit{bodhisattva} of the eighth \textit{bhumi} indeed runs a real risk of passing into \textit{nir\textasciitilde{v}a\textasciitilde{na}}, and thereby relapsing from his \textit{bodhicitta}, is answered differently by these two strands of thought. According to the former strand, although the risk of passing into \textit{nir\textasciitilde{v}a\textasciitilde{na}} is real for such a \textit{bodhisattva}, his passing into \textit{nir\textasciitilde{v}a\textasciitilde{na}} prematurely would not be considered a regression or relapse from his \textit{bodhicitta}, any more than the \textit{Buddha’s} passing into \textit{nir\textasciitilde{v}a\textasciitilde{na}} can be considered a regression or relapse. According to the latter strand, the answer would depend on how \textit{nir\textasciitilde{v}a\textasciitilde{na}} in this context is understood. If it is understood as the ‘sterile’ \textit{nir\textasciitilde{v}a\textasciitilde{na}}, the risk of passing into such a \textit{nir\textasciitilde{v}a\textasciitilde{na}} is not real, as has been argued by Mi-pham. If \textit{nir\textasciitilde{v}a\textasciitilde{na}} in this context is the ‘fertile’ \textit{nir\textasciitilde{v}a\textasciitilde{na}}, it is by definition not a risk.

7. The Restorability of \textit{Bodhicitta}

The idea and actual practice of confessing misdeeds (\textit{pi\textasciitilde{p}addan\textasciitilde{i}}) in Buddhism, particularly in view of the Buddhist theory of karma, certainly deserve further investigation. Har Dayal’s claims that the practice of confession described by S\textasciitilde{\textasciitilde{a}ntideva} ‘bears witness to the influence of the completely developed Hindu doctrine of \textit{bhakti} (devotion) on Buddhist thought’ and that the ‘ideas of self-reliance and personal retribution are discarded, and the \textit{bodhisattvas} are invoked to save a sinner from evil consequences of his deeds’ seem to provide an inaccurate picture of the \textit{bodhisattva} doctrine and should be reconsidered. It is, however, beyond the scope of this study to discuss these issues.

In Tibet it is said that the good quality of misdeeds is that they can be purified through confession. The stories of Nanda, A\textasciitilde{\textasciitilde{g}}ulima\textasciitilde{\textasciitilde{i}}, Aj\textasciitilde{\textasciitilde{a}t\textasciitilde{\textasciitilde{a}}\textasciitilde{\textasciitilde{a}}\textasciitilde{\textasciitilde{r}}\textasciitilde{\textasciitilde{u}}, and Udayana have often been used for didactic purposes to illustrate that even those who have negligently committed the most heinous deeds are capable of reacquiring their circumspection. Breaking one’s vows is no doubt considered negative, with potential negative consequences. Unlike the \textit{pr\textasciitilde{\textasciitilde{a}timok\textasciitilde{\textasciitilde{s}}}a} vow, however, which is said to be irreparable if damaged, and hence has often been compared to a palm tree or an earthenware vessel (\textit{\textasciitilde{r}\textasciitilde{d\textasciitilde{\textasciitilde{s}}}a be ‘u}), the \textit{bodhisattva} and mantra vows are...
said to be, in principle, restorable. To be sure, bodhicitta has an exclusive role to play. If other parts of the tantric and non-tantric Mahāyāna vows are broken, they can be repaired with the help of bodhicitta. But if bodhicitta itself is lost or damaged, nothing else is able to restore it. In other words, there is no substitute for bodhicitta. Likewise, there are several measures prescribed for the confession and purification of all kinds of misdeeds. Finding an antidote for bad deeds more powerful than bodhicitta is said to be impossible. The fact that broken vows can be restored is, of course, no excuse to break them again and again, for according to Sāntideva doing so would decelerate the attainment of the stages (bhūmi).

8. Retaking and Restoring Bodhicitta

We have already considered the process of restoring the bodhisattva vow according to the Mañjuśrī-Nāgārjuna and Maitreya-Asaṅga traditions. We shall not go into the method of retaking or restoring bodhisattva and mantra vows general but focus only on how bodhicitta is restored by means of bodhicitta. Whether one retakes or merely restores a bodhicitta vow would, of course, depend on whether it has been completely or only partially breached. The loss of bodhicitta cannot be compensated by anything other than the re-assumption of bodhicitta itself; the same is true with regard to restoring impaired bodhicitta.

Here, we shall look at the reviving or restoring of bodhicitta as discussed in the context of the mantra vow. Just as the term 'impair' (nyams pa), as has already been mentioned, is used as a generic term for both 'impairment' and 'loss,' so the term 'restoration' (bskang ba) is employed as a generic term for the following four procedures: (1) confessing (bshags pa) offences committed through carelessness, (2) restoring or reconstituting (bskang zhing gso ba) breached pledges, (3) purifying (sbyang ba) misdeeds (sdig pa), and (4) retaking (slar blang ba) the vows.

It is stated that according to the kriyātantras and yogatantras those who have abandoned bodhicitta and thereby nullified their vow should basically retake the vow.

---

87 See, for example, the Vinayavastu (T, vol. ka, fol. 89b6–7; D, vol. ka, fol. 59b6–7): ‘di lla ste dper na shing ta la’i mgo bcad na sngon por ‘gyur du mi rung la ‘phel zhing rgyas pa dang ‘yangs par ‘gyur du mi rung ba bzhin no ||. See also the mChims chen (p. 378.8–9). Cf. the Sāgaramatipariprachāsaūra (T, fol. 32b7; D, fol. 23a6): shing ta la’i mgo bcad [goad D] pa bzhin du rtsa ba nas chad nas ma ‘ongs pa na ni skye ba’i chos can du ‘gyur ro ||.

88 Kun bzang bla ma’i zhal lung (fols. 217b5–218a2): nyan thos kyis lung la rtsa lung skor gcig byung na rdza be’u chag pa dang ‘dra te slar gso ba’i thabs med par gsungs | byang sdom rin po che’i nyer spya dang chag pa dang ‘dra ste | dper na rin po che’i nyer spya dang na mgar ba mkhas pa la brien nas bcos su yod pa ltar | gezan rkyen dge ba’i bshes gnyen la brien nas gso rung bar gsungs | gsang sngags kyi sdom pa ni rin po che’i nyer spya dang cung zad zhom pa dang ‘dra ste | rang nyid kyis kyang lha sngags ting ‘dzin la brien nas bshags pa byas kyang lhag ma med par dag par gsungs pa yin ||.

89 Bodhicaryāvatārāpanijjē (p. 6.14): na ca sambodhicittāt pratipakṣo mahāyānaparāh sambhavati ||.

90 Bodhicaryāvatāra 4.11: 
- evam āpattibalato bodhicittabalena ca ||
- dolāyamānāḥ sāṃsāre bhūmiprāptāḥ cirāyate ||.

91 Perhaps I should point out LOPEZ 1995, where a rite for restoring bodhisattva and mantra vows according to Tsong-kha-pa’s tradition is discussed. The article also includes (pp. 507–512) a plain translation of the sDom pa gong ma gnyis kyi phyir bcos byed tshul rje ‘i phyag len bzhin bkod pa (TsSB, vol. kha, pp. 917–928).

92 mDo rgyas (A, fol. 265a1–2; B, p. 379.23–24): da ni nyams pa rnam bs kang ba’i cho ga bshad de de yang mdoor bsdu na rnam pa bzhin ‘dus te bshags pa dang | gso ba dang | sbyang ba dang | sdom pa slar blang ba’o ||.
According to the mahāyoga system, the restoration or revival of a mantra vow on the strength (rtsal) of one’s own compassion (karunā) and discriminating insight (prajñā) is particularly noteworthy. In this regard, Rong-zom-pa states:

[Question:] It has been taught that the tantric pledges can be restored by one’s own power. If that is the case, [why is this not discussed here?] Is there not such a method here [in this system]? [Response]: This method has been taught [with the understanding] that [the mantra vow] can be restored if [one is] aware of (lit. ‘imbued with’) the fact that there is [in reality] nothing to restore.

[Question:] What is that [power]? [Response]: It is the power of [one’s] compassion and the power of [one’s] discriminating insight. Of these, the power of [one’s] compassion is as follows: All sentient beings are endowed with the Essence of Awakening (i.e., clearly, the tathāgataagarbha) and are under the protection of those who have generated bodhicitta. Likewise, it is taught that even those who have not accumulated the basic wholesome virtues (kusāla) and those whose [mental] continuum has not matured can attain (lit. ‘become causes of’) release (mokṣa) [from saṃsāra] or good destinations (sugati) [in saṃsāra]. This being the case, I myself have not broken [my] pledge and will protect all sentient beings. In this way, if the great strength of bodhicittotpāda is practised for a long time, [an impaired vow] will be restored. The strength of discriminating insight is as follows: All phenomena are by nature pure. If even those that appear in the form of mere illusion are pure and equal within the configuration (mandala) of an [awakened] body, speech, and mind, what impure sentient being [can] exist? If [this view] is realised and practised for a long time, it is taught that [the impaired vow] will be restored.

This passage makes it clear that the power of one’s compassion and insight, which are two indispensable components of bodhicitta, can reinvigorate broken mantra vows. We shall now consider two points, namely, the four means of confession (bshtags pa) and the five methods of restoration (bskang ba) according to the Kun 'dus rig pa'i mdo, cited by Rong-zom-pa under its alternative title rDo rje bkod pa (*Vajravyūha). In these cases, too, emphasis will be laid on bodhicitta. The four means of confession may be summarised as follows: 95 (1) confessing by means of the continuum of great insight (she rab po'i rgyud) so that the latent tendencies (vāsanā) are cognised as possessing no self-nature, (2) confessing by means of the fire of the great meditative absorption (ting nge 'dzin chen po'i me) so that the latent tendencies are burnt and reduced to nothing, (3) confessing by means of the light rays of bodhicitta (byang chub sems kyi 'od zer) so that all the darkness of the latent tendencies is

See also the mDo rgyas (A, fols. 267b2–268a2; B, pp. 382.22–383.14), where this passage is cited.
The Resolve to Become a Buddha
dispelled and purified, and (4) confessing by means of the water of daring conduct (spyod pa rlabs po che) so that all the latent tendencies are washed clean.

It should be added that the purification of misdeeds by generating bodhicitta is included as one form of daring conduct. The five methods of restoration (bskang ba) are:

1. restoring through the performance of (wholesome) activities (spyad pa'i las kyis bskang ba), for example, recitation of mantras and minor sūtras, building stūpas, rescuing lives (srog gdon pa), and making prostrations,
2. restoring by means of material resources (rdzas kyis bskang ba), for example, by making material offerings to the deities and teachers,
3. restoring on the strength of (having seen) true reality (don gyis bskang ba), for example, realising the freedom from manifoldness of all phenomena; studying, contemplating, and meditating on the profound dharma; sponsoring teaching activities; and copying scriptures and donating them,
4. restoring through meditative concentration (ting nge 'dzin gyis bskang ba)—three kinds of meditative concentration being discussed, namely, the meditative concentration that burns up the latent tendencies (bag chags bskang ba), the meditative concentration that scatters the latent tendencies (bag chags gtor ba'i ting nge 'dzin), and the meditative concentration that washes the latent tendencies clean (bag chags bkru ba'i ting nge 'dzin), and
5. restoring by the method of secret instructions (man ngag gsang ba thabs kyis bskang ba), for example, special meditative practices.

The mDo rgyas goes on to explain the relation between the three vows and the reason why impaired bodhicittavajra cannot be restored by anything else.

It is taught that there are methods of restoration if the three, namely, the vase empowerment (kalaśābhiṣeka) pertaining to body, the secret empowerment (guhyābhiṣeka) pertaining to speech, or the empowerment of the knowledge of insight (prajñānābhiṣeka) pertaining to mind, have been impaired once obtained, but there is no method of purification if the fourth empowerment (caturthābhiṣeka) has been impaired. This is because it has been taught that if the [three] vows, the lower ones rely [for their continuance] on the upper ones successively, while the upper ones secure (lit. ‘hold’) and invigorate (lit. ‘purify’) the lower ones with [their] might. In this way, if the bodhisatva vow is taken on the basis of the prātimokṣa vow, invalidated prātimokṣa vows can be retaken on the basis of the bodhisatva vow. Similarly, up until the mantra vow, upper [vows] are taken successively on the basis of the lower ones, and the latter are allowed to be restored on the strength of the former. However, if the upper ones themselves are broken, they cannot be restored by lower methods. Therefore, if the fourth empowerment, which involves the maintenance of the three vows, the lower ones rely [for their continuance] on the upper ones successively, while the upper ones secure (lit. ‘hold’) and invigorate (lit. ‘purify’) the lower ones with [their] might.

---

96 mDo rgyas (A, fol. 268a2–3; B, p. 383.14–15): de la spyod pa rlabs po ches bkru ba'ang byang chub kyi sens bskyed cing sdig pa sbyong ba dang.

97 Kun 'dus rig pa'i mdo (P, fol. 57a1; D, fol. 58a3–4):
bskang ba'i thabs kyang lnga yod de ||
spyad pa'i las [thubs P] kyis bskang ba dang ||
rdzas dang don dang ting 'dzin dang ||
man ngag gsang ba'i thabs chen no ||

See also the mDo rgyas (A, fol. 268b4–270b4; B, pp. 384.9–386.17).

98 mDo rgyas (A, fol. 270b5–271a4; B, pp. 386.19–387.6): bum pa sku'i dbang dang | gsang ba gsung gi dbang dang | shes rab ye shes thugs kyi dbang gsum thob pa las | nyams par gyur na ni bskang ba'i thabs yod kyi | dbang bzhis pa las nyams na ni dag pa'i thabs med do || shes gsungs te | gang gi phyir sdom pa rnaams ni | mas yar [lar A] rim gyis brten cing | gong ma'i mithus 'dzin cing dag par byed par gsungs te | di litar so sor thar pa'i sdom pa la brten nas | byang chub sems dpa'i sdom pa blangs pa na | so sor thar pa'i sdom pa zhis pa rnaams | byang chub sems dpa'i sdom pa la brten nas slar blang du rung ngo || de bzhin du gsung sngaogs kyi sdom pa'i bar du yang rim gyis 'og ma la brten cing | gong ma blangs pa yin la | gong ma'i mithu la brten cing 'og ma sor [gsor] gzhug ste | gong ma nyid nyams na de la thabs 'og mas ma bskongs [skongs B] so || de bas na dbang bzhis pa ni rdo rje byang chub kyi sens 'dzin pa yin la | gal te de nyid nyams par gyur na | de gso ba'i thabs su gyur pa | gzhan gyis mi nus te | rdo rje rin po che chag pa rtsi gzhan gyis mi 'byor ba bzhin no ||
other means of restoring it can do so, just as, for example, no other adhesive can fasten together broken [pieces of] precious diamond.

Although the relationship between the three vows is not his actual theme, this passage shows Rong-zom-pa’s stance on the issue of the assumption, subsistence, and restoration of the three vows (in the mental continuum of an individual). First, his position on the assumption of the three vows is that the higher vows are taken on the basis of the bodhisattva vow, and it in turn on the basis of the prātimokṣa vows. Second, his position on the continuing validity of the three vows is that the lower vows rely on the upper ones for their security, so to speak; that is, the upper ones provide the lower ones with stability and qualitative enhancement. Third, his position on the restoration of the three vows is that the impaired lower vows can be retaken or otherwise restored on the strength of the upper ones, but not vice versa. And since Rong-zom-pa does not really tell us how impaired bodhicittavajra should be restored, I assume that the vow relating to the fourth empowerment, involving bodhicittavajra, can only be retaken.

9. The Four Strengths

We have already run across the expression ‘four strengths’ (stobs bzhi) in the chapter on the two bodhicittotpāda traditions. The exercise of the four strengths seems to be the most popular method of cleansing oneself of one’s past misdeeds. Its popularity is perhaps due to its supposed effectiveness, for it is maintained that there is no misdeed that cannot be purified through the four strengths. The locus classicus is perhaps the following passage from the Caturdharmakāśūṭra, which is cited in the Śikṣāsamuccaya:

Furthermore, the washing away of misdeeds has been taught in the Caturdharmakāśūṭra, [as follows]: “O Maitreya, a bodhisattva-mahāsattva endowed with four qualities overcomes misdeeds that have been committed and [allowed to] collect. Which four? [The following four]: [1] the proper approach to reproaching [oneself for one’s misdeeds], [2] the proper approach to antidotes, [3] the strength to resist committing transgressions, and [4] the strength [to seek] support. [1] As to these [four], the proper approach to reproaching [oneself for one’s misdeeds] is to feel great repentance for unwholesome deeds wherever they have been perpetrated; [2] the proper approach to antidotes is to make energetic efforts to commit wholesome deeds once unwholesome deeds have been committed; [3] the strength to resist committing transgressions comes from [re]taking a vow of non-action (akaranasamvara); [4] the strength [to seek] support comes from taking refuge in the Buddha, Dharma, and Sangha and from the non-abandonment of bodhicitta. Given the support of the Powerful One, [one] cannot be overpowered by misdeeds. O Maitreya, a bodhisattva-mahāsattva endowed with these four qualities overpowers misdeeds that have been committed and [allowed to] collect.”

Although in the Tibetan sources, each of these four qualities is referred to as a ‘strength’ (stobs: bala), we notice here that only the last two are referred to as pratyāpattibala and

---

100 It is not clear to me what akaranasamvara means.

101 For the Tibetan translation, see the Śikṣāsamuccaya (P, fols. 105b5–106a1; D, fols. 89b7–90a4; S, vol. 64, pp. 1218.18–1219.10). Cf. the English translation in BENDALL & ROUSE 1922: 158–159.
āśrayabala, the first two being called viduṇāṇaṃsaṃmuḍācāra and pratipākaṃsaṃmuḍācāra. In the Tarkajvāla, the above passage from the Caturdharmakasūtra has been cited to make the Mahāyāna case that even the most serious misdeeds can be neutralised. The passage is often quoted in the Tibetan sources. sGam-po-pa, for instance, illustrates each of the four strengths with an example and refers to the stories of Nanda, Aṅgulimāla, Ajātaśatru, and Udayana as, so to speak, historical cases, as follows:

<table>
<thead>
<tr>
<th>Four Strengths</th>
<th>Four Analogies</th>
<th>Cases</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. viduṇāṇaṃsaṃmuḍācāra</td>
<td>Making a plea to a powerful person to be exempted from unpayable debts</td>
<td>Aṅgulimāla</td>
</tr>
<tr>
<td>2. pratipākaṃsaṃmuḍācāra</td>
<td>Washing and perfuming a person after rescuing him from a pit of filth</td>
<td>Udayana</td>
</tr>
<tr>
<td>3. pratyāpattibala</td>
<td>Changing the course of a devastating flood</td>
<td>Nanda</td>
</tr>
<tr>
<td>4. āśrayabala</td>
<td>A culprit clasp (i.e. seeking pardon from) a powerful king or the detoxication or neutralisation of poison through mantras</td>
<td>Ajātaśatru</td>
</tr>
</tbody>
</table>

Furthermore, one of the qualities of bodhicitta that has often been eulogised is its ability to cleanse all misdeeds.

10. Concluding Remarks

Let me recapitulate what has been said in this chapter. Firstly, bodhicitta is seen as something that can be impaired and easily lost. Secondly, impairing or abandoning bodhicitta is considered a serious offence in the context of both the bodhisattva and mantra vows. Thirdly, Mahāyāna Buddhism seems to profess that not only is the impaired or lost bodhicitta restorable, but in fact all offences or misdeeds, regardless of how grave they may be, can be atoned for by timely and proper measures. Fourthly, bodhicitta is said to be capable of mending other broken vows or pledges and purifying other misdeeds, but if bodhicitta itself is lost, there is nothing that can serve as a substitute for it. Thus the one and only way to atone for the loss of bodhicitta is to regain it.

102 Tarkajvāla (P, fol. 201a4–b2; D, fols. 184b4–185a2; S, vol. 58, pp. 448.15–449.9).

For an English translation, see BENDALL & ROUSE 1922: 173. See also Bodhicaryāvatāra 1.6 and the English translation in CROSBY & SKILTON 1995: 5.
Appendix A

A Critical Edition of the Sanskrit Text of *Bodhisattvabhūmi* 1.2

1. Introduction

For the critical edition of the Sanskrit text, I have used two previous editions made by Wogihara (W) and Dutt (D) together with photocopies of a Nepal MS (N) microfilmed by the NGMPP and photographs of the Patna MS (P). Below I shall first describe the extant manuscripts and editions briefly. This will be followed by a short discussion of the stemmatic relationship of the manuscripts to one another. Finally I shall explain the method employed in the critical edition.

(a) Extant Manuscripts, Critical Editions, and Other Related Studies on the *Bodhisattvabhūmi*

In the course of the nineteenth century, numerous Buddhist Sanskrit manuscripts from Nepal found their way to libraries of Asian societies in London and Paris. The collection of such manuscripts from Nepal was initiated and stimulated by Brian Houghton Hodgson (1800–1894), who arrived in Kathmandu as an English resident at the Court of Nepal in the year 1821. This activity of collecting manuscripts was continued by Dr. Daniel Wright, a brother of the Arabist William Wright of Cambridge and a long-time English surgeon to the British Residency at Kathmandu. His collection of manuscripts numbered over four hundred, some of them very old. These manuscripts, which ended up in the Cambridge University Library, were catalogued by Cecil Bendall in 1883. This catalogue brought the manuscripts of the Cambridge collection to the attention of interested scholars, thus lending impetus to the study of various Buddhist Sanskrit texts, the *Bodhisattvabhūmi* being among them.

---

1 I should like to thank Prof. Schmithausen for kindly procuring for me the microfilm of the Nepal manuscript from the Berlin State Library and for lending me his photographs of the Patna manuscript.

2 For bibliographical references to the Hodgson collection of Sanskrit manuscripts, see the appendix in YUYAMA 1992: 16–17.

3 BENDALL 1883.

4 Ernst Windisch (1844–1918) discussed the discovery of the Sanskrit manuscripts from Nepal and the boost it gave to the study of what was then known as ‘northern Buddhism.’ See WINDISCH 1917: 130–131.
Having attracted interest since almost the beginning of Western Indology and modern Buddhist studies, the Bodhisattvabhūmi has been the subject of a number of monographs. Unrai Wogihara (1869–1937), a Japanese Sanskritist then in Strassburg, noticed the title Bodhisattvabhūmi while reading Bendall’s catalogue (MS Add. 1702)\(^5\) in 1904, and in the same year, presuming it to be the Bodhisattvabhūmi from the Yogācārabhūmi collection, went to Cambridge, where he made two transcripts of the palm-leaf manuscript.\(^6\) A short article by him on the ‘northern’ Buddhist terminology in the Bodhisattvabhūmi appeared in 1904.\(^7\) In 1908 he submitted his dissertation (at the University of Strassburg), in which he discussed the Bodhisattvabhūmi in general and some of its lexical terms in particular.\(^8\)

When he was compiling the catalogue, Bendall assumed that no other manuscripts or versions of the Bodhisattvabhūmi existed.\(^9\) However, in 1914, to Wogihara’s surprise, the Japanese scholar Ryōzaburō Sakaki ‘brought home from India’ a paper manuscript of the Bodhisattvabhūmi and deposited it in the Kyoto University (then called the Kyoto Imperial University) Library.\(^10\) Wogihara started editing the

---

\(^5\) BENDALL 1883: 191–196.

\(^6\) See WOGIHARA 1904: 34; WOGIHARA 1908: 2 (preface to his dissertation); WOGIHARA 1930–36: i–iv. Unrai Wogihara, who may be called a pioneer in the study of the Bodhisattvabhūmi, made it possible for other pioneering scholars such as La Vallée Poussin to do work on the same topic. His edition of the Sanskrit text of the Bodhisattvabhūmi, general introduction to it, division of the text, and discussion of its authorship, lexical terms, and the like can still be read with much profit.

\(^7\) WOGIHARA 1904.

\(^8\) The title of Wogihara’s dissertation, as mentioned in LEUMANN 1931: 21, is “Asaṅga’s Bodhisattvabhūmi ein dogmatischer Text der Nordbuddhisten nach dem Unikum von Cambridge im allgemeinen und lexikalisch untersucht (1908).” This dissertation, which he calls ‘my little German dissertation’ (WOGIHARA 1930–36: i), is appended to his edition with an independent pagination running from page 1 to 43. This dissertation consists of two parts: part one (pp. 4–14) is a general discussion of the Bodhisattvabhūmi, and part two (pp. 15–43) is about its lexical terms. The original title of the dissertation does not seem to have been mentioned.

\(^9\) BENDALL 1883: 191: “No other MS or version of the work seems to exist.” Cf. WOGIHARA 1904: 452: “Weil indessen besagte Handschrift in Europa als Unikum gilt...” See also WOGIHARA 1930–36: ii: “All the events as stated above took place in the thirty-third year of Meiji (1904 P. Chr.), when the MS. was still a unique one in the world.” See also the title of Wogihara’s dissertation.

\(^10\) See WOGIHARA 1930–36: ii. The paper manuscript of the Bodhisattvabhūmi (MS K) is identified as having the serial number E 263 in GOSHIMA & NOGUCHI 1983: 20–21. The collection to which it belongs is called the Sakaki Ryōzaburō Collection; see YUYAMA 1992: 13 (no. 24), 14 (no. 28). Confusion reigned in regard to the origin of MS K. For instance, Dutt in the introduction to his edition of the Bodhisattvabhūmi stated that it was ‘procured probably from Nepal’; see DUTT 1966: 3. Ernst Leumann (1859–1931) thought that MS K was brought by Ekai Kawaguchi from Tibet! He gave the following account of the manuscript: “Zurück in Japan hat Wogihara später unter den im Verlauf von Kawaguchi in Tibet erworbenen Handschriften noch ein zweites Exemplar der Bodhisattva-bhūmi gefunden, das freilich auch wieder bedauerlich Lücken aufwies. Aber Wogihara konnte doch den Plan fassen, nunmehr das Werk herauszugeben, um so mehr als er im Tibetischen sich soweit vervollkommnete, daß er die tibetische Übersetzung der Bodhisattva-bhūmi, die lückenos erhalten ist, zur Kontrolle und zur Ergänzung der beiden Sanskrithandschriften (C = Cambridge und K = Kawaguchi) heranziehen konnte”; see LEUMANN 1931: 21–22. Probably the siglum K used by Wogihara to designate the manuscript of the Bodhisattvabhūmi deposited in the Kyoto University Library was falsely associated with the name Kawaguchi. Although there is a Kawaguchi Ekai Collection of manuscripts kept in the Toyo Bunko Oriental Library in Tokyo (KANEKO & MATSUNAMI 1979: 151–191), no Sanskrit manuscript of the Bodhisattvabhūmi brought by Kawaguchi is known of (to me at least). Note that Ernst Leumann’s article, where the description of MSS C and K occurs, was published after his death, and the mistake may be that of the editor(s) rather than the author himself.
Appendix A: A Critical Edition of the Sanskrit Text of Bodhisattvabhūmi 1.2

Bodhisattvabhūmi using the Cambridge and Kyoto manuscripts, comparing them with the sDe-dge edition of the Tibetan translation and with the Chinese translations by Hsüan-tsang and *Dharmakṣema.¹¹ His edition appeared in two parts: part one in 1930 and part two in 1936.¹² Johannes Rahder used one of the two transcripts made by Wogihara in Cambridge for his edition of the Vihārapatāla (Bodhisattvabhūmi 2.4) and the Bhūmipatāla (Bodhisattvabhūmi 3.3).¹³ After the first volume of Wogihara's edition was published, a major portion of the Balagotrapatāla (Bodhisattvabhūmi 1.8) was published again as a specimen by his professor Ernst Leumann.¹⁴

The Indian pañcita Rāhula Sāṅkṛtyāyana (1893–1963)¹⁵ travelled to Tibet in the years 1929/30, 1934, 1936, and 1938. Although he heard about the existence of palm-leaf manuscripts of Sanskrit texts in Tibetan monasteries, he did not find any during his first journey.¹⁶ The following trips, however, yielded many palm-leaf Sanskrit manuscripts, most of them in three Tibetan monasteries situated in gTsang: Sa-skya, Ngor, and Zha-lu. The manuscripts found in Ngor and Zha-lu, though, were originally housed in Sa-skya.¹⁷ Some of his finds he copied down,¹⁸ but most he had photographed.¹⁹ In 1938, during the last of his four visits to Tibet, the manuscripts of the Bodhisattvabhūmi and the Śrāvakabhūmi,²⁰ among many others, were discovered at Zha-lu Monastery.²¹ On his return to India, Sāṅkṛtyāyana wrote a report and made a catalogue of his finds.²² The Bodhisattvabhūmi manuscript appears in the latter as

¹¹ According to Prof. Schmithausen (personal communication), the Chinese name of the translator should rather be reconstructed into Sanskrit as *Dharmakṣema (cf. Hōbōgirin, s.v. dommusen) and not as *Dharmarakṣa, as given by Wogihara. See also DE JONG 1987b: 166, where the name of the translator is given as *Dharmakṣema.

¹² Since the two parts have been now published as one book, it is not clear where the original partition lay. It should be noted that this publication contains several related studies, such as the ‘Synopsis of the Contents of the Bodhisattvabhūmi’ with separate pagination (from 1 to 23) and Wogihara’s dissertation in German, also with separate pagination (from 1 to 43).

¹³ RAHDER 1926.

¹⁴ See LEUMANN 1931. The portion of the text published is basically the same as in Wogihara’s edition (pp. 95–110). There is a difference in the lay-out of the text. A numbered outline has been introduced into it in order to make the structure of the text ‘clearer’ (übersichtlicher). The critical apparatus found in the footnotes in Wogihara’s edition was left out.

¹⁵ For the biography of Sāṅkṛtyāyana, see BANDURSKI 1994: 27, n. 76.

¹⁶ SĀṅKṛTYĀYANA 1935: 21 (part 1).

¹⁸ MUCH 1988: 12.

²⁰ For a recent discussion on the origin and date of the Śrāvakabhūmi manuscript, see DELEANU 2006: 51–72.

²¹ SĀṅKṛTYĀYANA 1938: 21 (part 4).

²² SĀṅKṛTYĀYANA 1938. dGe-'dun-chos-'phel (1903–1951), who accompanied Sāṅkṛtyāyana, also describes the same Śrāvakabhūmi and Bodhisattvabhūmi manuscripts as having been seen by them in Zha-lu Monastery. According to him, the Bodhisattvabhūmi manuscript contained 266 short format (dpe
number forty-one of the Zha-lu corpus (section IX). The negatives of the photographs of the manuscript were deposited in the Bihar Research Society in Patna. The famous Tibetologist Giuseppe Tucci (1894–1984) made many scientific expeditions to India, Nepal, and Tibet in the 1930s and 1940s. During his expedition to Tibet in 1939 he was able to photograph more than 1,500 pages of Indian palm-leaf manuscripts that he discovered in various monasteries in Tibet. He also photographed some of the manuscripts that had already been photographed by Sānkṛtyāyana. One manuscript photographed twice was the Bodhisattvabhūmi. From 1968 to 1971, the Department of Indology and Buddhist Studies of the University of Göttingen was able to make copies from the negative films that were put at the disposal of Kashi Prasad Jayaswal Research Institute in Patna by the Bihar Research Society. This Göttingen collection of Buddhist Sanskrit texts discovered in Tibet by Sūryāśīla was the theme of Frank Bandurski’s M.A. thesis, in which he catalogued and described each manuscript included in the collection. In his catalogue of the Göttingen collection, the Bodhisattvabhūmi bears the catalogue number 28 (Xc 14/29). The original manuscript of the Bodhisattvabhūmi from Zha-lu Monastery, was held for a time in the Central Institute of Nationalities (Zhongyang Minzu Xueyuan) in Beijing, and then brought back to Lhasa in 1993.

thung) folios of good quality (spus legs), with a remark (kha byang) on the cover-leaf: “Offered by Slob-dpon ’Od-zer-seng-ge.” See his gSer gyi thang ma (p. 26.2–4).

23 See SĀNKṛTYĀYNA 1938: 145 (part 4); cf. ROTH 1975/76: 166; see also BANDURSKI 1994: 65.

24 The negatives are kept in the Archives of the Kashi Prasad Jayaswal Research Institute, Museum Buildings, Patna. See ROTH 1975/76: 166, 174. Whether the negatives are of glass or films is discussed by BANDURSKI 1994: 13, n. 15. See also MUCH 1988.

25 For an informative report on the Sanskrit manuscripts and photos of them in Giuseppe Tucci’s collection, see SFERRA 2000.

26 Sferra states that while working on his critical edition of the Hevajratantrapindārthaṭīkā (forthcoming in the Serie Orientale Roma), a clear reading of the manuscript was made possible by comparing the photographic reproductions prepared by Tucci and Sānkṛtyāyana. In certain cases, such as Ratnakaraśānti’s Sāratamā, which is a commentary on the Aṣṭādāhārsikāprajñāpāramitāśūtra, Tucci’s photographs contained more leaves than Sānkṛtyāyana’s (SFERRA 2000: 401).

27 The Bodhisattvabhūmi occurs thrice in the list of items in Giuseppe Tucci’s collection compiled by Francesco Sferra and Claudio Cicuzza (SFERRA 2000: 409–413). The number of negatives specified are 8, 3, and 10 (totalling 21). The list is a provisional one, and the details offered are minimal. A more detailed and accurate list will be published in a forthcoming catalogue and accompanying CD-ROMS; see SFERRA 2000: 410. Sferra does not mention the Bodhisattvabhūmi as a work photographed by both Sānkṛtyāyana and Tucci. However, Zha-lu is given as the location where both Tucci and Sānkṛtyāyana photographed a manuscript of the Bodhisattvabhūmi, which is perhaps enough to conclude that the object was one and the same manuscript. I should like to take this opportunity to thank Prof. Francesco Sferra of the University of Rome for kindly sending me a CD-ROM containing a tentative copy of the Bodhisattvabhūmi manuscript photographed by Tucci. However, as already noted by him (SFERRA 2000: 399, 401), the quality of the photographs is often very poor, and I have not been able to make use of them.

29 BANDURSKI 1994: 64.

In 1966 Nalinaksha Dutt (1893–1973) published a new edition of the *Bodhisattvabhūmi*\(^{32}\) using the photos taken by Sāṅkṛtyāyana at Zha-lu\(^{33}\) (with the help of a copy of the manuscript made by Pañḍita Baldeo Mishra of the Kashi Prasad Jayaswal Research Institute) and Wogihara's edition.\(^{34}\) Gustav Roth published a new edition and an annotated English translation of the beginning of the text in 1975/76, noting a number of wrong readings in Dutt's edition.\(^{35}\) Recently, yet another palm-leaf manuscript of the *Bodhisattvabhūmi* was microfilmed by the Nepal-German Manuscript Preservation Project,\(^{36}\) and thus one more manuscript has been put at our disposal. But again this manuscript is unfortunately incomplete.

The most recent work concerning the *Bodhisattvabhūmi* is that of Mudagamuwe Maithrimurthi. The portion of the *Pūjasevāpramaṇaṇapāṭala* (*Bodhisattvabhūmi* 1.16) dealing with the four immeasurables (*apramāṇa*) has been critically edited, analysed and translated by him. This forms a part of his doctoral dissertation on the study of the history of ideas as it relates to the four immeasurables in Buddhist ethics and spirituality, beginning from earliest Buddhism to early Yogācāra.\(^{37}\) For his edition, Maithrimurthi has used photographic copies of the palm-leaf manuscripts from Patna (P) and Nepal (N) and the two editions of Wogihara (W) and Dutt (D). In addition, he has consulted the Tibetan translation of the *Bodhisattvabhūmi* (Peking and sDe-dge) along with Sāgaramegha's *Bodhisattvabhūmi-vyākhyā*, which is extant only in Tibetan. He did not, however, edit the Tibetan text. He also consulted Hsüan-tsang's Chinese translation.

It should be mentioned here that Edgerton's dictionary is one of a number of important contributions to the lexicography of the *Bodhisattvabhūmi*.\(^{38}\) Another is a Sanskrit-Chinese index of the *Bodhisattvabhūmi* published by Hakuju Ui (1882–1966). Further, in 1996 Koitsu Yokoyama and Takayuki Hirosawa brought out an index (Chinese-Sanskrit-Tibetan) to the *Yogācārabhūmi* including the *Bodhisattvabhūmi*.\(^{39}\) Lastly, there are several other *Bodhisattvabhūmi*-related publications, particularly by Japanese scholars, which cannot be mentioned here.

---

\(^{31}\) According to YONEZAWA 1998: 11, n. 1, these original Sanskrit palm-leaf manuscripts were brought back to Lhasa and are now preserved in the Nor-bu-gling-ka (the Summer Palace of the Dalai Lamas). The Cultural Palace of Nationalities in Beijing possesses microfilms of the original Sanskrit manuscripts. A recent report on the past and future of Sanskrit manuscripts in Tibet appears in STEINKELLNER 2004.

\(^{32}\) DUTT 1966.

\(^{34}\) See my discussion of Dutt's edition in the introduction to the critical edition of the Sanskrit text.

\(^{35}\) See ROTH 1975/76. De Jong made the following comment regarding Dutt's edition: "...Gustav Roth has shown convincingly that Dutt's edition is not to be relied upon" (DE JONG 1987a: 73).

\(^{36}\) See n. 42.

\(^{37}\) MAITHRIMURTHI 1999.

\(^{38}\) It is, however, difficult to know if Edgerton had read the entire text or had mainly used Wogihara's index to his edition (DE JONG 1987b: 164).

\(^{39}\) See YOKOYAMA & HIROSAWA 1996. For a review of this index, see SILK 2001.
The following general description of MSS P, C, and K are to a great extent based on details provided in previous studies, reference to which will be made in the respective footnotes. Note that any further specific observations made on all manuscripts and editions are based only on the Cittotpādaṇḍaṭa. Still, I hope that at least some of the observations I make in the following paragraphs are representative of the manuscripts and editions of the Bodhisattvabhumi as a whole.

(i) The Patna MS

The Patna MS (P) contains 266 leaves measuring 12 x 2 inches, and represents a complete text. The text is written in Kuṭila script with seven lines on each side. There are 30 photo plates reproducing the whole, labelled 1A, 1B up to 15A, 15B. The folio numbers occur on the reverse. Sometimes MS P uses a danda-like stroke at the end of lines, seemingly with a hyphen-like function. It also occasionally manifests some scribal peculiarities—for instance, not combining the consonant of the previous word with the vowel of the following word (e.g. "om uO" instead of the common "omuO"). It generally (but not always) omits avagraha signs, and it does not use the virīma sign at all. It also contains a few corrections made by the scribe. Compared to MS N, it is in much better shape and contains no lacunae, as far as I could judge from the Cittotpādaṇḍaṭa portion.

(ii) The Nepal MS

The Nepal palm-leaf manuscript (N) is written in ornamental Nevāri script and contains 108 folios with five lines each. Numerous folios are missing, among them the first folio and possibly the last series of folios; the text concludes at the end of the third Yogasthāna. The last folio filmed is numbered 174 which means that at least 66 folios are missing. The folios, measuring 56 x 6 centimetres, are riddled with holes, and the margins of several folios have broken off, resulting in damage to numerals. This must have created a good deal of confusion when the manuscript was photographed. The Cittotpādaṇḍaṭa, for instance, begins on folio 6 recto and ends on 10 recto. Folio 8 is missing, another folio belonging to another section (its folio number is missing) being found in its place, that is, between folios 7 and 9, and a further two folios, again belonging to another section (their folio numbers are missing as well), have been inserted between folios 9 and 10. MS N generally (but not always) omits avagraha.

---

40 By a printing mistake, the number of folios is given in Sāṅkṛtyāna 1938: 145 as 226 instead of 266. This was pointed out by Roth 1975/76: 166, 174. The number 266 is confirmed by the report of the discovery of the manuscript written by dGe-'dun-chos-'phel (gSer gyi thang ma, p. 26.2–3). In the unpublished lists of Sanskrit palm-leaf manuscripts kept in Beijing, the number of manuscript leaves is also registered as 266; see Bandurski 1994: 66.

41 For details, see Sāṅkṛtyāna 1938: 145 (part 4); Bandurski 1994: 65.

42 The MS no. 3–681 (buddhadarsana 63), National Archives, Kathmandu, NGMPP-Reel No. A 38/3. The date of filming is given as 22.9.70. This manuscript has a book-cover illustrated with nine Buddha-figures displaying various hand gestures (mudrā).
signs, and often too the *anusvāra* is either missing or indiscernible. Owing to the numerous lacunae, MS N has not been of much value for the critical edition.

(iii) The Cambridge MS

The Cambridge palm-leaf manuscript (C) consists of 144 leaves, the number of lines on them ranging from 6 to 8. The size of the leaves is given by Bendall as 12 x 2 inches. The physical condition of the manuscript is described by him as “imperfect and very shattered at the edges, in particular many of the leaf-numbers being broken off.” In addition, Wogihara noted the occasional illegibility of letters marred by stains. Bendall also remarked that the manuscript, which is written in Nevārī script, is scribed in two different hands and that one hand is more archaic than that of the palm-leaf manuscript of the *Paramesvaratantra* (MS Add. 1049) which dates from 875 C.E. He placed this manuscript of the *Bodhisattvabhūmi* in the ninth century C.E. According to Wogihara, C was written in the eighth or the beginning of the ninth century.

(iv) The Kyoto MS

I have been able to obtain a copy of the microfilm of the Kyoto manuscript of the *Bodhisattvabhūmi* (K) through the library of the Department of the Culture and History of India and Tibet (University of Hamburg). Unlike the other manuscripts, K is written on paper. There are 206 folios, the number of lines being regularly 7. The folios are numbered on the right margin of the *verso* in Devanāgarī numerals, while on the left margin of the same side appears the syllable *bo*, obviously an abbreviation of *Bodhisattvabhūmi*. It seems that the manuscript was provided with a corresponding pagination on the *recto* in Arabic numerals before filming. The colophon of K states that its original was an undated palm-leaf manuscript. Such facts as the absence of the

---

43 Originally, the number of leaves of MS C must have been 151, and thus it now lacks seven leaves; see WOGIHARA 1930–36: ii (preface).

44 BENDALL 1883: 191.

45 See WOGIHARA 1930–36: ii (preface). For a description of MS C, see WOGIHARA 1904: 34.

46 For a discussion of palaeographical features of MS C, see the ‘Palaeographical Introduction’ in BENDALL 1883: xvii–xxxviii.

47 The end of the first hand and the beginning of the second hand of MS C (Add. 1702, leaf no. 19) is reproduced in Plate 1.1; see BENDALL 1883: 191–196.

48 BENDALL 1883: xxxix–l.

49 Har Dayal, who used the Cambridge palm-leaf manuscript of the *Bodhisattvabhūmi* manuscript for his dissertation, also dated it to the ninth century. He gives no explanation for his dating, but he probably relied on Bendall; see DAYAL 1932: 348 (appendix).

50 See WOGIHARA 1908: 6; DE JONG 1987b: 165.

51 I should like to take this opportunity to thank Dr. Felix Erb who, in spite of severe financial constraints faced by the library of the Department, agreed to order the microfilm of the Kyoto manuscript of the *Bodhisattvabhūmi* (K) from Kyoto, Japan, and Achim Beyer for clearing the order in Japan.
beginning portion of the Gotrapātala and the fourth and last Anukramapātala, and the
marking of missing lines and letters with dashes, indicate that the palm-leaf manuscript
upon which K was based was in a poor condition. Wogihara held the original of K to be
older than the original of C. However, he did not venture to estimate the date of MS K.
In de Jong's judgement, MS K is probably a recent copy made in the nineteenth
century. 53 Not being a palaeographer, I am unable to offer any suggestions as to the age
of P and N. MS K seems to be in any case quite recent.

(v) Wogihara's Edition

Wogihara remarked that the manuscripts that he used (C and K) are both incomplete and
abound in clerical errors, which he corrected (wherever possible) on the basis of the
Tibetan translation. Irregular samdhi, though, he left as it stands in the original, except
at the end of a sentence. 54 He took into consideration the Tibetan translation of the sDe­
dge recension and the Chinese translations of Hsüan-tsang and *Dharmakṣema. In cases
of lacunae in his manuscripts, he reconstructed the Sanskrit text based on the Tibetan
and Chinese translations, often successfully. In general, given the quality of the
manuscripts and the amount of work involved, his edition, done with much more care
than Dutt's, is quite reliable.

(vi) Dutt's Edition

As already stated, Dutt used photographs of MS P for his edition. In addition, he used a
copy of the same manuscript made by Paṇḍit Baldeo Mishra of the Kashi Prasad
Jayaswal Research Institute. In this regard the following statement is made by Dutt: 55

I should also thank Paṇḍit Baldeo Mishra of the Institute for preparing a copy from the
photographs, all of which are not legible. As the photographs are not kept in order, the
Paṇḍit's copy also suffered from the same defect. The copy however reduced my labour of
decipherment to a large extent though I had to prepare a fresh copy for the Press.

As is evident from his critical apparatus, Dutt used another version (assigned by him the
siglum J), without, however, identifying it. As most of the variant readings in J recorded
by Dutt in his critical apparatus bear a great deal of similarity with Wogihara's edition,
with the numbers following the siglum J obviously referring to the page numbers in the
latter, J (probably standing for 'Japanese') must be referring to Wogihara's edition,
concerning which Dutt states: 56

On the basis of the Cambridge and Kyoto mss., Prof. U. Wogihara published an edition in
Romanised script. A copy of this work came into my hands when I had nearly completed
the edition of the present ms. I found that the readings of the Cambridge ms. agreed with
those in our ms. The present ms. being almost complete, it filled up the lacuna in
Wogihara's edition.

A careful examination reveals, however, that J is not completely identical with W,
which can perhaps only be explained by assuming inaccurate recording on the part of

52 The colophon of MS K (fol. verso 206.5–6) reads: "[The text] was written after being seen in an old
undated book written on palm leaves in Lāñjana/Rāñjana-akṣaras" (tīlapatreyu lāñjanaśararair lliḥhitam
samvatsararāhite purāṇanapustake drṣṭvā likhitam ||). See also WOGIHARA 1930–1936: ii.
54 See WOGIHARA 1930–36 (no page number), 'General Remarks' in his edition of the Bodhisattvabhūmi.
55 DUTT 1966: 2 (Preface).
56 DUTT 1966: 3 (Introduction).
Dutt. Unlike Wogihara, Dutt seems to have consulted neither the Tibetan nor any Chinese translation.

The observations made by me in regard to Dutt's edition on the basis of my critical edition of the Cittotpādpatāla portion make clear that Dutt’s edition abounds in mistakes and is often imprecise. Several cases demonstrate that he has sometimes misread his manuscript, creating variants that cannot be confirmed. There are many instances where D reads the same as W (only occasionally does Dutt indicate, by using square brackets, that his reading is an emendation) without the variant of P or D being given, although P reads differently. These cases clearly demonstrate that Dutt often did not faithfully record the readings of his manuscript. In various other cases Dutt, while not following any of the readings attested, emended the text without marking the emendation as such. Furthermore, the notes given in his critical apparatus are sometimes ambiguous and thus prone to conflicting interpretations. Since Dutt employs a negative apparatus, one can only assume that in the instances where D reads the same as W, with variants recorded for P but not for D, and vice versa, he is following respectively D against P and the reverse. There is at least one instance where D reads the same as W while recording a variant reading in D as well as in P. In three further cases, D reads the same as W (in one of them he supplies no variant either in P or in D), and in the remaining two he notes a variant in D but not in P, but nevertheless reads against both P and D, which reads the same as W). These cases confirm that Dutt has actually used W without explicitly stating so. It was also de Jong's impression that Dutt adopted some readings from Wogihara's edition even when his own manuscript offered a better reading, and that on the whole Dutt's edition was produced with much less care than Wogihara’s.

(c) Some Observations on the Stemmatic Relationship of the Manuscripts

Given the limited number of manuscripts available and the focus on only a small portion of the text, there is no firm basis for adequately determining the stemmatic relationship of the manuscripts to one another. Nevertheless, I should like to present here some observations based on a statistical evaluation of the different readings of the manuscripts of this particular portion of the text. In general, the readings in P differ from the readings in W (which reflects both C and K). But when C and K differ, P is clearly closer to K. The number of cases in which N shows some similarity to P as opposed to W is approximately equal to the number of cases in which N and W have similar readings as opposed to P (note, however, that we have a number of cases in which P differs from W but where N is lost). Again, when C and K differ, N shows a greater affinity with K. Hence one may generalise that while C and K show a certain similarity as opposed to P, both P and N more closely resemble K than C. One may recall here that the three manuscripts P, N, and K lack the Anukramapātala, which is found only in C. There are, further, no clear indications as to whether the manuscript(s) used by the Tibetan translators is or are in anyway related to any of the present manuscripts, for the Tibetan translation does not predominantly support the readings of any of them. Note, however, that the Tibetan translation includes the Anukramapātala, found also in MS C.

57 The few instances where he gives 'Tib.' in his critical apparatus may have simply involved copying from Wogihara's edition.
58 See also my presentation of the methods employed in my critical edition of the Sanskrit text.
59 de Jong 1987b: 164.
(d) The Methodology and Abbreviations Employed in the Critical Edition of the Sanskrit Text

A positive apparatus has been followed for the critical edition. I have made an attempt to record all variants: Those variants that I regard as significant for textual criticism and for the textual transmission are reproduced in the footnotes (in Roman letters, beginning anew on each page) and the less significant ones in the endnotes (in Arabic numerals that run on). The variants regarded by me as less significant are ones largely palaeographical and stylistic in nature, namely, variants regarding the avagraha sign (often omitted by both P and N), any variation involving the application of anusvara versus one of the nasal letters (including cases where the anusvara is missing or indiscernible, as is often the case in MS N), and variants in punctuation (i.e. the use of *danda*⁶⁰), along with obvious scribal or printing errors.

The numbering of the text in Arabic numerals (e.g. 3.2.0.) is mine and employed to mark the main points. When necessary, passages are partitioned further and numbered in Roman letters within round brackets (e.g. (a)). The page or folio numbers of the manuscripts and editions are given in raised and large angled brackets (e.g. <Pl2r>) where a new page or folio commences. In cases where I thought it unclear which portion of text a particular footnote or endnote refers to, I have used small raised angled brackets (e.g. (ayarp. prathamal;t)) to mark the text in question. In addition to the variant readings in the editions made by Wogihara and Dutt, I have also included all variant readings marked by them in the notes to their editions. These readings are indicated by the siglum of the edition followed by a raised siglum for the manuscript (e.g. WC for Wogihara’s reading of MS C). I also refer to any remark or observation made by Wogihara regarding the Tibetan or Chinese translations. The variants given by Dutt in his critical apparatus are sometimes ambiguous and subject to interpretation. In such cases, I interpreted Dutt’s variants (at times with the help of MS P used by him) and recorded them in my critical apparatus as he had apparently intended, as opposed to how he himself recorded them. When I found it necessary to do so, I provided Dutt’s exact formulation, described its ambiguity, and explained my interpretation. In general, *samādi* rules have been adopted if attested in at least one of the manuscripts or editions. Only in a few cases have I emended the text by applying *samādi* rules. The lacunae in MS N have been marked with *lost in N*. When illegible, in part or in whole, I have used *defaced in N*. In a few cases, I have also recorded the scribal corrections found in MS P using P<sup>ac</sup> to designate the reading before correction, and P<sup>pc</sup> the reading after correction. In cases of uncertainty, I refer to the Tibetan translation in the Sanskrit edition and vice versa.

As stated above, I have made an attempt to record all variants. Some minor variants, though, which seem to be mere stylistic peculiarities have not been noted. These include the omission of the *virāma* sign and the use of the *danda*-like short stroke at the end of a line, both in MS P. Some other scribal peculiarities observed in MS P are no longer visible when transliterated into Roman script. For instance, both *cit tta mu tpa da ya ti* (as in MS P) and the common *cit tta mu tpa da ya ti* are transcribed as *cit tam utpadayati*.

---

⁶⁰ Note that Wogihara used a full stop for *danda* throughout. Hence the variants in W regarding *danda* can be indicated only in cases when these are either omitted or added. Differences in the number of *danda* cannot be determined.
The following abbreviations are used in the critical edition of the Sanskrit text:

- *ante correctum* (ac)
- *addendum* (add)
- *Cambridge MS* (C)
- *Chinese translation by Hsüan-tsang* (Chin)
- *conjecture* (conj)
- *Dutt’s edition* (D)
- *Dutt’s reading of Wogihara’s edition* (D’)
- *Dutt’s reading of the Patna MS indicated in his footnotes* (D^p)
- *emendation* (em)
- *Kyoto MS* (K)
- *Nepal MS* (N)
- *omit* (om)

Appendix A: A Critical Edition of the Sanskrit Text of Bodhisattvabhūmi 1.2

Appendix B

A Critical Edition of the Tibetan Text of *Bodhisattvabhumi 1.2*

1. Introduction

The copying of the bsTan-'gyur was less common than that of the bKa'-gyur (esteemed as the buddhavacana) and was held to result in fewer beneficial resources (punya). Copying the bsTan-'gyur was also an immense and expensive task involving the reproduction of as many as 225 volumes (as in the case of the Golden bsTan-'gyur) in comparison with the approximately one hundred volumes of the bKa'-gyur. As a result, the number of bsTan-'gyur editions transmitted is far smaller than that of the bKa'-gyur. Only five bsTan-'gyur recensions are available to modern scholars today, although other handwritten versions of the bsTan-'gyur are known to have been produced in sNar-thang, Zha-lu, 'Phyong-rgyas, rTse-thang, rGyal-rtse, and elsewhere. We know more about the history of the bKa'-gyur than we do about the history of the bsTan-'gyur, thanks to the work of scholars such as Helmut Eimer. A thorough study of the history of the bsTan-'gyur tradition, however, remains a desideratum. The five bsTan-'gyur recensions available today are:

1. The Peking bsTan-'gyur, completed in 1724.
2. The sDe-dge bsTan-'gyur, completed in 1744.
3. The sNar-thang bsTan-'gyur, completed in 1742.

---

3 For the names of some leading scholars in the field, see SCHOENING 1995: 122–123 and ZIMMERMANN 2002: 164.

5 See SCHOENING 1995: 143 (Blockprint Editions, no. 8). According to the *Bod yig 'bri tshul* (p. 33), the original wood blocks of the Peking bsTan-'gyur are no longer extant.

6 For a brief history of the sDe-dge bsTan-'gyur, see SCHOENING 1995: 142–143 (Blockprint Editions, no. 4) and the *Bod yig 'bri tshul* (p. 29). The original wood blocks of the sDe-dge bsTan-'gyur have survived until this day (*Bod yig 'bri tshul*, pp. 29, 33).
(4) the Co-ne bsTan-'gyur, completed in 1772, and
(5) the Golden bsTan-'gyur of the mid-18th century. Except for the Golden bsTan-'gyur, which is the first and so far only handwritten bsTan-'gyur to become accessible to modern scholars, all other recensions are xylographic editions. Schoening has made an attempt to define the stemmatic tree of the bsTan-'gyur editions. As shown by him, the sDe-dge bsTan-'gyur (which is an edition made by collating four different manuscript versions) and the faithful copy of it that resulted in the Co-ne bsTan-'gyur represent one strand of transmission, and the Peking, sNar-thang, and the Golden copies, all of which derive from the 'Phying-ba sTag-rtse recension, compiled shortly after the death of the Fifth Dalai Lama (reigned 1642–1682), another. Both of these bsTan-'gyur traditions have descended in turn from the Zha-lu bsTan-'gyur (early 14th century). The sDe-dge edition in particular is a critical edition of sorts, and seems to have undergone an unusual degree of editorial scrutiny. This is probably the reason why it offers the smoothest readings from the point of view of Tibetan grammar and syntax, although such readings do not necessarily represent the original (‘correct’) ones in the Tibetan translation.

For my critical edition, I have used all but the sNar-thang edition. The method applied here is basically the same as the one applied in the critical edition of the Sanskrit text. A positive apparatus has been adopted, and the numbers used to segment the text (corresponding to the numbers in the Sanskrit edition and the translation) are mine. The folio numbers of each recension are given in raised angled brackets (for instance, represents folio number 10 recto of the Peking recension). The variants that I hold to have semantic significance have been recorded in the footnotes (in lettered sequence, beginning on each page anew). In addition, the few instances where all Tibetan editions deviate from the Sanskrit text have been noted. Less significant variants such as the use of strokes (shad), orthographic variants that have resulted from

---

7 For a description of the sNar-thang bsTan-'gyur, see SCHOENING 1995: 132, 143 (Blockprint Editions, no. 6). Some of the wood blocks of the sNar-thang bsTan-'gyur are said to have been destroyed during the Cultural Revolution. Later the wood blocks of the missing texts in the sNar-thang bsTan-'gyur were recarved based on extant prints from the original wood blocks. However, some corrections were made in the process. Since the old and new blocks were commingled, it is now difficult to know whether a particular block belongs to the original or to the new blocks, and thus whether a certain reading is original or emended. (I thank Dr. Felix Erb for sharing this information.) Compare the table (re’u mig) in the Bod yig ’bri tshul (p. 33), which merely states ‘[wood] blocks destroyed’ (par ‘jig) as a note to the sNar-thang bsTan-'gyur.

8 See SCHOENING 1995: 142 (Blockprint Editions, no. 3) and the Bod yig ’bri tshul, pp. 27–28. According to the Bod yig ’bri tshul (pp. 28, 33), the original wood blocks of the Co-ne bsTan-'gyur were destroyed during the Cultural Revolution when Co-ne Monastery was burnt down. I have used a photocopy made from the microfilm of the xylographic print of the Co-ne bsTan-'gyur kept in the library of the University of Hamburg (Asien-Afrika-Institut, Abteilung für Kultur und Geschichte Indiens und Tibets).

10 See SCHOENING 1995: 133 (Figure 2: Tentative Tanjur stemma).

12 There is a modern print of the Tibetan Bodhisattvabhumi published together with the Tibetan Udanaavarga by the Mi-rigs-dpe-skrun-khang. See the Byang sa dang tshoms. The editors (dPe skrun gsal bshad, p. 2.12–15) state that they collated the sDe-dge and sNar-thang recensions and, except for serious mistakes, retained all original readings. However, since this edition has no historical and philological value, I have not used it for my critical edition.
abbreviations, obvious scribal errors, and confusion between pa and ba, have been recorded in the endnotes (under Arabic numerals). However, I have not recorded scribal peculiarities (such as the placing of the suffix s below the preceding letter, commonly employed in order to save space) or later scribal or editorial corrections. Likewise, no distinction was made between the common shad and the rin chen spung shad,13 commonly used for the first shad in the line when it occurs after only one syllable.

Some observations may be made on the basis of the Cittotpādāpātala. Although the Peking and the Golden editions belong to the same tradition, their readings are not completely identical. The most notable feature of the Golden edition is its profuse use of orthographic abbreviations (skung yig),14 invariably resulting in simple orthographic variants (e.g. the reading yongsu instead of yongs su). Since the abbreviations were not used consistently throughout, they have been recorded individually. Moreover, the Golden edition abounds in scribal errors or deliberate ‘corrections,’ which are less common in the Peking edition. The Peking version often confuses pa and dpa' (for example, reading sens pa instead of sens dpa' and vice versa). And although the readings of Co-ne agree with the readings of sDe-dge to a great extent, these two editions are by no means identical. Most of the variations in Co-ne, however, seem to have resulted from scribal error rather than deliberate emendation.

The following sigla are used in the critical edition of the Tibetan text:

P Peking (P 5538), Sems tsam, vol. zhi, fols. 8b4–14b1
D sDe-dge (D 4037), Sems tsam, vol. wi, fols. 7a6–12a4
G Golden bsTan-'gyur, Sems tsam, vol. zhi, fols. 10a6–17a2
C Co-ne (Reel nos. 49–50), Sems tsam, vol. wi, fols. 7a7–12a5

Skt. Sanskrit (referring to my critical edition)

13 Lit. ‘the stroke [that looks like] a heap of jewels.’

14 Already noted in SKILLING 1991: 139. dPa'-ris Sangs-rgyas devotes a chapter of his work Bod yig 'bri tshul (pp. 109–132) to orthographic abbreviations (yig ge skung tshul). He comments that the tradition of using abbreviations (skung sro) is archaic, one found already in the Tun-huang documents (p. 109). The benefits of skung yig, he states, are speed and the economy of ink and paper (p. 120). In the case of the Golden bsTan-'gyur, however, the judicious use of gold may have been the primary motive behind the extensive use of abbreviations.

1 This section includes also non-Indian works with Sanskrit titles (e.g. *Mahāvyutpatti*). Works that are said to be of Indian origin but have no Sanskrit titles (e.g. *Drin lan bsab pa'i mdo*) are listed under “Tibetan Sources.”
The Resolve to Become a Buddha

Abuddhabodhaka
Nāgārjuna (ascribed), Abuddhabodhakanāmaparakarana. P 5238; D 3838; S 3065, vol. 57.

Acintyādvaṇyakramopadeśa

Acintyāstava

Ajātaśatrūkṛtyavinodanāsūtra
Āryajātaśatrūkṛtyavinodanānāmamahāyānasūtra. T 223; D 216.

Aksayamatinirdeśasūtra
Āryāksayamatinirdeśanāmamahāyānasūtra. T 167; D 175.

Aksayamatinirdeśaṣṭiṅkā
Vasubandhu (ascribed), Āryāksayamatinirdeśaṣṭiṅkā. P 5495; D 3994; S 3226, vol. 66.

Anantamukhanirāhārāṇāpiṅkīka

Anavataptaśrāgarājapariprakāṣāsūtra
Āryānavataptaśrāgarājapariprakāṣānāmamahāyānasūtra. T 309; D 156.

Aṅgulimālīyasūtra
Āryāṅgulimālīyanāmamahāyānasūtra. T 82; D 213.

Aṣokadattavyākaranāsūtra
Āṣokadattavyākaranānāmamahāyānasūtra. T 11.32; D 76.

Aṣṭamahāsthānacāyaṇaṣṭoṣṭa
Nāgārjuna (ascribed), Aṣṭamahāsthānacāyaṇaṣṭoṣṭa. P 2025; D 1134; S 0026, vol. 1.

Aṣṭāsāhasrikā

Aṣṭasādhisamgraha

Aṭṭayājñānasūtravyākhyaṇa
Prajñāsāmadrā, Aṭṭayājñānasūtravyākhyaṇa. P 5504; D 4003; S 3235, vol. 67.

Bhādhūṭukasūtra
Bhādhūṭukasūtra. T 231; D 297.

Bhadraśrīpikāsūtra
Āryabhadraśrīpikanāmamahāyānasūtra T 34; D 94.

Bhadrapālasūtra

Bhāvanākrama (First)

Bhāvanākrama (Second)
Kamalasila, Bhāvanākrama [2]. In Namdol 1985, pp. 73–117 (Tibetan text), 201–221 (Sanskrit restoration).

Bhāvanākrama (Third)

Bodhicaryāvatāra
